11. Wheel of hose valve within 6 ft. 6 in. of stair landing or of steps within 2 ft.
12. An open or automatic ball drip between the siamese check and siamese.
13. Approved 3 in. x 3 in. siamese, with approved caps.
14. The words "STANDPIPE" cast in the body of the valve, or on metal plates secured to siamese riser, or secured to face of building behind the siamese.
15. The siamese street riser, wall collars and caps painted a Fire Department red.
16. Outlet pressure reducers on all hose outlet valves where the pressure exceeds 50 lbs. per square inch.
17. In factory or other buildings of hazardous use, where the fire lines are not within a protected stair enclosure and may be subjected to fire exposure because of such location, they shall be protected by asbestos covering, wire lath and cement, or terra cotta blocks as described in these rules.
18. Fire lines shall be protected from freezing as specified in these rules.
19. The tank shall be provided with a high and low water electric alarm, except where there is an automatic filling pump installed.
20. The bonnets or caps of all siamese or tank check valves which have been in the fire lines for at least ten years, where practicable, shall be removed and the interior of valve cleaned of all rust or other accumulations. The body of the valve shall then be given a good coat of red lead and linseed oil.

Rule 92. HOSE OUTLET VALVE. Hose outlet valves shall be 2½ in.

A—All hose outlet valves hereafter installed in buildings not exceeding 300 feet in height, or for the uppermost 300 feet in any building, shall conform to the following specifications:

RULES

1. Valves shall have a clear waterway of at least 5 sq. in. in area.
2. They shall show not more than 5 lbs. friction loss for a flow of 300 gallons per minute.
3. They shall close tightly against 300 lbs. hydraulic pressure under normal working conditions.
4. They shall stand a hydrostatic pressure test of 750 lbs. per sq. in. for 30 minutes and not distort.
5. They shall stand the operation of full opening and closing 300 times under 150 lbs. pressure without leaking at stuffing box or seat.
6. They shall not be of cast or malleable iron.
7. Only angle globe valves shall be permitted.

B—Hose outlet valves hereafter installed in buildings exceeding 300 feet in height, except as provided for in Subdivision A, shall show not more than 5 lbs. friction loss for a flow of 300 gallons per minute; they shall close tightly against 500 lbs. hydraulic pressure under normal working conditions; they shall stand a hydrostatic test of 1,250 lbs. per square inch for 30 minutes and not distort; they shall stand the operation of full opening and closing 300 times under 250 lbs. hydraulic pressure without leaking at stuffing box or seat. They shall be of brass or best grade of valve bronze.

Straight-way gate valves may be submitted for test.

All hose outlet valves hereafter installed shall have cast in the body of the valve:

1. The manufacturer's name or trade-mark.
2. The working pressure of the valve.
3. The approval number of the Board of Standards and Appeals.

Not less than 2 approved hose valves shall be delivered to the office of the Board of Standards and Appeals, the weight and other general matter noted, and valves certified. One of the valves shall then be delivered to the office of the Fire Commissioner, with certified specifications.

Rule 93. SPECIFICATIONS. Siamese Connections.

Fire Department siamese connection shall be as herein-after stated in this rule.

1. The body of the siamese may be of cast iron, cast steel, brass or any other suitable metals of sufficient strength to comply with Item 8 of this specification. All movable parts, clappers, swivels and all bolts, washers, nuts, screws and pin bearings and all swivel bearings shall be of non-corrodible metal.

2. Clapper valve seats shall be made of non-corrodible metal and shall be machined to insure a tight seat for clapper valves.

3. Each inlet to siamese shall be provided with a clapper valve machined to a true face. Single clapper siamese connections shall not be permitted.

4. The inside diameter of valve seats shall not be less than the inside diameter of the hose couplings. The area of the waterway beyond the valve seats shall not be less than the combined areas of the waterways through the two valve seats. The area of the waterway of each inlet shall not be reduced by the clapper when in a position of maximum opening.

5. Clappers shall be so hung that when siamese connection is placed in a horizontal position the clappers will be seated.

6. Swivels, attached to the body of the siamese by means of a collar expanded cold or screwed into the body of the siamese, or with other bearing surface extending entirely around the opening and exerting uniform shear, will be approved if giving a strength sufficient to meet Item 8.

7. Clapper valves must of such design and area that a pressure of 100 lbs. per sq. in. on the standpipe side will not prevent their opening when the pressure on the steamer side is 150 lbs. They must be so hung that with a discontinuance of flow into the siamese through that inlet the valve will close, and that it will not close where there is an inward flow and the pressure on the inlet is 5 lbs. or more greater than the standpipe pressure.

8. Siamese connections must stand a hydraulic pressure test of 500 lbs. for 30 minutes under normal working conditions.

9. Clapper valves shall be tight for any pressure on standpipe side up to 300 lbs.

10. Approved caps or plugs must be provided to protect the threads of the inlets.

11. The inlet swivels to siamese connection shall be provided with threads to fit the Fire Department hose.

12. The word "STANDPIPE" shall be cast into the top of the body of the siamese or on wall plate, in 1 in. letters not less than 1/8 of an inch in depth.

13. Where there is a fire boat siamese connection in the same system with a land end siamese connection, clapper valves shall be omitted from the land end siamese.

Saving Clause. All rules and regulations previously adopted and conflicting with these rules are hereby rescinded.

JOHN GUILFOYLE

CHIEF JOHN KENLON

WILLIAM J. O'GORMAN, Secretary

EDWARD V. BARTON, Chief Clerk

OFFICE—Municipal Building, Rooms 1001 to 1015.

TELEPHONE—WORTH 0184.

OFFICE HOURS—9 a. m. to 4 p. m. Saturdays 9 a. m. to 12 noon.

All communications should be addressed to the chairman of the board.

CONTENTS

This issue of the Bulletin contains, in the order given—

Docket.

Call of Clerk's Calendar.

The Trial Calendar.

Notices in Building Zone Cases.

Minutes of Regular Meeting, June 26, 1928, 10 a. m.

Minutes of Regular Meeting, June 26, 1928, 2 p. m.

Rules for Testing Wood.

Reserve Calendar.

Elevator Rules.

Progress Report.

PUBLIC HEARINGS

Tuesdays, at 10 a. m. and 2 p. m.
Special meetings as published in this Bulletin.
Call of Clerk's Calendar, Tuesdays, at 2 p. m.
All hearings are held in Room 1013, Municipal Building, Manhattan.

HOURS FOR CONSULTATION

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

CALL OF CLERK'S CALENDAR

The Clerk's Calendar consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, July 3, 1928, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, July 10, 1928, at 2 o'clock.

The Clerk's Calendar is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

NOTICE TO APPELLANTS AND PETITIONERS

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and disposition of same expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

CALL OF CLERK'S CALENDAR

TUESDAY, JULY 3, 1928, 2 P. M.

Building Zone Cases.

1266-27-BZ.

APPLICANT—Patrick J. Murray, for Gershell Realty Corp., owner.

PREMISES—Northeast corner of Northern boulevard and 196th street, Flushing, Borough of Queens.

APPLICATION, under section 21 of the building zone resolution,

TO PERMIT, partly in a residence district and partly in a business district, the erection and maintenance of a gasoline service station.

1353-27-BZ.

APPLICANT—Edwin M. Bohm, for Ames Transfer Co., owner.

PREMISES—3441-3461 Kingsbridge avenue and 250-258 West 236th street, southwest corner, The Bronx.

APPLICATION, under section 21 of the building zone resolution,

TO PERMIT in a residence district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

18-28-BZ.

APPLICANT—Hamill, Weinberg & Munro, substituted for Cohen & Cohen, for Leo Silver Co., Inc., owner.

PREMISES—1870-1878 East Tremont avenue and 1591-1599 White Plains road, southwest corner, The Bronx.

APPLICATION, under sections 7g and 21 of the building zone resolution,

TO PERMIT in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

73-28-BZ.

APPLICANT—John J. Dunnigan, for The Bernbro Realty Corp., owner.

PREMISES—Northeast corner of Corlear avenue and West 230th street, The Bronx.

APPLICATION, under section 21 of the building zone resolution,

TO PERMIT, partly in a residence district and partly in a business district, the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

124-28-BZ.

APPLICANT—Hamill, Weinberg & Munro, for John R. Lee, owner.

PREMISES—6419-6425 New Utrecht avenue, northeast corner of 65th street, Brooklyn.

APPLICATION, under section 21 of the building zone resolution,

TO PERMIT in a business district the erection and maintenance of a gasoline service station.

146-28-BZ.

APPLICANT—William F. Doyle, for S. S. Kresge Co., lessee for long term, over thirty years.

PREMISES—1416-1420 Kings Highway, south side, 42.42 ft. west of East 15th street, Brooklyn.

APPLICATION, under sections 7c and 21 of the building zone resolution,

TO PERMIT the extension, from a business district into a residence district, of a proposed business building.

CALENDAR

156-28-BZ.

APPLICANT—William F. Doyle, for Hugh Clark, owner.
PREMISES—287-291 Prospect avenue, Brooklyn.

APPLICATION, under sections 7e and 21 of the building zone resolution,

TO PERMIT in a business district the erection and maintenance of a gasoline service station and, also, a garage for the storage of more than five (5) motor vehicles.

159-28-BZ.

APPLICANT—William F. Doyle, for Hyman Chipkin and Meyer Chipkin, owners.

PREMISES—796-804 Park avenue, Brooklyn.

APPLICATION, under sections 6, 7a, 7b, 7e and 21 of the building zone resolution,

TO PERMIT in a business district the erection and maintenance of an extension to a motor vehicle repair shop, also the change of occupancy from a stable for more than five (5) horses to a garage for the storage of more than five (5) motor vehicles.

510-27-BZ.

APPLICANT—McCooley & Conroy, substituted for Philip J. Sinnott, for Alden Terrace Corp., owner.

PREMISES—Southwest corner of Cypress Hills road and Cooper avenue, Ridgewood, Borough of Queens.

APPLICATION, under sections 7g and 21 of the building zone resolution,

TO PERMIT in a business district the erection and maintenance of a gasoline service station (previously denied).

522-28-BZ.

APPLICANT—Victor C. Farrar, for Columbia Riding Club, Inc., owner.

PREMISES—48-68 West 100th street, Manhattan.

APPLICATION, under section 21 of the building zone resolution,

TO PERMIT in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles and a stable for more than five (5) horses.

JULY 3, 1928, 10 A. M.

Appeals from Administrative Orders.

1341-27-A—Foot of Marine street, City Island, The Bronx.

174-28-A—13-21 Park Row and 13 Ann street, Manhattan.

Building Zone Applications.

NOTICE IS HEREBY GIVEN by the board of standards and appeals of a public hearing under the provisions of the building zone resolution, *Tuesday morning, July 3, 1928, at 10 o'clock, in Room 1013, Municipal Building, on the following matters:*

CAL. NO. 120-28-BZ—Application, February 7, 1928, under sections 7c and 21 of the building zone resolution, of A. J. Burns, applicant, on behalf of Homack Construction Corp., owner, to permit in a residence district, extending from a business district, the erection and maintenance of a building for business use on first story and residence use above; premises north side of Lake street (41st avenue), 149 ft. east of Louona avenue (National avenue), southeast corner of Roosevelt avenue (Grand avenue) and Louona avenue (National avenue), Corona, Borough of Queens.

CAL. NO. 98-28-BZ—Application, February 2, 1928, under section 21 of the building zone resolution, of Denis A. Harrington, Jr., applicant, on behalf of Hannah McMonagle, owner, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles; premises 866-874 Rogers avenue, west side, 91 ft. 2 in. north of Snyder avenue, Brooklyn.

CAL. NO. 416-28-BZ—Application, May 2, 1928, under section 21 of the building zone resolution, of Fred F. French Co., applicant, on behalf of Tudor City Seventh Unit, Inc., lessee, for Renoclaf Realty Corp., owner, to permit in a one and one-half times height district, extending from a two times height district, the erection and maintenance of the street wall in excess of the height permitted under the zone resolution; premises 312-324 East 42nd street, south side, 175 ft. east of Second avenue, Manhattan.

CAL. NO. 569-27-BZ—Application, May 20, 1927, under sections 7g and 21 of the building zone resolution, of William F. Doyle, applicant, on behalf of Delaney & Otten Co., Inc., owner, to permit in a business district the erection and maintenance of a gasoline service station (previously denied); premises southeast corner of Fourth avenue and 12th street, Brooklyn.

CAL. NO. 1322-27-BZ—Application, December 21, 1927, under section 21 of the building zone resolution, of Croker National Fire Prevention Engineering Co., applicant, on behalf of Daleson Realty Corp., owner, to permit in a business district the erection and maintenance of a gasoline service station; premises 8100 Jerome avenue, southeast corner of 81st street, Woodhaven, Borough of Queens.

CAL. NO. 1326-27-BZ—Application, December 22, 1927, under section 21 of the building zone resolution, of John J. Dunnigan, applicant, on behalf of John H. Cordes and Amy B. Cordes, owners, to permit in a business district the erection and maintenance of a gasoline service station; premises southeast corner of Boston road and Herring avenue, The Bronx.

CAL. NO. 1327-27-BZ—Application, December 22, 1927, under section 21 of the building zone resolution, of John J. Dunnigan, applicant, on behalf of John Restivo, owner, to permit in a residence district the maintenance of a building occupied in part of the first story as a store and as dwellings above; premises 1421 Needham avenue, north side, 226.20 ft. east of Fish avenue, The Bronx.

CAL. NO. 1329-27-BZ—Application, December 22, 1927, under section 21 of the building zone resolution, of Cohen & Siegel, applicants, on behalf of Jerome-Van Wyck, Inc., owner, to permit in a business district the erection and maintenance of a gaso-

CALENDAR

line service station; premises 137-08 101st avenue and 101-05 Van Wyck boulevard, southeast corner, West Jamaica, Borough of Queens.

CAL. NO. 93-28-BZ—Application, February 1, 1928, under sections 7b and 21 of the building zone resolution, of Robert Gottlieb, applicant, on behalf of Adolph Weg, owner, to permit in a business district, extending from an unrestricted district, the erection and maintenance of a garage for the storage of more than five (5) motor vehicles; premises 3880-3886 Park avenue, east side of Park avenue, 109.72 ft. south of East 172nd street, The Bronx.

CAL. NO. 116-28-BZ—Application, February 7, 1928, under sections 7g and 21 of the building zone resolution, of Edward L. Kelly, applicant, on behalf of Clifbert Realty Corp., owner, to permit in a business district the erection and maintenance of a gasoline service station; premises 865-877 Ralph avenue, Brooklyn.

WILLIAM E. WALSH, *Chairman.*

MINUTES

BOARD OF STANDARDS AND APPEALS

REGULAR MEETING

TUESDAY MORNING, JUNE 26, 1928

Present: Commissioner Connell, Acting Chairman, Commissioners Holland and Guilfoyle and Chief Kenlon.

The minutes of the regular meeting of the board, held Tuesday morning, June 19, 1928, and the minutes of the regular meeting of the board held Tuesday afternoon, June 19, 1928, were approved as printed in the Bulletin, No. 26, Vol. XIII.

APPEALS FROM ADMINISTRATIVE ORDERS

1313-27-A.

APPELLANT—Philip J. Sinnott, for Edlar Realty Corp., owner.

SUBJECT—Appeal from decision of the fire commissioner.

PREMISES AFFECTED—Southeast corner of Sound View avenue and Thieriot avenue, The Bronx.

APPEARANCES—

For Appellant: Philip J. Sinnott and Robert G. Calder.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Laid over to September 11, 1928, at 10 a. m., pending receipt of statement from Board of Education.

96-28-A.

APPELLANT—Goodhue Livingston, for Equitable Trust Co., owner.

SUBJECT—Appeal from order of the superintendent of buildings.

PREMISES AFFECTED—11-23 Broad street, 51-55 Exchange place and 35 Wall street, Manhattan.

APPEARANCES—

For Appellant: Herman E. Horwood and George W. Jacoby.

ACTION OF BOARD—Appeal denied.

THE VOTE TO GRANT—

Affirmative	0
Negative: Acting Chairman Connell, Commissioners Holland and Guilfoyle and Chief Kenlon	4
Absent: Chairman Walsh.....	1

MINUTES

THE RESOLUTION—

(96-28-A)

WHEREAS, Goodhue Livingston, for Equitable Trust Co., owner, filed, February 1, 1928, an appeal from a decision of the superintendent of buildings, affecting premises 35 Wall street, 51-55 Exchange place and 11-23 Broad street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered January 4, 1928 (Violation Order No. 40-1928), reads:

"Number 35 Wall St.; 51-55 Exchange Place; 11-23 Broad St. does not conform to Section 356 of the Building Code in these respects:

"In that of installing wood trim on the ceiling of corridor on first story, contrary to law."

and

WHEREAS, the building is fireproof, thirty-eight stories in height, irregular in shape, having a frontage of 163 ft. 8 in. on Broad street, 28 ft. 2 3/4 in. on Wall street and 151 ft. 1 in. on Exchange place; OCCUPIED: 1st story, bank and stores; upper stories, offices, approximately 65 persons per story; and

WHEREAS, wood trim (approximately 1,660 sq. ft. in area) has been installed on the ceiling of the Broad street corridor on the first story of the building covering the fireproofing of the "T" beams to imitate a beamed ceiling effect; the ceiling between the beams is plaster; and

WHEREAS, appellant contends that this corridor is but one of five entrances to the building and that twenty-two samples of the fireproof chestnut used in the ceiling decoration were tested by the Columbia University laboratories under the supervision of a building department engineer and were officially approved by the bureau of buildings.

Resolved, that the decision of the superintendent of buildings be and it hereby is affirmed, and the appeal be and it hereby is denied.

128-28-A.

APPELLANT—Samuel Rosenblum, for Florabess Realty Co., Inc., owner.

SUBJECT—Appeal from order of the fire commissioner. PREMISES AFFECTED—761 Third avenue, Brooklyn.

APPEARANCES—

For Appellant: Samuel Rosenblum.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Acting Chairman Connell, Commissioners Holland and Guilfoyle and Chief Kenlon

Negative

Absent: Chairman Walsh.....

THE RESOLUTION—

(128-28-A)

WHEREAS, Samuel Rosenblum, for Florabess Realty Co., Inc., owner, filed, February 10, 1928, an appeal from an order of the fire commissioner affecting premises 761 Third avenue, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated January 21, 1928 (Order No. 31749-F), reads:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch with necessary check valves and 2 1/2 inch regulation Fire Department outlets.

"Each outlet to be provided with a sufficient amount of 2 1/2 inch standard hose not exceeding 100 feet and in lengths not greater than 50 feet."

and

WHEREAS, the building, facing on two street fronts, is non-fireproof, the main building being one story (16 ft.) in height (there being a two-story (29 ft.) section at the northerly front), 79 ft. 2 in. by 200 ft. 1 1/2 in. (approximately 15,800 sq. ft.) in area on the first story and 23 ft. 9 in. by 39 ft. 6 in. (approximately 930 sq. ft.) in area

on the second story; subdivided into three sections by fore and aft brick walls with openings therein; the opening in the northerly partition wall (which opening is not in use) being blocked up by wood boards on the north side and having a metal-covered wood door on the other side; the openings in the two other walls being unprotected; OCCUPIED: 1st story, manufacture of machinery and metal goods, 25 persons; 2nd story, office, 1 person; and

WHEREAS, appellant contends that the building is accessible from two street fronts; that it is low in height and subdivided into subsections by brick walls; that the occupancy is not hazardous and that water pails are distributed throughout the premises.

Resolved, that the order of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted on condition that the three openings in the dividing walls shown on the plans filed in the appeal shall be equipped with self-closing, fireproof doors; that no other openings shall be permitted in the two dividing walls; that the building shall not be increased in height, area or dimension, and granted only so long as conditions as to occupancy and use remain substantially unchanged.

112-28-A.

APPELLANT—C. W. Burke, for New York Rapid Transit Corp., lessee.

SUBJECT—Appeal from decision of the fire commissioner. PREMISES AFFECTED—170-194 Avenue X, Brooklyn.

APPEARANCES—

For Appellant: J. A. Boland and C. W. Burke.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Acting Chairman Connell, Commissioners Holland and Guilfoyle and Chief Kenlon

Negative

Absent: Chairman Walsh.....

THE RESOLUTION—

(112-28-A)

WHEREAS, C. W. Burke, for New York Rapid Transit Corp., lessee, filed, February 6, 1928, an appeal from a decision of the fire commissioner, affecting premises 170-194 Avenue X, Borough of Brooklyn; and

WHEREAS, the decision of the fire commissioner, rendered October 25, 1927 (Plan No. 2313-27), reads:

"2. A separate fill pipe must be provided for each fuel oil tank.

"18. Room or rooms in which oil burning devices are installed shall be cut off from the rest of the building by fireproof partitions and such rooms shall have the entrance from the street, court or yard only and shall be ventilated to the outer air."

and

WHEREAS, the premises consist of a large plot (58 acres) with one-story adjoining buildings of steel and brick construction, having interconnecting doorways; OCCUPIED as a repair shop for cars of the New York Rapid Transit Corporation; and

WHEREAS, the appellant claims that a fuel oil burning system has been installed consisting of two 5,250-gallon storage tanks buried outside, connected by piping to eleven burners located in the foundry and blacksmith shop and five burners in the babbitt shop using Grade A fuel oil; as to Item 2, that there are two fill pipes, one for wagon delivery and one for car delivery; both fill pipes lead to controlling valves which may supply oil to one tank, the other tank being entirely cut off; as to Item 18, that the buildings in which the burners are located are of fireproof construction, fireproof doors, and properly ventilated; that due to the large area of the building and nature of the work it would be impractical to cart all repair work out into the street and back again.

MINUTES

Resolved, that the decision of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, as to Item 2 of objections to Plan No. 2313-27, *on condition* that each tank shall be controlled by a valve immediately above the tank, and *granted*, as to Item 18, *on condition* that the room adjoining the room in which the oil burners are installed shall be used solely for the storage of electric car trucks and motors, and that all openings in the dividing wall shall be equipped with self-closing, fire-proof doors and that the fuel oil rules shall be complied with in all other respects.

136-28-A.

APPELLANT—William F. Doyle, for Courtlef Realty Corp., owner.

SUBJECT—Appeal from decision of the fire commissioner.

PREMISES AFFECTED—263-281 Seventh avenue, 165-173 West 25th street, and 158-162 West 26th street, Manhattan.

APPEARANCES—

For Appellant: William T. Doyle.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE RESOLUTION—

(136-28-A)

WHEREAS, William F. Doyle, for Courtlef Realty Corp., owner, filed, February 14, 1928, an appeal from an order of the fire commissioner, affecting premises 263-281 Seventh avenue, 165-173 West 25th street and 158-162 West 26th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated January 16, 1928 (Plan No. 4263), reads:

"1. As plans indicate height of building is in excess of 300 feet provide an intermediate tank for each 300 feet or fraction thereof except where the fraction does not exceed 50 feet, approved outlet reducers may be provided so that the pressure will not exceed 80 lbs. per square inch at any outlet as per rule 35.

"2. Additional outlets with sufficient hose must be installed, where the maximum length (100') of hose permitted at present outlets does not protect the entire floor area as per rule 31."

and

WHEREAS, the building is fireproof, twenty-six stories (302 ft. 8½ in.) in height, having a frontage of 197 ft. 6 in. on Seventh avenue, 115 ft. on West 25th street and 111 ft. 4 in. on West 26th street, an area of approximately 22,000 sq. ft.; OCCUPIED: 1st story, stores; upper stories, offices, showrooms and tenant factories, 280 persons per story; and

WHEREAS, appellant contends that the standpipe system consists of an 18,000-gallon gravity tank, a 5,000-gallon suction tank and a 750-gallons-per-minute fire pump located in the cellar; siamese connections at the street fronts of the building; an 8-inch riser in the main stairway with 100 ft. of hose at the outlet on each story from the basement to the 26th story, inclusive; an 8-inch riser in the fire tower with hose, not exceeding 125 ft. in length at the outlet on each story from the basement to 17th story, inclusive, and 100 ft. of hose at the outlet on each story from the 18th to the 26th stories, inclusive; and

WHEREAS, appellant contends that the height of the building is but slightly in excess of 300 ft.; that the additional 25 ft. of hose plus the hose stream allowance will cover all portions of the floor area; appellant contends, further, that the building will be equipped with an automatic sprinkler system.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, as to Item 1, and *granted*, as to Item 2, *on condition* that the building shall not be increased in height, area or dimension and that the standpipe rules shall be complied with in all other respects.

BUILDING ZONE CASES

47-28-BZ.

APPLICANT—John J. Dunnigan, for Adolph Weg, owner.

SUBJECT—Application (re decision of the superintendent of buildings) under section 21 of the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station.

PREMISES AFFECTED—Northeast intersection of Bailey avenue and Bailey place, The Bronx.

APPEARANCES—

For Applicant: John J. Dunnigan.

For Opposition: J. W. Zior, Louis G. Friess, Mary A. Ventarola and George Abel.

ACTION OF BOARD—Laid over to July 10, 1928, at 10 a. m., for inspection and report by a committee of board.

1339-27-BZ.

APPLICANT—Harry Urquhart, for Israel Rosenblum, owner.

SUBJECT—Application (re decision of the fire commissioner) under section 21 of the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station.

PREMISES AFFECTED—1605-1611 Coney Island avenue, Brooklyn.

APPEARANCES—

For Applicant: D. G. Albert.

For Opposition: Joseph I. Erenstoft, Morris Gerber and Charles Burston.

ACTION OF BOARD—Laid over to July 17, 1928, at 10 a. m., on request of applicant's representative.

1356-27-BZ.

APPLICANT—Alfred J. Boulton, for John A. R. Duntze, owner.

SUBJECT—Application (re decision of the superintendent of buildings) under sections 7c and 21 of the building zone resolution, to permit partly in a business district and partly in a residence district, also extending from an unrestricted district, the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—135-147 East 22nd street, east side of East 22nd street, 275 ft. 6⅞ in. south of Tilden avenue, Brooklyn.

APPEARANCES—

For Applicant: Alfred J. Boulton and Joseph W. O'Donnell.

For Opposition: T. H. Roberts, George F. Bender, H. Eames and Susan Digeso.

ACTION OF BOARD—Laid over to July 27, 1928, at 2 p. m., on request of applicant.

48-28-BZ.

APPLICANT—Schreiber, Collins, Myers and Buchter, for Fort Lee Ferry Garage Co., Inc., owner.

SUBJECT—Application (re decision of the superintendent of buildings) under sections 7g and 21 of the building zone resolution, to permit partly in a business district and partly in a residence district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

MINUTES

PREMISES AFFECTED—228-232 Nagle avenue, Manhattan.

APPEARANCES—

For Applicant: Herman Schrier.

For Opposition: Thomas F. Mullaney, Joseph S. Gilbert, E. Halla and Mrs. A. Malone.

ACTION OF BOARD—Laid over to September 11, 1928, at 10 a. m., on request of applicant's representative.

71-28-BZ.

APPLICANT—Max Handel, owner.

SUBJECT—Application (re decision of the superintendent of buildings) under sections 7e and 21 of the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—285-289 Thatford avenue, east side, 100 ft. south of Dumont avenue, Brooklyn.

APPEARANCES—

For Applicant: Samuel Goldstein.

For Opposition: Max Vrijler, M. Raigman and David A. Diamond.

ACTION OF BOARD—Laid over to September 11, 1928, at 10 a. m., on request of applicant's representative.

97-28-BZ.

APPLICANT—Elizabeth Jackman, owner.

SUBJECT—Application (re decision of the superintendent of buildings) under section 21 of the building zone resolution, to permit in a residence district the erection and maintenance of a chicken slaughter house.

PREMISES AFFECTED—102 Tapscott avenue, west side, 31 ft. 8 5/8 in. south of East 93rd street, Brooklyn.

APPEARANCES—

For Applicant: A. E. Klapper, on application for adjournment, but absent on hearing when case was called.

For Opposition: Nathan Bernstein, J. W. Penny, Nat C. Helman, Alexander A. Doblin and J. P. Coffin.

ACTION OF BOARD—Request to lay over application denied. Motion to dismiss for lack of prosecution on account of no appearance for applicant at the call of the case laid over to July 10, 1928, at 10 a. m., for full vote of board.

THE VOTE TO DISMISS—

Affirmative: Acting Chairman Connell, Commissioner Holland and Chief Kenlon..... 3

ACTION OF BOARD—Application reopened and time extended to obtain permits.

THE VOTE TO REOPEN AND EXTEND TIME—

Affirmative: Acting Chairman Connell, Commissioners Holland and Guilfoyle and Chief Kenlon

Negative 0

Absent: Chairman Walsh..... 1

THE RESOLUTION—

(380-27-BZ)

WHEREAS, Irving Seelig, for S. Dietz, owner, filed, April 11, 1927, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 304-322 Brighton Beach avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, May 31, 1927, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Brighton Beach avenue, East 3rd street and East 4th street are in business districts; and

WHEREAS, the decision of the superintendent of buildings, rendered March 21, 1927 (App. No. 4172-1927), reads:

"Proposition contrary to the Zone Resolution Art. II, Sec. 4(a), Subdivision 15. The erection of a building to be used in part as a public garage for more than five motor vehicles.";

and

WHEREAS, the proposed building is to be of non-fireproof construction, two stories in height, with a frontage of 158 ft. 2 in. and a depth of 112 ft. and 104 ft., irregular; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, applicant filed 62.41 per cent of consents of owners of property deemed affected by the board and was precluded from obtaining 80 per cent because property owners on the north side of Brighton Beach avenue, precluded by restrictive covenants against garage use in their deeds, refuse to subscribe to this proposed variation, and the board considered the project in the nature of a public and local convenience and that to require strict compliance with section 7g, owing to inability to obtain further consents would work an unnecessary hardship in the development of the property; and

WHEREAS, this application was granted by the board at its meeting, May 31, 1927, on certain conditions, and applicant requested a modification of the time limit imposed.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the structure shall not exceed in height a building more than two stories above grade and shall be constructed fireproof throughout; that the gable walls shall be unpierced throughout their entire height and length, other than an emergency exit not exceeding a width of 3 ft. 8 in. to the rear on each gable wall; that the frontage on Brighton Beach avenue, first story, other than two vehicular exits and entrances,

MINUTE

shall be restricted to the use and occupancy of stores, retail shops or mercantile business, for a depth of not less than 25 ft.; that the rear yard requirements shall be complied with at the second story level at the rear of the building; that the front elevation shall be finished in face brick with architectural terra cotta or stone trimmings, substantially in accordance with the design of the front elevation filed in this case; that there shall be no roof signs erected or maintained; that there shall be no advertising display or signs on the gable or rear walls; that any skylights installed shall be glazed with plain glass protected with wire guards above and below; that any gasoline storage equipment installed shall be located within the building and that no portable gasoline tanks shall be operated or maintained on any part of the premises nor on the street in front of same; that all required permits shall be obtained within four months and the work completed within six months from the date of this action—June 26, 1928.

AREA FIXED.

(510-28-BZ)

The chairman read a communication from Philip Freshman, requesting the board to fix the area deemed affected and within which to obtain consents to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles and also the installation of a gasoline service station; premises 15-23 Bay Ridge avenue, Borough of Brooklyn.

The following area was approved by the board:

Both sides of Bay Ridge avenue from Shore road to a point 400 ft. east of premises in question; both sides of Owl's Head Court from Bay Ridge avenue to 68th street; also both sides of 68th street from a point 100 ft. west of Owl's Head Court to a point 100 ft. east of Owl's Head Court.

Adjourned 4.00 p. m.

WILLIAM J. O'GORMAN, *Secretary*.

RULES

RULES FOR THE TESTING OF WOOD

Pursuant to the Provision of Section 356 of Chapter 5 of the Code of Ordinances (Building Code).

(639-27-SR)

Adopted by the Board of Standards and Appeals July 22, 1927. Amended March 16, 1928.

Rule 1. Before any wood may be used for flooring or interior trim where incombustible materials are required under the provisions of section 356 of the Building Code, the superintendent of buildings must be notified promptly upon the delivery at the job of a consignment of such material. One test sample for each 2,000 feet of material will then be selected by a representative of the Bureau of Buildings, marked for identification, and forwarded to the testing laboratory, where, under the supervision of the superintendent of buildings or his representative, the samples shall be subjected to the following tests:

Before making tests of all specimens for testing shall be oven dried at a temperature of 140° F. to a point where there is no further loss of weight due to evaporation of moisture content.

A. SHAVING TEST—A mass of shavings cut fairly thick from the outside and interior of sticks of the treated wood are to be tested separately. These shavings shall be placed to a depth of two inches in a metal vessel twelve inches square, the bottom of which shall consist of a wire screen of ½ inch mesh. The shavings shall be packed down moderately to reduce the air spaces. A Bunsen yellow flame shall then be placed beneath the receptacle so that the flame is in contact with the shavings. After twenty-five seconds the flame shall be removed. The flame at no time should show higher than six inches above the top of the bed of shavings and the shavings should not be consumed in less than five minutes.

B. TIMBER TEST. Two samples ¾ inch by 1½ inches in cross section and twelve inches long shall be

laid side by side across the top of a gas crucible furnace with a pyrometer between them. The specimens shall be subjected to a flame at 1700 deg. Fahrenheit for two minutes, the test pieces shall then be removed, and the time of duration of flame and glow observed. The sticks shall then be cut through the middle at the most burned section and the area of the unburned wood measured with a planimeter. The flame must not persist longer than 15 seconds nor the glow longer than 20 seconds, and, in the case of hard woods, the unburned area should not be less than 55 per cent., nor in the case of soft woods less than 45 per cent.

C. CRIB TEST—Twenty samples are to be prepared, each ½ inch square and 6 inches long. These shall be built up on a ring support to form a crib work five tiers high, four sticks to a tier, making the crib six inches by six inches and approximately 2½ inches high. The crib shall be set six inches above a Bunsen burner to which the crib shall be exposed for a period of one minute at a temperature approximating 1200 deg. Fahrenheit. The flame must not persist more than twenty seconds after the Bunsen burner is removed, nor the glow last more than thirty seconds. The tendency of the flame to spread from stick to stick must also be noted.

Rule 2. All of the above tests shall be at the expense of the owner or contractor or other interested party.

If the tests are satisfactory the entire shipment will be permitted to be taken into the building and used. If not, the entire shipment shall be condemned and must be removed from the premises.

In general, acceptance shall be predicated upon the existence of a complete plant in full working order from which the material is shipped, and each shipment, or, where possible, each piece shall be trade marked in a conspicuous manner so that there may be no doubt as to its identity.

- 304-28-SA—Crocker 2½-Inch Angle Hose Valve, approval of.

Cases listed in the Reserve Calendar are cases upon which action by the board has been deferred pending committee reports, of this board, court or department actions, and will remain thereon until the aforesaid reports, court or departmental actions are consummated. Whereupon the case or cases will be restored to the regular calendar and due notice of the date set for hearing will be mailed to the appellant, applicant or petitioner of record.

RULES

ELEVATOR RULES

RULES FOR THE CONSTRUCTION, MAINTENANCE AND OPERATION OF ELEVATORS,
ADOPTED JULY 30, 1918, BY THE BOARD OF STANDARDS AND APPEALS, EFFECTIVE
AUGUST 26, 1918; REVISED MAY 13, 1919.

Rule 1. Application of Elevator Rules. Every elevator, escalator, freight conveyor or amusement device, within the City of New York, in addition to conforming to all provisions of the labor law, building code or other laws or ordinances, as are applicable thereto, shall comply with the requirements of these rules.

Existing and future installations shall at all times be maintained by the owner in a safe condition and in conformity with the requirements of these rules.

Rule 2. Definitions Relating to Elevators.

(a) The terms "elevator," "passenger elevator," "freight elevator" and "amusement device" shall have the meanings indicated in §560 of the building code.

(b) The term "dumbwaiter" shall apply to such special form of freight elevator, whether power driven or manually operated, the dimensions of which do not exceed nine square feet in horizontal section nor four feet in height.

(c) The term "hand power elevator" shall apply to such forms of passenger or freight elevators which are manually operated and the dimensions of which exceed nine square feet in horizontal section.

(d) The term "sidewalk type elevator" shall apply to such special form of freight elevator, either power driven or manually operated, the platform of which does not exceed fifty (50) square feet in area and is suspended or supported at one or more points on the underside.

(e) The term "escalator" shall apply to a moving continuous inclined stairway or runway designed for elevating or lowering passengers.

(f) The term "freight conveyor" shall apply to a device used for elevating or lowering freight in a vertical or inclined direction on a continuous moving carrier without the services of an operator thereon.

(g) The term "future installations" shall apply to any elevator, machinery or equipment used in connection therewith, installed after these rules become effective.

(h) The term "existing installations" shall apply to any elevator, machinery or equipment used in connection therewith, either already installed, in process of installation, or for which plans are on file with the superintendent of buildings prior to August 26, 1918.

(i) The term "alteration" shall include any essential change to the elevator car, counterweights, rails, machinery, safeties or other equipment or direct motive power; except that any repair work made necessary by the ordinary operation of the elevator shall not be deemed an alteration.

(j) The term "power driven elevator" shall apply to any form of elevator except those operated by hand power, gravity in both directions, or through friction grip on the pull rope.

Rule 3. Permits. The application required by §562, building code, for the installation or alteration of elevators, amusement devices, etc., shall be in triplicate on blanks furnished by the superintendent of buildings, stating the size, manner of construction, speed, capacity, other essentials, and mode of operation of the same, and accompanied by necessary drawings; except that applications for the installation of dumbwaiters, and conveyors or hoists may consist of a notice to the superintendent of buildings that such installation is to be made.

Rule 4. Alterations. In making alterations to existing installations, the parts changed or altered must conform in every respect to the rules governing future installations, and where parts of the elevator are damaged from any cause, the damaged parts must be completely renewed, at the discretion of the superintendent of buildings.

Where hand power elevators are changed to power-driven elevators, they shall conform to every rule governing power-driven elevators, except, that when the rise is not more than thirty-five feet and the capacity is not increased, existing wood guide rails may remain in use. In such conversions the use of a power-driven friction grip device is prohibited when the capacity exceeds 800 pounds.

Rule 5. Change of Classification. In future, no freight elevator shall be used for passenger service, unless such elevator conforms to the rules governing future installations of passenger elevators in so far as they relate to safety equipment, hoist ropes, carrying capacity, car enclosure, including gates and emergency exit, shaft openings and doors, and motive power.

In existing installations where such change of classification is made and the hatchway is unenclosed, a substantial enclosure of lawful partitions extending from floor to ceiling and flush with the hatchway shall be constructed, with all openings protected by proper shaft doors.

Rule 6. Tests of New Elevators. In future installations all elevators shall be tested as follows:

The cars of all power-driven elevators shall be loaded to their maximum carrying capacity and operated up and down the shaft several times to test the lifting capacity of the machinery and the operation of the upper and lower automatic limit devices. The car shall be stopped at various levels in the shaft to test the operation of the machine brake.

The cars of all power-driven elevators having speeds exceeding one hundred (100) feet per minute, and of hand-power elevators with a rise of more than fifteen (15) feet, shall be loaded to their maximum carrying capacity, run to the top landing and made to travel downward beyond normal speed, so as to automatically operate the speed retarder or speed governor and car safety device and the slack rope device when required, and (except for hand-power elevators) to stop the machine. This rule shall not be construed, however, to require safe lift elevators to be tested with safe lift load.

The cars of power-driven elevators having speeds of one hundred (100) feet per minute or less shall be loaded to their maximum carrying capacity, run to the top landing and started down at normal speed. At this speed the governor shall be manually operated to test the action of the safety equipment.

Rule 7. Carrying Capacity. In existing installations the owner, lessee or other person having charge or control of any elevator, except a dumbwaiter, and in future installations the manufacturer of any such elevator, shall cause to be fastened in a conspicuous place in the car of said elevator a metal plate, having suitable letters and figures on same, which shall designate the number of pounds weight which said elevator can safely carry.

Future installations shall be designed to sustain in all their parts a load per square foot of platform area inside the car of not less than the following:

RULES

- (a) 75 pounds for power-driven passenger elevators;
- (b) 50 pounds for power-driven freight elevators having platform areas not exceeding 100 square feet;
- (c) 50 pounds for hand-power passenger elevators.

Rule 8. Rules to be Posted. In the car of every passenger elevator the superintendent of buildings shall cause to be posted and maintained, in a conspicuous place, for the guidance and information of operators and passengers, such of the rules relating to the operation of elevators as he may deem necessary to insure public safety, including the number of passengers that such car may carry at one time.

Rule 9. Full Automatic Push Button Elevators. In future installations full automatic push button elevators must be so designed and equipped that the car, at its rated speed and load, will automatically stop when the car floor is level with or not more than three inches from the designated landing floor.

The car gate and shaft doors shall be equipped with approved devices that will prevent the operation of the car until the car gate is closed and the shaft door is closed and locked. The shaft door shall not be capable of being opened unless the floor of the car is within three inches of the landing. A push button to operate an alarm bell shall be provided in the car, for the purpose of notifying the person in charge of the premises, in case the car becomes stopped in the shaft from any cause. The shaft doors shall be so arranged that they cannot be opened after the car leaves the landing, except in emergency cases, and then only by a special key which must be provided and kept in the possession of the person having charge of the building.

Rule 10. Belt or Chain Drives. In future installations no hoisting machine driven by a chain or belt device from a motor or countershaft shall be used in connection with any passenger elevator.

Rule 11. Shaft Openings. In shafts hereafter constructed for passenger elevators, no more than one opening shall be allowed in each story, and all openings in the several stories shall be located one above the other, except that doors may be located on opposite or adjacent sides in the several stories when the distance from the car operating device to the door lock does not exceed forty-eight inches and can at all times be fully controlled by the elevator operator without leaving the car operating device. Door openings may be located on opposite or on adjacent sides of the shaft in the first or main entrance story and in the top story, provided that the openings in the remaining stories are all on the same side of the shaft, that a satisfactory device is installed preventing the operation of the car while the car gate distant from the operator is open, that an attendant is always present to control the shaft doors located in the first or top stories, and that there are no offsets or recesses on the inside of the shaft walls.

No alteration not in compliance with the above provision shall be made to any existing passenger elevator shaft.

Rule 12. Hoistway Enclosure. In the existing and future installations where no enclosure of solid partitions is required around the hoistway by the provisions of the building code, labor law or these rules, there shall be provided a substantial vertical enclosure extending from the floor for a distance of not less than six (6) feet on the side or sides where there are no openings in the car for loading purposes. On all other sides, gates or doors must be provided. Such enclosure may be constructed of mesh work, grille work or slatted partitions, provided that when mesh work is used it shall be of not less than No. 10 U. S. gauge wire or No. 13 U. S. gauge expanded metal, with mesh not exceeding one and one-half ($1\frac{1}{2}$) inches; when grille

work is used there shall be not more than one and one-half ($1\frac{1}{2}$) inches space between any two members, except that where plain straight bars, not filled in with scroll, are used, there shall be not more than one (1) inch space between members; when wood slats are used they shall be not less than three-eighths ($\frac{3}{8}$) of an inch thick, spaced not more than one (1) inch between slats.

In all cases where existing grille work permitted by law or regulation as a shaft enclosure is altered, such alteration shall be of substantial material and construction, properly braced and carried the full height of openings, with not more than one and one-half inch space between any two members; except that where straight bars, not filled in with scroll work, are used, there shall be not more than one inch between members. Where deemed necessary, existing grille work with spaces exceeding those specified in this rule shall be made safe by suitable screen or wire mesh, or wire glass construction.

Rule 13. Shaft Doors. In existing and future installations all gates or doors leading to any shaft in which power-driven passenger elevators are operated (except full automatic push button elevators) shall be locked, bolted or securely fastened on the shaft side. Such shaft doors or gates shall be closed by the operator before the car is put in motion.

In future installations of passenger elevators, keys for opening the shaft doors or gates from the outside of the shaft, in case of emergency, shall be provided and shall be restricted in use to persons in responsible charge of the building.

In existing and future installations in factory buildings only, the openings in every passenger or freight elevator shaft or hoistway enclosure shall be protected in one of the following manners:

- (a) by properly constructed sliding doors.
- (b) by combination slide and swing doors;
- (c) by hinged or swinging doors equipped with approved devices to insure the shaft doors being closed and locked before the car can start from the landing;
- (d) by hinged or swinging doors, either manually operated or self-closing, with auxiliary gates not less than five (5) feet six (6) inches in height, substantially constructed of wood or metal, with not more than two (2) inches space between any two parallel members, and the bottom of the gate not more than ten (10) inches from the floor, except at the top and bottom landings when the distance from the floor to the bottom of the gate may be increased to give the required head room, and shall close automatically upon the car leaving the landing in either direction; except further that for hand power elevators having the pull rope located in front of the shaft entrance, gates may be two (2) feet six (6) inches in height.

When shaft doors are equipped with electric contacts or other locking devices, an approved emergency release shall be provided on the car within easy reach of the operator.

Rule 14. Car Gates. In existing and future installations, all entrances to the cars of power-driven passenger elevators shall be provided with substantial folding or sliding gates or doors, and where floor tracks are used the same must be kept level with the finished floor surface of the car. All folding gates over three feet wide at the entrance to shaft or car shall have top and bottom braces, spaced not more than eighteen inches on centers when the gates are fully expanded. All car gates shall be closed by the operator before the car is put in motion.

In future installations passenger elevator car gates shall be equipped with an approved device or devices that will prevent the operation of the car while the car gates

RULES

are open, and an approved emergency release shall be provided on the car within easy reach of the operator.

Rule 15. Counterweights. In future installations all counterweights shall have their sections securely bolted together with one or more rods, as determined by the superintendent of buildings. Such rods must pass through all the sub-weights and at least one portion of the frame work. No continuous forged straps shall be permitted.

In existing and future installations where counterweights run in the same shaft as the car, they shall, when at the uppermost position, be protected on all exposed sides the full length of the counterweight with substantial and properly secured shields of iron or steel not less than No. 16 U. S. gauge; except that for plunger or fixed stroke piston hydraulic or traction type elevators no top shield shall be required. Where no compensating chains or ropes are attached to the counterweight, similar shields shall be provided eighteen inches above the bottom of the counterweight runway and extending upwards at least five feet. In existing installations, where the clearance between car and counterweight is not more than one and one-half inches, neither top nor bottom shields shall be required, but in lieu thereof tell-tale metal chains not less than five feet long, spaced not more than six (6) inches on centres from rail to rail, shall be suspended from the bottom of the counterweight.

Rule 16. Speed Governors. All power-driven elevators with a rise of more than fifteen feet not already equipped with a speed governor and safety (except sidewalk type elevators and existing freight elevators in buildings not exceeding five stories in height and direct plunger elevators) shall have at the top of the elevator shaft a governor properly connected to a safety device attached to the underside of the car platform, in such manner that the car will be brought to rest with an easy and gradual stop, or in a distance not greater than nine feet at a speed of seven hundred feet per minute, provided that on elevators having a speed of one hundred feet per minute or less, safeties of the instantaneous type may be used. Every governor operating a car safety shall be set to trip the safety at a speed not exceeding forty per cent. above the rated speed given in the application, but in no case exceeding eight hundred and fifty feet per minute; but this shall not require any governor to trip the safety at a speed less than one hundred and fifty feet per minute. When a speed governor has been set for the rated speed it shall be sealed. When safeties of the instantaneous type are used, a proper flexible means of application must be interposed between the safety and the governor.

Rule 17. Limit Devices. In future installations all power-driven elevators shall have approved limit devices as follows:

(a) for Drum Type Electric Elevators, except sidewalk type elevators with speeds not exceeding seventy-five (75) feet per minute, limit switches on the machine and in the shaft or on the car;

(b) for Traction Type Electric Elevators, limit switches in the shaft or on the car;

(c) for Electric Drum Sidewalk Type Elevators, with speeds not exceeding seventy-five (75) feet per minute, machine automatics will be required, but stopping devices on the operating rope will be accepted in lieu of limit switches in the shaft or on the car;

(d) for Hydraulic Elevators, with speeds not exceeding one hundred and fifty (150) feet per minute, stopping devices on the operating rope;

(e) for Hydraulic Elevators, with speeds exceeding one hundred and fifty (150) feet per minute, limit devices on the machine;

(f) for Lever or Crank-Operated Hydraulic Elevators, limit devices on the machine.

Rule 18. Elevator Brake. In future installations every electric elevator shall be equipped with an electric

or electro-mechanical brake that will bring the car to rest when the car operating device is brought to the stop position or when any of the electric safety devices operate.

When the elevator is driven by a belt from an electric motor, the brake must be arranged to operate should the motor belt break or leave the pulleys.

Rule 19. Operating Device. In future installations every elevator driven by electric power and operated by hand rope, lever, wheel or other non-self-centering device, shall be provided with an approved device preventing the operation of the car, after the interruption of the current, until the operating device has been first returned to the inoperative position, and electric car operating switches shall be self-centering and self-locking in the inoperative position.

Rule 20. Reverse Phase Relays. In future installations every elevator motor operated by polyphase alternating electric current shall be equipped with a reverse phase relay.

Rule 21. Slack Rope Device. In future installations all power-driven elevators, including power-driven sidewalk elevators, operated by drum hoisting machines, shall have approved automatic slack rope devices that will stop the machine if, from any cause, any car hoisting rope or chain attached to the drum becomes slack.

Rule 22. Car Locking Device. No elevator shall be used for the carrying of safes or other material of a greater weight than the normal lifting power of such elevator, unless the machine is provided with special equipment and the car is equipped with an approved locking device which will hold it at any landing, independent of the hoisting ropes while such safe or other material is being loaded or unloaded.

Rule 23. Hand-Power Elevator Safety Devices. In future installations every hand-power elevator (except sidewalk type elevators) with a rise of more than fifteen feet, shall be equipped with an approved safety device that will immediately stop and hold the car with a full load if the rope breaks, and with an approved automatic speed retarder and a hand-operated brake operating in both directions.

Grip hoists and elevators operated by gravity in both directions shall comply with the requirements for hand power elevators.

Rule 24. Escalators. In future, every escalator installed shall be equipped with an approved safety device to prevent any accidental downward reversal and with an approved stopping device.

Rule 25. Car Construction. In future installations the car and car frame of every power-driven elevator and of every hand-power elevator with a rise of more than thirty-five (35) feet shall be of incombustible materials; except that the platform may be of wood covered on the underside with incombustible materials. The car enclosure and flooring may be of hard wood. The car, car frame and enclosure of every hand-power elevator with a rise of thirty-five (35) feet or less may be constructed of wood.

Rule 26. Passenger Car Enclosures. In existing and future installations every passenger elevator car shall be fully enclosed on all sides not used for loading or unloading, and on the top, with substantial construction.

In future installations where grille work is used for the car enclosure, including the top, it shall be constructed with not more than one and one-half inch space between any two members; except that where straight bars not filled in with scroll work are used there shall be not more than one inch space between members. When the clearance between car and counterweight is less than two (2) inches, that part of the car enclosure opposite the counterweight runway shall

RULES

be of solid construction or screened with not more than one-half ($\frac{1}{2}$) inch mesh of not lighter than No. 16 U. S. gauge wire, to a height of not less than six (6) feet six (6) inches.

In existing installations in factory buildings only, where the spaces exceed those specified for future installations, it shall be deemed satisfactory if the grille work is made safe by suitable screen or wire mesh fastened to the car enclosure.

Rule 27. Emergency Exit. In future installations every power-driven passenger elevator car shall have a trap door in the top, of such a size as to afford easy egress for passengers, but not less than sixteen inches in least dimension nor less than four hundred square inches in area. When there is more than one elevator in a shaft and the vertical distance between any two consecutive shaft door openings exceeds thirty (30) feet, there shall be provided in addition to the trap door an emergency side exit to the adjacent car.

In existing installations not already provided with an emergency exit, a trap door as specified for future installations shall be provided; except that when the cross head or car top construction renders it impracticable to provide such trap door, this requirement may be waived by the superintendent of buildings, if egress, in case of emergency, is possible through shaft openings, or to an adjacent car.

Rule 28. Freight Car Enclosure. In existing and future installations in factory buildings only, every freight elevator car shall be enclosed on all sides not used for loading or unloading, with substantial construction, to a height of five (5) feet six (6) inches, or to the cross head, when this is less than five (5) feet six (6) inches above the car platform.

In future installations, where an enclosure of open construction is used, the space between any two parallel members shall not exceed one inch.

Rule 29. Freight Elevator Cover. In existing and future installations in factory buildings only, every freight elevator car shall be provided with a substantial cover or grating constructed of not less than No. 8 U. S. gauge wire or its equivalent in strength, and of a mesh that will reject a one and one-half ($1\frac{1}{2}$) inch diameter ball. Sections of the cover or grating may be arranged to swing upward for handling long material, but such cover or grating shall be closed at all other times. In covers hereafter installed (except where car gates are provided) that part of the cover facing the entrances to the hoistway, extending the full width of the car, shall be hinged on a line not less than eight (8) inches nor more than twelve (12) inches back from the edge of the landing, and the hinged section shall be self-closing.

Rule 30. Space Between Saddles and Car. In future installations there shall be not more than one and one-quarter inch, nor less than three-quarters of an inch space between the floor of the car and the floor saddles, and where the saddles project into the shaft the same shall be properly bevelled on the underside at an angle of not less than sixty degrees to the horizontal.

Rule 31. Lights. In existing and future installations the cars of all elevators shall be properly lighted at all times when in service.

Rule 32. Guide Rails. In future installations, guide rails for both car and counterweights of all elevators (except dumbwaiters, and hand-power elevators with a rise of thirty-five feet or less) shall be of iron or steel. They shall be fastened to the sides of the shaft with wrought or cast iron brackets of such strength and design and so spaced that the guide rails and their fastenings shall be able to safely withstand the application of the safety when stopping a fully loaded car under test. For elevators requiring safeties, the guiding surfaces of the car guides shall be finished smooth and joints shall be tongued and grooved or doweled, and rails shall extend to the level of or above the overhead beams and shall be bottomed on a suitable support.

The weights of steel or iron guide rails shall be not less than given in the following table:

WEIGHT OF GUIDE RAILS PER LINEAL FOOT.

Total Weight of Car and Live Load, or Weight of Counterweight	Weight of Car Guide Rails		Weight of Counterweight Guide Rails	
	With Safeties.	Without Safeties.	With Safeties.	Without Safeties.
0-4000 lbs.....	$7\frac{1}{2}$	$7\frac{1}{2}$	$7\frac{1}{2}$	$6\frac{1}{2}$
4001-15000 ".....	14	14	14	$7\frac{1}{2}$
15001-40000 ".....	30	30	30	$7\frac{1}{2}$

Rule 33. Ropes. In future installations, all elevators (except dumbwaiters) shall have not less than two ropes independently connected to the car and to each set of counterweights. In drum type machines, the lifting and counterweight ropes shall have at least one full turn of the rope on the drum when they have reached the limit of travel. Every rope hereafter used shall have a factor of safety of not less than six for freight elevators, and not less than eight for passenger elevators. The diameter of any hoist or counterweight rope hereafter installed (except for hand-power elevators and sidewalk type elevators) shall be not more than one-fortieth ($\frac{1}{40}$) of the diameter of any sheave or drum over which it passes. All ropes used in the operation of elevators shall be of steel, iron or marlin covered steel. Ropes of other material than metal may be used as hand ropes and brake ropes in hand power elevators or as centering ropes in power driven elevators with hand rope control. Where overhead machines are used, equalizer arms will be permitted on the car and counterweights. Nothing in this rule shall prohibit the use of chains on sidewalk elevators instead of ropes.

Rule 34. Auxiliary Freight Compartments. In future installations no elevator shall be permitted to have attached above, below or on the side of the car a freight compartment or similar device.

In existing installations, entrances to freight compartments shall be protected by folding gates, as required for passenger elevators, and so arranged that the elevator cannot be operated until the gate is closed.

Rule 35. Overhead Gratings. In every elevator shaft (except existing elevator shafts, dumbwaiter shafts or the shafts of sidewalk elevators outside the building line) immediately under the sheaves at the top of the shaft, or when the machine is located at the top of the shaft, at the level of the top of the machine beams, there shall be provided and placed in a substantial grating of iron or steel capable of sustaining not less than seventy-five pounds per square foot. No two members of such grating shall be spaced more than one and one-half inches apart. When such grating does not extend over the entire area of the shaft, the open edges shall be protected by substantial screened railings not less than three feet high. Every such grating shall extend at least two and one-half feet beyond the general contour of the sheaves or machinery. Deflecting sheaves extending below the machine level, or hoist and counterweight sheaves located at the sides of the shaft, shall be protected by gratings or cradles of a construction similar to that required for the gratings. Fireproof floor construction shall be accepted as the equivalent of the gratings.

Nothing in this rule shall prevent the placing of a trap door in such a grating where other suitable access cannot be had.

Any grating hereafter placed in an existing elevator shaft shall conform to the requirements of this rule.

Rule 36. Elevator Pit. In every elevator shaft hereafter constructed (except shafts for dumbwaiters, for sidewalk elevators and for hand-power elevators with a rise of less than thirty-five feet), the distance from the floor saddle of the lowest landing to the bottom of the pit shall not be less than four feet when the speed does not exceed two hundred and fifty feet per minute, not less than

RULES

ive feet when the speed exceeds two hundred and fifty but does not exceed four hundred feet per minute, and not less than six feet when the speed exceeds four hundred feet per minute, and in no case shall there be less than two feet in the clear between the bottom of the pit and the lowest point of the underside of the car floor framing when the car is at the lowest possible position. In the case of power-driven sidewalk type elevators, the clear space between the bottom of the pit and underside of the car floor structure shall be not less than six inches. The pits herein required at the bottom of elevator shafts shall not be used for piping, machinery, or for any purpose not required for the elevator equipment; but this shall not prevent the encroachment upon such pits, in the case of new elevators installed in existing buildings, of the foundations of bearing walls and columns to an extent not exceeding twenty-five per cent. of the area of the pit.

Rule 37. Overhead Clearance for Cars. For all elevator shafts hereafter installed (except shafts for sidewalk type elevators) there shall be provided a sufficient clear space, when the car is at the top landing, to allow a run-by of not less than two feet for elevators having a speed not exceeding one hundred feet per minute, not less than three feet for elevators having a speed exceeding one hundred feet per minute and not exceeding three hundred and fifty feet per minute, and not less than five feet for elevators having a speed exceeding three hundred and fifty feet per minute.

Rule 38. Overhead Clearance for Counterweights. In future installations there shall be provided in all elevator shafts a sufficient clear space when the car has completely compressed the pit buffers to allow of a run-by of the counterweight of not less than two (2) feet for traction and hydraulic type elevators, and not less than three (3) feet for drum type elevators.

Rule 39. Machinery Room. All parts of the elevator machinery for power-driven elevators shall be properly enclosed, and suitable light provided. In buildings hereafter

erected free and safe access must be provided to all parts of the elevator machinery, and there shall be not less than twelve (12) inches clearance at limit stop devices on machine and outboard bearings of motor. In future installations in existing buildings, such clearance shall be provided as deemed necessary by the superintendent of buildings, but need not exceed that specified for buildings hereafter erected. When the machine is located at the bottom of the shaft, it shall be protected with a substantial pit pan.

Rule 40. Speed. The speed of all power-driven elevators shall not exceed seven hundred feet per minute.

Rule 41. Buffers. In future installations for all power-driven elevators (except sidewalk type elevators) there shall be provided substantial spring buffers, pneumatic buffers, or oil buffers for the car and counterweights provided that for the cars and counterweights of all elevators having speeds of more than three hundred and fifty feet per minute, substantial oil buffers shall be installed.

Rule 42. Supporting Beams. Supporting beams hereafter installed for elevator sheaves or machinery (except in dumbwaiter shafts) shall be of iron or steel.

Rule 43. Determination of Questions. When any existing installation for either passenger or freight service is deemed by the Superintendent of Buildings to be in an unsafe or dangerous condition it shall be made safe in such manner as he shall prescribe, and all defective parts necessary of replacement shall conform, in so far as possible, with the rules governing future installations.

Where there are practical difficulties in the way of carrying out the strict letter of the foregoing rules, the Superintendent of Buildings shall have power to vary their provisions so that the spirit of the law shall be observed and public safety secured and substantial justice done, provided that whenever such variations are granted by a superintendent of buildings it shall be indorsed in writing upon the permit over the signature of such superintendent.

RULES

COMMUNITY LAUNDRIES IN BUSINESS DISTRICTS

*Amended Resolution Adopted by the Board of Appeals,
March 16, 1920, Under Cal. No. 549-17-BZ*

WHEREAS, the board of appeals, at its regular meeting, December 16, 1919, unanimously rescinded an opinion incidentally expressed and incorporated in a resolution adopted by the board on May 28, 1917, in acting on Cal. No. 549-17-BZ. This opinion was that a laundry is not a prohibited use in a business district under the building zone resolution. The board unanimously rescinded this expression of opinion, inasmuch as a laundry is a factory within the meaning of the labor law and must be so construed under the building zone resolution in the absence of any definition therein to the contrary.

Resolved, that this shall not be construed to include within the prohibited uses specified under Section 4 of the building zone resolution a community or neighborhood laundry located in the basement or ground floor of a building within a business district and containing not more than eight (8) rotary washing machines with inside cylinders not more than 30 in. in diameter by 30 in. in length over all nor more than two 20 in. extractors, the 20 in. measurement being the diameter of the inside basket, which machines and extractors shall be operated solely by electric power and do not require the installation of steam boiler or plant.

FORMS FOR NOTICES TO PROPERTY OWNERS

If applicants, under the building zone resolution, desire copies of Form 13A, for notices to property owners, such forms are not to be supplied by this office.
The applicant is entitled only to one copy of Form 13A, properly filled out.

If he desires additional copies for his own convenience, in notifying property owners, he can obtain such copies from The O'Connell Press, 176 Park Row, Manhattan, at three cents each, postage to be added if the forms are to be supplied by mail.

WARNING

Notice is hereby given to all petitioners, appellants and applicants, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

First, That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

Second, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

Third, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and of the posting of the calendars on the bulletin board in the

offices of the board and of the further publication of the calendars in the daily press.

Fourth, That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

Fifth, That the business of the board is to dispose of a cases promptly, for the reason that the pendency of a appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of the appellant or petitioner to file necessary data, or by any other method of delay.

Sixth, That no appeal, application or petition will be accepted for filing unless, at the time of filing, all papers, plans and data required by law are supplied, as specified on the blank appeal, application or petition forms.

CONTENTS

This issue of the Bulletin contains, in the order given—

Docket.

Call of Clerk's Calendar.

The Trial Calendar.

Notices in Building Zone Cases.

Minutes of Regular Meeting, July 3, 1928, 10 a. m.

Minutes of Regular Meeting, July 3, 1928, 2 p. m.

Correction.

Smoking in Factories, Rules.

Reserve Calendar.

Second Quarterly Report.

Rules for Testing Wood.

Progress Report.

PUBLIC HEARINGS

Tuesdays, at 10 a. m. and 2 p. m.

Special meetings as published in this Bulletin.

Call of Clerk's Calendar, Tuesdays, at 2 p. m.

All hearings are held in Room 1013, Municipal Building, Manhattan.

HOURS FOR CONSULTATION

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

CALL OF CLERK'S CALENDAR

The *Clerk's Calendar* consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, July 10, 1928, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, July 17, 1928, at 2 o'clock.

The *Clerk's Calendar* is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

NOTICE TO APPELLANTS AND PETITIONERS

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and disposition of same expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

MINUTES

THE RESOLUTION—

(1327-27-BZ)

WHEREAS, John J. Dunnigan, for John Restivo, owner, filed, December 22, 1927, an application, under the building zone resolution, to permit in a residence district the maintenance of a building occupied in part of the first story as a store and as dwellings above; premises 1421 Needham avenue, north side, 226.20 ft. east of Fish avenue, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, July 3, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Needham avenue is in a residence district, Fish avenue is in a residence district and Oakley avenue is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered December 15, 1927 (re Viol. 2161-1924), reads:

"Your letter of October 31, 1927, received in reference to Violation No. 2161 of 1924 pending against premises No. 1421 Needham Avenue, north side, 250' east of Fish Avenue, Bronx.

"The violation must be sustained as our inspector reports that part of the building is being used as a store for business use and the premises are located in a residence district, in which such business use is prohibited."

and

WHEREAS, the existing building is of frame construction, two stories in height, with a frontage of 22 ft. and a depth of 33 ft. 6 in.; to be occupied as a store on the first story and the remainder to be used as dwelling; and

WHEREAS, the board granted a temporary permit for a store on the same street, and the applicant has filed the consents of the owners of a large street frontage affected.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted*, for a temporary period of two years from this date, *on condition* that the store use shall be limited to the ground floor, a space of 14 ft. by 15 ft., at the front of building, on the south side; that there shall be no signs, other than lettering on the front windows of the store, indicating the name and nature of the business conducted on the premises, and that the use shall be limited to the conduct of a stationery and candy business store only.

416-28-BZ.

APPLICANT—Fred F. French Co., for Tudor City Seventh Unit, Inc., lessee, for Renoclaf Realty Corp., owner.

SUBJECT—Application (re decision of superintendent of buildings) under section 21 of the building zone resolution, to permit in a one and one-half times height district, extending from a two times height district, the erection and maintenance of the street wall in excess of the height permitted under the zone resolution.

PREMISES AFFECTED—312-324 East 42nd street, south side, 175 ft. east of Second avenue, Manhattan.

APPEARANCES—

For Applicant: Fred J. Flynn.

For Opposition: Edward H. Daly.

ACTION OF BOARD—Application granted on condition.

THE VOTE—

Affirmative: Acting Chairman Connell, Commissioners Holland and Guilfoyle and Deputy Chief Martin..... 4

Negative 0

Absent: Chairman Walsh..... 1

THE RESOLUTION—

(416-28-BZ)

WHEREAS, Fred F. French Co., for Renoclaf Realty Corp., owner, filed, May 2, 1928, an application, under the building

zone resolution, to permit in a one and one-half times height district, extending from a two times height district, the erection and maintenance of the street walls of a building in excess of the height permitted under the building zone resolution; premises 312-324 East 42nd street, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, July 3, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the district maps accompanying the building zone resolution show that the area on the east side of a north and south line located 400 ft. west of First avenue is in a two times height district and the area on the west side of same line is in a one and one-half times height district; and

WHEREAS, the decision of the superintendent of buildings, rendered April 9, 1928 (re N. B. App. No. 150-28), reads:

"5. Height is excessive. Art. 3 of Building Zone Resolution."

and

WHEREAS, the proposed building is to be of fireproof construction, thirty-two stories in height, with a frontage of 116 ft. 8 in. and a depth of 76 ft. $\frac{3}{4}$ in.; to be occupied as an apartment hotel; it is proposed to build the street walls to a uniform height of 200 ft. without a setback, above this point, setbacks to conform with the two times height regulations, except the street wall of the tower at 26th, 27th, 28th, 29th and 30th stories, shown by hatched lines on front elevation. The proposed building is located 75 ft. in the one and one-half times district and 41 ft. 8 in. in the two times district; under the zone resolution the 75 ft. of street wall in the one and one-half times district may be erected 150 ft. without a setback with an additional height on 60 per cent of the wall under the dormer provision; and

WHEREAS, 41 ft. 8 in. of the property under appeal is in a two times district and the westerly 75 ft. of the property is in a one and one-half times district, and the board deemed that there would be hardship in confining the street wall to the lesser height.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted*, to allow the application of the two times height district regulations for the entire building under appeal and, as to the location of the tower, permitting the northerly face of the tower to come within 58 ft. 6 in. southerly from the center of 42nd street, *on condition* that the building zone regulations shall be complied with in all other respects.

93-28-BZ.

APPLICANT—Robert Gottlieb, for Adolph Weg, owner.

SUBJECT—Application (re decision of superintendent of buildings) under sections 7b and 21 of the building zone resolution, to permit in a business district, extending from an unrestricted district, the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—3880-3886 Park avenue, east side, 109.72 ft. south of East 172nd street, The Bronx.

APPEARANCES—

For Applicant: Robert Gottlieb.

For Opposition: None.

ACTION OF BOARD—Application granted on condition.

Absent: Chairman Walsh..... 1

MINUTES

THE RESOLUTION—

(93-28-BZ)

WHEREAS, Robert Gottlieb, for Adolph Weg, owner, filed, February 1, 1928, an application, under the building zone resolution, to permit in a business district, extending from an unrestricted district, the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 3880-3886 Park avenue, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, July 3, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Park avenue is in an unrestricted district; Washington avenue is in a business district and East 172nd street is in a business and unrestricted district; and

WHEREAS, the decision of the superintendent of buildings, rendered May 23, 1928 (re App. N. B. 82-1928), reads:

"1. Proposed extension of public garage located in unrestricted district into business district contrary to Section 4 of the Building Zone Resolution.";

and

WHEREAS, the proposed building is to be of non-fireproof construction, one story in height, with a frontage of 75 ft. and a depth of 150 ft.; to be occupied as a garage for more than five motor vehicles, the rear portion extending approximately 5 ft. into the business district at the rear; and

WHEREAS, the board deemed that applicant substantiated his basis of appeal under section 7b in that the use district boundary line divides the plot within the one ownership; that applicant was entitled to relief under section 21 on the grounds of practical difficulty and unnecessary hardship.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the entire rear wall and the southerly gable wall in business district shall be unpierced throughout its entire height and length, and that the building zone resolution shall be complied with in all other respects.

CASES DISMISSED.

Appeals from Administrative Orders.

The chairman called attention to the following cases, where notices of intention to appeal were offered for filing; but where, despite notices from this office, papers have not been completed, thus tying the hands of the administrative official in the performance of his duty:

(14-28-A)

Filed January 7, 1928—Premises 4022 98th street, Corona, Borough of Queens. Appeal from order of the fire commissioner. Appellant: Alexander Oil Burner Corp. Dismissed for lack of prosecution.

(86-28-A)

Filed January 30, 1928—Premises 250 Greenpoint avenue, Borough of Brooklyn. Appeal from order of the fire commissioner. Appellant: Gustave Erda. Dismissed for lack of prosecution.

(87-28-A)

Filed January 30, 1928—Premises 226-228 Newell street Borough of Brooklyn. Appeal from order of the fire commissioner. Appellant: Gustave Erda. Dismissed for lack of prosecution.

THE VOTE TO DISMISS—

Affirmative: Acting Chairman Connell, Commissioners Guilfoyle and Holland and Deputy Chief Martin.....

Negative

Absent: Chairman Walsh.....

THE RESOLUTION—

WHEREAS, the foregoing appellants have filed appeals with the board of standards and appeals from orders and decisions of administrative officials affecting the premises in question; and

WHEREAS, the appellants have failed to complete their papers, though duly notified to do so.

Resolved, that the foregoing appeals be and they hereby are *dismissed* for lack of prosecution.

Under the Building Zone Resolution.

The chairman called attention to the following cases where notices of intention to appeal were offered for filing but where, despite notices from this office papers have not been completed, thus tying the hands of the administrative official in the performance of his duty:

(23-28-BZ)

Filed January 11, 1928—Premises 502-506 Kings Highway Borough of Brooklyn. Decision of superintendent of buildings. Applicant: Felix J. Wasselle. Dismissed for lack of prosecution.

(38-28-BZ)

Filed January 16, 1928—Premises 192-208 East 98th street Borough of Brooklyn. Decision of superintendent of buildings. Applicant: Philip J. Sinnott. Dismissed for lack of prosecution.

(74-28-BZ)

Filed January 26, 1928—Premises 45-76, 45-78, 45-80 164th street (24th street), Flushing, Borough of Queens. Decision of superintendent of buildings. Applicant: Fox, Weller & Wintner. Dismissed for lack of prosecution.

THE VOTE TO DISMISS—

Affirmative: Acting Chairman Connell, Commissioners Guilfoyle and Holland and Deputy Chief Martin.....

Negative

Absent: Chairman Walsh.....

THE RESOLUTION—

WHEREAS, the foregoing applicants have filed with the board of standards and appeals applications under the building zone resolution, affecting the premises in question; and

WHEREAS, the applicants have failed to complete their papers, though duly notified to do so.

Resolved, that the applications be and they hereby are *dismissed* for lack of prosecution.

MINUTES

THE VOTE TO GRANT—

Affirmative	0
Negative: Acting Chairman Connell, Commissioners Holland and Guilfoyle and Deputy Chief Martin.....	4
Absent: Chairman Walsh.....	1

THE RESOLUTION—

(111-28-S)

WHEREAS, Dunbar Pattern Co., lessee, filed, February 6, 1928, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 23-25 Lafayette street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated March 22, 1927 (Order No. 11019-LD), reads:

"1. Remove all partitions not built of incombustible material as per Sections 263 and 270 of the Labor Law.";

and

WHEREAS, the building is fireproof, eight stories in height, 125 ft. by 100 ft. in area; OCCUPIED: 1st story, stores, 12 persons; 2nd story, manufacture of lighting fixtures, 50 persons; 3rd story, printing and metal spinning, 25 persons; 4th story, manufacture of brassiers, 75 persons; 5th story, knitting mill, 40 persons; 6th story, printing and pattern making, 60 persons; 7th story, manufacture of shoes, 75 persons; 8th story, manufacture of dental products, 12 persons; EQUIPPED with a sprinkler system and a standpipe system; EXITS: two interior fireproof stairways, extending from the first story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, the petitioner, occupant of sixth story, west side, claims that the partitions in question are constructed of rock plaster boards on wood studs, extending from the concrete floor to the concrete ceiling, separating the offices from the factory area; that business has been conducted eighteen months with these partitions without any hazard arising from the same.

Resolved, that the order of the fire commissioner be and it hereby is *affirmed*, and the petition be and it hereby is *denied*.

173-28-S.

PETITIONER—John J. Gilmartin, for Coleman Holding Corp., owner.

SUBJECT—Variation of the labor law as cited in order of fire commissioner.

PREMISES AFFECTED—114-116 East 25th street, Manhattan.

APPEARANCES—

For Petitioner: John J. Gilmartin.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition denied.

THE VOTE TO GRANT—

Affirmative	0
Negative: Acting Chairman Connell, Commissioners Holland and Guilfoyle and Deputy Chief Martin.....	4
Absent: Chairman Walsh.....	1

THE RESOLUTION—

(173-28-S)

WHEREAS, John J. Gilmartin, for Coleman Holding Corp., owner, filed, February 28, 1928, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 114-116 East 25th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated May 25, 1927 (Order No. 21652-LD), reads:

"1. Remove all partitions not built of incombustible material as per Sections 263 and 270 of the Labor Law.";

and

WHEREAS, the building is fireproof, twelve stories in height, 42 ft. by 95 ft. in area at first story and 42 ft. by

85 ft. in area above; OCCUPIED: 1st story, offices, 30 persons; 2nd story, offices and stockroom, 5 persons; 3rd story, vacant at present; 4th story, storage of perfumes, 2 persons; 5th story, office and stockroom, 5 persons; 6th story, vacant at present; 7th story, office and stockroom, 15 persons; 8th story, office and stockroom, 10 persons; 9th story, manufacture of perfumes, 30 persons; 10th story, manufacture of lamp shades, 30 persons; 11th story, office and stockroom, 10 persons; 12th story, office and stockroom, 10 persons; EQUIPPED with a sprinkler system and a fire alarm signal system; EXITS: two interior fireproof stairways, extending from the first story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, partitions 7 ft. high and constructed of wood and glass have been erected on the first, fifth, seventh, eleventh and twelfth stories of the building; and

WHEREAS, the petitioner contends that the only manufacturing done on the premises is on the ninth and tenth stories; proposes to remove the partitions on these stories and requests the acceptance of the existing partitions on the other stories.

Resolved, that the order of the fire commissioner be and it hereby is *affirmed*, and the petition be and it hereby is *denied*.

191-28-S.

PETITIONER—William F. Doyle, for George M. Adrian & Co., Inc., owner.

SUBJECT—Variation of the labor law as cited in decision of health commissioner.

PREMISES AFFECTED—240 East 28th street, Manhattan.

APPEARANCES—

For Petitioner: William F. Doyle.

ACTION OF BOARD—Petition granted on condition.

THE VOTE—

Affirmative: Acting Chairman Connell, Commissioners Holland and Guilfoyle and Deputy Chief Martin.....	4
Negative	0
Absent: Chairman Walsh.....	1

THE RESOLUTION—

(191-28-S)

WHEREAS, William F. Doyle, for George M. Adrian & Co., Inc., filed, March 2, 1928, a petition for a variation from the requirements of the labor law, as cited in a decision of the commissioner of health, affecting premises 240 East 28th street, Borough of Manhattan; and

WHEREAS, the decision of the board of health, dated January 10, 1928, reads:

"At a meeting of the Board of Health of the Department of Health of the City of New York, held January 10, 1928, your application for a Sanitary Certificate for a Cellar Bakery at 240 E. 28th Street, in the Borough of Manhattan, was denied.";

and

WHEREAS, the building is non-fireproof, six stories in height, 37 ft. 6 in. by 86 ft. 2 in. in area; OCCUPIED: cellar, bakery and boiler room, 3 persons; 1st story, store and three living apartments; 2nd, 3rd, 4th, 5th and 6th stories, five living apartments on each story; the existing bakery in rear of cellar is 8 ft. 4 in. in height from floor to ceiling; the bake oven is built under the yard; the bakery is ventilated by three windows and a door opening to east yard court and six pivoted windows over the oven to yard area; the floor of bakery is level with the bottom of east yard court; and

WHEREAS, the petitioner contends that the bakery has been operating for a good many years, but through ignorance of the law no certificate of exemption was filed with the board of health.

Resolved, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is *granted*, only

MINUTES

o far as it affects the height of ceiling; that any openings between the bakery and part marked "storage for tenants" hall be bricked up solid, and that the requirements of the labor law shall be complied with in all other respects.

52-28-S.

PETITIONER—William F. Doyle, for Alan Realty Co., owner.

SUBJECT—Variation of the labor law as cited in a decision of superintendent of buildings.

PREMISES AFFECTED—1384-1388 Broadway, Manhattan.

APPEARANCES—

For Petitioner: William F. Doyle.

ACTION OF BOARD—Petition granted on condition.

THE VOTE—

Affirmative: Acting Chairman Connell, Commissioners Holland and Guilfoyle and Deputy Chief Martin.....	4
Negative	0
Absent: Chairman Walsh.....	1

THE RESOLUTION—

(152-28-S)

WHEREAS, William F. Doyle, for Alan Realty Co., owner, filed, February 21, 1928, a petition for a variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises 1384-1388 Broadway, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered February 9, 1928, reads:

"1. All windows throughout must comply with Sec. 264-7 Labor Law and Rule 503 of Industrial Code.";

and

WHEREAS, the building is fireproof, twenty-three stories in height, having a frontage of 78 ft. $\frac{1}{4}$ in. on Broadway and 102 ft. 2 in. on West 38th street; OCCUPIED: 1st story, stores; 2nd story, bank; upper stories, offices, showrooms and 25 per cent manufacturing, approximately 30 persons per story; EQUIPPED with a sprinkler system; EXITS: two interior fireproof stairways, extending from the first story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, there are openings in both street walls of the building on the first, second, third and fourth stories glazed with plate glass; the maximum area of the glass on the first story being 8 ft. by 10 ft.; on the second story being 6 ft. by 7 ft.; on the third story being 8 ft. by 10 ft., and on the fourth story being 8 ft. by 10 ft.; and

WHEREAS, petitioner contends that a strict compliance with the labor law as to the area of the glass would destroy the intended use of the four lower stories and would also detract from the architectural appearance of the building.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted, only so far as it affects the windows of the three lower stories, street front, on condition that all openings shall be equipped with approved metal frames and sash, glazed with one-quarter-inch polished plate glass, and that the requirements of the labor law shall be complied with in all other respects.

1346-27-S.

PETITIONER—David Lupton's Sons Co., for The 25-27 West 56th Street Co., Inc., owner.

SUBJECT—Variation of the labor law as cited in a decision of superintendent of buildings.

PREMISES AFFECTED—25-27 West 56th street and 24-26 West 57th street, Manhattan.

APPEARANCES—

For Petitioner: Edward P. Doyle, Norman T. Valentine and J. R. Carey.

ACTION OF BOARD—Petition granted on condition.

THE VOTE—

Affirmative: Acting Chairman Connell, Commissioners Holland and Guilfoyle and Deputy Chief Martin.....	4
Negative	0
Absent: Chairman Walsh.....	1

THE RESOLUTION—

(1346-27-S)

WHEREAS, Edward P. Doyle, substituted for David Lupton's Sons Co., for The 25-27 West 56th Street Co., Inc., owner, filed, December 28, 1927, a petition for a variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises 25-27 West 56th street and 24-26 West 57th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, dated December 8, 1927 (Alt. 1931-27), reads:

"15. Windows should comply with Sec. 264, Labor Law, and Rule 503, Industrial Code.";

and

WHEREAS, the building is fireproof, ten stories in height, 50 ft. by 200 ft. 10 in. in area; OCCUPIED: 1st story, stores; showrooms and 25 per cent manufacturing, 60 persons; second to ninth stories, inclusive, stores, offices, showrooms and 25 per cent manufacturing, approximately 50 persons per story; 10th story, apartment, 4 persons; EQUIPPED with a sprinkler system; EXITS: three interior fireproof stairways, extending from the first story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, there are openings on the first story in the West 56th street walls of the building glazed with one-quarter-inch thick plate glass, the maximum area of the glass being 16 ft. by 6 ft. 8 in.; it is proposed to omit self-closing devices from all windows on all stories of the West 56th street front; it is further proposed to install casement sash opening outward on the mezzanine, second and third stories of the West 56th street front and to install casement sash opening outward and omitting therefrom the self-closing devices and wire glass on the tenth story, east elevation; and

WHEREAS, petitioner contends that a strict compliance with the labor law as to the area of the glass on the first story would destroy the intended use of said story; that the tenth story will be occupied as an apartment by the owner of the premises and that if any other type of sash and glass were used it would detract from the use of this story as an apartment.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted, only so far as it affects the area of glass in the windows of the three lower stories, street front, on condition that all openings shall be equipped with approved metal frames and sash, glazed with one-quarter-inch polished plate glass, and that the requirements of the labor law shall be complied with in all other respects.

110-28-S.

PETITIONER—Glenn S. Williamson, for Press Publishing Co. (New York World), lessee.

SUBJECT—Variation of the labor law as cited in order of fire commissioner.

PREMISES AFFECTED—53-63 Park Row, Manhattan.

APPEARANCES—

For Petitioner: Glenn S. Williamson.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

THE VOTE—

Affirmative: Acting Chairman Connell, Commissioners Holland and Guilfoyle and Deputy Chief Martin.....	4
Negative	0
Absent: Chairman Walsh.....	1

MINUTES

THE RESOLUTION—

(110-28-S)

WHEREAS, Glenn S. Williamson, for Estate of Joseph Pulitzer, owner, filed, February 6, 1928, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 53-63 Park Row, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated January 16, 1928, reads:

"1. Arrange the entrance doors at the Park Row front and William Street front of building so as to open outwardly as per Section 271 of the Labor Law."

and

WHEREAS, the building is fireproof, fourteen stories in height, 115 ft. 4 in. by 237 ft. in area; OCCUPIED: cellar, pressroom and mailroom, 271 persons; 1st story, stores and offices, 120 persons; 2nd to 11th stories, inclusive, offices, not more than 180 persons on each story; 12th story, editorial rooms, 112 persons; 13th story, composing, 233 persons; 14th story, engraving, 44 persons; EQUIPPED with a fire alarm signal system; EXITS: two interior fireproof stairways, extending from the first story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, the petitioner claims that two revolving doors are provided for the main entrance hall on first story leading to Park Row and two revolving doors are provided for the basement story at rear of main hall leading to William Street; that there is a swinging door, 32 in. in width, at the south side of the William Street revolving doors, which opens into a room, which room has an exit door 36 in. in width leading direct to William street; furthermore, the petitioner contends that watchmen are in charge of the entrance doors on Park Row day and night; that due to the wind pressure at front of the building it would not be safe to have swinging doors opening outwardly.

Resolved, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is *granted on condition* that an unobstructed passageway, leading directly from the main corridor, approximately in the center of the building, shall be maintained to the store on the northeast corner, which is in operation and open twenty-four hours of the day; that a door shall be maintained to a store from within each stairway enclosure in addition to the door into room at south side of William street with egress to street; that the building shall be not increased in height or area, and that a sprinkler system, satisfactory to the fire department, shall be installed within a reasonable time.

192-28-S.

PETITIONER—Frederick Bauer.

SUBJECT—Variation of the labor law as cited in order of fire commissioner.

PREMISES AFFECTED—338 East 31st street, Manhattan.

APPEARANCES—

For Petitioner: David C. Munson.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

THE VOTE—

Affirmative: Acting Chairman Connell, Commissioners Holland and Guilfoyle and Deputy Chief Martin..... 4
Negative 0
Absent: Chairman Walsh..... 1

THE RESOLUTION—

(192-28-S)

WHEREAS, Frederick Bauer, for Albert Grosfeld, Inc., lessee, filed, March 1, 1928, a petition for a variation from the requirements of the labor law, as cited in an order of the

fire commissioner, affecting premises 338 East 31st street, Borough of Manhattan;

WHEREAS, the order of the fire commissioner, dated January 10, 1928 (Order No. 31214-LD), reads:

"1. Provide safe and unobstructed egress from the lower termination of the fire escape at rear of building by constructing a fireproof passageway with an unobstructed width of at least 3' throughout, leading to the street, adequately lighted at all times during working hours, or by means of providing access to an open area having communication with the street, as per Section 273 of the Labor Law."

and

WHEREAS, the building is nonfireproof, five stories in height, 50 ft. by 94 ft. in area; OCCUPIED: 1st story, shipping, 7 persons; 2nd, 3rd and 4th stories, storage of furniture, no occupancy; 5th story, furniture repair shop, 26 persons; EQUIPPED with a sprinkler system; EXITS: an interior wooden stairway, extending from the first story to roof, enclosed in wooden partitions at each story, with wood doors at openings; a fire escape on the rear of the building, having fireproof openings along the course thereof, extending from the roof to yard level, with no legal means of egress from foot of fire escapes; ROOFS of adjoining buildings: 6 ft. lower at east and west; and

WHEREAS, the petitioner claims that to comply with the order would entail a tremendous expense; furthermore, the petitioner proposes to cut a gate in fence at rear of yard where egress may be had from foot of rear fire escape to yard of adjoining premises at south and through a fireproof passageway of the tenement to 30th street; a consent signed by the owner of the tenement to use her premises as an exit is filed in a prior case—Cal. No. 967-26-S.

Resolved, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is *granted on condition* that not more than twenty-five people shall be employed above the second story; that the egress from the termination of the fire escape at the rear shall be through a gate in the fence at rear to tenement house facing on 30th street and through a passageway in tenement house leading direct to street; that the consent of the owner of this tenement house shall be filed with the fire department; that the present sprinkler system shall be maintained; that the building shall not be increased in height or area, and that the labor law shall be complied with in all other respects.

1233-27-S.

PETITIONER—Max Cohen, for 25 West 35th Street Corp., owner.

SUBJECT—Variation of the labor law as cited in order of fire commissioner.

PREMISES AFFECTED—25 West 35th street, Manhattan.

APPEARANCES—

For Petitioner: J. Burmeister.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

Negative 0
Absent: Chairman Walsh..... 1

THE RESOLUTION—

(1233-27-S)

WHEREAS, J. Burmeister, substituted for Max Cohn, for 25 West 35th Street Corp., owner, filed, November 23, 1927, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 25 West 35th street, Borough of Manhattan; and

MINUTES

WHEREAS, the order of the fire commissioner, dated April 18, 1927 (Order No. 16983-LD), reads:

"1. Arrange the fire escape on rear of building and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Section 273 and 274 of the Labor Law and rules of the Board of Standards and Appeals, or carry out a proper alternative method of complying with the requirements of Section 271 of the Labor Law. SEE NOTE.

"NOTE: Among the defects noted are the following: Not continued to ground. No fireproof passageway to street.

"3. Extend the interior stairway at west side of building to the roof, as per Section 271 of the Labor Law.";

and

WHEREAS, the building is nonfireproof, four stories (42 ft.) in height, 22 ft. by 97 ft. in area at first story and 22 ft. by 90 ft. in area above; OCCUPIED: 1st story, restaurant; upper stories, tenant factories (manufacture of hats); 2nd story, 5 persons; 3rd story, 8 persons; 4th story, 6 persons; EXITS: an interior wood stairway, extending from the first story to top story, enclosed in metal-covered wood partitions with metal-covered wood doors at openings; a fire escape on the rear of the building, having (proposed) fireproof openings along the course thereof, extending from the main roof to an iron platform at first story extension roof level, with EGRESS from the termination of the fire escape by means of an iron platform on adjoining extension roofs and thence to fire escapes on adjoining building terminating on this platform and, also, by means of doors at second story level leading into adjoining building to east; ROOFS of adjoining buildings are at same level; and

WHEREAS, petitioner requests the acceptance of the existing means of egress from the termination of the fire escape and, contending that the occupancy of the building is small and the fire escape extends to the roof, requests permission to omit extending the interior stairway to the roof.

Resolved, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is *granted*, as to Item 1 of Order No. 16983-LD, only so far as it affects the fireproof passageway to the street from the termination of the fire escape, *on condition* that an iron balcony shall be provided from the termination of the fire escape on the second story to the balcony of the fire escape on the fireproof building directly to the rear, with egress from the same up one flight to a door leading to the fireproof passageway of this building in the rear to the street, and that the fire escape shall conform in all other respects with the labor law; *granted*, as to Item 3, *on condition* that the interior stairs shall be enclosed in fire-resisting material with fireproof, self-closing doors at the openings; that a double-rung ladder shall be provided, leading from the top story hall to a 2 ft. by 3 ft. scuttle in the roof; that the occupancy shall not exceed twenty-five persons above the first story; that the building shall be not increased in height or area, and that the labor law shall be complied with in all other respects.

115-28-S.

PETITIONER—Antonio Rendino, owner.

SUBJECT—Variation of the labor law as cited in order of fire commissioner.

PREMISES AFFECTED—302 Prospect Park West, Brooklyn.

APPEARANCES—

For Petitioner: Alice Rendino.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

THE VOTE—

Affirmative: Acting Chairman Connell, Commissioners Holland and Guilfoyle and Deputy

Chief Martin..... 4

Negative 0

Absent: Chairman Walsh..... 1

THE RESOLUTION—

(115-28-S)

WHEREAS, Antonio Rendino, owner, filed, February 7, 1928, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 302 Prospect Park West, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated December 1, 1927, reads:

"Order No. 29315-LD:

"1. Provide an additional means of egress from each floor of the building remote from the interior stairway, as per Section 271 of the Labor Law.

"2. Extend the interior stairway to the roof, as per Section 271 of the Labor Law.";

and

WHEREAS, the building is non-fireproof, three stories in height, 25 ft. by 85 ft. in area at first and second stories and 25 ft. by 28 ft. 8 in. in area at third story; OCCUPIED: 1st story, store and living apartment; 2nd story, dress-making, 12 persons; 3rd story, living apartment; EXITS: an interior wooden stairway, extending from the first story to top story, enclosed in wood lath and plaster partitions with wooden doors at openings; a fire escape on the rear of the building, having non-fireproof openings along the course thereof, extending from the yard level to the second story balcony; a gooseneck ladder to roof of second story extension; a second gooseneck ladder from roof of second story to main roof, with no legal means of egress from the foot of fire escape; ROOFS of adjoining buildings: 1 ft. 6 in. lower at south; vacant lot at north; and

WHEREAS, the petitioner claims, as to Items 1 and 2 of the order, that due to the reduced area of the third story there would be no benefit derived by providing a new interior stairway to the roof; that the ceiling of the second story is covered with stamped metal; that the fire hazard is low; furthermore, the petitioner proposes to provide a double-rung iron ladder to a metal-covered scuttle in the roof and also to provide a gate in the fence whereby egress may be had from yard to adjoining yard at west.

Resolved, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is *granted*, as to Item 1, *on condition* that a ladder shall be provided from the roof of the third story to the roof of the second story in the rear of the third story section; that a 60-degree iron stairway shall be provided on the fire escape in the rear in lieu of the gooseneck ladder now installed from the balcony at the second story to the roof of the second story; that all the openings on fire escape on the first and second stories shall be fireproofed; that the exits from the termination of the fire escape in the rear shall be through doors in the fence of the adjoining properties, and that a letter of consent from the owner of the property to the north shall be filed with the fire department, and *granted*, as to Item 2, *on condition* that a gooseneck ladder shall be provided at the third story of stair enclosure leading to the scuttle in the roof; that the labor law shall be complied with in all other respects, and this variation is granted so long as conditions as to occupancy and use remain unchanged.

123-28-S.

PETITIONER—A. E. Nast, for Estate of Annette W. Van Buren, owner.

SUBJECT—Variation of the labor law as cited in order of the fire commissioner.

PREMISES AFFECTED—52 West 22nd street, Manhattan.

MINUTES

APPEARANCES—

For Petitioner: John J. Gilmartin.
For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.
THE VOTE—

Affirmative: Acting Chairman Connell, Commissioners Holland and Guilfoyle and Deputy Chief Martin..... 4
Negative 0
Absent: Chairman Walsh..... 1

THE RESOLUTION—

(123-28-S)

WHEREAS, A. E. Nast, for Estate of Annette W. Van Buren, owner, filed, February 8, 1928, a petition for a variation from the requirements of the labor law, as cited in order of the fire commissioner, affecting premises 52 West 22nd street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated January 21, 1928, reads:

"Order No. 31742-LD—

"1. Provide an additional means of egress from 1st story remote from existing exit as per Section 271 of the Labor Law.

"2. Provide an additional means of exit from workshop at rear of 2nd story remote from the interior stairway as per Section 271 of the Labor Law.";

and

WHEREAS, the building is non-fireproof, 4 stories and pent-house in height, 23 ft. by 98 ft. 9 in. in area at 1st story and 23 ft. by 88 ft. 9 in. at 2nd story and smaller area above; OCCUPIED: 1st story, carpentering, 7 persons; 2nd story, showroom, 3 persons; 3rd story, furrier, 8 persons; 4th story, vacant; pent-house, living apartment; EXITS: an interior wooden stairway, extending from the 1st story to top story, enclosed in lath and plaster partitions with wood doors at openings; a fire-escape on the front and a fire-escape on the rear of the building, have fireproof openings along the course thereof, the front fire-escape extending from the 3rd to 4th story, with goose-neck ladder to roof, the rear fire-escape extending from roof of 2nd story extension to top story, with no legal means of egress from foot of rear fire-escape; ROOFS of adjoining buildings: 25 ft. higher at west; same level at east; and

WHEREAS, the petitioner claims as to Items 1 and 2 of the order, that it is impossible to provide a rear exit as the first story is built back to the rear lot line, and the second story to within 4 ft. of the lot line; furthermore, the petitioner proposes to provide a second means of egress from first and second stories by erecting an iron stairs 24 inches in width from the second story floor level at the head of first story stairs, leading to the bottom of a light shaft, located directly above, an iron landing and goose-neck ladder extending up to roof of 2nd story extension, where egress may be had to the adjoining extension roof of the same level at east, and to fire-escapes of the adjoining buildings;

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted on condition that a 60 degree stairway shall be provided in the rear of the first story, leading to an iron balcony at the level of the second story and a 60-degree iron stairway from the iron balcony leading to the roof of the second story extension, with egress from the termination to the roof of the second story extension of the building to the east, which is the same level as the second story extension of the building in question; that the openings on the first and second stories shall be equipped with fireproof casement doors; that the ceiling of the 2nd story extension for a distance of 10 ft. back from rear wall shall be fire retarded; that the building shall be not increased in height or area; and this variation is granted so long as conditions as to occupancy and use remain substantially unchanged.

759-27-S.

PETITIONER—John J. O'Brien, for O'Brien Estates, Inc., owner.

SUBJECT—Application for reopening—modification—re variation of the labor law, as cited in order of the fire commissioner.

PREMISES AFFECTED—647 Sixth avenue, Manhattan.

APPEARANCES—

For Petitioner: John J. O'Brien.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition reopened and resolution modified.

THE VOTE TO REOPEN AND MODIFY RESOLUTION—

Affirmative: Acting Chairman Connell, Commissioners Holland and Guilfoyle and Deputy Chief Martin..... 4
Negative 0
Absent: Chairman Walsh..... 1

THE RESOLUTION—

(759-27-S)

WHEREAS, John J. O'Brien, for O'Brien Estates, Inc., owner, filed June 30, 1927, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 647 Sixth avenue, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated April 13, 1927, reads:

"Order No. 16741-LD:

"1. Arrange the fire escape on rear of building and the openings leading thereto, and the windows opening on the course thereof so that same are in compliance with the provisions of Sec. 273 and 274 of the Labor Law and the rules of the Board of Standards and Appeals, or carry out a proper alternative method of complying with the requirements of Section 271 of the Labor Law. See NOTE.

"NOTE: Among the defects noted are the following:

"Windows on course not fireproof, self-closing; no stairs to roof; shutters obstruct passageway; no counter-balanced stairway from lowest balcony to ground; no fireproof passageway from termination to street; no doors to balcony each story.";

and

WHEREAS, the building is non-fireproof, four stories in height, 25 ft. by 50 ft. in area; OCCUPIED: 1st story, stores; 2nd story, employment agency, 5 persons; 3rd story, manufacture of embroidery, 5 persons; 4th story, manufacture of furs, 5 persons; EXITS: an interior wooden stairway, extending from the first story to top story, enclosed in wood lath and plaster partitions with wooden doors at openings; a double-rung iron ladder from top story hall closet to roof; a fire escape on the rear of the building having non-fireproof openings along the course thereof, extending from second story to top story; a goose-neck ladder to roof; a sliding drop ladder from second story balcony to yard and no legal means of egress from termination of fire escapes to street; ROOFS of adjoining buildings: same level at north and south; and

WHEREAS, the petitioner claims egress from termination of rear fire escapes may be had through first story public hallway to street; that there is an iron ladder from yard leading to roof of one-story extension adjoining at north; that there is an iron ladder leading to roof scuttle and a gooseneck ladder from rear fire escapes also leading to the roof; furthermore, the petitioner contends that the exits are adequate; and

WHEREAS, this petition was granted by the board at its session December 20, 1927, and applicant requested a modification of the original resolution as to occupancy because of additional work done in excess of requirement;

Resolved, that the board of standards and appeals does

MINUTES

hereby *make a variation* in the requirements of the labor law and that the petition be and it hereby is *granted on condition* that the window at the rear of the first story southerly store shall be cut down and equipped with a door; that the existing passageway partition of the hallway shall be covered on the hall side with metal throughout; that a gooseneck ladder shall be provided from the top story balcony, rear fire escape to the roof; that the existing iron shutters shall be removed and all openings on course of fire escape fire-proofed; that a drop ladder in guides shall be provided from the lowest balcony to yard level; that a fixed iron ladder shall be provided from the rear yard to the roof of the adjoining one-story extension to the north; that the occupancy shall not exceed 15 persons above the second story, and that the building shall be not increased in height or area.

CASES DISMISSED

Variation of the Labor Law

The chairman called attention to the following case, where notices of intention to petition were offered for filing; but where, despite notices from this office, papers have not been completed, thus tying the hands of the administrative official in the performance of his duty.

(1272-27-S)

Filed December 5, 1927—Premises 501-507 Seventh avenue and 135-147 West 37th street, Manhattan. Order of superintendent of buildings. Petitioner: Joseph Rosenberg & Co. Dismissed for lack of prosecution.

THE VOTE TO DISMISS—

Affirmative: Acting Chairman Connell, Commissioners Holland and Guilfoyle and Deputy Chief Martin..... 4
Negative 0
Absent: Chairman Walsh..... 1

THE RESOLUTION—

WHEREAS, the foregoing petitioner has filed with the board of standards and appeals a petition for variation of the labor law, affecting premises in question; and

WHEREAS, the petitioner has failed to complete his papers, though duly notified to do so;

Resolved, that the foregoing petition be and it hereby is dismissed for lack of prosecution.

Appliances

The chairman called attention to the following cases, where notices of intention to petition for approval were offered for filing; but where, despite notices from this office, papers have not been completed:

(1108-24-SA)

Filed September 9, 1924—Approval of Simplicity Fuel Oil Burner. Petitioner: The Petroleum Combustion Corp. Dismissed for lack of prosecution.

(683-25-SA)

Filed June 30, 1925—Approval of Billow Fuel Oil Burner. Petitioner: Charles O. Lenz. Dismissed for lack of prosecution.

(1106-25-SA)

Filed October 27, 1925—Approval of Modern Oil Burner. Petitioner: Modern Oil Burner Co., Inc. Dismissed for lack of prosecution.

(929-26-SA)

Filed November 12, 1926—Approval of Seaboldt Vacuum Syphon Oil Burner. Petitioner: National Safety Oil Burning Co., Inc. Dismissed for lack of prosecution.

(950-26-SA)

Filed November 18, 1926—Approval of The Ideal Fuel Oil Burner. Petitioner: George Jockers. Dismissed for lack of prosecution.

(1094-27-SA)

Filed October 10, 1927—Approval of Fluid Heat Domestic Fuel Oil Burner Type O. Petitioner: Lee Finish Corporation. Dismissed for lack of prosecution.

(1314-27-SA)

Filed December 20, 1927—Approval of Gravoil Burner. Petitioner: Gravoil Burner, Inc. Dismissed for lack of prosecution.

THE VOTE TO DISMISS—

Affirmative: Acting Chairman Connell, Commissioners Holland and Guilfoyle and Deputy Chief Martin..... 4
Negative 0
Absent: Chairman Walsh..... 1

THE RESOLUTION—

WHEREAS, the foregoing petitioners have filed with the board of standards and appeals petitions for approval of the above oil burners; and

WHEREAS, the petitioners have failed to complete their papers though duly notified to do so;

Resolved, that the foregoing petitions be and they hereby are dismissed for lack of prosecution.

Adjourned, 5.30 p. m.

WILLIAM J. O'GORMAN, *Secretary*.

MINUTES

*CORRECTION

The minutes of the meeting of the board of standards and appeal held Tuesday, April 10, 1928, as they appeared in Bulletin No. 16, Vol. XIII, are hereby corrected to read as follows:

THE RESOLUTION—

(1145-27-A)

WHEREAS, Joseph L. Hernon, for Bank of The Manhattan Co., owner, filed October 24, 1927, an appeal from an order of the fire commissioner, affecting premises 40-42 Wall street and 37-39 Pine street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated March 23, 1927, reads:

*Correction—Words "labor law" changed to "building code" in line 49 of resolution.

"Order No. 26776-F:

"1. Provide iron shutters at all openings in the exterior wall above 1st story which are distant in a direct line less than 30 ft. from any opening in any other building and not in the same plane with said openings and which are not more than 50 ft. above a neighboring roof at east and west sides of building or other approved protection, as per Section 375, Article 18, Chapter 5 of the Code of Ordinances.";

and

WHEREAS, the building is fireproof, twelve stories and pent house in height, having a frontage of 75 ft. on Wall street, 45 ft. 10½ in. on Pine street and a depth of 194 ft. 10 in.; OCCUPIED as an office building, approximately 45 persons per story; and

WHEREAS, there are six windows in the southeast court

MINUTES

of the building on the tenth, eleventh and twelfth stories and two windows in the northeast court of the building on the eleventh and twelfth stories of the building within 30 ft. of openings in a twenty-three-story fireproof building to the east; two windows on the eighth story, three windows on the ninth story, three windows on the tenth story and three windows on the eleventh story in the southerly portion of the west wall of the building within 50 ft. of the roof of a neighboring eight-story fireproof building to the west; two windows in the southerly wall of the westerly center court of the building on the third and fourth stories of the building within 30 ft. of openings in a neighboring building to the west; two windows on each story above the first story and one window on the second to eighth stories, inclusive, in the easterly wall, and one window on the

second to eighth stories, inclusive, in the north wall of the court at the northwest portion of the building within 30 ft. of openings in or within 50 ft. of the roof of a neighboring three-story fireproof building to the west; and

WHEREAS, appellat contends that the buildings forming the exposures are fireproof, occupied as office buildings and that there is nothing of a hazardous nature stored therein.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that all the windows in the stair halls, fire towers and elevator shafts shall comply with the requirements of the building code; that the building shall not be increased in height, area or dimension, and granted only as long as the use and occupancy of premises remain substantially unchanged.

RULES

SMOKING IN FACTORIES.

Adopted by the Board of Standards and Appeals,
August 13, 1918.

RULE 1. PERMIT.

(a) **Prohibition.** No person shall smoke, or carry a lighted cigar or cigarette in any factory as defined in Article 1, Section 2, of the State Labor Law, nor in any portion of a factory, within the City of New York, except in such protected portions or special classes of occupancies as are specified in Rule 2 of these rules, and then only after the issuance of a permit by the fire commissioner.

It shall be the joint and several duty of the owner and of the lessee or lessees of the building containing such factory or factories to cause to be posted in each and every entrance hall, stairhall or room throughout the building, as well as in every elevator-car, in English, and also in such other language or languages as the fire commissioner shall direct, a notice of such prohibition, and the penalty for its violation.

(b) **Application.** Application for such permit shall be made only by the owner of the building on suitable blank forms to be furnished by the fire commissioner.

(c) **Time Limit.** Such permit shall be for a definite period, not exceeding one year, and shall not be renewed upon expiration until a reinspection of the premises for which it is issued has been made for the purpose of determining whether existing conditions warrant a renewal.

(d) **Conditions.** The permit shall state the conditions under which, the hours between which, and the place or places in such factory where smoking may be permitted, and this permit shall be framed and kept posted in a conspicuous place in the factory.

(e) **Revocation.** Violation of any of the conditions specified in the permit, in addition to incurring such penalties as are prescribed by law, shall be full and sufficient cause for the revocation of such permit by the fire commissioner, and he shall not again issue a permit for the same premises until at least one year has elapsed.

RULE 2. PERMISSIBLE CASES.

Smoking may be permitted in:—

(a) Factories engaged in the manufacture of cigars, cigarettes, or smoking tobacco, when necessary for the efficient conduct of the business, provided that:

(1) No smoking other than that for sampling, testing and experimental purposes is carried on.

(2) Such smoking is conducted in a room provided especially for that purpose, separated from the rest of the building by fireproof or fire-resisting partitions, with all openings therein protected by self-closing fire doors, and, further, unless the building is of fireproof construction or equipped with an approved automatic sprinkler system, the floor and ceiling of such room shall be covered with fire-retarding material.

(3) Such chemical fire extinguishers as the fire commissioner may direct are installed.

(4) All waste paper and other inflammable waste materials are deposited in fireproof receptacles.

(b) Factories devoted entirely to one of the following occupancies:

- Blacksmithing or horseshoeing;
- Boiler making;
- Brick, terra cotta or artificial stone works;
- Forge shops;
- Foundries;
- Iron, steel, brass or copper works;
- Machine shops;
- Smelting;
- Stone or monumental works;

provided that in any case:

(1) The building is not of wooden construction;

(2) Such chemical fire extinguishers as the fire commissioner may direct are installed;

(3) All waste paper and other inflammable waste materials are deposited in fireproof receptacles.

FORMS FOR NOTICES TO PROPERTY OWNERS

If applicants, under the building zone resolution, desire copies of Form 13A, for notices to property owners, such forms are not to be supplied by this office.

The applicant is entitled only to one copy of Form 13A, properly filled out.

If he desires additional copies for his own convenience, in notifying property owners, he can obtain such copies from The O'Connell Press, 176 Park Row, Manhattan, at three cents each, postage to be added if the forms are to be supplied by mail.

RULES

RULES FOR THE TESTING OF WOOD

Pursuant to the Provision of Section 356 of Chapter 5 of the Code of Ordinances (Building Code).

(639-27-SR)

Adopted by the Board of Standards and Appeals July 22, 1927. Amended March 16, 1928.

Rule 1. Before any wood may be used for flooring or interior trim where incombustible materials are required under the provisions of section 356 of the Building Code, the superintendent of buildings must be notified promptly upon the delivery at the job of a consignment of such material. One test sample for each 2,000 feet of material will then be selected by a representative of the Bureau of Buildings, marked for identification, and forwarded to the testing laboratory, where, under the supervision of the superintendent of buildings or his representative, the samples shall be subjected to the following tests:

Before making tests of all specimens for testing shall be oven dried at a temperature of 140° F. to a point where there is no further loss of weight due to evaporation of moisture content.

A. SHAVING TEST—A mass of shavings cut fairly thick from the outside and interior of sticks of the treated wood are to be tested separately. These shavings shall be placed to a depth of two inches in a metal vessel twelve inches square, the bottom of which shall consist of a wire screen of ½ inch mesh. The shavings shall be packed down moderately to reduce the air spaces. A Bunsen yellow flame shall then be placed beneath the receptacle so that the flame is in contact with the shavings. After twenty-five seconds the flame shall be removed. The flame at no time should show higher than six inches above the top of the bed of shavings and the shavings should not be consumed in less than five minutes.

B. TIMBER TEST. Two samples ¾ inch by 1½ inches in cross section and twelve inches long shall be

laid side by side across the top of a gas crucible furnace with a pyrometer between them. The specimens shall be subjected to a flame at 1700 deg. Fahrenheit for two minutes, the test pieces shall then be removed, and the time of duration of flame and glow observed. The sticks shall then be cut through the middle at the most burned section and the area of the unburned wood measured with a planimeter. The flame must not persist longer than 15 seconds nor the glow longer than 20 seconds, and, in the case of hard woods, the unburned area should not be less than 55 per cent., nor in the case of soft woods less than 45 per cent.

C. CRIB TEST—Twenty samples are to be prepared, each ½ inch square and 6 inches long. These shall be built up on a ring support to form a crib work five tiers high, four sticks to a tier, making the crib six inches by six inches and approximately 2½ inches high. The crib shall be set six inches above a Bunsen burner to which the crib shall be exposed for a period of one minute at a temperature approximating 1200 deg. Fahrenheit. The flame must not persist more than twenty seconds after the Bunsen burner is removed, nor the glow last more than thirty seconds. The tendency of the flame to spread from stick to stick must also be noted.

Rule 2. All of the above tests shall be at the expense of the owner or contractor or other interested party.

If the tests are satisfactory the entire shipment will be permitted to be taken into the building and used. If not, the entire shipment shall be condemned and must be removed from the premises.

In general, acceptance shall be predicated upon the existence of a complete plant in full working order from which the material is shipped, and each shipment, or, where possible, each piece shall be trade marked in a conspicuous manner so that there may be no doubt as to its identity.

WARNING

Notice is hereby given to all petitioners, appellants and applicants, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

First, That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

Second, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

Third, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and of the posting of the calendars on the bulletin board in the

offices of the board and of the further publication of the calendars in the daily press.

Fourth, That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

Fifth, That the business of the board is to dispose of all cases promptly, for the reason that the pendency of an appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of the appellant or petitioner to file necessary data, or by any other method of delay.

Sixth, That no appeal, application or petition will be accepted for filing unless, at the time of filing, all papers, plans and data required by law are supplied, as specified on the blank appeal, application or petition forms.

BOARD OF STANDARDS AND APPEALS

WILLIAM E. WALSH, Chairman

HENRY L. CONNELL

JAMES P. HOLLAND

JOHN GUILFOYLE

CHIEF JOHN KENLON

WILLIAM J. O'GORMAN, Secretary

EDWARD V. BARTON, Chief Clerk

OFFICE—Municipal Building, Rooms 1001 to 1015.

TELEPHONE—WORTH 0184.

OFFICE HOURS—9 a. m. to 4 p. m. Saturdays 9 a. m. to 12 noon.

All communications should be addressed to the chairman of the board.

CONTENTS

This issue of the Bulletin contains, in the order given—

Docket.

Call of Clerk's Calendar.

The Trial Calendar.

Notices in Building Zone Cases.

Minutes of Regular Meeting, July 10, 1928, 10 a. m.

Minutes of Regular Meeting, July 10, 1928, 2 p. m.

Progress Report.

PUBLIC HEARINGS

Tuesdays, at 10 a. m. and 2 p. m.
Special meetings as published in this Bulletin.
Call of Clerk's Calendar, Tuesdays, at 2 p. m.
All hearings are held in Room 1013, Municipal Building, Manhattan.

HOURS FOR CONSULTATION

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted. *23 1928*

CALL OF CLERK'S CALENDAR

The Clerk's Calendar consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, July 17, 1928, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, July 24, 1928, at 2 o'clock.

The Clerk's Calendar is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

NOTICE TO APPELLANTS AND PETITIONERS

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and disposition of same expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

Building Zone Applications.

NOTICE IS HEREBY GIVEN by the board of standards and appeals of a public hearing under the provisions of the building zone resolution, *Tuesday morning, July 17, 1928, at 10 o'clock, in Room 1013, Municipal Building, on the following matters:*

CAL. NO. 1339-27-BZ—Application, December 23, 1927, under section 21 of the building zone resolution, of Harry Urquhart, applicant, on behalf of Israel Rosenblum, owner, to permit in a business district the erection and maintenance of a gasoline service station; premises 1605-1611 Coney Island avenue, Brooklyn.

CAL. NO. 146-28-BZ—Application, February 17, 1928, under sections 7c and 21 of the building zone resolution, of William F. Doyle, applicant, on behalf of S. S. Kresge Co., lessee for long term, over thirty years, to permit the extension, from a business district into a residence district, of a proposed business building; premises 1416-1420 Kings Highway, south side, 42.42 ft. west of East 15th street, Brooklyn.

CAL. NO. 68-28-BZ—Application, January 26, 1928, under section 21 of the building zone resolution, of Thomas W. Lamb, applicant, substituted for John Eberson, on behalf of Wilthan Realty Corp., owner, to permit the extension, from a business district into a residence district, of a proposed theatre building; premises 1230-1248 Third avenue, 183-187 East 71st street and 182-184 East 72nd street, Manhattan.

CAL. NO. 83-28-BZ—Application, January 28, 1928, under section 21 of the building zone resolution, of Harry M. Peyser, applicant, on behalf of Abraham L. Cohen, owner, to permit in a business district the erection and maintenance of a motor vehicle repair shop; premises 1239 East New York avenue, Brooklyn.

CAL. NO. 156-28-BZ—Application, February 23, 1928, under sections 7e and 21 of the building zone resolution, of William F. Doyle, applicant, on behalf of Hugh Clark, owner, to permit in a business district the erection and maintenance of a gasoline service station and, also, a garage for the storage of more than five (5) motor vehicles; premises 287-291 Prospect avenue, Brooklyn.

CAL. NO. 122-28-BZ—Application, February 8, 1928, under section 21 of the building zone resolution, of Nathan D. Shapiro & Brothers, applicants, on behalf of David Katz, owner, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles; premises 523-533 Remsen avenue, east side, 240 ft. north of Church avenue, Brooklyn.

CAL. NO. 159-28-BZ—Application, February 24, 1928, under sections 6, 7(a-b-e) and 21 of the building zone resolution, of William F. Doyle, applicant, on behalf of Hyman Chipkin and Meyer Chipkin, owners, to permit in a business district the erection and maintenance of an extension to a motor vehicle repair shop, also the change of occupancy from a stable for more than five (5) horses to a garage for the storage of more than five (5) motor vehicles; premises 796-804 Park avenue, Brooklyn.

CAL. NO. 144-28-BZ—Application, February 16, 1928, under section 21 of the building zone resolution, of McCooey & Conroy, applicants, on behalf of Prospect Plaza Corp., owner, to permit in a business district the erection and maintenance of a gaso-

CALENDAR

line service station; premises 348-358 Empire boulevard, south side, 60 ft. east of Nostrand avenue, Brooklyn.

CAL. NO. 73-28-BZ—Application, January 26, 1928, under section 21 of the building zone resolution, of John J. Dunnigan, applicant, on behalf of The Bernbro Realty Corp., owner, to permit, partly in a residence district and partly in a business district, the erection and maintenance of a garage for the storage of more than five (5) motor vehicles; premises northeast corner of Corlear avenue and West 230th street, The Bronx.

THE RESOLUTION—

(142-28-A)

WHEREAS, Walter P. McTeigue, Inc., for Milest Holding Corp., owner, filed, February 15, 1928, an appeal from an order of the fire commissioner, affecting premises 36-42 West 47th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated January 31, 1928 (Order No. 41161-LC), reads:

"You are hereby notified that an inspection of premises 36-42 West 47th St., Manhattan, used for the storage of oxygen, shows that the following must be done before permit requested by you can be issued:

"1. Each operator of a blow-pipe or other similar device or apparatus for heating, melting or welding, apply for and secure a Certificate of Fitness.";

and

WHEREAS, the building is fireproof, sixteen stories in height, 80 ft. by 100 ft. 5 in. in area; OCCUPIED: 1st story, stores; upper stories, offices and jewelry manufacturers, 40 persons per story; and

WHEREAS, appellant, the occupant of the sixteenth story, contends that there is but one cylinder containing 250 cubic feet of oxygen in the premises; that the cylinder is located in the westerly portion of the premises and approximately 30 ft. from the auxiliary torches; that the person operating the large torch, which is located at the side of the oxygen tank, has a certificate of fitness and that no other person is permitted to operate the large torch or the tank.

Resolved, that the order of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted on condition that the operator of the large torch and tank shall obtain a certificate of fitness.

THE RESOLUTION—

(1318-27-A)

WHEREAS, Croker National Fire Prevention Engineering Co., substituted for Daniel J. McParland, for P. H. Gill and Sons, owner, filed, December 21, 1927, an appeal from an order of the fire commissioner, affecting premises 2-30 Lorraine street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated September 1, 1927 (Order No. 83492-F), reads:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs) placed within main stairway enclosure.";

and

MINUTES

WHEREAS, the building is non-fireproof, one story and mezzanine (30 ft. 6 in.) in height, 200 ft. by 110 ft. and 163 ft. 6 in., irregular, in depth, about 28,000 sq. ft. in area; OCCUPIED as a forge and machine shop, 38 persons throughout the building; and

WHEREAS, the appellant claims that the building is divided into three separate areas by fire walls, equipped with a wet sprinkler system and the necessary fire appliances; that the building faces on three streets with an exit on each street and three accessible fire hydrants; furthermore, the appellant contends that the building is isolated, having no adjoining buildings.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the building shall not be increased in height, area or dimension; that it shall be equipped throughout with an approved sprinkler system supplied from city water supply with not less than a 6-inch connection to the city main, and granted only as long as premises remain in single tenancy and operation.

THE RESOLUTION—

(1341-27-A)

WHEREAS, Croker National Fire Prevention Engineering Co., for F. F. Wood, owner, filed, December 24, 1927, an appeal from an order of the fire commissioner, affecting premises Foot of Marine street, City Island, Borough of The Bronx; and

WHEREAS, the order of the fire commissioner, dated July 16, 1927 (Order No. 24759-F), reads:

"1. Provide yard hydrants and hose for yard as per Rule 37, Board of Standards and Appeals.";

and
WHEREAS, the premises consist of a plot of ground, divided into two sections by Marine street (which is 50 ft. wide); each section being 100 ft. by 300 ft. in area; upon this plot is located a boat builder's yard consisting of several one and three-story buildings, some of frame construction and others being constructed of concrete blocks; there being, also, two marine railways; 25 persons in entire premises; and

WHEREAS, appellant contends that there is a city fire hydrant in Marine street directly in front of the premises; that there is no point in the yard over 250 ft. from this hydrant and contends, further, that there are two other hydrants in Marine street from which hose could be stretched to cover the premises in question.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the premises shall be equipped throughout with such auxiliary fire extinguishing appliances as shall be directed by the fire commissioner and that a watchman's patrol system shall be installed and maintained, and granted only as long as the present use and occupancy remains substantially unchanged.

THE RESOLUTION—

(1349-27-A)

WHEREAS, Joseph D. Nunan, Jr., for Studebaker Corporation of America, filed, December 29, 1927, an appeal from an order of the fire commissioner, affecting premises 2040-2052 Broadway, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated June 18, 1927 (Order No. 23126-F), reads:

"1. Provide a tank on roof of at least 3,500 gallons capacity for the standpipe system, said tank to be so elevated that the bottom will be not less than 20 feet above the roof level. Sec. 20, Ch. 12, Code of Ordinances.";

and

WHEREAS, the building is fireproof, five stories (69 ft.) in height, irregular in shape, having a frontage of 101 ft. 5½ in. on West 70th street, 112 ft. ¾ in. on Broadway and a distance of 100 ft. 5 in. across the easterly rear, approximately 12,700 sq. ft. in area; described by appellant as OCCUPIED by one automobile concern; 1st story, automobile showrooms, 10 persons; 2nd story, automobile showrooms, 9 persons; 3rd story, general offices, 80 persons; 4th story, automobile showroom, 8 persons; 5th story, automobile showrooms, no persons, and permitted by the board to be occupied as a garage for the conduct of an automobile business for the demonstration, display and exchange of automobiles under Cal. No. 1483-22-A; and

WHEREAS, there is a dry 4-inch standpipe riser in the north stair hall and one in the south stair hall, each extending from the first story to the top story, with outlets on each story, supplied with sufficient hose to reach all parts of the floor; the riser in the north stair hall being connected with a siamese steamer connection on Broadway and the riser in the south stairway being connected with a siamese steamer connection on West 70th street; and

WHEREAS, appellant contends that the building is but slightly in excess of the 10,000 sq. ft. area limit requiring standpipe equipment and requests the acceptance of the existing standpipe system.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, only so far as it affects the installation of the gravity tank on the roof, *on condition* that the existing standpipe equipment shall be provided with a direct 4-inch connection to the city main and that the existing standpipe system shall be made to comply with the standpipe rules of the board of standards and appeals in all other respects.

THE RESOLUTION—

(1277-27-A)

WHEREAS, Frank W. Fitzpatrick, for Western District Cleaners and Dyers, filed, December 6, 1927, an appeal from an order of the fire commissioner, affecting premises 132-136 Academy street, Long Island City, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated July 5, 1927, reads:

"1. Discontinue the use of the above premises for factory purposes occupied in violation of Sec. 270 of the Labor Law, Sec. 151 and 176 of Ch. 10 of the Code of Ordinances. Defects noted as follows:

"3. Portion of premises used for dry goods above storage garage.";

and

WHEREAS, the premises consist of a plot of ground having a frontage of 75.06 ft. on Academy street and a depth of 100.1 ft., upon which is located a group of one and two-story non-fireproof buildings; OCCUPIED as a dry cleaning establishment; the building in question being non-fireproof, two stories in height, 25.02 ft. by 100.1 ft. in area at first story and 25.02 ft. by 90 ft. in area above; OCCUPIED: 1st story, front, garage for motor trucks used in the conduct of the business; rear, receiving and spotting room, 3 persons; 2nd story, pressing room, 15 persons; and

WHEREAS, appellant contends that the story above the garage is not used for the storage of dry goods but for pressing dresses, etc., which have been cleaned in other parts of the premises; that the garage is a necessity in the conduct of the business and that the ceiling of the garage is metal covered and the stair enclosure is of fireproof construction.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the use of the gasoline storage tank buried within the garage area shall be discontinued and same shall be filled with clean, dry sand; that the garage wall enclosure shall be unpierced on all sides, except one 3 ft. 8 in. wide emergency exit to yard; that there shall be no vertical opening from the garage to any portion of the premises; that the ceiling construction throughout, above the garage, and the floor construction of the garage shall be of approved fireproof construction with reinforced concrete arches or other approved fireproof masonry; that the garage use shall be restricted to the automobiles used in the conduct of the business on the premises and shall not exceed five (5) automobiles; that all permits necessary for the prosecution of the work shall be obtained within six months and the work completed within one year from the date of this action.

263-26-A.

APPELLANT—Gaffney Construction Corp., owner.

SUBJECT—Application for reopening—re appeal from decision of the fire commissioner.

PREMISES AFFECTED—East side of Zerega avenue, 236.15 ft. south of Quimby avenue, Bronx.

APPEARANCES—

For Appellant: Charles B. Meyers.

ACTION OF BOARD—Appeal reopened and resolution amended.

THE VOTE TO REOPEN AND AMEND RESOLUTION—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle.....	4
Negative	0
Absent: Chief Kenlon.....	1

THE RESOLUTION—

(263-26-A)

WHEREAS, Gaffney Construction Corp., owner, filed, March 26, 1926, an appeal from a decision of the fire commissioner, affecting premises east side of Zerega avenue, 236.15 ft. south of Quimby avenue, Borough of The Bronx; and

WHEREAS, the decision of the fire commissioner, rendered March 4, 1926 (N. B. Applic. No. 435-1926), reads:

"6. A separate fill pipe must be provided for each fuel oil tank.

"28. Show fuel oil tanks enclosed and protected as per Rule 6 and Rule 4, Section 3.

"29. Asphalt tanks must be buried and equipped with a fire extinguishing system and a fire alarm telegraph system as per Chapter 10, Section 111 of the Code of Ordinances.

"35. This plant must be equipped with a standpipe system in accordance with Rule 37 of the Standpipe Rules.";

and

WHEREAS, the premises consist of a large plot of ground, 353 ft. by 266 ft., about 93,898 sq. ft. in area, where it is proposed to install two 20,000-gallon fuel oil storage tanks, three 23,500-gallon asphalt storage tanks, enclosed by a corrugated iron shed, 42 ft. by 65 ft. in area; and

WHEREAS, the appellant proposes, as to Item 6, to provide one 4-inch fill pipe from the dock, and rising between the two fuel oil tanks with a swinging extension at top reaching the inlet of either tank; as to Item 28, to erect the two vertical fuel oil tanks above ground of proper distance apart with a surrounding reinforced concrete dike wall 1 ft. in thickness by 4 ft. 2 in. in height; as to Item 29, to erect three horizontal asphalt tanks above ground on 12 in. by 12 in. wooden saddles over a heavy pile foundation, a surrounding concrete wall, 6 in. in thickness by 2 ft. in height, forming a reservoir under tanks; the appellant contends, as to Item 35, that there is no building within 150 ft. of the tanks; that the premises is vacant land and bounded at the east by Westchester Creek; and

WHEREAS, since the granting of the original application there has been installed throughout the adjoining city streets city water service, together with hydrants on the city highway; and

WHEREAS, that portion of the plant operated other than an open yard is equipped in accordance with the original resolution with such other fire protecting appliances.

Resolved, that the decision of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, as to Item 6, *on condition* that the single fill pipe shall be limited to the supply of but two oil tanks; as to Item 28, *on condition* that a reservoir of reinforced concrete, equal to 60 per cent of the combined capacity of the tanks, shall be provided; as to Item 29, *on condition* that the asphalt tanks shall be enclosed in a metal structure; that a reservoir of not less than 60 per cent of the capacity of any single tank shall be provided; as to Item 35, *on condition* that the foregoing stipulations shall be complied with.

THE RESOLUTION—

(1014-27-BZ)

WHEREAS, Alfred J. Boulton, substituted for Herman Wolff, for Rachel Salit and Pepie Kornreich, owners, filed, September 16, 1927, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station; premises 61-65 Quentin road and 176-188 Kings Highway, southwest corner of West 11th street, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, July 10, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Quentin road is in a business and residence district, Kings Highway is in a business district and West 11th street is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered August 2, 1927 (re Applic. No. 13668-27), reads:

"Proposed gas station prohibited in a Business District, therefore denied, under Art. 2, Section 4, Par. 46

of Zone Resolution for prohibited use in a Business District.";

and

WHEREAS, the premises consist of a one-story triangular building used for stores; it is proposed to remove a portion of the building at the junction of Kings Highway and Quentin road, erect a one-story office, about 19 ft. by 40 ft., bury two 550-gallon tanks and erect seven pumps for the purpose of conducting a gasoline service station within a business district; and

WHEREAS, the board deemed that applicant did not substantiate his basis of appeal brought under section 21 of the building zone resolution.

Resolved, that the decision of the superintendent of buildings be and it hereby is affirmed, and the application be and it hereby is denied.

THE RESOLUTION—

(91-28-BZ)

WHEREAS, Weeks Avenue Construction Co., Inc., owner, filed, January 31, 1928, an application, under the building zone resolution, to permit the extension, from a business district into a residence district, of a proposed business building; premises 80-84 East 161st street and 850-864 Gerard avenue, southeast corner, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, July 10, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that East 161st street is in a business district; Gerard avenue, south of a point 100 ft. south of East 161st street, is in a residence district, and River avenue, south of a point 100 ft. south of East 161st street, is in an unrestricted district; and

WHEREAS, the decision of the superintendent of buildings, rendered January 12, 1928 (re Applic. N. B. 36-28), reads:

"1. The projection of proposed business building into the residence district is contrary to the Building Zone Resolution."; and

WHEREAS, the proposed building is to be of non-fireproof construction, one story in height, with a frontage of 91 ft. 11½ in. on East 161st street and 111 ft. 2 in. on Gerard avenue; to be occupied as stores; and

WHEREAS, the board deemed that applicant substantiated his basis of appeal under section 7, subdivision b, in that the use district boundary line divides the plot under appeal, and under section 7, subdivision c, for the reason that it is the extension of a proposed business building.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the southerly gable wall of these premises shall be unpierced throughout its entire height and length; that the conduct, use and operation of that portion of the premises within the residence use area shall be restricted to only such business permitted under the building zone regulations for business districts, and that the requirements of the building zone resolution otherwise shall be complied with in all respects, and that all permits required shall be obtained within six months and any work involved thereby shall be completed within one year from the date of this action.

47-28-BZ.

THE RESOLUTION—

(47-28-BZ)

WHEREAS, John J. Dunnigan, for Adolph Weg, owner, filed, January 18, 1928, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station; premises northeast intersection of Bailey avenue and Bailey place, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, July 10, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Bailey avenue, Bailey place and West 234th street are all in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered January 18, 1928 (re App. N. B. 2686-27), reads:

"1. Erection of building and maintenance of premises in business district to be used for gasoline selling station is contrary to provisions of Building Zone Resolution."

and

WHEREAS, the premises consist of a plot of ground having a frontage of 157.5 ft. on Bailey avenue, 123.52 ft. on Bailey place and a distance of 40.47 ft. across the rear, upon which it is proposed to erect a one-story office, 25 ft. by 12 ft. in area, and to install the necessary tanks and pumps for a gasoline service station; and

WHEREAS, the board deemed that applicant substantiated his basis of appeal brought under section 21 of the building zone resolution in that, owing to the irregular shape and contour of the plot and the steep grade on Bailey place, the plot would be practically unsuited to any other purpose than that of a gasoline service station.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the building erected on the premises shall be located along the northerly boundary line of the plot; that there shall be incorporated at the southerly end of the plot a semi-circular concrete platform not less than 12 in. above the mean grade sidewalk level; that any gasoline pumps installed shall be located along the easterly or Bailey place property line on Bailey avenue grade; that a concrete curbing not less than 12 in. in height above the grade level of Bailey avenue shall be installed and not more than two driveways shall be installed therein, not exceeding a width of 10 ft. each; that a fence of substantial construction with iron

uprights and heavy gauge wire or of wrought-iron construction shall be incorporated along the Bailey place building line, not less than 6 ft. 6 in. in height; that there shall be no grease racks or pit service incorporated on these premises; that the architect shall make a return of the drawings in accordance with the foregoing stipulations for the approval of this board before submission of same to the building superintendent or the fire department; that all permits required shall be obtained within six months and any work involved thereby shall be completed within one year from the date of this action.

THE RESOLUTION—

(88-28-BZ)

WHEREAS, William F. Regan, for Alex. Tyszlowski, owner, filed, January 31, 1928, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station; premises 109-65 to 109-75 Sutphin boulevard, northeast corner of Brinkerhoff avenue, Jamaica, Borough of Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, July 10, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Sutphin boulevard is in a business district, Brinkerhoff avenue is in a residence and unrestricted district and Glassboro avenue is in a residence and unrestricted district; and

WHEREAS, the decision of the fire commissioner, rendered January 11, 1928 (re Plan No. 58-28), reads:

"A gasoline service station may not be permitted in a business district. Appeal may be taken to the Board of Standards and Appeals."

and

WHEREAS, the premises consist of an existing two-car frame garage, 20 ft. by 18 ft., on the rear of a corner lot; it is proposed to bury five 550-gallon tanks and erect five pumps on the front of the lot for the purpose of conducting a gasoline service station within a business district; and

WHEREAS, applicant predicated the appeal under principle of rules of exception, section 7, subdivision g, of the building zone resolution, which requires that 80 per cent consents of an area deemed affected, in that he has filed 83.9 per cent consents of an area fixed by the board and deemed affected; and

WHEREAS, the applicant has sustained his basis of appeal under the principle of section 7g of the building zone resolution, he is entitled to relief under section 21 of the building zone resolution.

MINUTES

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that there shall be erected along the northerly and easterly property line an 8-foot wall of approved masonry, finished on the exterior of the premises with enameled brick or light-colored face brick constructed in panel design, coped with natural stone; that there shall be incorporated at the building line of both street fronts a concrete curbing not less than 12 in. in height above grade; that there shall be not more than two driveway entrances not exceeding a width of 10 ft. on the Sutphin boulevard frontage; that the pumps shall be set back not less than 6 ft. from the building line on the Sutphin boulevard front; that there shall be incorporated a concrete platform not less than 12 in. in height for a depth of 7 ft. on the Sutphin boulevard front; that there shall be no grease racks or pits installed or operated on these premises; that any structure erected on these premises shall be used in conjunction with the conduct of the gasoline service station and shall not exceed a height of one story above grade and shall be finished on the exterior with enameled brick or face brick with natural stone or architectural terra cotta trimming; the roof shall be finished with variegated slate or tile of Spanish form; that any advertising display shall be restricted to the illuminating lamps on the pumps or flat wall signs on the structure erected on the premises; that all permits required shall be obtained within six months and all work involved completed within one year from the date of this action; that the architect shall make a return to this board for approval of the plans, in accordance with the foregoing conditions, before submission of same to the administrative officials having jurisdiction.

THE RESOLUTION—

(66-28-BZ)

WHEREAS, James Kearney, for Mary M. Shepherd, owner, filed, January 25, 1928, an application, under the building zone resolution, to permit in a business district and residence district the erection and maintenance of a gasoline service station; premises 205-43 Hollis avenue and 109-42 Cross Island boulevard, Hollis, Borough of Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, July 10, 1928, after due notice by publication in the bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Hollis avenue is in a business district, Cross Island (Rosedale) boulevard is in a residence

and business district and 205th place (Thomas street) is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered January 24, 1928 (re Plan No. N. B. 343-28), reads:

"The erection of a building for use as gasoline service station of the use of such premises is contrary to Article 2, Section 4, Building Zone Resolution.";

and

WHEREAS, it is proposed to erect a one-story metal office and rest room, 24 ft. by 12 ft. in area, bury four 550-gallon tanks and erect four pumps for the purpose of conducting a gasoline service station within a business and residence district; the north end of the premises extending 7.33 ft. into the residence district; and

WHEREAS, the applicant has filed 87.7 per cent consents of an area deemed affected and fixed by the board; and

WHEREAS, the board deemed that applicant is entitled to relief under section 21.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that there shall be erected along the westerly and northerly property lines a wall of approved masonry, not less than 8 ft. in height, the interior of the wall to be faced with enamel brick or light-color face brick, laid out in panel design and coped with natural stone or architectural terra cotta; that there shall be no grease racks or pits installed or operated on the premises; that the proposed building for the shelter of the operator and patrons of the premises shall be erected substantially in the middle of the plot of the area as indicated on plan filed in this appeal, and shall be finished on the exterior throughout with enamel brick or light-color face brick with two-tone trim at all openings; that no gasoline pump shall be installed within 10 ft. of the building line on either street front; that the conduct and operation of the gasoline service station shall be restricted to and maintained within the property of these premises; that there shall be constructed along the building line of this property on both street fronts a concrete curbing not less than 12 in. in height with not more than two entrances on the Cross Island boulevard frontage, not exceeding a width of 10 ft. each and an exit and entrance on the Hollis avenue frontage not exceeding a width of 10 ft. each; that any advertising display shall be restricted to the illuminated glass lamps of the gasoline pumps and flat wall sign incorporated on the structure, and that all permits shall be obtained within six months and any work involved shall be completed within one year from the date of this action.

WHEREAS, Frank W. Fitzpatrick, for Western District

MINUTES

Cleaners and Dyers, owner, filed, December 6, 1927, an application, under the building zone resolution, to permit in a business district the maintenance of a dry cleaning establishment; premises 132-136 Academy street, Long Island City, Borough of Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, May 22, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Academy street is in a business district; Payntar avenue, west of a point 100 ft. east of Academy street, is in a business district; Payntar avenue, east of a point 100 ft. east of Academy street, is in an unrestricted district; Beebe avenue, west of a point 100 ft. east of Academy street, is in a business district; Beebe avenue, east of a point 100 ft. east of Academy street, is in an unrestricted district, and 30th street is in an unrestricted district; and

WHEREAS, the decision of the superintendent of buildings, rendered April 3, 1928, and order of the fire commissioner, rendered July 5, 1927, read:

"Your request for a Certificate of Occupancy, premises Academy Street, east side, 150 feet north of Payntar Avenue, Long Island City, to be used as dry cleaning establishment, is hereby denied for the reason that a business of this character is not allowed in this district.";

and

WHEREAS, the order of the fire commissioner reads:

"4. Portion of premises used as dyeing and cleaning establishment.";

and

WHEREAS, the premises consist of a group of non-fireproof buildings having a frontage of 75.06 ft. and a depth of 100.10 ft.; No. 132 and No. 134 being buildings occupied as a dry cleaning and dyeing establishment since the premises were in an unrestricted use district; No. 136, the building in question, being subsequently erected for use as a garage and for storage purposes; this building is non-fireproof, two stories in height, 25.02 ft. by 100.10 ft. in area and is now occupied on first story as a garage used in connection with the conduct of the business and as a receiving and spotting room; the second story being used as a pressing room; and

WHEREAS, the board deemed that applicant is entitled to relief under section 21 of the building zone resolution; and

WHEREAS, this application was granted by the board at its meeting, May 22, 1928, on certain conditions; and

WHEREAS, the board has granted an appeal, Cal. No. 1277-27-A, in the matter of the conduct and operation of a garage on these premises and the board deemed that the original resolution should be modified.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that any existing gasoline storage tanks for motor vehicle supply and use be removed or filled up with dry, clean sand and sealed; that the garage shall be cut off and segregated from the remainder of premises by walls, floors and ceiling constructed of approved fireproof material with no vertical openings; that the building shall not be increased in height or area; that all permits required shall be obtained within sixty days and any work involved by the terms of the foregoing resolution shall be completed within sixty days from the date of this action.

AREAS FIXED.

(1224-27-BZ)

The chairman read a communication from Messrs. Cannava and Viviani, requesting the board to fix the area deemed affected and within which to obtain consents to permit in a business district the erection and maintenance of a gasoline service station; premises 3000-3010 Boston road, 1061-1069 Adee avenue and 3001-3009 Lurting avenue, northeast corner of Boston road and Adee avenue, Borough of The Bronx.

The following area was approved by the board:

Both sides of Lurting avenue and also Boston road, from a point 200 ft. north of premises in question to a point 400 ft. south of premises in question; both sides of Adee avenue, from Laconia avenue to a point 400 ft. west of premises in question.

(15-28-BZ)

The chairman read a communication from Stanley Jahoda, requesting the board to fix the area deemed affected and within which to obtain consents to permit in a business district the erection and maintenance of a gasoline service station; premises southeast corner of Hillside avenue and 207th street, Queens Village, Borough of Queens.

The following area was approved by the board:

Both sides of Hillside avenue, from Cross Island boulevard to a point 400 ft. east of premises in question; both sides of 207th street, from Hillside avenue to 89th avenue; also the westerly side of 208th street, from Hillside avenue to a point 190 ft. south of Hillside avenue.

(253-28-BZ)

The chairman read a communication from William F. Doyle, requesting the board to fix the area deemed affected and within which to obtain consents to permit, partly in a business district and partly in a residence district, the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 7817-7825 Third avenue and 301-313 79th street, Borough of Brooklyn.

The following area was approved by the board:

Both sides of 79th street, from a point 200 ft. west of Third avenue to a point 400 ft. east of the premises in question; both sides of Third avenue, from 80th street to a point 100 ft. north of 78th street and, also, the property at the rear, within 50 ft. of the lot line of the premises in question.

THE RESOLUTION—

(169-28-S)

WHEREAS, John J. Gilmartin, for Samuel Arnow, owner, filed, February 25, 1928, a petition for a variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises 2328 Broadway, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered February 3, 1928 (Alt. 2836-1927), reads:

"6. Exits do not comply with Section 271 of the Labor Law.

"Fire escape does not comply with the Labor Law.";

and

WHEREAS, the building is non-fireproof, three stories (34 ft.) in height, 22 ft. by 79 ft. in area at first story and 22 ft. by 56 ft. in area above; OCCUPIED: 1st story, store and manufacturing, 20 persons; 2nd story, showrooms and manufacturing, 20 persons; 3rd story, office, 15 persons; EXITS: an interior fireproof stairway, extending from the first story to top story, enclosed in fire-resisting partitions with fireproof doors at openings; ROOFS of adjoining buildings: to north, two stories lower; to south, three stories higher; and

WHEREAS, petitioner proposes to provide a 60-degree fire escape on the front of the building, having fireproof windows along the course thereof, extending from the third story to the second story balcony, with drop ladder in guides to street; and

WHEREAS, petitioner contends that to provide the required 45-degree stairway and counterbalanced stair to street would require subdivided fireproof windows across the entire front of the building and that this requirement would destroy the intended use of the building.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted on condition that a balcony fire escape shall be provided on the front of the building, with 60-degree connecting stairs, with drop ladders in guides at both ends of the lower balcony to reach sidewalk level; that the factory occupancy shall be restricted to that of the needle trades and confined to the second story, and that this petition is granted only so long as conditions as to use and occupancy otherwise remain substantially unchanged.

THE RESOLUTION—

(1276-27-S)

WHEREAS, Frank W. Fitzpatrick, for Western District Cleaners and Dyers, Inc., owner, filed, December 6, 1927, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 132-136 Academy street, Long Island City, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated July 5, 1927, reads:

"1. Discontinue the use of the above premises for factory purposes occupied in violation of Sec. 270 of the Labor Law, Sec. 151 and 176 of Ch. 10 of the Code of Ordinances. Defects noted as follows:

"1. Stairway in south section of building not 44" wide and not enclosed in fireproof material.";

and

WHEREAS, the premises consist of a plot of ground having a frontage of 75.06 ft. on Academy street and a depth of 100.1 ft., upon which is located a group of non-fireproof, one and two-story buildings; OCCUPIED as a dry cleaning establishment; EXITS: (southerly or "old" group erected prior to 1913) an interior wooden stairway, 39 in. wide, extending from the first to second story, enclosed in wood partitions, metal covered on both sides with wood doors at openings; a 3-foot-wide iron stairway, extending from the second story to yard, with EGRESS from the yard through buildings in group to street; EXITS: (northerly or "new" building erected in 1927) an interior 48-inch-wide fireproof stairway, extending from the first to second story, enclosed in fireproof partitions with fireproof doors at openings; the secondary means of egress being openings in the south wall of this building leading to the exits in the southerly or "old" group of buildings; OCCUPIED: northerly or "new" building: 1st story, front, garage for motor trucks used in the conduct of the business; rear, receiving and spotting room, 3 persons; 2nd story, pressing room, 15 persons; southerly or "old" group: 1st story, 15 persons; 2nd story, 8 persons; and

MINUTES

WHEREAS, petitioner requests, in view of the light occupancy, the acceptance of the existing means of egress from the premises.

Resolved, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is *granted on condition* that the stairs referred to in this order shall be enclosed with fire-resisting construction, carried from the basement to the roof, with a fixed double-rung iron ladder from the top story hall to a scuttle in the roof, and that all openings thereto shall be equipped with self-closing, fireproof doors; that the conditions stipulated under Cal. No. 1277-27-A and Cal. No. 1275-27-BZ shall be complied with in conjunction with this stipulation so far as the premises are affected, and this petition is granted so long as conditions as to occupancy and use otherwise remain unchanged and that the business is conducted in single use, operation and tenancy.

193-28-S.

PETITIONER—J. Burmeister, for Master Rule Mfg. Co., Inc., owner.

SUBJECT—Variation of the labor law as cited in order of fire commissioner.

PREMISES AFFECTED—815 East 136th street, The Bronx.

APPEARANCES—

For Petitioner: J. Burmeister.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

THE RESOLUTION—

(193-28-S)

WHEREAS, J. Burmeister, for Master Rule Manufacturing Co., Inc., owner, filed, March 2, 1928, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 815 East 136th street, Borough of The Bronx; and

WHEREAS, the order of the fire commissioner, dated July 23, 1926 (Order No. 99851-LD), reads:

"1. Arrange the interior stairway at the front of building and stairway at the rear of the building so that same conform to Section 270 of the Labor Law.

"Among the defects noted are the following:

"Stairways not constructed of incombustible material and not 44" wide. Not enclosed in fireproof partitions. Roof of stair enclosure not constructed of fireproof material."

and

WHEREAS, the building is non-fireproof, two stories in height, 75 ft. by 100 ft. in area at first story and 75 ft. by 20 ft. 8 in. in area above; OCCUPIED: 1st story, manufacture of master rules, 40 persons; 2nd story, office, 4 persons; EQUIPPED with a sprinkler system and a fire alarm signal system; EXITS: an interior stairway at southwest corner of the building, extending from the first story to second story, enclosed in metal lath and cement partitions with fireproof doors at openings, also an open interior stairway towards the center of the building, extending from first story to second story; ROOFS of adjoining buildings: same height; and

WHEREAS, the petitioner claims that both interior stairways are more than 44 in. in width; that the two interior stairways were constructed as required and passed on by the inspector at the time the building was erected in 1924; that Certificate of Occupancy No. 582-1924 was issued by the bureau of buildings on April 12, 1924, for factory occupancy; furthermore, the petitioner contends that the exits are adequate and no fire hazard exists; and

WHEREAS, the Certificate of Occupancy No. 582-1924 was issued by the bureau of buildings and is now in force as to factory occupancy on the first story; and

WHEREAS, the second story portion of structure is but 20 ft. deep, used as offices.

Resolved, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is *granted on condition* that the building shall be not increased in height or area; that the occupancy and use shall be restricted to the conditions as stipulated in the certificate of occupancy now in force; that both existing stairways shall be enclosed in fire-resisting construction, and this variation is granted so long as conditions as to occupancy and use remain substantially unchanged.

THE RESOLUTION—

(376-28-S)

WHEREAS, William A. Sealey, for Edward F. Caldwell & Co., Inc., owner, filed, April 20, 1928, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 38-40 West 15th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated October 20, 1927 (Order No. 27542-LD), reads:

"1. Provide a passageway consisting of partitions of fire resisting material from the termination of interior stairway west side of building at 1st story to street as per Sec. 271 of the Labor Law."

and

WHEREAS, the building is non-fireproof, six stories in height, 50 ft. by 95 ft. in area; OCCUPIED: cellar, storage, 16 persons; 1st story, showroom, 15 persons; 2nd to 6th stories, manufacture of electric light fixtures, not more than 63 persons on each story; EQUIPPED with a sprinkler system and a fire alarm signal system; EXITS: two interior non-fireproof stairways, extending from the cellar story to roof, enclosed in fireproof partitions with fireproof doors at openings; a party wall fire escape on the rear of the building, having non-fireproof openings along the course thereof, extending from the first story to top story; a gooseneck ladder from top balcony to roof and a drop ladder from lowest balcony to yard level; ROOFS of adjoining buildings: two stories higher at west; six stories higher at east; and

WHEREAS, the petitioner claims that the building was erected prior to 1913; that a fireproof passageway has been constructed in the cellar from the foot of westerly interior stairway to the street instead of on the first story as called for in the order; that to build the passageway on first story would destroy the use of that story for showroom purposes; furthermore, the building is provided with a horizontal exit equipped with fire doors on each story leading to the fireproof building adjoining at east; and

WHEREAS, there is on each story a horizontal exit to the adjoining building to the east in the same operation and tenancy.

MINUTES

Resolved, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is *granted*, only so far as it affects egress from the termination of the stair hall on the first story, *on condition* that the westerly stair-hall enclosure shall be carried to the basement, the enclosure to be constructed of fire-resisting material throughout, with self-closing, fireproof doors at all openings, with egress from the termination at the front of the building directly up to the sidewalk of public highway; that any window openings on the course of the stairs from the basement level to the street shall be equipped with approved metal frames, glazed with wire glass, and this variation is granted only so long as conditions as to occupancy and use, in single tenancy, remain substantially unchanged.

388-28-S.

PETITIONER—Hamill, Weinberg & Munro, for I. Miller & Sons, Inc., owner.

SUBJECT—Variation of the labor law as cited in decision of the superintendent of buildings.

PREMISES AFFECTED—562 Fifth avenue and 1 West 46th street, northwest corner, Manhattan.

APPEARANCES—

For Petitioner: James J. Munroe.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

THE VOTE—

THE RESOLUTION—

(388-28-S)

WHEREAS, Hamill, Weinberg & Munro, for I. Miller and Sons, Inc., owner, filed, April 24, 1928, a petition for a variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises 562 Fifth avenue and 1 West 46th street, northwest corner, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered April 5, 1928 (Applic. No. 340-1928), reads:

"1. All structural steel should be enclosed in 2" of fireproof material, Sec. 264 of the Labor Law.

"2. Doors to fire tower not 44" in clear (one 34" in clear) Sec. 270 Labor Law.

"3. Doors to fireproof stairs not 44" in clear (one 34" in clear) Sec. 270 Labor Law.

"5. All windows should be approved fireproof windows not greater than 720 sq. in. in each lighter. Sec. 264 Labor Law.

"8. All doors leading from workrooms where more than five persons are employed must swing out."

and

WHEREAS, the building is fireproof, twelve stories (136 ft. and pent house) in height, 100 ft. by 63 ft. 9 in. and 27 ft. 1 in., irregular, in depth; OCCUPIED: offices, showrooms and 25 per cent manufacturing, not more than 75 persons on a story; located within a business use district; EQUIPPED with a standpipe system and a fire alarm signal system; EXITS: a fire tower; an interior fireproof stairway, extending from the first story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, the petitioner claims, as to Items 2 and 3, that the structure was erected in 1920 for an office building, provided with a fire tower and a fireproof interior stairs, each 44 in. in width with exit doors 3 ft. in width; as to Item 1, that the structural steel floor beams are protected with 1½ in. of fireproofing; as to Item 5, that to divide the glass in windows would destroy the architectural appearance and also impair the rental value of the building; as to Item 8, that to swing the exit doors from rooms to

corridor on each story would cause a serious obstruction to the egress of those passing along the public corridor, and to rehang these doors would impose an unnecessary hardship upon the owner; and

WHEREAS, the premises is a fireproof structure, provided with an approved primary means of exit and fire tower, equipped with a standpipe system throughout and a fire alarm system.

Resolved, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is *granted on condition* that the building shall be not increased in height or area; that the manufacturing use shall not exceed 25 per cent of the floor area of the premises and shall be restricted to the conduct of light needle work and the jewelry trade in the readjustment, alteration and nominal repair of merchandise purchased on the premises; that the live load imposed on any one floor shall not exceed that permitted under the certificate of occupancy now in force; that the occupancy shall be restricted to the legal capacity of the primary means of exit, the interior stairway.

171-28-S.

PETITIONER—Croker Nat'l Fire Prev. Eng. Co., for Julia Goldberg, owner.

SUBJECT—Variation of the labor law as cited in order of fire commissioner.

PREMISES AFFECTED—12-14 West 32nd street, Manhattan.

APPEARANCES—

For Petitioner: Herman E. Horwood.

For Administration: Inspector Maher of fire department.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin.....	5

THE RESOLUTION—

(171-28-S)

WHEREAS, Croker National Fire Prevention Engineering Co., for Julia Goldberg, owner, filed, February 27, 1928, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 12-14 West 32nd street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated October 7, 1927 (Order No. 26910-LD), reads:

"Inspection shows the following to be necessary to make the above premises comply with the Labor Law.

"1. Provide an independent fireproof passageway from termination of rear exterior screened stairway to street, as per Section 268 of the Labor Law."

and

WHEREAS, the building is fireproof, twelve stories (147 ft. 11 in.) in height, 33 ft. 8 in. by 93 ft. in area at first story and 33 ft. 8 in. by 85 ft. in area above; OCCUPIED: 1st story, store, 5 persons; 2nd story, dress jobbing, 6 persons; 3rd story, vacant at present only; 4th story, manufacturing infants coats, 15 persons; 5th story, showroom and neckwear stock, 15 persons; 6th story, brassiere manufacturing, 22 persons; 7th story, manufacturing underwear, 30 persons; 8th story, manufacturing underwear, 20 persons; 9th story, office, showroom, underwear cutting, 7 persons; 10th story, manufacturing underwear, 30 persons; 11th story, brassiere manufacturing, 12 persons; 12th story, manufacturing underwear, 35 persons; EQUIPPED with a fire alarm signal system; EXITS: an interior steel strings and risers and slate treads stairway, extending from the first story to roof, enclosed in 3-inch plaster block partitions with fireproof doors at openings; an exterior screened iron stairway on the rear of the building, having fireproof openings along the course thereof, extending from the roof to the yard, with EGRESS

MINUTES

from the termination of the fire escape by means of a platform at the level of the yard of the premises to the rear and leading to the open yards of these rear premises, with egress from these yards through the buildings opening thereon; ROOFS of adjoining buildings: to east, seven stories lower; to west, one story lower; and

WHEREAS, petitioner contends that the building in question was erected in 1907 and the conditions have been practically the same since that time and requests the acceptance of the existing means of egress from the termination of the rear fire escape; and

WHEREAS, this occupancy has existed for more than twenty years under the same exit conditions.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted, only so far as it affects the egress from the termination of the rear screened stairway, on condition that egress from the termination shall be maintained to three open yards of the premises directly to the rear on West 31st street, with egress therefrom through buildings to street, as shown on the plans of record filed with this petition; that the requirements of the labor law shall be complied with in all other respects, and this variation is granted so long as conditions as to occupancy and use remain substantially unchanged.

163-28-S.

PETITIONER—Cass Gilbert, Inc., for Williams-1811 Realty Corp., owner.

SUBJECT—Variation of the labor law as cited in decision of the superintendent of buildings.

PREMISES AFFECTED—259-273 Tenth avenue and 502 West 26th street, Manhattan.

APPEARANCES—

THE RESOLUTION—

(163-28-S)

WHEREAS, Cass Gilbert, Inc., for the Williams-1811 Realty Corp., owner, filed, February 24, 1928, a petition for a variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises southwest corner of Tenth avenue and 26th street, 259-273 Tenth avenue and 502 West 26th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered February 24, 1928 (N.B. 263-1927), reads:

"Item 2. Wood and glass partitions erected on 7th floor, contrary to Sec. 264 of the Labor Law.

"3. Wood wainscote on walls of office southwest corner of 7th floor contrary to Sec. 264 of the Labor Law.";

and

WHEREAS, the building is fireproof, ten stories in height, 200 ft. by 100 ft. in area; OCCUPIED: basement, storage and heating, 6 persons; 1st story, shipping, 60 persons; 2nd, 3rd and 4th stories, storage, 10 persons each story; 5th and 6th stories, storage and manufacturing, 10 persons each story; 7th story, accounting and salesroom, 110 persons; 8th, 9th and 10th stories, storage, 6 persons each story; EQUIPPED with a fire tower and an interior fireproof stairway and a sprinkler system; fire drills are conducted on the premises; and

WHEREAS, oak and glass partitions and oak and wire partitions have been installed in the center rooms on the seventh story, front, of the building, the oak and wire partitions being 8 ft. 9 in. high and the oak and glass extending to the ceiling; there has also been installed in one room on

the northwest corner of the seventh story wood wainscoting 3 ft. 1¾ in. high; and

WHEREAS, petitioner contends that the seventh story of the building is used exclusively for accounting and salesroom; that there will be no manufacturing on this story; that the area occupied by the partitions and wainscoting is a very small per cent of the floor area; that the manufacturing is confined to the fifth and sixth stories and occupies only 10 per cent of the area of these stories; and

WHEREAS, the entire premises are occupied in single tenancy; and

WHEREAS, but one office on the seventh story on the southwest corner, used as the executive office of the business conducted on the premises, for interior decorative purposes is furnished with wood wainscoting 3 ft. high, planted solidly and rigidly fixed on fireproof construction.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted, only as to the single room in the southwest corner, on condition that the wainscoting shall be planted on fireproof partition construction, any interstices between the back of the wainscoting and the fireproof construction to be filled solidly with asbestos or other fireproof material, and granted, as to the wire screen partition enclosing the accounting room on the Tenth avenue front, seventh story, and one additional dwarf partition enclosing the telephone operator's space, on condition that the requirements of the labor law shall be complied with in all other respects, and this petition is granted only so long as conditions as to use and occupancy remain unchanged and in single tenancy.

1265-27-S.

PETITIONER—Croker Nat'l Fire Prevention Eng. Co., for Schlegel Investing Co., owner.

SUBJECT—Application for reopening—reconsideration (previously denied) re variation of the labor law as cited in order of fire commissioner.

WHEREAS, Croker National Fire Prevention Engineering Co., for Schlegel Investing Co., owner, filed, December 1, 1927, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 374-380 Second avenue and 300-310 East 22nd street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated May 28, 1927 (Order No. 21841-LD), reads:

"1. Reduce the area of wired glass in partitions enclosing stairway at east and west side of building all stories so that no single pane of glass shall exceed 360 sq. in. and not more than 720 sq. in. on any story as per rule 505 of the Industrial Code.

"4. Arrange exit doors leading to interior stairways west and east side of building, so that same will not obstruct stairways. Sec. 271 of the Labor Law.";

and

WHEREAS, the building is fireproof, ten stories in height, 84 ft. 7 in. by 194 ft. 2 in. in area; OCCUPIED: 1st

MINUTES

story, storage of printer's stock, 25 persons; 2nd story, printing, 35 persons; 3rd story, printing, 22 persons; 4th story, manufacture of buttons, 17 persons; 5th story, manufacture of buttons and jewelry cases, 40 persons; 6th story, printing, 55 persons; 7th story, printing, 20 persons; 8th story, printing, 12 persons; 9th story, printing, 14 persons; 10th story, printing, 20 persons; 235 persons above the first story; EQUIPPED with a sprinkler system; EXITS: four interior iron stairways, extending from the first story to roof, enclosed in a four-inch terra cotta partition with fireproof doors at openings; and

WHEREAS, in the partitions enclosing the easterly stairway there are four wire glass panels on each story and in the partitions enclosing the westerly stairway there are three wire glass panels on each story; each panel containing three lights of $\frac{1}{4}$ -inch wired glass, approximately $18\frac{1}{4}$ in. by 45 in. (822 sq. in.) in area; in each stair hall door there is a glass panel $18\frac{3}{4}$ in. by $41\frac{3}{4}$ in. (approximately 780 sq. in.) in area; on each side of both stairway enclosures, on each story, there is an opening 5 ft. wide equipped with a pair of fireproof doors, the one nearest the stairs being bolted top and bottom at all times, the other door swinging out; and

WHEREAS, petition contends that the glass panels and the stair doors were shown on the approved plans for the erection of the building; that the bolted section of the door is rarely used; that the occupancy of the greater portion of the building is less than 25 per cent of the permissible occupancy; proposes to divide the glass panels horizontally, in the center, with metal muntins and requests the acceptance of the existing exit doors leading to the interior stairways; and

WHEREAS, this petition was denied by the board at its meeting, May 1, 1928, and reopened by vote of the board.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted, as to Item 1, on condition that kalamein panels shall be installed on the sash on the loft side of the openings embraced within this order, and granted, as to Item 4, on condition that the existing doors to the stair hall shall be made self-closing and to open out, and this variation is granted so long as conditions as to occupancy and use otherwise remain substantially unchanged.

WARNING

Notice is hereby given to all petitioners, appellants and applicants, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

First, That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

Second, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

Third, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and of the posting of the calendars on the bulletin board in the

offices of the board and of the further publication of the calendars in the daily press.

Fourth, That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

Fifth, That the business of the board is to dispose of cases promptly, for the reason that the pendency of an appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of the appellant or petitioner to file necessary data, or by any other method of delay.

Sixth, That no appeal, application or petition will be accepted for filing unless, at the time of filing, all papers, plans and data required by law are supplied, as specified on the blank appeal, application or petition forms.

This issue of the Bulletin contains, in the order given—

Docket.

Notice of Adjournment.

Call of Clerk's Calendar.

The Trial Calendar.

Notices in Building Zone Cases.

Minutes of Regular Meeting, July 17, 1928, 10 a. m.

Minutes of Regular Meeting, July 17, 1928, 2 p. m.

Fuel Oil Burners Approved.

Reserve Calendar.

Progress Report.

PUBLIC HEARINGS

Tuesdays, at 10 a. m. and 2 p. m.

Special meetings as published in this Bulletin.

Call of Clerk's Calendar, Tuesdays, at 2 p. m.

All hearings are held in Room 1013, Municipal Building, Manhattan.

HOURS FOR CONSULTATION

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

CALL OF CLERK'S CALENDAR

The *Clerk's Calendar* consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, July 24, 1928, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, September 11, 1928, at 2 o'clock.

The *Clerk's Calendar* is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

NOTICE TO APPELLANTS AND PETITIONERS

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and disposition of same expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

MINUTES

BOARD OF STANDARDS AND APPEALS

REGULAR MEETING

TUESDAY MORNING, JULY 17, 1928

Present: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon, with Deputy Chief Martin substituting.

The minutes of the regular meeting of the Board, held Tuesday morning, July 10, 1928, and the minutes of the regular meeting of the Board held Tuesday afternoon, July 10, 1928, were approved as printed in the Bulletin, No. 29, Vol. XIII.

APPEALS FROM ADMINISTRATIVE ORDERS

210-28-A.

APPELLANT—J. R. Thompson, Inc., owner.

SUBJECT—Appeal from decision of the superintendent of buildings.

PREMISES AFFECTED—668 Eighth avenue, Manhattan.

APPEARANCES—None.

ACTION OF BOARD—Appeal denied.

THE VOTE TO GRANT—

Affirmative	0
Negative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon	5
Absent	0

THE RESOLUTION—

(210-28-A)

WHEREAS, J. R. Thompson, Inc., owner, filed, March 27, 1928, an appeal from a decision of the superintendent of buildings, affecting premises 668 Eighth avenue, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, dated February 16, 1928 (N. B. Applic. No. 272-1927), reads:

"10. Provide an outwardly swinging door at least 3 ft. wide located immediately adjacent to revolving door. Par. 5, Exit Rules, Board of Standards and Appeals."

and

WHEREAS, the building is non-fireproof, cellar and one story in height, 20 ft. 4 in. by 100 ft. in area; OCCUPIED as a restaurant: cellar, 10 persons; 1st story, 65 persons; it is proposed to use a revolving door, Type A, at the front entrance door in place of the swinging doors; and

WHEREAS, the appellant claims that the proposed revolving door is automatic, collapsible, panic-proof; that the egress through this particular revolving door cannot be blocked and no side swinging door is necessary.

Resolved, that the decision of the superintendent of buildings be and it hereby is *affirmed*, and the appeal be and it hereby is *denied*.

MINUTES

76-28-A.

APPELLANT—Arthur B. Levis, attorney for Theresa Squeri, owner.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—24-73 Kindred street, Astoria, Queens.

APPEARANCES—

For Appellant: Bernard Kommel and Alexander Klein.

For Administration: Inspector Meyer of fire department.

ACTION OF BOARD—Appeal denied.

THE VOTE TO GRANT—

Affirmative 0

Negative: Chairman Walsh, Commissioners

Connell, Holland and Guilfoyle and

Chief Kenlon 5

Absent 0

THE RESOLUTION—

(76-28-A)

WHEREAS, Arthur B. Levis, for Theresa Squeri, owner, filed, January 27, 1928, an appeal from an order of the fire commissioner, affecting premises 24-73 Kindred street, Astoria, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated December 1, 1927 (Order No. 13678-LD), reads:

"1. Provide a covering of 26 U. S. Gauge Metal on the plaster-board ceiling in garage enclosure. Sec. 154, Chapter 10, Code of Ordinances, N. Y.;"

and

WHEREAS, the building is non-fireproof, cellar and two stories in height, 20 ft. by 52 ft. 6 in. in area; OCCUPIED: cellar, garage for two cars; 1st and 2nd stories, living apartment on each story; and

WHEREAS, the appellant claims that the ceiling of the non-storage garage in the cellar is constructed of one-quarter-inch plaster boards covered with a scratch coat of plaster cement, which is in every way fire-retarding; furthermore, the appellant contends that the order is a technical one.

Resolved, that the order of the fire commissioner be and it hereby is affirmed, and the appeal be and it hereby is denied.

77-28-A.

APPELLANT—Arthur B. Levis, for Anthony Jerome, owner.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—24-11 24th street, Long Island City, Queens.

APPEARANCES—

For Appellant: Bernard Kommel and Alexander Klein.

For Administration: Inspector Meyer of fire department.

ACTION OF BOARD—Appeal denied.

THE VOTE TO GRANT—

Affirmative 0

Negative: Chairman Walsh, Commissioners

Connell, Holland and Guilfoyle and

Chief Kenlon 5

Absent 0

THE RESOLUTION—

(77-28-A)

WHEREAS, Arthur B. Levis, for Anthony Jerome, owner, filed, January 27, 1928, an appeal from an order of the fire commissioner, affecting premises 24-11 24th street, Long Island City, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated June 16, 1927, reads:

"Order No. 11201-LC:

"1. Provide a covering of approved fire retarding material on ceiling of garage as prescribed by rules of the Board of Standards and Appeals. See Vol. 2, No.

36, Page 620, Bulletin of Board of Standards and Appeals, Sept. 6, 1917, and Vol. No. 2, No. 45, Page 795, Nov. 8, 1917.";

and

WHEREAS, the building is non-fireproof, cellar and two stories in height, 20 ft. by 52 ft. 6 in. in area; OCCUPIED: cellar, garage for two cars; 1st and 2nd stories, living apartment on each story; and

WHEREAS, the appellant claims that the ceiling of the non-storage garage in the cellar is constructed of one-quarter-inch plaster-board covered with a scratch coat of plaster cement, which is in every way fire-retarding; furthermore, the appellant contends that the order is a technical one.

Resolved, that the order of the fire commissioner be and it hereby is affirmed, and the appeal be and it hereby is denied.

151-28-A.

APPELLANT—Carl F. Huttlinger, for The American Sugar Refining Co., owner.

SUBJECT—Appeal from decision of the fire commissioner.

PREMISES AFFECTED—2-10 South 2nd street, Brooklyn.

APPEARANCES—

For Appellant: T. L. McGannon.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners

Connell, Holland and Guilfoyle and Chief

Kenlon 5

Negative 0

Absent 0

THE RESOLUTION—

(151-28-A)

WHEREAS, Carl F. Huttlinger, for the American Sugar Refining Co., owner, filed, February 21, 1928, an appeal from a decision of the fire commissioner, affecting premises 2-10 South 2nd street, Borough of Brooklyn; and

WHEREAS, the decision of the fire commissioner, dated February 10, 1928 (Plan No. 986-27), reads:

"2. Show entire boiler room completely cut off from rest of building by fireproof materials, with egress to street, yard or court only.";

and

WHEREAS, the building is of fireproof construction (some steel exposed), one and four stories in height, 96 ft. by 189.75 ft. in area; OCCUPIED as a power plant for sugar refining: 1st story, pumps, 1 person; 2nd story, turbines, 3 persons; 3rd story, boilers and burners, 4 persons; 4th story, coal bins, no occupancy; a fuel oil burning system has been installed consisting of a 1,500-gallon storage tank buried outside, connected by piping to 24 fuel oil burners located at boilers on the third story; and

WHEREAS, the building is provided with a fireproof enclosed stairway from first story to fourth story, also a fireproof, unenclosed stairway from first story to third story (boiler room); and

WHEREAS, the appellant claims that the burners are only used to facilitate the ignition of the pulverized fuel; that they do not constitute a fuel oil burning system but simply an ignition system; that pulverized coal and not oil constitutes the fuel for this power plant; that the exits are adequate and there is no fire hazard; furthermore, the appellant contends that the building is a segregated fireproof power plant.

Resolved, that the decision of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted, only as long as the present conditions as to the fuel oil equipment of the existing boiler room plant remain substantially unchanged, on condition that fire extinguishing ap-

MINUTES

pliances, as directed by the fire commissioner, shall be installed and maintained.

466-28-A.

APPELLANT—Philip J. Sinnott, for Weprin & Glass Building Corp., lessee.

SUBJECT—Appeal from decision of the fire commissioner.

PREMISES AFFECTED—2013-2017 Third avenue and 200-208 East 111th street, southeast corner, Manhattan.

APPEARANCES—

For Appellant: Philip J. Sinnott.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon	5
Negative	0
Absent	0

THE RESOLUTION—

(466-28-A)

WHEREAS, Philip J. Sinnott, for Weprin & Glass Building Corp., lessee, filed, May 21, 1928, an appeal from a decision of the fire commissioner, affecting premises 2013-2017 Third avenue and 200-208 East 111th street, southeast corner, Borough of Manhattan; and

WHEREAS, the decision of the fire commissioner, dated May 8, 1928 (Plan No. 455-27), reads:

"4. Top of tank to be buried 2 feet below the lowest level within 10 feet. Examination continued when additional information is received.";

and

WHEREAS, the building is fireproof, cellar and two stories in height, 100 ft. 11 in. by 110 ft. in area; OCCUPIED: cellar, storage garage, 3 persons; 1st story, garage and gasoline service station, 6 persons; 2nd story, garage, 3 persons; it is proposed to place three 550-gallon gasoline storage tanks on the cellar floor entirely surrounded by 12 inches of concrete (except on top) as required by the code of ordinances, the entire enclosure to be surrounded by a brick wall 8 inches in thickness; and

WHEREAS, the appellant claims that upon excavating the cellar floor water is found; furthermore, the appellant contends that the proposed method of installing the gasoline tanks is as good as being buried 2 feet below the cellar floor.

Resolved, that the decision of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the tanks shall be separated, not less than 12 inches apart and encased completely with not less than 12 inches of stone concrete (of coarse aggregate not exceeding $\frac{3}{4}$ inches) on all sides and on top and that this protective construction shall be enclosed with a wall of approved masonry additional thereto extending from the cellar floor to the underside of the first story concrete floor construction; that the space above the concrete enclosure on the top of the tanks shall be filled in with clean, dry earth or sand and that the gasoline storage installation shall otherwise comply with all laws in all respects.

1044-27-A.

APPELLANT—John J. Gilmartin, for K. E. and A. K. Morgan, owners.

SUBJECT—Application for reopening—correction—re appeal from order of the fire commissioner.

PREMISES AFFECTED—700 Mott avenue, The Bronx.

APPEARANCES—None.

ACTION OF BOARD—Appeal reopened and resolution corrected.

THE VOTE TO REOPEN AND CORRECT RESOLUTION—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon	5
Negative	0
Absent	0

THE RESOLUTION—

(1044-27-A)

WHEREAS, John J. Gilmartin, for K. E. and A. K. Morgan, owners, filed, September 24, 1927, an appeal from an order of the fire commissioner, affecting premises 700 Mott avenue, Borough of The Bronx; and

WHEREAS, the order of the fire commissioner, dated May 18, 1927 (Order No. 21016-F), reads:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and $2\frac{1}{2}$ inch regulation Fire Department outlets on each story (including basements, cellars and roofs) placed within main stairway enclosure. Each outlet to be provided with sufficient feet of $2\frac{1}{2}$ inch standard hose attached thereto.";

and

WHEREAS, the building is non-fireproof, two stories (34 ft.) in height at Mott avenue and two stories (41 ft.) in height at Sheridan avenue, the two streets being at different levels; 118 ft. frontage on Mott avenue, 134 ft. on Sheridan avenue and a depth of 172 ft., a total area of approximately 12,400 sq. ft.; OCCUPIED as a laundry, 155 persons in entire premises; and

WHEREAS, the appellant contends that the building is open on all sides; that the building is equipped with a sprinkler system and, also, three two-inch standpipe risers with outlets and 50 ft. of two-inch hose at each outlet; and

WHEREAS, the floor area is subdivided; and

WHEREAS, this appeal was granted by the board at its meeting, February 28, 1928, on certain conditions, and the board deemed that a modification of these conditions should be made as to the central office connection.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the building shall not be increased in height, area or dimension; that the entire premises throughout shall be equipped with a two-source wet sprinkler system; that all interior door openings shall be equipped with at least one automatic fire door or self-closing, fire-proof door, and granted only as long as conditions as to occupancy and use remain substantially unchanged.

969-27-A.

APPELLANT—Samuel Rosenblum, substituted for Cornell Utilities Co., Inc., for the J. Hamburger Co., Inc., owner.

SUBJECT—Appeal from order of the fire commissioner (previously denied).

PREMISES AFFECTED—227-228 West street, Manhattan.

APPEARANCES—

For Appellant: Samuel Rosenblum.

For Administration: Inspector Meyer of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon	5
Negative	0
Absent	0

THE RESOLUTION—

(969-27-A)

WHEREAS, Samuel Rosenblum, substituted for Cornell Utilities Co., Inc., for The J. Hamburger Co., Inc., owner, filed, September 1, 1927, an appeal from an order of the

MINUTES

fire commissioner, affecting premises 227-228 West street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated August 10, 1927 (Order No. 39345-LC), reads:

"1. Separate boiler room from remainder of building as shown on approved plan No. 4273-26. Rule 33 of the Fuel Oil Rules."

and

WHEREAS, the building is fireproof, three stories in height, 50 ft. by 85 ft. in area; OCCUPIED: 1st story, provision market, 10 persons; 2nd story, offices, 10 persons; 3rd story, offices, 5 persons; a fuel oil burning system having been installed consisting of a 1,080-gallon storage tank, buried outside, connected by piping and valves to a Nokol oil burner located in the cellar using Grade B fuel oil;

and
WHEREAS, the appellant has filed plans showing the boiler room (where burner is placed), enclosed in fireproof partitions with two fireproof, self-closing doors opening to other parts of the cellar; furthermore, the appellant proposes to install an engineer's ladder in the front area leading to the sidewalk on West street; and

WHEREAS, the original appeal was denied by the board February 21, 1928; reopened June 20, 1928; and

WHEREAS, the appellant claims that the watchman on the premises is also an engineer holding the certificate of fitness; that a door from boiler room to the other part of cellar would keep the engineer in more direct connection, thus aiding him in performing his duties.

Resolved, that the order of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted on condition that there shall be provided in the existing sidewalk area at the front of the building a fixed iron ladder to sidewalk with a counterbalanced hatchway opening or grating at sidewalk level; that the openings in the fireproof enclosure of the existing boiler room shall be equipped with self-closing, fireproof doors, and that the fuel oil burning equipment shall otherwise be installed and maintained strictly in accordance with the fuel oil rules of the board of standards and appeals, and that all necessary permits shall be obtained, and granted only as long as the present use and occupancy remains substantially unchanged.

161-28-A.

APPELLANT—Mayer and Lowenstein, owners.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—43-43 Vernon boulevard, Long Island City, Borough of Queens.

APPEARANCES—

For Appellant: James H. Abraham.

For Administration: Inspector Meyer of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief

Kenlon 5

Negative 0

Absent 0

THE RESOLUTION—

(161-28-A)

WHEREAS, Mayer & Lowenstein, owners, filed, February 24, 1928, an appeal from an order of the fire commissioner, affecting premises 43-43 Vernon boulevard, Long Island City, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated February 7, 1928 (Order No. 15219-LC), reads:

"2. Have at least one person obtain a certificate of fitness to have care and supervision of oil selling station, which station must be under the supervision of such person while it is open for business. Sec. 160, Ch. 10. Examinations every day between 9 a. m. to 3 p. m. Saturdays 9 a. m. to 11 p. m. at 365 Jay Street, Brook-

lyn. Applicant must file two unmounted photographs of himself 2 x 3 inches.

"3. Permanently brick up the opening now protected by self-closing, fireproof doors on 1st floor of garage north side leading into the varnish storage room of the 3rd story varnish bldg. Note—this opening does not show on approved F.D. Plan 3090-27 and is a violation of subdiv. 13, Sec. 151, Ch. 10 CO. N. Y.

"4. Permanently brick up opening now protected by self-closing, fireproof doors on the north side 2nd story of garage building leading into the three story varnish building. Note—This opening does not show on approved F.D. Plan 3090-27 and is a violation of subdiv. B, Sec. 151, Ch. 10, C.O.N.Y.";

and

WHEREAS, the building is of reinforced concrete construction, two stories in height, 50 ft. by 60 ft. in area; OCCUPIED: 1st story, garage and shipping room, no occupancy; 2nd story, offices, 10 persons; a 550-gallon tank buried under first story floor for gasoline storage; EXITS: an enclosed interior stairway, from first story to second story; a communicating doorway at first story, also at second story to the third story building adjoining at north and protected by fire doors; and

WHEREAS, the appellant claims, as to Item 2, that a gasoline selling station is not maintained on the premises; as to Items 3 and 4, that the communicating doorways are protected by standard fire doors which always remain closed except when materials are transferred; furthermore, the appellant contends that the adjoining building at north is occupied: cellar, storage; 1st story, shipping; 2nd story, storage and factory; 3rd story, laboratory and factory, also that the building is equipped with a sprinkler system and an automatic fire alarm system.

Resolved, that the order of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted, as to Items 3 and 4, only so long as the use, operation and conduct of this garage service is restricted to the conduct of the business operated on these premises, exclusively for the use of motor vehicles in the ownership of the business conducted thereon, on condition that the existing horizontal openings mentioned in this order shall be equipped on both sides with self-closing, fireproof doors and that no additional openings be installed, and that the garage building shall not be increased in height, area or dimension, and the garage use restricted to first story thereof; and denied as to Item 2.

BUILDING ZONE CASES

122-28-BZ.

APPLICANT—Nathan D. Shapiro & Bros., for David Katz, owner.

SUBJECT—Application (re decision of the superintendent of buildings) under section 21 of the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

THE VOTE TO REOPEN AND INTERPRET RESOLUTION—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle..... 4

Negative 0

Absent: Deputy Chief Martin..... 1

THE RESOLUTION—

(717-26-BZ)

WHEREAS, the board, in granting the variation, considered the application as to the non-conforming use of an invaded district and it was not specifically intended, other than by the description by the applicant himself, to restrict the building to a motion picture conduct only.

Resolved, therefore, the official interpretation of the board is that it did not intend to restrict the use exclusively to a motion picture theatre.

1339-27-BZ.

THE RESOLUTION—

(1339-27-BZ)

WHEREAS, Harry Urquhart, for Israel Rosenblum, owner, filed, December 23, 1927, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station; premises 1605-1611 Coney Island avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, July 17, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Coney Island avenue is in a business district; Locust avenue, east of a point 100 ft. east of Coney Island avenue, is in a residence district; Avenue M, east of Coney Island avenue, is in a business district, and East 12th street, north of a point 100 ft. north of Avenue M, is in a residence district; and

WHEREAS, the decision of the fire commissioner, rendered December 17, 1927 (re Plan No. 4130-27), reads:

"1. A gasoline service station may not be permitted in a business district."

and

WHEREAS, the premises consist of a plot of ground having a frontage of 103 ft. 9 in. on Coney Island avenue and 103 ft. 8¼ in. on Locust avenue, upon which it is proposed to erect a one-story office, 18 ft. by 18 ft. in area, and to install the necessary tanks and pumps for a gasoline service station; and

WHEREAS, the board deemed that applicant did not substantiate his basis of appeal brought under section 21 of the building zone resolution.

Resolved, that the decision of the fire commissioner be and it hereby is *affirmed*, and the application be and it hereby is *denied*.

THE RESOLUTION—

(83-28-BZ)

WHEREAS, Harry M. Peyser, for Abraham L. Cohen, owner, filed, January 28, 1928, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a motor vehicle repair shop; premises 1239 East New York avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meet-

ing, July 17, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that East New York avenue and Pitkin avenue are in a business district; Tapscott street, south of a point 100 ft. south of East New York avenue, is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered January 20, 1928 (re App. No. 22486-1927), reads:

"Repair shop for motor vehicles contrary to Building Zone Resolution. Art. II, § (a) 16 and is therefore denied."

and

WHEREAS, the proposed building is to be of non-fireproof construction, one story in height, with a frontage of 24 ft. 1¼ in. and a depth of 70 ft.; to be occupied as a motor vehicle repair shop; and

WHEREAS, the board deemed that applicant was not entitled to relief under section 21 of the building zone resolution on the ground of practical difficulty and unnecessary hardship.

Resolved, that the decision of the superintendent of buildings be and it hereby is *affirmed*, and the application be and it hereby is *denied*.

510-27-BZ.

APPLICANT—McCooley & Conroy, substituted for Philip J. Sinnott for Alden Terrace Corp., owner.

SUBJECT—Application (re decision of the superintendent of buildings) under sections 7(g) and 21 of the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station (previously denied).

WHEREAS, McCooley & Conroy, substituted for Philip J. Sinnott, for Alden Terrace Corp., owner, filed, May 9, 1927; reopened June 12, 1928, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station (previously denied); premises southwest corner of Cypress Hills road and Cooper avenue, Ridgewood, Borough of Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, July 17, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Cypress Hills road, west side, is in a business district; Cypress Hills road, east side, is in a residence district, and Cooper avenue is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered March 9, 1927 (re Plan No. 2162-1927), reads:

"1. Creation of a gasoline station is prohibited in a business district by the zoning resolution of the Board of Standards and Appeals."

and

WHEREAS, the premises consist of a plot of ground having a frontage of 101 ft. on Cypress Hills road and 152.23 ft.

MINUTES

on Cooper avenue, upon which it is proposed to erect a one-story office and accessory store (15 ft. by 20 ft. in area) and to install the necessary tanks and pumps for a gasoline service station; and

WHEREAS, the applicant established his basis of appeal under the principle of section 7g of the building zone resolution by filing 84 per cent of consents of affected property owners within area fixed by the board and the board deemed that it would constitute a hardship to deny the variation requested.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that a wall, not less than 8 ft. high be erected along the westerly and southerly property lines of the premises, the interior of such wall to be faced with enamel brick laid out in panels of two-tone brick; that no gas pump shall be installed within 10 ft. of the building line of the property; that a concrete curbing not less than 12 in. in height shall be installed along the building line on both street fronts, with driveways not exceeding 10 ft. in width therein, and not more than two driveways on each street front; that any building erected for the accommodation of patrons and operators on these premises shall not exceed a one-story structure and shall be finished on the exterior with enamel brick of the same color and texture as the material facing the wall; that the roof shall be of variegated slate or vitrified tile of Spanish type; that any advertising shall be restricted to the glass globes of the pumps or to flat wall signs; that all necessary permits shall be obtained within six months and the work completed within one year from the date of this action.

THE RESOLUTION—

(146-28-BZ)

WHEREAS, William F. Doyle, for S. S. Kresge Co., owner, filed, February 17, 1928, an application, under the building zone resolution, to permit the extension, from a business district into a residence district, of a proposed business building; premises 1416-1420 Kings Highway, south side, 42.42 ft. west of East 15th street, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, July 17, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Kings Highway is in a business district, and East 15th street, south of a point 100 ft. south of Kings Highway, is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered February 1, 1928 (re App. No. 1308-28), reads:

"Proposition contrary to the Zone Resolution, Art. II, Sec. 3.

"The erection of a building for stores and other business purposes, principally in a business district, but extending into a residence district.";

and

WHEREAS, the premises is L shape, having a frontage of 42.63 ft. on Kings Highway and 22 ft. on East 15th street; a gore-shaped portion at the southeast section of the plot (approximately 700 sq. ft.) is within the residence district, the remainder being in the business district; at present there is a non-fireproof building on the Kings Highway front with store occupancy and dwellings above; the plot on East 15th street is now vacant; it is proposed to extend the existing store portion (one story in height) to cover the East 15th street plot; the entire building to be used as a store on the first story and the second story (on Kings Highway) to be used as offices and cloak room; and

WHEREAS, that portion of the premises extended on East 15th street, the front of which is within the residence use area and the greater portion of this lot lies in the business use area; in that East 15th street does not run perpendicular to the Kings Highway frontage, thereby causing this condition; and

WHEREAS, the board is empowered under section 7b and section 7c to grant a variation, and the denial of which the board believes would be an unnecessary hardship and an impractical difficulty.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the use of the premises shall be restricted to retail mercantile business; that the elevation of the proposed building on East 15th street shall preclude the construction of any show window frontage; that the openings shall be restricted to windows with sills not less than 4 ft. above the sidewalk level and a doorway not exceeding 3 ft. 8 in. in width from the proposed stairway, in addition to the exit doorway proposed for the basement; that there shall be no advertising of any nature or description displayed or exposed on the 15th street frontage of the premises; that all permits required shall be obtained within six months and all work involved completed within one year from the date of this action.

filed, February 23, 1928, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station and also a garage for the storage of more than five motor vehicles; premises 287-289 Prospect avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, July 17, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Prospect avenue is in a business district and Sixth avenue is in a business district; and

WHEREAS, the decision of the fire commissioner, rendered February 11, 1928 (re Plan No. 321-1928), reads:

"1. A garage for more than five cars and a gasoline service station may not be permitted in a business district. Appeal may be taken to the Board of Standards and Appeals. Sec. 4, Building Zone Resolution."

and

WHEREAS, the proposed building is to be of fireproof construction, two stories in height, with a frontage of 75 ft. and a depth of 196 ft. 7 in.; to be occupied as a gasoline service station and a garage for the storage of more than five motor vehicles; and

WHEREAS, the applicant established his basis of appeal under section 7e of the building zone resolution and the board deemed that denial of the variation would constitute unnecessary hardship within the meaning of section 21 of the resolution.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the building shall be erected fireproof throughout and shall not exceed two stories in height above grade; that the building shall not be erected within 5 ft. of the westerly property line; that both gable walls shall be unpierced throughout their entire height and length; that the front elevation shall be finished with face brick and architectural terra cotta or stone trimmings; that any gasoline storage equipment installed shall be located at the extreme easterly end of the premises at the front of the building; that there shall be no open gasoline service station installed on these premises; that the walls shall be carried, at the building line, from the street grade to the roof; that all necessary permits shall be obtained within nine months and the work completed within one year from the date of this action.

THE RESOLUTION—

(724-27-BZ)

WHEREAS, McIntyre & O'Leary, for St. James Methodist

Episcopal Church, owner, filed, June 23, 1927, an application, under the building zone resolution, to permit in a residence district the erection and maintenance of an apartment house having stores on the first story; premises 8313-8323 20th avenue, northeast corner of 84th street, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its special meeting, December 16, 1927, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that 20th avenue, north of 84th street, is in a residence district; 20th avenue, south of 84th street, is in a business district, and 84th street is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered March 4, 1927 (Applic. No. 3493-27), reads:

"Proposition contrary to the Zone Resolution, Art. II, Sec. 3.

"The erection of a building with stores in a residential district."

and

WHEREAS, the proposed building is to be of non-fireproof construction, six stories in height, with a frontage of 100 ft. on 20th avenue and 90 ft. on 84th street; to be occupied as an apartment house with stores on the first story; and

WHEREAS, the board deemed that application came under the principles of section 7g, supported by consents in affidavit form of the twenty property owners within the residence use district immediately affected; and

WHEREAS, it was proposed at time of filing original application to erect a six-story apartment house with stores on the street grade only of 20th avenue front, and it is now proposed to erect five separate buildings, the inside buildings 19 ft. in width and the corner building 24 ft. in width, each three stories in height with stores on ground floor; and

WHEREAS, the board in considering the application and adopting the original resolution intended to vary the regulations specifically and only so far as it affected the first story, on condition that the use of the premises above the first story shall be restricted and limited to conforming residential use; that the conditions of the resolution as originally adopted as to business use shall be limited to the stipulations of the original resolution.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the store use shall be restricted to the first story of these premises on the 20th avenue front, separated from the dwelling occupancy by unpierced walls of approved masonry; that no portion of the stores shall return on 84th street; that the 84th street wall shall be returned on the 20th avenue front by brick construction not less than 16 in. in frontage on the 20th avenue front; that the use and occupancy of these stores shall be restricted to retail mercantile business; that no portion of the premises shall be occupied, rented or maintained for the sale or conduct of delicatessen business, fish business or meat business; that no merchandise or produce of any nature or description shall be exposed or displayed outside the building lines of these premises; that the remainder of the premises shall be restricted to conforming residential use and occupancy; that there shall be no advertising display of any nature or description other than by fixed letters to the plate glass show windows of the store fronts, and that all permits required shall be obtained within nine months and any work involved thereby shall be completed within eighteen months from the date of this action.

THE RESOLUTION—

(68-28-BZ)

WHEREAS, Thomas W. Lamb, substituted for John Eberson, for Wilthan Realty Corp., owner, filed, January 26, 1928, an application, under the building zone resolution, to permit the extension, from a business district into a residence district, of a proposed theatre building; premises 1230-1248 Third avenue, 183-187 East 71st street and 182-184 East 72nd street, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, July 17, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Third avenue and Lexington avenue are in a business district; 71st street, from a point 100 ft. west of Third avenue to a point 100 ft. east of Lexington avenue, is in a residence district, and 72nd street, from a point 100 ft. west of Third avenue to a point 100 ft. east of Lexington avenue, is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered January 6, 1928 (re App. No. 549-27), reads:

"1. On that portion of the lot extending into the residence district no theatre or commercial building may be erected. Sec. 3, Building Zone Resolution."; and

WHEREAS, the proposed building is fireproof, with auditorium and stores on the first story and balcony above, having a frontage of 125 ft. on East 72nd street, 204 ft. 4 in. on Third avenue and 119 ft. 8 in. on East 71st street; there being an open court running along the westerly side of the structure; the building to be occupied by stores on the Third avenue and on the East 72nd street fronts of the first story and the remainder of the premises to be occupied as a theatre; the orchestra seating 1,658 persons and the balcony seating 1,482 persons; the westerly portion of the building extends for a distance of 25 ft. into the residence district on East 72nd street and for a distance of 19 ft. 8 in. into the residence district on East 71st street, the remainder of the structure being in the business district; to be occupied as a theatre building; the plot having a frontage of 133 ft. 2 in. on East 71st street, 130 ft. on East 72nd street and 204 ft. 4 in. on Third avenue; and

WHEREAS, the board, created by chapter 503 of the Laws of 1916, may, in appropriate cases, after public notice and hearing, and subject to appropriate conditions and safeguards, determine and vary the application of the use district regulations herein established in harmony with their

general purpose and intent as follows, and so believes under section 7, subdivision c; and

WHEREAS, the board believes that the strict enforcement of the zone resolution, so far as it affects this plot, would be imposing an unnecessary hardship in the general development of the plot as a whole.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution; and that the application be and it hereby is granted on condition that the building on 71st street shall be restricted and limited to a distance not exceeding 119 ft. 8 in. westerly from Third avenue and that the building shall be restricted within an area not exceeding 125 ft. westerly from Third avenue building line on 72nd street; that there shall be no exit or entrance within the residence use area of the premises other than the egress from the side court as required pursuant to the building code, article 25; that there shall be no sign or advertising of any nature or description erected, exposed or displayed within the residence use area of the premises; that there shall be no opening in the westerly gable wall other than the emergency exits from the orchestra floor, opening to the open court, required under article 25 of the building code; that the exterior of the rear westerly wall shall be finished in light-color face brick, or painted a light color in three-coat finish; that there shall be no advertising or advertising display, billboards or signs erected or permitted on any portion of the 71st street elevation, other than fixed white letters affixed to the plate glass show windows of that portion of the corner store returning on the 71st street side; that any advertising, other than flat signs on the marquee, within the business use area of the 72nd street frontage shall be confined and restricted to plate glass show windows on the 72nd street front; that the exterior of the building throughout on both street fronts and avenue shall be finished with natural stone up to the first story sill course and with face brick or natural stone above with natural stone trimming or architectural terra cotta trimming; that the requirements of the zone resolution otherwise for the building proposed shall be complied with in all other respects, and that all permits required shall be obtained within nine months and any work involved thereby shall be completed within eighteen months from the date of this action.

AREAS FIXED.

(106-28-BZ)

The chairman read a communication from Messrs. Horn & Ligeti, requesting the board to fix the area deemed affected and within which to obtain consents to permit in a business district the erection and maintenance of a gasoline service station; premises 357-365 Beach 71st street and 7101-7105 Amstel boulevard, Borough of Queens.

The following area was approved by the board:

Both sides of Beach 71st street, from Amstel boulevard to a point 400 ft. south of premises in question; both sides of Hammels boulevard, from Beach 72nd street to Beach 71st street; both sides of Amstel boulevard, from a point 100 ft. west of Beach 72nd street to a point 400 ft. east of premises in question (not including the unrestricted portion); also the easterly side of Beach 72nd street, from Amstel boulevard to a point 155 ft. south of Amstel boulevard.

(265-28-BZ)

The chairman read a communication from William F. Doyle, requesting the board to fix the area deemed affected and within which to obtain consents to permit, partly in a

MINUTES

residence district and partly in a business district, the erection and maintenance of a garage for the storage of more than five motor vehicles; premises west side of Westchester avenue, 161.14 ft. south of Wilkinson avenue, Borough of The Bronx.

The following area was approved by the board:

Both sides of Westchester avenue, from a point 100 ft. north of Wilkinson avenue to a point 400 ft. south of

proposed garage; both sides of Sands place, from Westchester avenue to a point 200 ft. east of Westchester avenue; also the property at rear within a distance of 50 ft. in any direction.

Adjourned 3.00 p. m.

WILLIAM J. O'GORMAN, *Secretary*.

BOARD OF STANDARDS AND APPEALS

REGULAR MEETING

TUESDAY AFTERNOON, JULY 17, 1928

Present: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin.

PETITIONS FOR VARIATIONS

218-28-S.

PETITIONER—William F. Doyle, for Abraham Katz, owner.

SUBJECT—Variation of the labor law as cited in order of the fire commissioner.

PREMISES AFFECTED—1793-1799 Jerome avenue, The Bronx.

APPEARANCES—

For Petitioner: William F. Doyle.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Laid over to July 24, 1928, at 2 p. m., subject to amendment as to certificate of occupancy for factory use.

1223-27-S.

PETITIONER—Edwin H. Thatcher, for Decorated Metal Mfg. Co., owner.

SUBJECT—Variation of the labor law as cited in orders of the fire commissioner.

PREMISES AFFECTED—199 Sackett street and 192-196 Degraw street, Brooklyn.

APPEARANCES—

For Petitioner: Edwin H. Thatcher.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition withdrawn.

THE VOTE TO WITHDRAW—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin..... 5

THE RESOLUTION—

(229-28-S)

WHEREAS, William Hochberg, for Hochberg & Schwartz, owner, filed, March 14, 1928, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 328 Broome street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated February 15, 1928, reads:

"Order No. 32886-LD:

"1. Provide a counter-balanced stairway from lowest fire-escape balcony at front of building to the street, as per Section 274 of the Labor Law.";

and

WHEREAS, the building is non-fireproof, four stories in height, 22 ft. by 70 ft. in area; OCCUPIED: 1st story, showroom and office, 4 persons; 2nd story, workshop, 8 persons; 3rd and 4th stories, storage of store fixtures, no occupancy; EXITS: an interior iron and steel stairway, extending from the first story to roof, enclosed in (wire lath and ¾-inch cement plaster, both sides) partitions with steel doors at openings; a fire escape on the front of the building, having fireproof openings along the course thereof, extending from the second story to roof and drop ladder from second story balcony to sidewalk; ROOFS of adjoining buildings: 8 ft. higher at west; same level at east; and

WHEREAS, the petitioner claims that the store and show window on first story, used to display store fixtures, would be destroyed by complying with the order; furthermore, the petitioner contends that the exits are adequate and the occupancy is very light.

Resolved, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is *granted on condition* that a counterbalanced drop ladder in guides shall be provided at each end of the lowest balcony fire escape at the front of the building; that the occupancy shall not exceed ten persons above the first story; that the entire premises shall remain in single tenancy and operation; that the building shall be not increased in height or area, and this variation is granted so long as conditions as to occupancy and use otherwise remain substantially unchanged.

249-28-S.

PETITIONER—Samuel Rosenblum, for John Block and H. G. Block, owners.

SUBJECT—Variation of the labor law as cited in decision of the superintendent of buildings.

PREMISES AFFECTED—146 East 53rd street, Manhattan.

APPEARANCES—

For Petitioner: Samuel Rosenblum.

ACTION OF BOARD—Petition granted on condition.

THE VOTE—

THE RESOLUTION—

(249-28-S)

WHEREAS, Samuel Rosenblum, for John Block and H. G. Block, owners, filed, March 22, 1928, a petition for a variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises 146 East 53rd street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered February 28, 1928 (re App. No. 321-1928), reads:

"5. A fireproof passageway from fire escape to street at first floor level should be provided."

and

WHEREAS, the building is non-fireproof, three stories in height, 25 ft. by 75 ft. in area at first story and 25 ft. by 62 ft. in area above; OCCUPIED: 1st story, store and manufacture of shoes, 25 persons; 2nd story, manufacture of shoes, 14 persons; 3rd story, storage of shoes and lasts, 1 person; EXITS: an interior stairway constructed of concrete from the first to second story and of wood from the second story to roof, enclosed in 6-inch terra cotta partitions on the first story and in wood lath and plaster above with wood and also fireproof doors at openings; a fire escape on the rear of the building, having fireproof openings along the course thereof, extending from the main roof to the roof of the first story extension, with EGRESS from the termination of the fire escape by means of a 45-degree iron stairway leading to the rear yard, with egress from yard by means of doorway in fence leading to yard at east; ROOFS of adjoining buildings: to east, one story higher; to west, same level.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted, only so far as it affects egress from the termination of the rear fire escape, on condition that a door shall be provided in the brick fence to yard of the adjoining premises to the east, with egress from the yard of No. 146 East 53rd street to store on the first story and thence to street; that the building shall be not increased in height or area; that the petitioner shall file written consent of the owner of the adjoining premises for egress through his property, No. 148 East 53rd street, with the superintendent of buildings, and this variation is granted so long as conditions as to occupancy and use remain substantially unchanged.

241-28-S.

PETITIONER—William F. Doyle, for Vincent Valentine, lessee.

SUBJECT—Variation of the labor law as cited in order of the fire commissioner.

PREMISES AFFECTED—540-550 West 58th street, Manhattan.

APPEARANCES—

For Petitioner: William F. Doyle.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition dismissed as not being properly before the board.

THE VOTE TO DISMISS—

THE RESOLUTION—

(241-28-S)

WHEREAS, William F. Doyle, for Mayal Realty Co., owner, filed, March 20, 1928, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 540-550 West 58th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated January 17, 1928 (Order No. 31595-LD), reads:

"1. Discontinue the use of the above premises for factory purposes for the reason that same does not conform to Sec. 270 of the labor law.

"Among the defects noted are the following:

"1. Only one fireproof enclosed stairway provided. Fire escape at rear cannot be accepted as second means of exit."

and

WHEREAS, the building is fireproof, six stories (84 ft.) in height, 150 ft. by 100 ft. 5 in. in area at first story and 150 ft. by 90 ft. 5 in. in area above; OCCUPIED: 1st story, service and distributing station for automobiles, 15 persons; 2nd story, service and distributing station for automobiles, 12 persons; 3rd story, office and storage of automobile supplies, 15 persons; 4th story, storage of advertising materials, 15 persons; 5th story, storage of automobiles, 3 persons; 6th story, storage of automobiles, 14 persons; EQUIPPED with a standpipe system and a fire alarm signal system; EXITS: an interior 3 ft. 10 in. wide fireproof stairway, extending from the first story to roof, enclosed in 4-inch terra cotta partitions with fireproof doors at openings; an outside iron stairway, 3 ft. 10 in. in width, with rails 4 ft. high, on the rear of the building, having fireproof openings along the course thereof, extending from the top story to the rear yard, with EGRESS from the termination of the fire escape through the building to street; ROOFS of adjoining buildings: to east, 10 ft. lower; to west, same level; and

WHEREAS, petitioner contends that the number of persons employed in the building is less than that permitted as the capacity of the interior fireproof stairway and requests the acceptance of the existing means of egress; and

WHEREAS, there is no contention as to any violation of the use and occupancy as stipulated by resolution for a variation of the zoning regulations as granted by this board under Cal. No. 64-26-BZ regarding these premises.

Resolved, that the petition be and it hereby is dismissed as not being properly before the board, as the use and occupancy as granted under Cal. No. 64-26-BZ does not constitute a factory.

216-28-S.

PETITIONER—William F. Doyle, for Leonard Weill, owner.

SUBJECT—Variation of the labor law as cited in order of the fire commissioner.

PREMISES AFFECTED—368 Canal street, Manhattan.

APPEARANCES—

For Petitioner: William F. Doyle.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

THE RESOLUTION—

(216-28-S)

WHEREAS, William F. Doyle, for Leonard Weill, owner, filed, March 9, 1928, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 368 Canal street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated November 29, 1927 (Order No. 29016-LD), reads:

"1. Provide an unobstructed passageway around hoistway leading from the foot of the stairway to the street, said passageway to be not less than 3' in width as per Sec. 272 of the Labor Law."

and

WHEREAS, the building is non-fireproof, five stories in height, 25 ft. 9 in. by 90 ft. 5 in. in area at first story and

MINUTES

25 ft. 9 in. by 80 ft. 5 in. in area above; OCCUPIED: 1st story, radio supplies, 5 persons; 2nd story, manufacture of brass work, 8 persons; 3rd story, manufacture of leather goods, 8 persons; 4th and 5th stories, decorating glassware, 4 persons each story; EXITS: an interior wooden stairway, extending from the first story to top story, double-rung iron ladder to roof scuttle, enclosed in metal lath and cement partitions with fireproof doors at openings; a fire escape on the front of the building, having fireproof openings along the course thereof, extending from the second story to top story, a gooseneck ladder to roof and drop ladder from second story balcony to sidewalk; ROOFS of adjoining buildings: 20 ft. lower at east; 30 ft. lower at west; 40 ft. lower at south; and

WHEREAS, the petitioner claims that the hoistway over entrance hall is provided with trap doors; that it is used only two or three times a day in hauling goods too large to be carried upstairs by hand; that to comply with the order would mean destroying the use of the first story for store purposes; furthermore, the petitioner proposes to provide telltale chain protection as granted by the board under Cal. No. 1690-18-A.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted on condition that the present hoistway wellhole shall be filled in with floor construction and beams equal to existing floor construction permitting a hoistway opening not exceeding 3 ft. in width by 4 ft. in length; that a bulkhead shall be provided at the termination in the first story hall with platform construction and steel supports not more than 3 ft. from the easterly wall, maintaining a passageway around same not less than 3 ft. in the clear; the hatchway at bulkhead to be provided with trap doors constructed of sheet steel and angle iron, and provided with tell tale chains in accordance with recommendation of Cal. No. 1690-18-A.

THE RESOLUTION—

(224-28-S)

WHEREAS, Croker National Fire Prevention Engineering Co., for James River Realty Corp., owner, filed, March 13, 1928, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 48 West 46th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated February 18, 1928 (Order No. 32994-LD), reads:

"1. Arrange the fire escape on the rear of the building to conform to the requirements of Sec. 274 of the Labor Law.

"Among the defects noted are the following:

"(B) No safe egress from termination of fire escape to street."

and

WHEREAS, the building is non-fireproof, five stories in height, 20 ft. by 77 ft. 3 in. in area at first, second and third stories and 20 ft. by 52 ft. in area above; OCCUPIED: 1st story, store, 5 persons; 2nd story, dressmaking, 4 persons;

3rd story, beauty parlor supplies, 3 persons; 4th story, vacant; 5th story, art decorating, 15 persons; EXITS: an interior wooden stairway, extending from the first story to roof, enclosed in fire-resisting partitions with fireproof doors at openings; a fire escape on the rear of the building, having fireproof openings along the course thereof, extending from the roof to the yard level, with EGRESS from the yard to adjoining yard at west; ROOFS of adjoining buildings: same level at west; and

WHEREAS, the petitioner claims that egress is maintained from foot of rear fire escape to open yard adjoining at west and through first story of adjoining building, or up the party wall fire escape which was permitted as a second means of exit by the board for the next adjoining building at west under Cal. No. 40-26-S; that all three buildings are under the same ownership and operation; furthermore, the petitioner contends that a similar order, No. 68700-LD, was dismissed by the fire department as complied with on April 11, 1921.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted, only so far as it affects the egress from the termination of the rear fire escape, on condition that the fire escape otherwise shall comply with the labor law in all respects; that an opening shall be provided to the adjoining yard of premises to the west with egress to the yard of No. 50 West 46th street direct to the street or by means of rear fire escape on the rear of No. 50 West 46th street to premises No. 52 West 46th street; that the doorway from the rear yard of No. 50 West 46th street shall be maintained unlocked during working hours; that the building shall be not increased in height or area; that the occupancy of the building shall not exceed the legal capacity of the interior stairway, and this variation is granted only so long as these premises and the two adjoining premises to the east remain in single ownership and the conditions of these premises as to occupancy and use remain substantially unchanged.

126-28-S.

PETITIONER—Croker Nat'l Fire Prev. Eng. Co., for Segal Mfg. Co., owner.

SUBJECT—Variation of the labor law as cited in order of the fire commissioner.

PREMISES AFFECTED—98-100 Nott avenue, Long Island City, Borough of Queens.

APPEARANCES—

For Petitioner: Herman E. Horwood.

For Administration: Inspector Maher of fire department.

THE RESOLUTION—

(126-28-S)

WHEREAS, Croker National Fire Prevention Engineering Co., for Segal Manufacturing Co., owner, filed, February 9, 1928, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 98-100 Nott avenue, Long Island City, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated June 26, 1926, reads:

"Order No. 98702-LD:

"1. Provide an additional required means of exit from the 2nd story remote from the existing stairway, preferably located at the rear of the building, in accordance with the requirements of Section 270 of the Labor Law.

"2. Enclose the interior stairway at the northwest corner of the building serving as a required means of

MINUTES

in accordance with the requirements of Sec. 270 of the Labor Law.”;

and

WHEREAS, the building is non-fireproof, two stories in height, 50 ft. by 100 ft. in area at first story and 40 ft. by 100 ft. in area above; OCCUPIED by one concern for the manufacture of furniture: 1st story, 4 persons; 2nd story, 4 persons; EXITS: an interior wooden stairway, extending from the first story to top story, enclosed in partitions constructed of brick on the first story and of wood studs, sheathed on each side and covered with metal on the hall side, with fireproof doors on the first story and wood doors at openings on the second story; ROOFS of adjoining buildings: to south, one story lower; and

WHEREAS, the petitioner, as to Item 1, contends that there is a doorway at the rear of the second story which leads out to the roof of the abutting building to the rear (same being used in conjunction with premises in question), thence across roof to 12th street front, where petitioner proposes to provide a portable iron ladder which would lead to street; as to Item 2, petitioner proposes to cover the loft side of the stairway enclosure with plaster board and metal; petitioner contends, further, that the building was erected in 1914 from plans filed with the bureau of buildings as a one-story and basement factory building and that after completion a certificate of occupancy was issued for same and that it was due to the fact that the fire department considered the structure a two-story building that these orders were issued; and

WHEREAS, a certificate of occupancy was issued by the bureau of buildings as a one-story building, which is in error, as more than 50 per cent of the first story is above the grade of the curb level, therefore the building is two stories.

Resolved, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is *granted*, as to Item 1, *on condition* that a doorway shall be provided at the rear of the second story opening on the roof of the one-story building immediately to the south, in the same and single ownership; that a balcony shall be provided on the street front of the 12th street building, with a counter-balanced drop ladder in guides to the street, and *granted*, as to Item 2, *on condition* that the stair shall be enclosed on the first story with approved fire-resisting construction with self-closing, fireproof door at the first story level; that the building shall be not increased in height or area; that the use and occupancy shall remain unchanged, and that this building, in conjunction with the building immediately to the rear, shall remain in single tenancy and operation.

THE RESOLUTION—

(215-28-S)

WHEREAS, Samuel Rosenblum, for John A. Weekes, owner, filed, March 8, 1928, a petition for a variation from the requirements of the labor law, as cited in order of

the fire commissioner, affecting premises 176 Park Row, Borough of Manhattan; and

WHEREAS, the orders of the fire commissioner, dated August 11, 1927, read:

“Order No. 25359-LD:

“1. Provide safe and unobstructed egress from the lower termination of the fire escape on rear of building by constructing a fireproof passageway with an unobstructed width of at least 3' throughout, leading to the street, adequately lighted at all times during working hours, or by means of providing access to an open area having communication with the street, as per Section 273 of the Labor Law.”;

and

“Order No. 25360-LD:

“1. Reduce the area of wire glass in fireproof windows on course of fire escape so that same does not exceed 720 square inches, rule 503 of the Industrial Code.”;

and

WHEREAS, the building is fireproof, eight stories in height, 25 ft. 1 in. by 125 ft. 2½ in. in area; OCCUPIED: 1st story, store; 2nd story, printing, 4 persons; 3rd story, printing, 12 persons; 4th story, printing, 15 persons; 5th story, printing, 9 persons; 6th story, printing, 8 persons; 7th story, printing and manufacture of blank books, 15 persons; 8th story, photographer, one person; EQUIPPED with a dry sprinkler system in cellar and a fire alarm signal system; EXITS: an interior fireproof stairway, extending from the first story to roof, enclosed in fireproof partitions with fireproof doors at openings; a fire escape on the rear of the building, having fireproof openings along the course thereof, extending from the second story to top story, gooseneck ladder to the roof, with EGRESS from second story balcony by means of stairs leading to adjoining yard at north; ROOFS of adjoining buildings: three stories lower at north; two stories lower at south; and

WHEREAS, the petitioner claims, as to Order No. 25359-LD, that egress may be had from foot of rear fire escape to yard adjoining at east, where access may be had to fire escapes, to rear windows or through a passageway to the front yard and to street, which has been maintained for a great many years and has been acceptable heretofore; as to Order No. 25360-LD, that each door leading to rear fire escape has two glass panels, each 18 in. by 34 in., a window next to door has two glass panels, each 20 in. by 36 in., the remaining windows have two glass panels, each 48 in. by 36 in.; as these windows are subdivided at present and the condition has existed for many years, it is requested that the present condition be accepted; and

WHEREAS, the labor law violation enforced prior to 1916 has been dismissed of record as being complied with, affecting the windows in question; and

WHEREAS, the premises has been in continuous use prior to 1916 as a factory.

Resolved, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is *granted*, as to Order No. 25359-LD, Item 1, only so far as it affects egress from the termination of the fire escape in the rear yard to an open side yard of the adjoining premises to the east, with egress from said side yard or court through an unobstructed, unpierced passageway running easterly to the yard of premises 5 and 9 Mulberry street, with egress from the easterly yard of 5 and 9 Mulberry street through two separate hallways to Mulberry street, and *granted*, as to Order No. 25360-LD, Item 1, in view of the compliance with the labor department order prior to 1916, *on condition* that the area of glass shall be not increased; that there shall be no additional openings installed along the course of the fire escape, unless complying with the labor law in all respects; that the building shall be not increased in height or area, and that the use and occupancy shall remain substantially unchanged.

THE RESOLUTION—

(225-28-S)

WHEREAS, Croker National Fire Prevention Engineering Co., for Spitzer & Spitzer, Inc., lessee, filed, March 13, 1928, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 50 West 46th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated February 9, 1927 (Order No. 10807-LD), reads:

"1. Arrange the fire escape on the rear of the building to conform to the requirements of Sec. 273 of the Labor Law.

"Among the defects are the following:

"Fire doors 2 x 6 not provided. Not screened to height of 4' 6". No safe egress from termination of fire escape to street.

"2. Enclose the interior stairway at the east side of building and the landings and passageways connecting therewith and the openings leading thereto in fire retarding material from the 1st story to 3' above the roof, as per Sec. 271 of the Labor Law."

and

WHEREAS, the building is non-fireproof, five stories and pent house in height, 20 ft. by 97 ft. 5 in. in area at first story and 20 ft. by 90 ft. in area above (the pent house 20 ft. by 22 ft.); OCCUPIED: 1st story, store, 5 persons; 2nd story, manufacture of shoes, 6 persons; 3rd story, manufacture of shirts, 6 persons; 4th story, pressing, 11 persons; 5th story, furrier and dressmaking, 5 persons; pent house, art studio, 3 persons; EQUIPPED with a fire alarm signal system; EXITS: an interior wooden stairway, extending from the first story to roof, enclosed in wood studs, lath and plaster partitions with wooden doors at openings; a fire escape on the rear of the building, having fireproof openings along the course thereof, extending from the roof to the yard level, with EGRESS from the yard to adjoining yards at east and west; ROOFS of adjoining buildings: same level at east; one story higher at west; and

WHEREAS, the petitioner claims, as to Item 1, that the rear party wall fire escapes were constructed in compliance with the resolution adopted under Cal. No. 40-26-S, as a second means of exit from the adjoining building at west, the openings on the course thereof are protected with fireproof windows and it is requested to be relieved of changing them to doors; that egress from foot of the rear fire escape may be had to adjoining yards at east and at west; that the three buildings are under the same ownership and operation; as to Item 2, that there are less than twenty-five persons employed above the second story and the order is not enforceable at the present time; furthermore, that a similar order was dismissed as complied with on February 24, 1918; and

WHEREAS, under sworn testimony the petitioner testified as to the existence of the present structure in 1918, under the same and similar order, No. 73614-LD, dismissed as complied with; and

WHEREAS, the order has been reinstated because of a so-called pent house, roof structure, of limited area; and

WHEREAS, the order will not be enforceable if not exceeding five stories in height.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted, as to fire doors on the course of said fire escape and the height of existing screening, and granted, as to egress from the termination of rear fire escape, on condition that the yards between these premises and the adjoining premises to the east, 48 West 46th street, shall be maintained with egress from the yard of 48 West 46th street through store at first story, direct to the street, and by means of fire escape from the rear yard of these premises, 50 West 46th street, to premises adjoining to the west, 52 West 46th street, so long as the three premises remain in single ownership and the exit facilities at the rear are maintained; that the building shall be not increased in height, area or dimension; that the occupancy and use shall remain substantially unchanged; that the occupancy shall not exceed twenty-five persons above the second story.

APPLIANCE SUBMITTED FOR APPROVAL

1151-27-SA.

PETITIONER—W. D. Allen Mfg. Co.

SUBJECT—Application for reopening—modification—re Allen 2½-Inch Angle Hose Valve (approval for Type "B" installations).

APPEARANCES—

For Petitioner: Andrew L. Boerner.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition reopened and resolution amended.

THE VOTE TO REOPEN AND AMEND RESOLUTION—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin..... 5

Negative 0

Absent 0

THE RESOLUTION—

(1151-27-SA)

WHEREAS, W. D. Allen Manufacturing Co. filed, October 26, 1927, a petition with the board of standards and appeals for the approval of their device known as the Allen 2½-Inch Angle Hose Valve; and

WHEREAS, a committee of the board made a test of this valve under operating conditions, and a joint report of the bureau of fire prevention and the board recommended the approval of the device; and

WHEREAS, this valve was approved by the board at its meeting, May 22, 1928, for use as a Type A valve and petitioner requested approval for Type B also.

Resolved, that the board of standards and appeals does hereby approve the Allen 2½-Inch Angle Hose Valve for use as Type A and Type B valve under rule 92 of the standpipe rules of the board of standards and appeals.

Adjourned 5.00 p. m.

WILLIAM J. O'GORMAN, Secretary.

FORMS FOR NOTICES TO PROPERTY OWNERS

If applicants, under the building zone resolution, desire copies of Form 13A, for notices to property owners, such forms are not to be supplied by this office.

The applicant is entitled only to one copy of Form 13A, properly filled out.

If he desires additional copies for his own convenience, in notifying property owners, he can obtain such copies from The O'Connell Press, 176 Park Row, Manhattan, at three cents each, postage to be added if the forms are to be supplied by mail.

WARNING

Notice is hereby given to all petitioners, appellants and applicants, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

First, That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

Second, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

Third, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and of the posting of the calendars on the bulletin board in the

offices of the board and of the further publication of the calendars in the daily press.

Fourth, That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

Fifth, That the business of the board is to dispose of all cases promptly, for the reason that the pendency of an appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of the appellant or petitioner to file necessary data, or by any other method of delay.

Sixth, That no appeal, application or petition will be accepted for filing unless, at the time of filing, all papers, plans and data required by law are supplied, as specified on the blank appeal, application or petition forms.

PUBLIC HEARINGS

Tuesdays, at 10 a. m. and 2 p. m.
Special meetings as published in this Bulletin.
Call of Clerk's Calendar, Tuesdays, at 2 p. m.
All hearings are held in Room 1013, Municipal Building, Manhattan.

HOURS FOR CONSULTATION

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

CALL OF CLERK'S CALENDAR

The Clerk's Calendar consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, September 11, 1928, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, September 18, 1928, at 2 o'clock.

The Clerk's Calendar is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

NOTICE TO APPELLANTS AND PETITIONERS

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and disposition of same expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

NOTICE

Notice is hereby given that the board of standards and appeals will hold no meetings during the month of August. The next regular meeting of the board of standards and appeals will be held on Tuesday, September 11, 1928, at 10 a. m. and that the next Clerk's Calendar Call will be held on the same day and date at 2 p. m.

During the month of August the office will be open as usual for the filing of appeals, applications and petitions, also for consultation and other business.

CALL OF CLERK'S CALENDAR TUESDAY, SEPTEMBER 11, 1928,

Building Zone Cases.

165-28-BZ.
APPLICANT—Philip Freshman, for Roma Development Corp., owner.

PREMISES—1535-1547 Gravesend avenue, east side, 300 ft. south of Avenue M, Brooklyn.

APPLICATION, under section 21 of the building zone resolution,
TO PERMIT in a business district the erection of a garage for the storage of more than five (5) motor vehicles.

202-28-BZ.

APPLICANT—William Shary, for Edwin Estates Co., Inc., owner.

PREMISES—1506 Bronxdale avenue, southeast corner of Poplar street, The Bronx.

APPLICATION, under section 21 of the building zone resolution,
TO PERMIT in a business district the erection and maintenance of a gasoline service station.

211-28-BZ.

APPLICANT—William A. Schroeder, owner.

PREMISES—North side of Braddock street (Rocky Hill road), 155 ft. east of 244th street, Queens Village, Borough of Queens.

APPLICATION, under section 21 of the building zone resolution,
TO PERMIT, partly in a business district and partly in a residence district, the erection and maintenance of a gasoline service station.

244-28-BZ.

APPLICANT—William R. Bayes, for Gravesend Realty Corp., owner.

THE VOTE TO GRANT—

Affirmative 0

Negative: Chairman Walsh, Commissioners

Connell, Holland and Guilfoyle 4

Absent: Deputy Chief Martin 1

THE RESOLUTION—

(227-28-A)

WHEREAS, Harry T. Barrett, for Edward E. Klein, owner, filed, March 13, 1928, an appeal from an order of the fire commissioner, affecting premises 1211 Second avenue, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated February 2, 1928 (Order No. 41243-LC), reads:

"1. Discontinue the manufacture of Nobrac Carbon Remover, Craveroil, and any and every other combustible mixture or inflammable mixture on these premises;"

and

WHEREAS, the building is non-fireproof, two stories in height, 125 ft. by 100 ft. in area; OCCUPIED: 1st story, 9 stores and garage, 10 persons; 2nd story, garage, 3 persons; and

WHEREAS, the appellant occupying the store known as No. 1211 Second avenue claims that the store is separated from other parts of the building by fireproof walls, floor and ceiling; that he has no employees; that he does all the mixing and canning under precautionary measures in the manufacture of a carbon remover; that not more than one 52-gallon drum of benzol and one 52-gallon drum of denatured alcohol is stored on the premises at any time; furthermore, the appellant contends that there is no flame of any kind in his store and there is no existing hazard.

Resolved, that the order of the fire commissioner be and it hereby is affirmed, and that the appeal be and it hereby is denied.

248-28-A.

APPELLANT—William F. Regan, for Kres-Kno Oil-Gas Burner Corp., lessee.

SUBJECT—Appeal from decision of the fire commissioner.

PREMISES AFFECTED—168-37 Hillside avenue, Jamaica, Borough of Queens.

APPEARANCES—

For Appellant: William F. Regan.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal denied.

THE VOTE TO GRANT—

Affirmative 0

Negative: Chairman Walsh, Commissioners

Connell, Holland and Guilfoyle and Deputy

Chief Martin 5

Absent 0

THE RESOLUTION—

(248-28-A)

WHEREAS, William F. Regan, for Allen B. Gifford, owner, filed, March 22, 1928, an appeal from a decision of the fire commissioner, affecting premises 168-37 Hillside avenue, Jamaica, Borough of Queens; and

WHEREAS, the decision of the fire commissioner, rendered March 17, 1928 (Plan No. 667-28), reads:

"1. Burners must be of a type approved by the Board of Standards and Appeals. Fuel Oil Rule 12.

"2. Location of storage tank does not conform to the Fuel Oil regulations. Fuel Oil Rule 4.

"4. Boiler room must be completely cut off from the rest of the building by fireproof partitions, ceiling and floor constructed of not less than 8" for brick or 6" for concrete or terra cotta. Fuel Oil Rule 20.

"5. Boiler room must have entrance from street, yard or court only. Fuel Oil Rule 20."

and

WHEREAS, the building is non-fireproof, two stories in height, 20 ft. by 68 ft. in area; OCCUPIED: 1st story, store; 2nd story, dwelling; and

WHEREAS, a fuel oil burning system has been installed consisting of a 200-gallon fuel oil tank located on the cellar floor, a Kres-Kno oil gas burner connected to a boiler in the store on the first story and the necessary valves and piping for a complete equipment; and

WHEREAS, appellant requests a temporary permit for the installation pending the approval of the burner by the board.

Resolved, that the decision of the fire commissioner be and it hereby is affirmed, and that the appeal be and it hereby is denied.

190-28-A.

APPELLANT—E. J. Wagner, for Robert Bosch Magneto Co., Inc., owner.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—3607-3609 Queens Boulevard, Long Island City, Borough of Queens.

APPEARANCES—

For Appellant: E. J. Wagner.

For Administration: Inspector Meyer of fire department.

THE VOTE TO GRANT—

Affirmative 0

Negative: Chairman Walsh, Commissioners

Connell, Holland and Guilfoyle..... 4

Absent: Deputy Chief Martin..... 1

THE RESOLUTION—

(190-28-A)

WHEREAS, E. J. Wagener, for Robert Bosch Magneto Co., Inc., for Treshomo Realty Corp., owner, filed, March 1, 1928, an appeal from an order of the fire commissioner, affecting premises 3607-3609 Queens boulevard, 36th street, 43-41 to 49 inclusive, Long Island City, Borough of Queens; and

MINUTES

WHEREAS, the order of the fire commissioner, dated December 7, 1927 (Order No. 13849-LD), reads:

"3. Separate boiler room from the remainder of building by enclosure of solid masonry at least 8 inches in thickness. Entrance to boiler room to be from exterior of building only.";

and

WHEREAS, the building is non-fireproof, four stories and basement in height, 95 ft. by 100 ft. in area at first story and 95 ft. by 60 ft. in area above; OCCUPIED: basement, storage, 6 persons; 1st story, offices and garage for the storage of six cars, 17 persons; 2nd story, offices, 47 persons; 3rd story, machine shop, 34 persons; 4th story, assembling, 5 persons; in an unrestricted district; the fire commissioner having been requested to issue a permit for the storage of ten cars on the first story; and

WHEREAS, the appellant claims, as to Item 3, that the boiler room is in the basement of the main building, separated from the garage by a fire wall, 16 inches in thickness, with one communicating opening, protected by approved fireproof doors on both sides; that the garage is not for the public but is used solely in connection with his own business; furthermore, the appellant contends that there is no existing fire hazard.

Resolved, that the order of the fire commissioner be and it hereby is affirmed, and that the appeal be and it hereby is denied.

219-28-A.

APPELLANT—Joseph Ahearn, for Brill Brothers, owners.
SUBJECT—Appeal from order of the fire commissioner.
PREMISES AFFECTED—1619 Broadway and 207-213

West 49th street, Manhattan.

Connell, Holland and Guilfoyle..... 4
Negative 0
Absent: Deputy Chief Martin..... 1

THE RESOLUTION—

(219-28-A)

WHEREAS, Joseph Ahearn, for Brill Brothers, owner, filed, March 12, 1928, an appeal from an order of the fire commissioner, affecting premises 1619 Broadway and 207-213 West 49th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated January 3, 1928 (Order No. 16501-F), reads:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs) placed within main stairway enclosure.";

and

WHEREAS, the building is non-fireproof, three and four stories (40 ft.) in height, 112 ft. by 125 ft., about 13,000 sq. ft. in area at first story and 12,000 sq. ft. in area above; OCCUPIED: cellar, shipping room, 6 persons; 1st and 2nd stories, salesroom and alterations made on suits, 50 persons on each story; 4th story, storage of stock, no occupancy; and

WHEREAS, the appellant claims that the premises are occupied by one tenant for the purpose of conducting a furnishing store for men and women; that the building faces on two streets, with sufficient hydrants and fire alarm box in the vicinity; that there are fire appliances distributed throughout the entire building.

Resolved, that the order of the fire commissioner be and it hereby is modified, and that the appeal be and it hereby is granted on condition that the premises shall be equipped

throughout with such other auxiliary fire-fighting appliances as shall be directed by the fire commissioner; that the building shall be not increased in height, area or dimension, and so long as conditions as to occupancy, use, operation and single tenancy remain unchanged.

155-28-A.

APPELLANT—John J. Gilmartin, for The Travelers Insurance Co., lessee.

SUBJECT—Appeal from orders of the fire commissioner.
PREMISES AFFECTED—55 John street and 4-6 Dutch street, Manhattan.

APPEARANCES—

For Appellant: John J. Gilmartin.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners
Connell, Holland and Guilfoyle 4
Negative: 0
Absent: Deputy Chief Martin..... 1

THE RESOLUTION—

(155-28-A)

WHEREAS, John J. Gilmartin, for the Travelers Insurance, lessee, filed, February 23, 1928, an appeal from orders of the fire commissioner, affecting premises 55 John street and 4-6 Dutch street, Borough of Manhattan; and

WHEREAS, the orders of the fire commissioner, dated September 7, 1927, read:

"Order No. 25871-F:

"1. Extend standpipe tank on roof to not less than 20' above highest outlet as per the rules of the Board of Standards and Appeals.";

and

"Order No. 25872-F:

"1. Provide iron shutters at all openings in the exterior wall above 1st story which are distant in a direct line less than 30' from any opening in any other building and not in the same plane with said openings and which are not more than 50' above a neighboring roof at east, west and north sides of building, or other approved protection, as per Sec. 375, Art. 18, Ch. 5 of the Code of Ordinances.";

and

WHEREAS, the building is fireproof, sixteen stories (197 ft.) and pent house in height, having a frontage of 81 ft. on John street and 124 ft. on Dutch street; OCCUPIED as an office building, 75 persons per story, the pent house being occupied as the superintendent's office; and

WHEREAS, the building is equipped with a standpipe system provided with two 5,000-gallon gravity tanks, 3,500 gallons reserve in each tank for standpipe fire lines; the bottoms of the tanks being located 6 ft. above the roof and 15 ft. above the highest outlet (on the sixteenth floor); and

WHEREAS, there are ten windows in the westerly wall on each story above the first story, within 25 ft. of openings in a neighboring building to the west (across Dutch street); six windows in the north wall of building on each story from the seventh to tenth stories, inclusive, within 50 ft. of the roof of the four-story fireproof extension to the north (under same ownership); three (northerly) windows on each story (in the west wall of the east court) from the seventh to tenth stories, inclusive, within 50 ft. of the roof of the four-story fireproof extension to the north; two (easterly) windows on each story in the south wall of the easterly court from the seventh to tenth stories, inclusive, within 50 ft. of the roof of an adjoining seven-story building to the east; and

WHEREAS, appellant contends that the roof of the pent house is a type of mansard design which would make it a very difficult matter to elevate the tanks and that the buildings forming the exposures are of fireproof construction with fireproof roofs.

MINUTES

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and that the appeal be and it hereby is *granted*, as to Order No. 25871-F, Item 1, so long as conditions as to occupancy and use remain unchanged, and *on condition* that there shall be distributed throughout the top floor such other auxiliary fire-extinguishing appliances as shall be directed by the fire commissioner, and *granted*, as to Order No. 25872-F, Item 1, so long as conditions as to occupancy and use of the premises remain unchanged.

Connell and Holland 3

Absent: 0

THE RESOLUTION—

(1215-27-BZ)

WHEREAS, Alfred J. Boulton, substituted for Jacob Lubroth, Inc., for Roseth Realty Co., owner, filed, November 16, 1927, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles (previously dismissed for lack of prosecution); premises 342-352 Coney Island avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, July 24, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Coney Island avenue, west side, is in a business district; Coney Island avenue, east side, is in a residence district; Caton place, west of a point 100 ft. west of Coney Island avenue, is in an unrestricted district; Kermit place is in a business district; East 8th street, north of a point 100 ft. north of Kermit place, is in an unrestricted district, and East 8th street, south of a point 100 ft. north of Kermit place, is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered November 1, 1927 (re App. No. 20133-1927), reads:

"1. Proposition contrary to Art. II, Sec. 4a-15, of the Building Zone Resolution, the erection of a public garage for more than five motor vehicles in a business district."

and

WHEREAS, the proposed building is to be of non-fireproof construction, one story in height, with a frontage of 100 ft. 2½ in. and a depth of 175 ft. 10¼ in. (irregular); to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, an application on this site was previously denied by this board under hardship and reopened subject to section 7g; the applicant failed to substantiate his basis of appeal under section 7g of the building zone resolution in this new request for a variation and the board deemed hardship was not substantiated.

Resolved, that the decision of the superintendent of buildings be and it hereby is affirmed, and that the application be and it hereby is denied.

114-28-BZ.

APPLICANT—Byrnes & Buckley, for Louis Tufano, owner.

SUBJECT—Application (re decision of the fire commissioner) under sections 7e and 21 of the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—109-07 to 109-17 101st avenue (4453-4459 Jerome avenue), Richmond Hill, Borough of Queens.

Absent: 0

THE RESOLUTION—

(114-28-BZ)

WHEREAS, Byrnes & Buckley, for Louis Tufano, owner, filed, February 6, 1928, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 109-07 to 109-17 101st avenue (4453-4459 Jerome avenue), Richmond Hill, Borough of Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, July 24, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that 101st (Jerome) avenue is in a business district; 109th street (Grant avenue) is in a residence district, and 110th street (Myrtle avenue) is in a residence district; and

WHEREAS, the decision of the fire commissioner, rendered December 2, 1927 (re Plan No. 3843-1927), reads:

"1. Garage for more than five cars may not be permitted in a business district. Appeal may be taken to Board of Standards and Appeals."

and

WHEREAS, the proposed building is to be of non-fireproof construction, one story in height, with a frontage of 100 ft. and a depth of 100 ft.; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the applicant substantiated his basis of appeal under section 7e of the building zone resolution and further supported his application by the filing of over 80 per cent of consents of affected property owners, the board deemed the variation just and reasonable.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the building shall be restricted in height to one story above grade; that there shall be no basement or cellar to these premises, other than a limited area at the front of the building for the accommodation and service of heating apparatus, if installed; that the front of the premises, for a depth of not less than 20 ft., other than two vehicular entrances, shall be restricted, developed and maintained for store use, separated from the garage area by walls of fireproof construction; that the rear and gable walls shall be unpierced throughout their entire height and length; that there shall be incorporated in the roof not less than eight skylights, not less than 48 sq. in. in area each, glazed with plain glass, equipped with wire guards above and below; that the front elevation above the show windows of store front shall be constructed of false gable construction, the exposed (gable) surface to be finished with tile roofing of Spanish type, with pediments over the vehicular entrances of one-half timber and stucco construction; that a return of the front elevations shall be made to this board before submission to the superintendent of buildings; that all required permits shall be obtained within six months and the work completed within one year from the date of this action.

THE RESOLUTION—

(329-28-BZ)

WHEREAS, William F. Doyle, for Golran Realty Corp., owner, filed, April 9, 1928, an application, under the building zone resolution, to permit in a residence district the erection and maintenance of a tenement house with stores on the first story; premises northwest corner of Van Cortlandt avenue and Bailey (Orloff) avenue, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, July 24, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Van Cortlandt avenue, Bailey avenue and Cannon place are in residence districts; and

WHEREAS, the decision of the tenement house commissioner, rendered March 30, 1928, reads:

"The use of the first story of proposed building for business purposes is contrary to Article 2, Sec. 3, of the Building Zone Resolution and is, therefore, unlawful."; and

WHEREAS, the decision of the superintendent of buildings, rendered June 12, 1928 (Application No. N. B. 1243-1928), reads:

"1. Erection of proposed business building in residence district is contrary to provisions of Building Zone Resolution."; and

WHEREAS, the proposed building is to be of non-fireproof construction, six stories in height, with a frontage of 200.03 ft. and a depth of 84.44 ft. and 77.14 ft., irregular; to be occupied as a tenement house with stores on the first story; and

WHEREAS, the board visited these premises and submitted a report of the committee of inspection, recommending a variation in this particular case, which was unanimously adopted; and

WHEREAS, there had been no provision made in the existing zoning maps for business use in this extensive area; and

WHEREAS, there is active and extensive dwelling house development in the nature of tenement houses now erected and in course of erection; and

WHEREAS, the board deemed that legal provision should be made for business incidental to the dwelling house development for community requirement of the neighborhood; and

WHEREAS, the board believes that applicant is entitled to relief under section 21 of the building zone resolution.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted, only so far as it affects the first story for business use, restricted to retail mercantile use and operation; that the use and occupancy above the ground floor shall be restricted to residential use occupancy and that the requirements of the zoning law shall otherwise be complied with in all respects; that any advertising displayed on these premises shall be restricted exclu-

sively to the plate glass show windows of the stores so developed; that there shall be no merchandise displayed or exposed beyond the building line on the outside of these premises, and that all permits required shall be obtained within nine months and any work involved thereby shall be completed within eighteen months from the date of this action.

THE RESOLUTION—

(1034-21-BZ)

WHEREAS, Anna Murphy, for Bridget Meehan, owner, filed, July 6, 1921, amended November 23, 1921, an application, under the building zone resolution, to permit in a residence district the maintenance of a garage for more than three cars, space in which is rented to persons not residing on the premises; premises 1226 Nelson avenue, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of appeals, at its regular meeting, December 6, 1921, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Nelson avenue and Woodycrest avenue are in residence district and West 168th street is in a business district; and

WHEREAS, the order of the fire commissioner, dated June 11, 1921 (Order No. 7240-C), reads:

"1. Deliver and surrender to the Chief of the Bureau of Fire Prevention, Room 1100, Municipal Building, Manhattan, your Fire Department permit No. 50179, said permit is hereby revoked."; and

WHEREAS, the premises consist of a plot of ground 25 ft. by 100 ft. in area, located in a residence district, on the front of which is a dwelling and on the rear a one-story metal building, 25 ft. by 18 ft. in area; occupied as a garage for three cars, space being rented to persons not residing on the premises; this lot adjoining a lot in a business district on which there are three metal garages for five cars operating under fire department permits; and

WHEREAS, the board deemed that this application might be granted under the provisions of section 7, subdivision F, of the building zone resolution; and

WHEREAS, this application was granted by the board at its meetings of December 6, 1921, December 23, 1924, and April 27, 1926, for a period of two years, and the applicant requested an extension of the permit for a further period of two years.

Resolved, that the board of appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted to maintain three individual metal garages for the storage of three pleasure type automobiles on the rear lot 25 ft. front on Nelson avenue, 125 ft. in depth, known as No. 1226 Nelson avenue, for a period not to exceed two years from this date—July 24, 1928.

the garage use shall be set back from the Broadway line not less than 100 ft. easterly from the corner formed by the intersection of 233rd street and Broadway; that a structure of conforming business use shall be erected on the Broadway front in conjunction with the erection of this proposed garage; that the garage building shall be constructed fireproof and shall not exceed a height of one story above the fixed sidewalk grade; that there shall be no openings in the rear and westerly gable walls; that there shall be no roof signs erected and that the front elevation shall be finished in face brick, with architectural terra cotta or stone trimmings; that all permits necessary for the prosecution of the work shall be obtained within nine months from July 6, 1926, and the building completed within one year from the date of this action—July 24, 1928.

1353-27-BZ.

APPLICANT—Edwin M. Bohm, for Ames Transfer Co., owner.

SUBJECT—Application (re decision of the superintendent of buildings) under section 21 of the building zone resolution, to permit in a residence district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—3441-3461 Kingsbridge avenue and 250-258 West 236th street, southwest corner, the Bronx.

APPEARANCES—

For Applicant: Edwin M. Bohn, James M. Ames.

For Opposition: Abraham C. Nelson, Nathan Lottman, N. Bremer, William T. Baer.

ACTION OF BOARD—Application granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Holland and Guilfoyle and Deputy Chief Martin	4
Negative: Commissioner Connell	1
Absent:	0

THE RESOLUTION—

(1353-27-BZ)

WHEREAS, Edwin M. Bohm, for Ames Transfer Co., owner, filed, December 30, 1927, an application, under the building zone resolution, to permit in a residence district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 3441 Kingsbridge avenue and 250-258 West 236th street, southwest corner, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, July 24, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Kingsbridge avenue, west side, south of West 236th street, is in a residence district; Kingsbridge avenue, west side, north of West 236th street, is in a business district; Kingsbridge avenue, east side, south of a point 100 ft. south of West 236th street, is in a residence district; Kingsbridge avenue, east side, north of a point 100 ft. south of West 236th street, is in a business district, and Corlear avenue is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered December 2, 1927 (re App. N. B. 2612-1927), reads:

"1. Erection of public garage for storage of more than five motor vehicles in residence district is contrary to provisions of Building Zone Resolution."

and

WHEREAS, the proposed building is to be of fireproof construction, two stories in height, with a frontage of 173 ft. 9 5/8 in. and a depth of 100 ft.; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the proposed building and its use is for the extension of an existing business, a garage, in single owner-

ship and operation, used in conjunction with the business of the owner of the premises; and

WHEREAS, the greater portion of the premises was purchased prior to the enactment of the zoning law for the extension of the existing business.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted for a garage for the housing of automobiles in the ownership of the owner of the premises, used in conjunction with his business, on condition that the building shall not exceed in height two stories above grade; shall be constructed fireproof throughout; that the westerly gable wall shall be unpierced throughout its entire height and length; that the first tier of beams shall not be more than 8 ft. 6 in. above the mean curb level of the 236th street front; that the front elevation shall be finished with light-color brick with architectural terra cotta or natural stone trim; that any gasoline storage equipment installed shall be located at the extreme southerly end of the proposed building, abutting the existing garage building in the same ownership and operation; that there shall be no signs or advertising of any nature or description displayed or exposed on the exterior of these premises, other than one electric projecting sign displaying the name and business of owner of premises; that any skylights installed shall be glazed with plain glass, equipped with wire guards above and below, and that all permits shall be obtained within nine months and all work involved thereby shall be completed within eighteen months from the date of this action.

18-28-BZ.

APPLICANT—Hamill, Weinberg & Munro, substituted for Cohen and Siegel, for Leo Silver Co., Inc., owner.

SUBJECT—Application (re decision of the superintendent of buildings) under sections 7g and 21 of the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—1870-1878 East Tremont avenue and 1591-1599 White Plains road, southwest corner, The Bronx.

APPEARANCES—

For Applicant: James J. Munro.

For Opposition: None.

ACTION OF BOARD—Application granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin	5
Negative	0
Absent:	0

THE RESOLUTION—

(18-28-BZ)

WHEREAS, Hamill, Weinberg & Munro, substituted for Cohen & Siegel, for Leo Silber Co., Inc., owner, filed, January 10, 1928, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 1870-1878 East Tremont avenue, 1591-1599 White Plains road, southwest corner, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, July 24, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that East Tremont avenue is in a business and unrestricted district; White Plains road is in a business and unrestricted district, and Leland avenue is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered December 29, 1927 (re App. No. 2767-27), reads:

MINUTES

"1. Erection of garage for storage of more than five motor vehicles in business district is contrary to provisions of Building Zone Resolution.";

and

WHEREAS, the proposed building is to be of non-fireproof construction, two stories in height, with a frontage of 108.66 ft. and a depth of 100 ft.; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the applicant supports his application with 77.5 per cent consents of owners of property affected, the remaining requirements as to consents, while not refusing consent, have stipulated no objection; and

WHEREAS, the property abuts and is opposite the unrestricted use area, the board believes that it is justified in the granting of application under hardship.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the building shall not exceed in height two stories above grade; that it shall be constructed fireproof throughout; that the elevation on street front shall be completed substantially in accordance with drawing on file with this application; that the exterior of street wall shall be finished with two-tone, light-color face brick, with architectural terra cotta or natural stone trimming; that the southerly gable wall shall be unpierced throughout its entire height and length; that any ramp installed on these premises the start shall be located not less than 10 ft. inside the building line; that no signs shall be displayed on these premises, other than one projecting electrical sign at the corner formed by the intersection of White Plains road and East Tremont avenue; that the vehicular openings shall be restricted to the East Tremont avenue frontage; that there shall be no door opening on the White Plains road front, other than one emergency exit, not exceeding 3 ft. 8 in.; that any gasoline storage equipment installed shall be located at the East Tremont avenue front, adjoining the unrestricted use area; that there shall be no portable gasoline tanks operated outside of the building line, and that all permits shall be obtained within six months and any work involved shall be completed within eighteen months from the date of this action.

THE RESOLUTION—

(522-28-BZ)

WHEREAS, Victor C. Farrar, for Columbia Riding Club, Inc., owner, filed, June 7, 1928, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a club house with a garage for the storage of more than five motor vehicles and a

stable for more than five horses; premises 48-68 West 100th street, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, July 24, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that West 100th street is in a business district and that both West 99th street and Manhattan avenue are in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered June 5, 1928 (re App. N. B. 318-28), reads:

"1. The proposed erection of a building in a business district containing a garage for more than 5 motor vehicles and a stable for more than 5 horses is contrary to Section 4-a-15 and to section 4 a 36 of the Zoning Resolution.

"2. A garage for more than 5 cars may not be permitted which is situated on any portion of a street between two intersecting streets in which portion there exists any hospital maintained as a charitable institution. Sec. 21, Zoning Res."

and

WHEREAS, the proposed building is to be of fireproof construction, seven stories, cellar and sub-cellar in height, with a frontage of 247 ft. 8 in. and a depth of 100 ft. 11 in.; to be occupied as a private riding club with a garage for the storage of more than five motor vehicles and a stable for more than five horses; and

WHEREAS, the board deemed that applicant is entitled to relief under section 21 of the building zone resolution on the ground that it is the establishment of a bona fide, incorporated club, under the laws of the State of New York, and the board under section 20 authorized and empowered to and does hereby interpret the zoning resolution to permit this use under the circumstances of use and operation.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the building shall comply as to heights, area and use, otherwise of the premises strictly with the requirements of the building zone resolution; that the use and occupancy of these premises shall be restricted and limited to the uses incidental and accessory to the operation and conduct of this riding club, the Columbia, with accommodations for such horses and automobiles, the property of the members of the club using and occupying the premises; that there shall be no gasoline storage equipment installed or maintained on the premises; that the front elevation shall be of attractive architectural design, finished with face brick, architectural terra cotta or natural stone; that all windows on any floors on which horses are stabled shall be equipped with movable wire screens of not less than No. 16 mesh; that a return of the drawing of the facade of the proposed building shall be made to this board for approval before submission to the superintendent of buildings; that no signs of any nature or description shall be erected or displayed on these premises, other than one electrically illuminated sign, indicating the name and title of the club operating on the premises, and that all permits required shall be obtained within nine months and any work involved thereby shall be completed within eighteen months from the date of this action.

THE RESOLUTION—

WHEREAS, the foregoing applicants have filed with the board of standards and appeals applications, under the building zone resolution, affecting the premises in question; and

WHEREAS, the applicants have failed to complete their papers, though duly notified to do so.

Resolved, that the applications be and they hereby are dismissed for lack of prosecution.

AREAS FIXED.

(255-28-BZ)

The chairman read a communication from William F. Doyle, requesting the board to fix the area deemed affected and within which to obtain consents to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 1676-1678 Jerome avenue, Borough of The Bronx.

The following area was approved by the board:

MINUTES

Both sides of Jerome avenue, from a point 100 ft. south of East 174th street to a point 400 ft. north of premises in question; also the premises at rear and for a distance of 50 ft. on either side of the side lot lines of the premises in question.

(268-28-BZ)

The chairman read a communication from William Richter, requesting the board to fix the area deemed affected and within which to obtain consents to permit in a business district the erection and maintenance of a garage for the

storage of more than five motor vehicles; premises 878-886 Gravesend avenue, west side, 160 ft. south of Avenue F, Borough of Brooklyn.

The following area was approved by the board:

Both sides of Gravesend avenue from a point 100 ft. north of Avenue F to 18th avenue; also the premises at rear and for a distance of 50 ft. on either side of the side lot lines of the premises in question.

THE RESOLUTION—

(298-28-S)

WHEREAS, Henry I. Oser, for Printarts Building, Inc., owner, filed, April 2, 1928, a petition for a variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises 228-238 East 45th street and 237 East 44th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered March 28, 1928, reads:

"All windows must comply with Section 264-7 of Labor Law and Rule 503 of Industrial Code.";

and

WHEREAS, the building is fireproof, sixteen stories in height, having a frontage of 30 ft. on East 44th street, 127 ft. on East 45th street and a depth of 200 ft. 10 in.; OCCUPIED: 1st story, stores; upper stories, tenant factories, 115 persons per story; EQUIPPED with a sprinkler system; EXITS: two interior fireproof stairways, extending from the first story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, there are windows on the first and second stories, in both street fronts of the building, glazed with one-quarter-inch plate glass; the maximum area of the glass on first story being 120 in. by 132 in., and on the second story being 144 in. by 90 in.; and

WHEREAS, petitioner contends that a strict compliance with the labor law as to the area of the glass would destroy the intended use of the two lower stories.

Resolved, that the decision of the superintendent of buildings be and it hereby is *affirmed*, and that the petition be and it hereby is *denied*.

226-28-S.

PETITIONER—Julius Eckmann, for 245 West 29th Street Corp., owner.

SUBJECT—Variation of the labor law as cited in decision of the superintendent of buildings.

THE RESOLUTION—

(226-28-S)

WHEREAS, Julius Eckmann, for 245 West 29th Street Corp., owner, filed, March 13, 1928, a petition for a variation from the requirements of the labor law, as cited in a de-

cision of the superintendent of buildings, affecting premises 241-243 West 29th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered December 20, 1927 (N. B. App. No. 483-1927), reads:

"14. All windows should comply with Sec. 264, Labor Law, and Rule 503, Industrial Code.";

and

WHEREAS, the building in course of construction is fireproof, seventeen stories in height, 79 ft. 1 in. by 98 ft. 9 in. in area; OCCUPIED as a tenant factory, 115 persons on each story; EQUIPPED with a sprinkler system and a standpipe system; EXITS: a fire tower; an interior fireproof stairway, extending from first story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, the petitioner proposes to install plate glass show windows one-quarter inch in thickness on the street front, the maximum size of glass on first story 8 ft. 6 in. by 8 ft. 6 in.; second and third stories, 5 ft. 3 in. by 8 ft. 6 in.; and

WHEREAS, the petitioner contends that to divide the glass into smaller lights would impair the value of the lower stories and handicap the owner in renting the same.

Resolved, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is *granted*, only as far as it affects the windows on the three lower stories of the street front, *on condition* that no light of glass on the second and third stories shall exceed a width of 4 ft. 2 in. and that the openings shall be equipped with approved metal frames and sash, glazed with one-quarter-inch polished plate glass and that the requirements of the labor law otherwise shall be complied with in all respects.

THE RESOLUTION—

(194-28-S)

WHEREAS, J. L. Hernon, for Midcity Realty Corp., owner, filed, March 2, 1928, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 402 Broadway, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated January 21, 1928 (Order No. 31741-LD), reads:

"1. Provide an outside iron balcony fire escape on the front of the building with balconies 4' in width connected by stairways not less than 22" wide, placed at an incline of not more than 45 degrees, extending from ground to roof constructed as per Section 273 of the Labor Law and the rules of the Board of Standards and Appeals, or carry out a proper alternative method of complying with Section 271 of the Labor Law.";

and

WHEREAS, the building is non-fireproof, five stories in height, 25 ft. by 91 ft. in area at first story and 25 ft. by 73 ft. in area above; OCCUPIED: 1st story, store, 6 per-

MINUTES

sons; 2nd story, manufacture of bed spreads, 15 persons; 3rd, 4th and 5th stories, vacant; EXITS: an interior wooden stairway, extending from the first story to top story, enclosed at first story in wood studs, wire lath and one inch of cement mortar partitions, and in wooden partitions on upper stories, with wooden doors at openings; a party wall fire escape balcony at second story front, having a fireproof opening to the balcony, with EGRESS by means of a counterbalanced stairway to sidewalk; a ladder from top story to roof scuttle; ROOFS of adjoining buildings: same height at north and south; and

WHEREAS, the petitioner claims that only the first and second stories of the building are occupied; that the second means of egress is provided by a party wall balcony at second story front, to adjoining building at north and counterbalanced stairs to sidewalk; that the two buildings are under the same ownership; furthermore, the petitioner contends that an additional means of exit may be had at rear of second story to roof of first story extension and to roof of adjoining extension at north on the same level.

Resolved, that the order of the fire commissioner be and it hereby is affirmed, and the petition be and it hereby is denied.

283-28-S.

PETITIONER—John H. Knubel, for Clemons Realty Co., owner.

SUBJECT—Variation of the labor law as cited in decision of the superintendent of buildings.

PREMISES AFFECTED—345-353 Seventh avenue, Manhattan.

APPEARANCES—

For Petitioner: John H. Knubel.

ACTION OF BOARD—Petition denied, reconsidered and then granted on condition.

THE RESOLUTION—

(283-28-S)

WHEREAS, John H. Knubel, for Clemons Realty Co., owner, filed, March 29, 1928, a petition for a variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises 345-353 Seventh avenue, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered November 18, 1927 (Applic. No. 424-1927), reads:

"16. All windows including show windows should comply with section 264 Labor Law and Rule 503 Industrial Code.";

and

WHEREAS, the building is fireproof, twenty-five stories in height, 101 ft. 4¾ in. by 75 ft. in area; OCCUPIED: 1st story, stores; 2nd to 24th stories, inclusive, tenant factories, 160 persons per story; 25th story, apartment; EQUIPPED with a sprinkler system and a fire alarm signal system; EXITS: two interior fireproof stairways, extending from the first story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, there are openings in the street walls of the building on the first, second, third and fourth stories glazed

with one-quarter-inch plate glass; the maximum area of the glass in the first story is 7 ft. 6 in. by 8 ft. and 7 ft. 6 in. by 8 ft. on the second, third and fourth stories; and

WHEREAS, petitioner contends that a strict compliance with the labor law as to area of the glass would destroy the intended use of the lower four stories.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted, only as far as it affects the windows on the three lower stories on the street front, on condition that no light of glass on the second and third stories shall exceed a width of 4 ft. and that the openings shall be equipped with approved metal frames, glazed with one-quarter-inch polished plate glass and that the requirements of the labor law shall be complied with in all other respects.

497-28-S.

PETITIONER—Julius Eckmann, for Roxton Realty Company, owner.

SUBJECT—Variation of the labor law as cited in order of the superintendent of buildings.

PREMISES AFFECTED—1-3 East 35th street, Manhattan.

APPEARANCES—

For Petitioner: Julius Eckmann.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin	5
Negative	0
Absent	0

THE RESOLUTION—

(497-28-S)

WHEREAS, Julius Eckmann, for Roxton Realty Co., owner, filed, June 1, 1928, a petition for a variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises 1-3 East 35th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered June 1, 1928, reads:

"1. Egress from termination of rear fire escape should be as per Section 273, Labor Law.";

and

WHEREAS, the building is non-fireproof, five stories in height, 50 ft. by 98 ft. 9 in. in area at first story and 50 ft. by 70 ft. 6 in. in area above; OCCUPIED for the manufacture of hats and dresses, 40 persons on each story; EXITS: an interior fireproof stairway, extending from the first story to roof, enclosed in fireproof partitions with fireproof doors at openings; a fire escape on the rear of the building, having fireproof openings along the course thereof, extending from the roof of first story extension to the main roof, with EGRESS from the termination of the fire escape by means of an iron stairway from roof of first story extension leading into the second story of adjoining building at east; and

WHEREAS, the petitioner claims that safe egress is maintained from roof of first story extension (the termination of rear fire escapes), to adjoining building at east which is under the same ownership; furthermore, the petitioner contends that the egress as above stated was accepted by the board as a second means of egress from the adjoining building at east; the petitioner proposes a reciprocal arrangement of exits between these buildings.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted, only so far as it affects the egress from the termination of the rear fire escape from premises 1-3 East 35th street, on condition that the fire escape of No. 1 and No. 3 shall be

MINUTES

connected, making a party wall fire escape with No. 5 at the third story level; that the fire escape shall be extended to the roof of the first story extension of Nos. 1 and 3 East 35th street; that the ceiling of the extension of Nos. 1 and 3 shall be fire-retarded in accordance with the rules of the board of standards and appeals, and that egress from the termination of the fire escape on the roof of the first story extension shall be by means of an iron balcony at the easterly side of the extension on No. 3, connected with No. 5; that a door opening from the roof of No. 3 to second story of No. 5 shall be maintained unfastened and unlocked during working hours; that a casement door shall be provided from the rear of the second story to the extension roof of each section; Nos. 1 and 3 with iron steps to overcome difference in level; that the building shall not be increased in height, area or dimension and that the occupancy of the premises shall be restricted to the legal capacity of the interior stairs.

250-28-S.

PETITIONER—Samuel Rosenblum, for Live Wire Realty Co., Inc., owner.

SUBJECT—Variation of the labor law as cited in orders of the fire commissioner.

PREMISES AFFECTED—105-107 Duane street and 14 Thomas street, Manhattan.

APPEARANCES—

For Petitioner: Samuel Rosenblum.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition denied.

THE VOTE TO GRANT—

THE RESOLUTION—

(250-28-S)

WHEREAS, Samuel Rosenblum, for Live Wire Realty Co., Inc., owner, filed, March 22, 1928, a petition for a variation from the requirements of the labor law, as cited in orders of the fire commissioner, affecting premises 105-107 Duane street and 14 Thomas street, Borough of Manhattan; and

WHEREAS, the orders of the fire commissioner, dated September 26, 1927, read:

"Order No. 26300-LF:

"1. Place existing interior fire alarm system in proper working order and comply with the following:
(A) Extend existing interior fire alarm system to cover premises 107 Duane St. by providing additional apparatus as shown on the enclosed approved plan No. 7589.";

and

"Order No. 31217-LD:

"1. Arrange the fire escape at rear of building serving as a required means of exit so that same will conform to Sec. 271 of the Labor Law and the rules of the Board of Standards and Appeals, adopted Feb. 23, 1927.

"Defects noted as follows:

"(1) No safe egress from termination to street.

"(2) No fire doors at openings to balconies.

"(3) Fire escape does not extend to 105 section at 2nd story.

"2. Provide an unobstructed passageway around hoistway leading from the foot of the stairway at 107 section of building to the street, said passageway to be not less than 3' in width as per Sec. 272 of the Labor Law.

"3. Enclose the interior stairway at the east and at the west side of building in partitions of fire resisting material extending from floor to ceiling at 1st story, all openings in same to be protected by approved fire doors

as per rules of the Board of Standards and Appeals, adopted Feb. 23, 1927.";

and

WHEREAS, the premises consist of two non-fireproof, five-story buildings; No. 105 Duane street is 25 ft. by 97 ft. 6 in. in area at first story and 25 ft. by 88 ft. in area above; No. 107 Duane street having a frontage of 25 ft., connects on the first story, all the way through, with a building at 14 Thomas street, a total depth of 175 ft., and on the upper stories being 25 ft. by 90 ft. in area; there being connecting openings on the first and third stories between No. 105 and No. 107 Duane street; OCCUPIED: No. 105 Duane street: 1st story, restaurant; 2nd to 5th stories, inclusive, shoe storage, 5 persons; No. 107 Duane street: 1st story, shoe store; 2nd story, shoe jobbers and printers, 5 persons; 3rd story, shoe storage, no persons; 4th story, printers, 4 persons; 5th story, manufacture of packing, 5 persons; EQUIPPED with a fire alarm signal system in part of No. 105 Duane street; EXITS: two interior wooden stairways, extending from the first story to top story, enclosed in wood board partitions, excepting the first story of No. 107 Duane street, which is fire-retarded, with wood doors at openings; a 60-degree party wall balcony fire escape on the rear of the building, having unprotected openings in No. 105 Duane street and fireproof openings along the course thereof in No. 107 Duane street, extending from the roof to the second story balcony, with EGRESS from the termination of the fire escape by means of an iron balcony connecting with the fire escape on the rear of No. 14 and No. 16 Thomas street; ROOFS of adjoining building: to east and west are at same level; and

WHEREAS, petitioner, as to Order No. 26300-LF, contends that this order was issued due to the openings on the first and third stories, between the two buildings; that the order is to extend the system to cover premises No. 107 Duane street; that the occupancy of No. 107 Duane street being less than twenty-five persons above the first story would not require such a system; regarding the passageway around the hoistway, petitioner proposes to install telltale chains; petitioner, in view of the light occupancy of the premises, requests the acceptance of the existing means of egress.

Resolved, that the orders of the fire commissioner be and they hereby are affirmed, and that the petition be and it hereby is denied.

1062-27-SA.

PETITIONER—Automatic Fire Alarm Co., for Mohawk Electric Mfg. Co., owner.

SUBJECT—Mohawk Closed Circuit Sprinkler Alarm Panel and Mohawk Closed Circuit Standpipe Alarm, approval of.

APPEARANCES—

For Petitioner: E. L. Rollinson.

For Administration: Inspector Mulligan of fire department.

ACTION OF BOARD—Chairman read fire department report. Appliance approved in accordance with fire department report.

THE VOTE—

THE RESOLUTION—

(1062-27-SA)

WHEREAS, the Automatic Fire Alarm Co. filed, September 30, 1927, a petition for approval of their device known as the Mohawk Closed Circuit Sprinkler Alarm System and Mohawk Closed Circuit Standpipe Alarm System, A.C. and D.C.; and

WHEREAS, a report of the chief of the bureau of fire prevention, fire department, recommends the approval of these devices.

MINUTES

Resolved, that the board of standards and appeals does hereby approve the Mohawk Closed Circuit Sprinkler Alarm System and the Mohawk Closed Circuit Standpipe Alarm System A.C. and D.C. for use in accordance with the report of the fire department, when installed in accordance with

the rules of the board of standards and appeals for signaling apparatus.

Adjourned 4.45 p. m.

WILLIAM J. O'GORMAN, Secretary.

MINUTES

*CORRECTION.

The minutes of the meeting of the board of standards and appeals held June 12, 1928, are hereby corrected to read as follows:

THE RESOLUTION—

(287-28-SA)

WHEREAS, Joseph A. Cox, for the Timken-Detroit Co., owner, filed, March 30, 1928, a petition with the board of standards and appeals for approval of the device known as the Timken Oil Burner, Model 20; and

* Correction—Word "or" added in sixth line.

WHEREAS, this burner is of the mechanical draft, electric ignition type, with safety control and gravity or pump feed; and

WHEREAS, a committee of the board inspected this device in operation at premises 176 Hicks street, Borough of Brooklyn, and recommended the approval of the device.

Resolved, that the board of standards and appeals does hereby approve the Timken Oil Burner, Model 20, for use with Grade "A" and Grade "B" fuel oil for domestic and commercial installations, when installed in accordance with the fuel oil rules of the board of standards and appeals.

MINUTES

*CORRECTION.

The minutes of the meeting of the board of standards and appeals held June 12, 1928, as they appeared in Bulletin No. 25, Vol. XIII, are hereby corrected to read as follows: 63-28-SA.

PETITIONER—M. J. Sage, for Cleveland Steel Products Corp., owner.

SUBJECT—Toridheet Oil Burner, approval of.

APPEARANCES—

For Petitioner: M. J. Sage.

ACTION OF BOARD—Chairman read engineer's report. Report adopted. Petition approved.

THE VOTE TO ADOPT REPORT AND APPROVE PETITION—

THE RESOLUTION—

(63-28-SA)

WHEREAS, M. J. Sage, for the Cleveland Steel Products Corp., owner, filed, January 24, 1928, a petition with the board of standards and appeals for approval of the device known as the Toridheet Oil Burner; and

WHEREAS, the burner is of the centrifugal atomizing type with natural draft and gas pilot light, equipped with safety control; and

WHEREAS, a committee of the board inspected this device in operation at 223 Flatbush avenue, Borough of Brooklyn, and recommended the approval of the device.

Resolved, that the board of standards and appeals does hereby approve the device known as the Toridheet Oil Burner for use with Grade "A" and Grade "B" fuel oil in domestic and commercial installations.

* Correction—Words "Co. Inc." changed to "Corp." in lines 2 and 18 and word "Torridheat" changed to "Toridheet" in lines 3, 20 and 28.

MINUTES

*CORRECTION.

The minutes of the meeting of the board of standards and appeals held July 17, 1928, as they appeared in Bulletin No. 30, Vol. XIII, are hereby corrected to read as follows:

THE RESOLUTION—

(126-28-S)

WHEREAS, Croker National Fire Prevention Engineering Co., for Segal Manufacturing Co., owner, filed, February 9, 1928, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 98-100 Nott avenue, Long Island City, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated June 26, 1926, reads:

* Correction—Lines 17 and 18 of resolution which appear misplaced in the bulletin at top of page 794 are here properly inserted.

"Order No. 98702-LD:

"1. Provide an additional required means of exit from the 2nd story remote from the existing stairway, preferably located at the rear of the building, in accordance with the requirements of Section 270 of the Labor Law.

"2. Enclose the interior stairway at the northwest corner of the building serving as a required means of exit on all sides by fireproof partitions extending continuously from the lowest story to 3 ft. above the roof, in accordance with the requirements of Sec. 270 of the Labor Law";

and

WHEREAS, the building is non-fireproof, two stories in height, 50 ft. by 100 ft. in area at first story and 40 ft. by 100 ft. in area above; OCCUPIED by one concern for the manufacture of furniture: 1st story, 4 persons; 2nd story, 4 persons; EXITS: an interior wooden stairway, extending

MINUTES

from the first story to top story, enclosed in partitions constructed of brick on the first story and of wood studs, sheathed on each side and covered with metal on the hall side, with fireproof doors on the first story and wood doors at openings on the second story; ROOFS of adjoining buildings: to south, one story lower; and

WHEREAS, the petitioner, as to Item 1, contends that there is a doorway at the rear of the second story which leads out to the roof of the abutting building to the rear (same being used in conjunction with premises in question), thence across roof to 12th street front, where petitioner proposes to provide a portable iron ladder which would lead to street; as to Item 2, petitioner proposes to cover the loft side of the stairway enclosure with plaster board and metal; petitioner contends, further, that the building was erected in 1914 from plans filed with the bureau of buildings as a one-story and basement factory building and that after completion a certificate of occupancy was issued for same and that it was due to the fact that the fire department considered the structure a two-story building that these orders were issued; and

WHEREAS, a certificate of occupancy was issued by the bureau of buildings as a one-story building, which is in error, as more than 50 per cent of the first story is above the grade of the curb level, therefore the building is two stories.

Resolved, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is *granted*, as to Item 1, *on condition* that a doorway shall be provided at the rear of the second story opening on the roof of the one-story building immediately to the south, in the same and single ownership; that a balcony shall be provided on the street front of the 12th street building, with a counter-balanced drop ladder in guides to the street, and *granted*, as to Item 2, *on condition* that the stair shall be enclosed in the first story with approved fire-resisting construction with self-closing, fireproof door at the first story level; that the building shall be not increased in height or area; that the use and occupancy shall remain unchanged, and that this building in conjunction with the building immediately to the rear, shall remain in single tenancy and operation.

RULES

EXIT RULES—REVOLVING DOORS

Adopted, under Cal. No. 842-17-S, Sept. 6, 1917; amended, under Cal. No. 41-19-S, Feb. 11, 1919; under Cal. No. 412-20-S, July 8, 1920, and under Cal. No. 41-19-S, Jan. 8, 1924.

Rule 1. Classification of Revolving Doors. For the purpose of these rules revolving doors shall be classified as follows:

(a) **Type A. "Automatic Collapsible"** in which the individual wings are maintained in the normal revolving position, but which doors are so designed and constructed that in the event of excessive pressure being exerted on the wings, the braces or other devices which hold the wings in their normal position shall be disconnected, thereby permitting easy egress through the vestibule at least equivalent to that provided by a pair of swinging doors having the same width as the vestibule opening.

No revolving doors shall be included in this classification if the pressure necessary to collapse any wing exceeds one hundred and fifty (150) pounds when exerted at a point three (3) inches from the outer edge of the wing, and three (3) feet six (6) inches above the floor, but shall be classified under type B.

(b) **Type B. "Rigid Brace"** in which the individual wings are maintained in the normal revolving position by rigid braces or similar devices, but which doors are so designed and constructed that the braces or other devices which hold the wings in their normal position may be manually released by simple mechanical means, thereby permitting the individual wings to be manually collapsed and so arranged as to permit free egress through the vestibule.

Rule 2. Revolving Doors. Prohibitions. Revolving doors shall be prohibited in exit doorways from assembly halls, asylums, auditoriums, churches, dance halls, hospitals, motion picture theatres, schools, theatres, or from any room or space within a building where more than three hundred (300) persons congregate for purposes of amusement, instruction or worship; except that the main entrance doorway to a hospital or sanitarium may be equipped with either type A or B revolving doors when supplemented by swinging doors not less than three (3) feet eight (8) inches wide at this or other paths of egress.

Rule 3. Revolving Doors—Department Stores. Type A revolving doors hereafter installed shall be accepted in exit doorways from department stores provided doorways aggregating at least fifty (50) per cent of the legal re-

quired width, equipped with swinging doors, are installed, and one or more such outwardly swinging doors are located immediately adjacent to each revolving door. Such swinging doors need not be equipped with handles on the outside, and shall have a minimum clear width of three (3) feet.

Rule 4. Existing Revolving Doors. Except where otherwise prohibited existing Type A revolving doors may be retained as required means of exit in doorways from buildings.

Except where otherwise prohibited existing Type B revolving doors may also be retained as required means of exit in buildings, when, in the opinion of the administrative official having jurisdiction, no dangerous exit condition exists. If, however, such dangerous exit condition is deemed by him to exist, they shall be either replaced by Type A revolving doors, or supplemented by at least one swinging door not less than three (3) feet wide located adjacent to the revolving door, as the administrative official may direct.

Rule 5. New Revolving Doors. In buildings other than assembly halls, asylums, auditoriums, churches, dance halls, department stores, hospitals, motion picture theatres, schools and theatres, coming under the exit provisions of the building code, doorways serving as required exits may hereafter be equipped with Type A revolving doors or with Type B revolving doors, provided such revolving doors, not exceeding three in a unit, shall have an outwardly swinging door at least three (3) feet wide located immediately adjacent thereto.

Rule 6. Revolving Doors—Subway Entrances. Required exit doorways from buildings which serve in addition as a means of subway entrance and exit may be equipped with type A revolving doors, provided doorways of the legal required width equipped with swinging doors are also installed and one or more such outwardly swinging doors are located adjacent to each revolving door.

Rule 7. Saving Clause. But nothing in these rules shall prevent the installation on the exit doors from a bank, trust company, jewelry store, or any store devoted to a single similar use, of a locking device which may be operated by electricity or other means from the interior of the building, to be used only in an emergency.

WARNING

Notice is hereby given to all petitioners, appellants and applicants, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

First, That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

Second, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

Third, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and of the posting of the calendars on the bulletin board in the

offices of the board and of the further publication of the calendars in the daily press.

Fourth, That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

Fifth, That the business of the board is to dispose of all cases promptly, for the reason that the pendency of an appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of the appellant or petitioner to file necessary data, or by any other method of delay.

Sixth, That no appeal, application or petition will be accepted for filing unless, at the time of filing, all papers, plans and data required by law are supplied, as specified on the blank appeal, application or petition forms.

CONTENTS

This issue of the Bulletin contains, in the order given—

Docket.

Notice of Adjournment.

Call of Clerk's Calendar.

The Trial Calendar.

Notices in Building Zone Cases.

Minutes of Special Meeting, July 27, 1928, 10 a. m.

Minutes of Special Meeting, July 27, 1928, 2 p. m.

Correction.

Fire Retarding Rules.

Fuel Oil Burners Approved.

Reserve Calendar.

Progress Report.

PUBLIC HEARINGS

Tuesdays, at 10 a. m. and 2 p. m.
Special meetings as published in this Bulletin.
Call of Clerk's Calendar, Tuesdays, at 2 p. m.
All hearings are held in Room 1013, Municipal Building, Manhattan.

HOURS FOR CONSULTATION

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

CALL OF CLERK'S CALENDAR

The Clerk's Calendar consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, September 11, 1928, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, September 18, 1928, at 2 o'clock.

The Clerk's Calendar is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

NOTICE TO APPELLANTS AND PETITIONERS

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and disposition of same expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

THE RESOLUTION—

(239-28-A)

WHEREAS, G. W. Hallock, for Petroleum Heat and Power Co., for Thornton Building Co., Inc., owner, filed, March 19, 1928, an appeal from a decision of the fire commissioner, affecting premises 118 Amity street, Flushing, Borough of Queens; and

WHEREAS, the decision of the fire commissioner, dated February 8, 1928 (Plan No. 4641-26), reads:

"5. Boiler room must be completely cut off from the rest of the building by fireproof partitions, ceiling and floor constructed of not less than 8" for brick or 6" for concrete or terra cotta."

and

WHEREAS, the building is non-fireproof, three stories and basement in height, 97.33 ft. by 50 ft. in area; OCCUPIED: basement: boiler room and storage, 1 person; 1st story, stores, 10 persons; 2nd story, offices, 15 persons; 3rd story, offices, 7 persons; and

WHEREAS, appellant contends that the boiler room is enclosed with 6-inch terra cotta partitions, having an opening therein (protected with a fireproof door) leading to the open cellar which has a stairway leading to the yard and contends, further, that the ceiling of the boiler room is fire-retarded.

Resolved, that the decision of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the boiler room shall be enclosed with approved masonry enclosure with not more than one opening therein, equipped with a self-closing, fireproof door; that the ceiling shall be fire-retarded, in accordance with the rules of the board of standards and appeals, and that there shall be installed a concrete sill at door opening not less than 6 inches in height; that there shall be provided from the boiler room to the outer air by means of open areaway a fixed double-rung iron ladder to a grated hatchway or vault door maintained unfastened and unlocked to the open yard; that there shall be maintained in addition thereto an open stairway from the cellar direct to the yard of the premises with egress from the yard direct to the street, and that the installation shall comply in all other respects with the fuel oil rules of the board of standards and appeals.

208-28-A.

APPELLANT—Philip Markowitz, for 1569 Third Avenue Corp., owner.

SUBJECT—Appeal from order and decision of the superintendent of buildings.

PREMISES AFFECTED—1569 Third avenue and 201 East 88th street, Manhattan.

APPEARANCES—

For Appellant: Philip Markowitz.

ACTION OF BOARD—Appeal denied.

THE VOTE TO GRANT—

Affirmative	0
Negative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin.....	5
Absent	0

THE RESOLUTION—

(208-28-A)

WHEREAS, Philip Markowitz, for 1569 Third Avenue Corp., owner, filed, March 7, 1928, an appeal from an order and decision of the superintendent of buildings, affecting premises 1569 Third avenue and 201 East 88th street, Borough of Manhattan; and

WHEREAS, the order of the superintendent of buildings, dated January 31, 1927 (Order No. 522-1927), reads:

"In that of occupying the third floor as club, restaurant and cabaret, contrary to the last issued certificate of occupancy 6580 which states the occupancy of the 3rd floor to be offices.

"You are hereby directed to discontinue the said occupancy of the above described building until a certificate of occupancy has been issued by the Superintendent of Buildings for such use."

and

WHEREAS, the decision of the superintendent of buildings, rendered March 2, 1927 (Alt. Applic. No. 184-1927), reads:

"1. Building must be enclosed in walls of approved masonry. Sec. 5, Par. 4. Section 71, Par. 3."

and

WHEREAS, the building is of frame construction, three stories (34 ft.) in height, 25 ft. 8½ in. by 40 ft. and 46 ft. 7 in., irregular, in depth, about 1,200 sq. ft. in area; OCCUPIED: 1st story, stores, 5 persons; 2nd story, offices, 5 persons; 3rd story, cabaret and restaurant, 50 persons; within a business district; Certificate of Occupancy No. 6580 of 1923 now in force permits the use of the first story, stores; 2nd and 3rd stories, offices, 5 persons on each story; and

WHEREAS, the appellant claims that the building was altered in 1923 when the superintendent of buildings issued a certificate of occupancy for business purposes which is now in force; that the building is stuccoed on outside, not over 40 ft. in height; that the interior stairs are 3 ft. 8 in. in width, enclosed with fire-retarding materials and extends to the roof; furthermore, the appellant proposes to erect fire escapes on the outside of the building; and

WHEREAS, the applicant stated at this meeting that the premises had been used and operated as a restaurant and cabaret in violation of the existing certificate of occupancy, and after a full consideration of the facts presented by the superintendent of buildings, as deduced from examination of the papers on file.

Resolved, that the order and decision of the superintendent of buildings be and they are hereby *affirmed*, and the appeal be and it hereby is *denied*.

55-28-A.

APPELLANT—Charles R. Barrett, for Brewster & Co., Inc., owner.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—North side of North Jane street (Queensboro Bridge Plaza), from Radde to Prospect streets, Long Island City, Borough of Queens.

APPEARANCES—

For Appellant: Charles R. Barrett.

For Administration: Inspector Meyer of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin.....	5

THE RESOLUTION—

(55-28-A)

WHEREAS, Charles R. Barrett, for Brewster & Co., Inc., owner, filed, January 19, 1928, an appeal from an order of

MINUTES

the fire commissioner, affecting premises occupying block between Prospect and Radde streets, on north side of Bridge Plaza (North Jane street), Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated June 20, 1927 (Order No. 11241-LC), reads:

"You are hereby notified that an inspection of the above premises, used as a storage garage, shows that the following must be done before the permit requested by you can be issued:

"2. Separate boiler room from remainder of building by an enclosure of solid masonry at least 8 inches in thickness. Entrance to boiler room to be from exterior of building only, Section 159, Chapter 10, Code of Ordinances."

and

WHEREAS, the building is fireproof, six stories and basement in height, irregular in shape, having a frontage of 169 ft. 4 in. on Prospect street, 201 ft. 1 in. on North Jane street and 353 ft. 1/2 in. on Radde street; OCCUPIED: basement, boiler room, automobile storage (empty tanks) and stock room, 5 persons; 1st story, reception room, automobile repair and shipping department, 40 persons; 2nd story, offices, draughting rooms and aircraft manufacture, 150 persons; 3rd story, blacksmith and machine shops, 100 persons; 4th story, Rolls-Royce automobile service station, 50 persons; 5th story, automobile body manufacturing, 125 persons; 6th story, paint shop, 60 persons; and

WHEREAS, appellant contends that the boiler room is provided with a sprinkler system; that it is enclosed with 8-inch concrete walls with two openings therein (provided with fireproof doors) which lead through the engine room to fireproof stairs leading to the upper stories of the building; that the doors at the openings leading from the engine room are fireproof and self-closing and contends, further, that there is an engineer's ladder at the westerly wall of the boiler room leading to the sidewalk; and

WHEREAS, the boiler room is entirely enclosed in approved fireproof construction.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the two existing openings from the boiler room to engine room adjoining shall be equipped with self-closing, fireproof doors with concrete saddle not less than 6 inches above cellar floor, the full width of the door jamb, and that there shall be provided on the westerly front of the boiler room a fixed double-rung iron ladder in area-way to counterbalanced hatchway at sidewalk level, said hatchway to be maintained unlocked and unfastened during working hours and that the fuel oil burning installation shall comply in all other respects with the fuel oil rules of the board of standards and appeals.

THE RESOLUTION—

(162-28-BZ)

WHEREAS, Gronenberg & Leuchtag, for Frank Volz, owner, filed, February 24, 1928, an application, under the building zone resolution, to permit, partly in a business district and partly in a residence district, the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 4446-4448 Broadway, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its special meeting, July 27, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Broadway is in a business district; Fairview avenue and Wadsworth Terrace are in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered February 7, 1928 (re App. N. B. 27-1928), reads:

"2. Proposed occupancy as a garage is contrary to Art. II, Sec. 3 and 4 of the Zone Resolution.";
and

WHEREAS, the proposed building is to be of fireproof construction, two stories and cellar in height, with a frontage of 66 ft. 5¼ in. and a depth of 150 ft. and 158 ft. 65⁄8 in., irregular; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the board deemed that applicant did not substantiate his basis of appeal brought under sections 7c and 21 of the building zone resolution.

Resolved, that the decision of the superintendent of buildings be and it hereby is *affirmed*, and the application be and it hereby is *denied*.

THE RESOLUTION—

(197-27-BZ)

WHEREAS, Louis Wirsching, Jr., for Uneeda Incorporated, owner, filed, February 24, 1927, an application, under the building zone resolution, to permit in a two times height district the erection and maintenance of the street wall of a tower in excess of the height permitted by the zone resolution; premises 505 West 14th street, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, April 12, 1927, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the height district maps accompanying the building zone resolution show that the area on the west side of a north and south line located 100 ft. east of Ninth avenue is in a two times height district; and

WHEREAS, the decision of the superintendent of buildings, rendered January 6, 1927 (N. B. 592-26), reads:

"1. Proposed height is excessive (TOWER) Art. III of Building Zone Resolution.";
and

WHEREAS, the proposed building is to be of fireproof construction, 24 stories in height, with a frontage of 90 ft. and a depth of 179 ft. 6 in. and 192 ft. 7 in., irregular; to be occupied as offices, etc.; it is proposed to erect the street wall of a tower (25 per cent of the area of the lot) 354 ft. 6 in. in height without a setback, at this point set back 5 ft. 6 in. to an additional height of 40 ft. and a further tapering height of 92 ft.; the proposed street wall of tower is in violation of section 8, subdivision g, under height exceptions, section 9, the tower should be set back 11 ft. at 200 ft. level; and

WHEREAS, the board deemed that applicant was entitled to relief under section 21 of the building zone resolution; and

WHEREAS, this application was granted by the board at its meeting, April 12, 1927, on certain conditions, and applicant

MINUTES

requested a modification of the time limit, and now requests a further extension of time.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the proposed structure shall be restricted in area, bulk and height in strict accordance with the drawings filed in this appeal; that no part of the building shall exceed in height the dimensions filed in this appeal, and that the requirements of the building zone resolution as to setback, area and use shall be complied with in all other respects, and that any permits required shall be obtained within six months and any work involved shall be completed within eighteen months from July 27, 1928.

THE RESOLUTION

(1025-27-BZ)

WHEREAS, Gardiner Conroy, for Oppenheim, Michelson & Zamore Realty Corp., owner, filed, September 19, 1927, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station; premises southwest corner of Avenue U and Brigham street, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, February 28, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Avenue U is in a business district, Brigham street is in a residence district and Gerritson avenue is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered July 19, 1927 (Applic. No. 13433-1927), reads:

"Proposition contrary to the Zone Resolution, Art. II, Sec. 4 a, Subdiv. 46.

"The installation of a gasoline service station in a business district.";

and

WHEREAS, the premises consist of an irregular-shaped plot of ground, having a frontage of 62 ft. 8 $\frac{7}{8}$ in. on Old Avenue U, 39 ft. 4 $\frac{7}{8}$ in. on Brigham street and 74 ft. 1 $\frac{1}{8}$ in. on New Avenue U, upon which it is proposed to erect a small office, a greasing rack and install the necessary tanks and pumps for a gasoline service station; and

WHEREAS, the board deemed that applicant was entitled to relief under section 21 in view of the irregular shape and size of the plot, which would make it unsuitable for a conforming use; and

WHEREAS, at the public hearing the objectors practically withdrew their objections for the reason that they had been

mistaken as to the location for the proposed gasoline station; and

WHEREAS, this application was granted by the board at its meeting, February 28, 1928, on certain conditions, and applicant requests a modification of the time limit.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that there shall be erected a one-story building for the use and accommodation of the patrons of the premises; that the building shall be finished on the exterior with glazed, white enamel brick and with vitreous tile roofing; that there shall be no grease racks or service racks maintained or operated on these premises; that there shall be no portable gasoline tanks maintained or operated on these premises; that any advertising display shall be restricted to the illuminated glass lamps of the oil pumps and flat wall signs on the one-story building; that all permits required shall be obtained within sixty days and any work involved shall be completed within one year from the date of this action—July 27, 1928.

THE RESOLUTION—

(1350-27-BZ)

WHEREAS, Frederick J. Flynn, for Infried Realty, Inc., owner, filed, December 29, 1927, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 2100-2110 Jerome avenue, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its special meeting, July 27, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Jerome avenue, Burnside avenue and East 181st street are in a business district; Walton avenue is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered December 2, 1927 (re N. B. 2576-27), reads:

"1. Erection of public garage for storage of more than five motor vehicles in a business district is contrary to provisions of building zone resolution.";

and

WHEREAS, the proposed building is to be of non-fireproof construction, two stories in height, with a frontage of 125 ft. and a depth of 100 ft.; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the applicant substantiated his basis of appeal under section 7, subdivision e, with documentary proof filed in this office; and

MINUTES

WHEREAS, the board deemed that applicant was entitled to relief under section 21 in view of the abutting and surrounding conditions.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the building as proposed shall not exceed a height of two stories above grade; that the rear and gable walls, unless opening within the property of the same lot or plot and in the same single ownership, shall be unpierced throughout their entire height and length; that any runway or ramp installed or maintained in this building shall be set back at street grade level not less than 10 ft. from the front wall of the building; that the front elevation shall be finished with face brick, architectural terra cotta or stone trimmings, panel design, other than the store show windows if installed; that there shall be no roof signs erected; no signs or advertising display shall be exposed on the front of the structure other than one projecting electric sign, indicating the title and type of business conducted on the premises; that any advertising shall be limited to fixed letters affixed to plate glass show windows; that all permits required shall be obtained within nine months and any work involved shall be completed within eighteen months from the date of this action, and that the building shall be constructed in accordance with the requirements of the zoning resolution in all other respects.

1144-27-BZ.

APPLICANT—William F. Doyle, for Marben Realty Corp., owner.

SUBJECT—Application (re decision of the superintendent of buildings) under section 21 of the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles (previously denied).

PREMISES AFFECTED—Southeast corner of Cedar avenue and West 179th street, The Bronx.

APPEARANCES—

For Applicant: William F. Doyle.

For Opposition: Max Monfried, A. Serpone, Lillian Brace, Mrs. Rawson, H. A. McDonough, Mr. Casey and Christopher C. McGrath.

THE RESOLUTION—

(1144-27-BZ)

WHEREAS, William F. Doyle, for Marben Realty Corp., owner, filed, October 24, 1927; denied May 15, 1928; referred to a committee of the board June 12, 1928, and reopened June 19, 1928, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises southeast corner of Cedar avenue and West 179th street, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its special meet-

ing, July 27, 1927, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Cedar avenue is in a business district; West 179th street is in a business and unrestricted district, and West 178th street is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered October 13, 1927 (re App. No. N. B. 2249-27), reads:

"Erection of a garage for more than five motor vehicles in a business district is contrary to the provisions of the zone resolution."

and

WHEREAS, the proposed building is to be of non-fireproof construction, one and two stories in height, with a frontage of 168.93 ft. on Cedar avenue and a depth of 73.94 ft. and 168.69 ft., irregular; to be occupied as a garage for the storage of more than five automobiles; and

WHEREAS, an inspection of these premises was made by a committee of the board before consideration for reopening; and

WHEREAS, the report of inspection was adopted by the board and in accordance therewith the case was reopened subject to the same procedure as the filing of a new case; and

WHEREAS, the board deemed that applicant is entitled to relief under section 21 on the grounds of unnecessary hardship and practical difficulties.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations, and that the application be and it hereby is *granted on condition* that the structure shall not exceed in height a building two stories above the mean curb level of the Cedar avenue frontage; that the upper grade of the 179th street frontage of this property shall be developed, maintained and operated for retail mercantile store or business use and occupancy; that the store use shall be separated from garage use by a wall of approved masonry; that all vehicular entrances shall be restricted to the Cedar avenue front of the property; that no vehicular entrances shall be located within 30 ft. of the corner of 179th street; that there shall be no signs or advertising exposed or displayed on any portion of 179th street other than advertising lettering affixed to the plate glass show windows of the store fronts; that the southerly gable wall shall be unpierced throughout its entire height and length; that the street elevations, other than the plate glass show windows of the store fronts, shall be finished with face brick of light color with architectural terra cotta or natural stone trimmings; that the corner formed by the intersection of Cedar avenue and 179th street on the Cedar avenue grade shall be limited to store or office use; that no roof signs shall be erected or maintained; that any gasoline storage equipment installed shall be confined and restricted to the Cedar avenue front of the premises at the southerly end of the property; that there shall be no portable gasoline tanks operated or maintained outside of these premises; that any skylights installed shall be glazed with plain glass, provided with wire guards above and below, and that all permits shall be obtained within nine months and any work involved thereby shall be completed within eighteen months from the date of this action.

MINUTES

BOARD OF STANDARDS AND APPEALS

SPECIAL MEETING

FRIDAY AFTERNOON, JULY 27, 1928

Present: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin.

APPEAL FROM ADMINISTRATIVE ORDER 119-28-A.

APPELLANT—Charles J. O'Connor, for Giuseppe Giambalvo, adjoining owner; Isaac Cohen, owner of premises affected.

SUBJECT—Appeal from decision of the superintendent of building re revocation of permit No. 9077/21, issued by the superintendent of buildings.

PREMISES AFFECTED—664-666 Bushwick avenue, west side, 5 feet 7 inches south of Myrtle avenue, Brooklyn.

APPEARANCES—

For Appellant: Charles J. O'Connor, Giuseppe Giambalvo.

For Opposition: E. Celler.

For Administration: James D'Antonio, for fire department; Martin O'Donnell for bureau of buildings.

ACTION OF BOARD—Appeal to revoke permit denied.

THE VOTE TO GRANT—

Affirmative 0

Negative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin..... 5

Absent 0

THE RESOLUTION—

(119-28-A)

WHEREAS, Charles J. O'Connor, for Giuseppe Giambalvo, adjoining owner, filed, February 7, 1928, an appeal from a decision of the superintendent of buildings, affecting premises 664-666 Bushwick avenue, Borough of Brooklyn; and

WHEREAS, the decision of the superintendent of buildings, rendered January 18, 1928, reads:

"Your demand for the cancellation of permit 9077/21 for premises 664-68 Bushwick Avenue, 5 feet 7 in. south of Myrtle Avenue, west side of Bushwick Avenue, is hereby denied. This matter has been completely threshed out by this bureau. The permit is legal.

"The violation at first filed against this premises for alleged occupancy in violation of the Zone Resolution, on subsequent investigation, was shown to be in error, the building being rightfully used for stores and gasoline selling use in a business district, an affidavit having been submitted that the premises had been used as a gasoline selling station since 1918. The violation notice was, therefore, later removed and certificate of occupancy No. 45063 issued for stores and gas selling station and storage for one car.

"All of this information was given under date of Aug. 20, 1927, to Commissioner of Accounts James A. Higgins and Fire Commissioner John J. Dorman, following complaints of similar character forwarded here by the offices of those officials.";

and

WHEREAS, the building is non-fireproof, one story in height, 52 ft. 8 in. by 19 ft. 11 in. in area; OCCUPIED as stores and a one-car garage with a gasoline service station directly in front consisting of two storage tanks, buried under the sidewalk, and four gasoline pumps erected on the sidewalk; and

WHEREAS, the appellant claims that Permit No. 9077-21 was issued by the superintendent of buildings for the erection of four stores upon the premises in question, such permit

was amended August 20, 1927, to use the premises also as a gasoline selling station which is in violation of Article 2, subdivisions 4 and 6 of the zone resolution; furthermore, the appellant contends that the premises being within a business district, the amendment of August 20, 1927, was unauthorized and illegal in that no plans were filed and the superintendent of buildings was without power to permit the premises to be used for gasoline selling station; and

WHEREAS, the records of the fire department as submitted by its representative and the documentary proof as submitted, establishes the continuous use of these premises by permits in force since 1918 for gasoline selling station use.

Resolved, that the decision of the superintendent of buildings be and it hereby is affirmed, and that the appeal be and it hereby is denied.

BUILDING ZONE CASES

1261-27-BZ.

APPLICANT—Arverne Bay Construction Co., owner.

SUBJECT—Application (re decision of the fire commissioner) under section 21 of the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station and, also, a garage for the storage of more than five (5) motor vehicles.

THE RESOLUTION—

(120-28-BZ)

WHEREAS, A. J. Burns, for Homack Construction Corp., owner, filed, February 7, 1928, an application, under the

MINUTES

building zone resolution, to permit in a residence district, extending from a business district, the erection and maintenance of a building for business occupancy on first story and residence use above; premises 103-17 41st avenue (Lake street) and 103-08 Roosevelt (Grand) avenue, Corona, Borough of Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its special meeting, July 27, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that 41st avenue (Lake street) is in a residence district; Roosevelt avenue is in a business district, and Louona avenue is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered January 24, 1928 (re Plan No. N. B. 404-1928), reads:

"The erection of a building for business purposes, extending into a residence district, is prohibited by the Zone Law.";

and

WHEREAS, the proposed building is to be of non-fireproof construction, two stories and cellar in height, with a frontage of 25 ft. and a depth of 140 ft.; to be occupied as a business building on first story and residence above in the residence district; and

WHEREAS, the board deemed that applicant was entitled to relief under section 7c of the building zone resolution and that denial of relief would constitute an unnecessary hardship within the meaning of section 21 of the resolution.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted*, only so far as it affects the first floor, street grade of the premises, within the residence use area on the Lake street front, *on condition* that the remainder of the premises within the residence use area above the first story shall be restricted to conforming residence use; that any signs or advertising displayed on the Lake street front shall be confined to the plate glass show windows of the store fronts; that all permits required shall be obtained within six months and the work involved thereby completed within one year from the date of this action.

106-28-BZ.

APPLICANT—Horn & Ligeti, for Abraham Laschower, owner.

SUBJECT—Application (re decision of the superintendent of buildings) under section 21 of the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station.

PREMISES AFFECTED—357-365 Beach 71st street and 7101-7105 Amstel boulevard, southwest corner, Arverne, Borough of Queens.

APPEARANCES—

THE RESOLUTION—

(106-28-BZ)

WHEREAS, Horn & Ligeti, for Abraham Laschower, owner, filed, February 3, 1928, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station; premises 357-365 Beach 71st street and 7101-7105 Amstel boulevard, Borough of Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its special meeting, July 27, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Amstel boulevard is in a business and unrestricted district, Beach 71st street is in a business district and Hammels boulevard is in a business and unrestricted district; and

WHEREAS, the decision of the superintendent of buildings, rendered December 13, 1927 (re Plan No. N. B. 15505-1927), reads:

"The erection of a gasoline station in a business district is contrary to Zone Law.";

and

WHEREAS, the premises consist of a two-story dwelling, a one-story frame poultry slaughter house and a garage; it is proposed to remove the garage building, erect an office, bury six 550-gallon tanks, erect six pumps and one grease rack for the purpose of conducting a gasoline service station within a business district; and

WHEREAS, the applicant filed 83.4 per cent of consents of affected property owners in support of his application and the board deemed the principles of section 7g of the building zone resolution were applicable to this case and that denial of relief would constitute an unnecessary hardship within the meaning and intent of section 21.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the sale of gasoline on the premises shall be restricted to and confined within the property; that there shall be erected along the building line of the property a concrete curbing not less than 12 inches in height above sidewalk grade, with but one entrance not exceeding a width of 10 ft. on Amstel boulevard and one entrance on Beach 71st street; that there shall be no grease racks, crankcase service racks or pits installed or operated on the premises; that any advertising display shall be restricted to the illuminated glass globes of the pumps; that all necessary permits shall be obtained within six months and the work involved completed within one year from the date of this action.

THE RESOLUTION—

(1298-27-BZ)

WHEREAS, W. D. J. McCarthy, for Charles H. Hallock, owner, filed, December 14, 1927, an application, under the

MINUTES

building zone resolution, to permit the extension, from an unrestricted district into a business district, of a proposed building to be used as a gasoline service station and as a garage for the storage of more than five motor vehicles; premises southeast corner of Roosevelt avenue (Greenpoint avenue) and 51st street (Stone street), Woodside, Borough of Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its special meeting, July 27, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that 52nd street, south of a point 100 ft. south of Roosevelt avenue, is in an unrestricted district; Roosevelt avenue (excepting park on lot 64, block 506) is in a business district; Park is in a residence use district, and that 51st street, south of Roosevelt avenue, is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered April 26, 1928 (re Plan No. 15026-27), reads:

"1. The erection of a building in a business district to be used as a garage for more than five motor vehicles and a gasoline station is contrary to the Zone Law.

"Not further considered.";

and

WHEREAS, the proposed building is non-fireproof, two stories in height, irregular in shape, having a frontage of 70.12 ft. on 51st street, 94 ft. on Roosevelt avenue and a distance of approximately 214 ft. along the southerly lot line; an irregular portion at the southeast corner of the building approximately 114 ft. along the south wall and 60 ft. along the east wall (approximately 3,200 sq. ft. in area) being in the unrestricted district and the remainder (approximately 13,000 sq. ft.) being in the business district; proposes to occupy the northwest corner of the plot as a gasoline service station and the proposed building as a garage for the storage of more than five motor vehicles; and

WHEREAS, the board deemed that applicant was entitled to relief under section 7b of the building zone resolution and that denial of relief would constitute an unnecessary hardship within the meaning of section 21.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted*, only so far as it affects the development of a building for garage use, *on condition* that there shall be no gasoline service station installed as requested and indicated on plans filed in the application; that the structure shall not exceed a building one story in height above grade; that the walls other than on the street fronts shall be unpierced throughout their entire height and length; that there shall be incorporated in the roof of the structure automatic ventilating skylights glazed with plain glass, protected with wire guards above and below; that there shall be not more than one vehicular entrance on each street front; that any gasoline storage equipment installed shall be located at the easterly end of the Roosevelt avenue front inside of the building; that there shall be no portable gasoline tanks maintained or operated on the premises; that the walls on the street fronts shall be finished with two-toned, light-colored brick, trimmed with architectural terra cotta or natural stone; that there shall be no advertising displayed on the front of the premises, except one projecting illuminated sign at the intersection of Roosevelt avenue and 52nd street; that no roof sign shall be erected; that all necessary permits shall be obtained within six months and the work involved completed within one year from the date of this action.

1356-27-BZ.

APPLICANT—Alfred J. Boulton, for John A. R. Duntze, owner.

SUBJECT—Application (re decision of the superintendent of buildings) under sections 7c and 21 of the building zone resolution, to permit partly in a business district and partly in a residence district, also extending from an unrestricted district, the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—135-147 East 22nd street, east side of East 22nd street, 275 feet 6 $\frac{7}{8}$ inches south of Tilden avenue, Brooklyn.

APPEARANCES—

For Applicant: Alexander I. Rorke and Alfred J. Boulton.

For Opposition: T. H. Roberts, Burlingham Neily, Mr. Tibball, William A. Aston, George F. Bender and Mrs. Tibball.

ACTION OF BOARD—Application granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin.....	5
Negative	0
Absent	0

THE RESOLUTION—

(1356-27-BZ)

WHEREAS, Alfred J. Boulton, for John A. R. Duntze, owner, filed, December 31, 1927, an application, under the building zone resolution, to permit, partly in a business district and partly in a residence district, and extending from an unrestricted district, the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 135-147 East 22nd street, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its special meeting, July 28, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that East 22nd street is in a residence, business and unrestricted district, Duryea place is in a business district and Beverly road is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered May 12, 1928 (re App. No. 23289-1928), reads:

"The erection of a public garage for more than five motor vehicles, partly in a residential district and partly in a business district and extending slightly into an unrestricted district. Proposition contrary to Zone Resolution, Art. 2, Sec. 3 & Sec. 4-a-15.";

and

WHEREAS, the proposed building is to be of non-fireproof construction, one story in height, with a frontage of 125 ft. 7 $\frac{1}{4}$ in. and a depth of 100 ft. $\frac{1}{2}$ in.; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the board deemed that applicant was entitled to relief under section 7c of the building zone resolution and that denial of relief would work an unnecessary hardship within the meaning of section 21 of the resolution.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the structure shall be restricted to a building not more than one story in height above grade; that there shall be no cellar or basement other than an area only of sufficient size for the accommodation of heating apparatus; that the rear and gable walls shall be unpierced throughout their entire height and length; that there shall be installed in the roof of the structure skylights, glazed with plain glass, provided with wire guards above and below; that no skylight shall be installed within 25 ft. of the southerly gable wall; that

MINUTES

there shall be not more than two vehicular entrances, not exceeding a width of 9 ft. 6 in. each; that the vehicular entrances at the southerly end of the building on the street front shall be not less than 25 ft. from the southerly gable wall; that any gasoline storage equipment installed shall be located at the extreme northerly end of the property at the street front; that no portable gasoline tank shall be stored, maintained or operated on the premises; that there shall be no advertising or signs displayed or exposed on the premises, other than one projecting electric sign located at the center of the building; that the front elevation shall be finished with light-colored face brick, with trimmings and openings of two-toned brick, architectural terra cotta or nat-

ural stone; that the front of the building shall be of attractive design, with parapet walls at the front not less than 4 ft. above the roof level; that the applicant shall make a return to this board of the drawings for approval in accordance with the foregoing conditions before submission of same to the superintendent of buildings; that all necessary permits shall be obtained within six months and the work involved completed within one year from the date of this action.

Adjourned 6.00 p. m.

WILLIAM J. O'GORMAN, *Secretary*.

MINUTES

*CORRECTION.

The minutes of the meeting of the board of standards and appeals held May 29, 1928, as they appeared in Bulletin No. 23, Vol. XIII, are hereby corrected to read as follows:

THE RESOLUTION—

(1338-27-S)

WHEREAS, William F. Doyle, for Shaw & Sanford, owner, filed, December 23, 1927; amended May 29, 1928, a petition for a variation from the requirements of the labor law, as cited in orders of the fire commissioner and a decision of the superintendent of buildings, affecting premises 1985-1993 Jerome avenue, Borough of The Bronx; and

WHEREAS, the orders of the fire commissioner, dated November 29, 1927, read:

"Order No. 29021-LD:

"1. Extend the interior stairway at north side of building to roof as per Sec. 270 of the Labor Law.";

and

"Order No. 29022-LD:

"1. Arrange all exit doors to interior stairways to open outwardly. Sec. 270 of the Labor Law.";

and

WHEREAS, the decision of the superintendent of buildings, rendered January 5, 1928, reads:

"A certificate of occupancy for the building at above mentioned location for occupancy as stores on first floor and factory on second floor is hereby denied as exits do not comply with the Labor Law and a factory use in a business district would be contrary to the Building Zone Resolution.";

and

* Correction—Word "northwesterly" in line 57 changed to "northeasterly."

WHEREAS, the building is non-fireproof, two stories (24 ft. 6 in.) in height, 108 ft. 4 in. by 75 ft. in area; OCCUPIED: 1st story, stores, 10 persons; 2nd story, offices, billiard room and factory (manufacturing dresses), 37 persons, 12 persons being engaged at factory work; EXITS: two interior fireproof stairways, the southerly stairway extending from the first story to roof, and the northerly stairway extending from the first to second (top) story, enclosed in fireproof partitions with fireproof doors at openings; ROOFS of adjoining buildings are at same level; and

WHEREAS, petitioner contends that the south stairway extends to the roof and requests the acceptance of the existing stairway at the north end of the premises; and contends, further, that the fireproof doors leading to the two enclosed stairs do open outwardly and, in view of the light occupancy of the building, requests that the doors, opening in, on the corridor on the second story be permitted to remain as they are.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted, as to Order No. 29021-LD, Item 1, on condition that a fixed double-rung iron ladder shall be installed in the jog of the stair hall enclosure at the northerly end of public corridor, second story; granted, as to Order No. 29022-LD, Item 1, on condition that all doorways to stair hall enclosures shall be in accordance with the requirements of the labor law, and granted, as to the decision of the superintendent of buildings, re N. B. 1178-1925, of January 5, 1928, on condition that the building shall be not increased in height or area; that the factory occupancy shall be limited to one room at the northeasterly front of building, restricted to the conduct of light needlework industry, with the factory occupancy limited to fifteen persons, under single tenancy; that the factory occupancy of these premises shall at no time exceed twenty-five per cent of the area of the building.

CONCRETE RULES

USE OF HYDRATED LIME IN CONCRETE

Adopted by the Board of Standards and Appeals, April 19, 1920, under Cal. No. 153-20-S.

The use of hydrated lime in all classes of concrete construction shall not be prohibited when used in accordance with the conditions hereinafter set forth.

The hydrated lime shall conform with the standard specifications for this material which have been adopted by the American Society for Testing Materials.

The maximum amount of hydrated lime which may be used shall conform with the following table, all weights given being the amount of lime which may be incorporated for each ninety-five pound bag of Portland cement.

1-1½-3 Mix, 4 pounds of hydrated lime per bag of cement.

1-2-4 Mix, 5 pounds of hydrated lime per bag of cement.

1-2½-5 Mix, 6 pounds of hydrated lime per bag of cement.

For hand mixed concrete, the hydrated lime and Portland cement shall be well mixed while dry.

Hydrated lime shall not be used in concrete which is to be deposited under water.

RULES

FIRE RETARDING RULES

Adopted by the Board of Standards and Appeals August 30, 1927; Amended November 1, 1917, and Feb. 3, 1922.

Rule 1. Fire Retarding Materials for Garages, Motor Vehicle Repair Shops and Oil Selling Stations. In garages, motor vehicle repair shops and all selling stations any material or form of construction shall be deemed fire-retarding within the meaning of §73, subdivision 3, of the building code, that resists the action of flame and heat when subjected to a continuous fire for one hour at an average temperature of seventeen hundred (1700) degrees Fahrenheit without the passage of flame, and with a maximum temperature rise to four hundred (400) degrees Fahrenheit on the side away from the fire. The point at which the temperature of transmitted heat is measured shall be protected from external air and weather conditions.

When the test specimen is in the form of partition construction, the area under test shall be not less than one hundred (100) square feet and least dimension shall be not less than nine (9) feet. When in the form of floor construction, the area under test shall be not less than two hundred (200) square feet and the least dimension shall be not less than fourteen (14) feet.

During the fire, the floor construction shall support the live load for which it is designed, and after the fire shall safely sustain twice the designed live load with a maximum deflection of not more than one two-hundredth (1/200) part of the span.

Rule 2. Wood Joisted Floor Construction. Wood joisted floor construction shall be accepted as fire-retarding construction in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations when the beams are protected on the upper and under sides with the fire-retarding materials specified in rules for floor and ceiling coverings.

Rule 3. Floor Covering. Any one of the following forms of construction shall be accepted as fire-retarding for the covering of the upper sides of wood floor beams in joisted floor construction in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations

(a) Seven-eighths ($\frac{7}{8}$) inch wood underflooring protected with a membrane of two-ply waterproofing covered with not less than two and one-half ($2\frac{1}{2}$) inches of 1:2½:5 concrete or better, reinforced with not less than one-fourth ($\frac{1}{4}$) of one (1) per cent of steel mesh.

(b) Two and one-half ($2\frac{1}{2}$) inches of 1:2:4 concrete applied directly to the top of the joists, with or without temporary support, reinforced with not less than one-fourth of one per cent steel rods, mesh or steel lath, and having the tops of the joists coated with approved waterproof paint or protected by tar paper on the top and on the sides for a distance of three inches from the top. (Amendment, Nov. 1, 1917.)

Rule 4. Ceiling Covering. Any one of the following forms of construction shall be accepted as fire-retarding for the covering of the undersides of wood floor beams in joisted floor construction in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations:

(a) One-half ($\frac{1}{2}$) inch plaster boards, or three-eighths ($\frac{3}{8}$) inch gypsum wall boards weighing not less than 16 pounds per square yard with pointed joints covered with No. 26 U. S. gauge sheet metal with one (1) inch lapped seams nailed to the wood beams when spaced not more than sixteen (16) inches on centers, or nailed to furring strips when the floor beams are spaced more than sixteen (16) inches on centers;

(b) Two thicknesses of one-quarter ($\frac{1}{4}$) inch asbestos board laid with tight staggered joints and nailed to the beams, when spaced not more than sixteen (16) inches on centers, or nailed to furring

strips when the floor beams are more than sixteen (16) inches on centers.

(c) Metal lath weighing not less than three pounds per square yard, attached to furring strips and plastered with Portland cement mortar at least three-quarters ($\frac{3}{4}$) inch thick.

Rule 5. Attachment to Ceiling. Fire-retarding ceilings in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations shall be attached to wood floor beams and girders in such manner as to maintain an air space between the wood beams, and all wood beams shall be seasoned before applying the protective coat.

Rule 6. Openings in Fire-Retarding Floors. Pipes or conduits which pass through floors shall be fitted with metal thimbles and made watertight for a height of three (3) inches above the floor.

Rule 7. Columns. All structural posts and columns in non-fireproof buildings required to be fire-retarded shall be protected with the fire-retarding materials specified for ceiling coverings in these rules, or with any of the materials accepted in fireproof construction; except that an air space shall not be required around steel or cast iron columns.

Where necessary for protection against mechanical injury, the fire-retarding protection on columns shall be jacketed to a height of five (5) feet from the ground with No. 4 U. S. gauge metal.

Rule 8. Girders. All girders in non-fireproof buildings required to be fire-retarded shall be protected with the fire-retarding materials specified for ceiling coverings in these rules, or with any of the materials acceptable in fireproof construction; except that an air space need not be provided around steel girders.

Rule 9. Shaft Enclosures. Existing stairways and vertical shafts in non-fireproof business buildings hereafter converted to be used as garages, motor vehicle repair shops or oil selling stations shall be enclosed in fire-retarding partitions continued through the non-fireproof floor construction, and when unfilled wood stud partitions are used, the space between the floor beams shall be fire-stopped with incombustible materials. All openings in such partitions shall be protected with accepted metal-covered fire doors or windows. Wherever necessary for protection against mechanical injury, the partition shall be jacketed to a height of five (5) feet on the garage side with No. 4 U. S. gauge metal. Any one of the following forms of partitions shall be accepted for the enclosure:

(a) Two by four inch wood studs, spaced not more than sixteen (16) inches on centers, covered both sides with metal lath weighing not less than three pounds per square yard, attached to furring strips and plastered with Portland cement mortar at least three-quarters ($\frac{3}{4}$) of an inch thick;

(b) Two by four inch wood studs placed not more than sixteen (16) inches on centers, covered both sides with seven-eighths ($\frac{7}{8}$) inch wood sheathing, one-half ($\frac{1}{2}$) inch plaster boards with pointed joints and No. 26 U. S. gauge sheet metal with one-inch lapped seams;

(c) Two by four inch wood studs spaced not more than sixteen (16) inches on centers, covered both sides with seven-eighths ($\frac{7}{8}$) inch wood sheathing, two thicknesses of one-quarter ($\frac{1}{4}$) inch asbestos boards laid with tight staggered joints and jacketed with No. 16 U. S. gauge metal on the garage side to a height of five (5) feet.

(d) Two by four inch wood studs spaced not more than sixteen (16) inches on centers, filled in solidly between the studs with four inches of approved fireproof materials and covered on both sides with No. 26 U. S. gauge metal;

(e) Existing wood stud, lath and plaster partitions covered on the garage side with No. 26 U. S. gauge sheet metal with one-inch lapped seams.

FORMS FOR NOTICES TO PROPERTY OWNERS

If applicants, under the building zone resolution, desire copies of Form 13A, for notices to property owners, such forms are not to be supplied by this office.

The applicant is entitled only to one copy of Form 13A, properly filled out.

If he desires additional copies for his own convenience, in notifying property owners, he can obtain such copies from The O'Connell Press, 176 Park Row, Manhattan, at three cents each, postage to be added if the forms are to be supplied by mail.

WARNING

Notice is hereby given to all petitioners, appellants and applicants, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

First, That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

Second, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

Third, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and of the posting of the calendars on the bulletin board in the

offices of the board and of the further publication of the calendars in the daily press.

Fourth, That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

Fifth, That the business of the board is to dispose of all cases promptly, for the reason that the pendency of an appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of the appellant or petitioner to file necessary data, or by any other method of delay.

Sixth, That no appeal, application or petition will be accepted for filing unless, at the time of filing, all papers, plans and data required by law are supplied, as specified on the blank appeal, application or petition forms.

CHIEF JOHN KENLON

WILLIAM J. O'GORMAN, Secretary

EDWARD V. BARTON, Chief Clerk

PUBLIC HEARINGS

Tuesdays, at 10 a. m. and 2 p. m.
Special meetings as published in this Bulletin.
Call of Clerk's Calendar, Tuesdays, at 2 p. m.
All hearings are held in Room 1013, Municipal Building, Manhattan.

HOURS FOR CONSULTATION

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

CALL OF CLERK'S CALENDAR

The *Clerk's Calendar* consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, September 11, 1928, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, September 18, 1928, at 2 o'clock.

The *Clerk's Calendar* is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

NOTICE TO APPELLANTS AND PETITIONERS

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and disposition of same expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

WILLIAM E. WALSH, *Chairman.*

RULES

COMMUNITY LAUNDRIES IN BUSINESS DISTRICTS

*Amended Resolution Adopted by the Board of Appeals,
March 16, 1920, Under Cal. No. 549-17-BZ*

WHEREAS, the board of appeals, at its regular meeting, December 16, 1919, unanimously rescinded an opinion incidentally expressed and incorporated in a resolution adopted by the board on May 28, 1917, in acting on Cal. No. 549-17-BZ. This opinion was that a laundry is not a prohibited use in a business district under the building zone resolution. The board unanimously rescinded this expression of opinion, inasmuch as a laundry is a factory within the meaning of the labor law and must be so construed under the building zone resolution in the absence of any definition therein to the contrary.

Resolved, that this shall not be construed to include within the prohibited uses specified under Section 4 of the building zone resolution a community or neighborhood laundry located in the basement or ground floor of a building within a business district and containing not more than eight (8) rotary washing machines with inside cylinders not more than 30 in. in diameter by 30 in. in length over all nor more than two 20 in. extractors, the 20 in. measurement being the diameter of the inside basket, which machines and extractors shall be operated solely by electric power and do not require the installation of steam boiler or plant.

WARNING

Notice is hereby given to all petitioners, appellants and applicants, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

First, That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

Second, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

Third, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and of the posting of the calendars on the bulletin board in the

offices of the board and of the further publication of the calendars in the daily press.

Fourth, That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

Fifth, That the business of the board is to dispose of all cases promptly, for the reason that the pendency of an appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of the appellant or petitioner to file necessary data, or by any other method of delay.

Sixth, That no appeal, application or petition will be accepted for filing unless, at the time of filing, all papers, plans and data required by law are supplied, as specified on the blank appeal, application or petition forms.

PUBLIC HEARINGS

Tuesdays, at 10 a. m. and 2 p. m.
Special meetings as published in this Bulletin.
Call of Clerk's Calendar, Tuesdays, at 2 p. m.
All hearings are held in Room 1013, Municipal Building, Manhattan.

HOURS FOR CONSULTATION

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

CALL OF CLERK'S CALENDAR

The Clerk's Calendar consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, September 11, 1928, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, September 18, 1928, at 2 o'clock.

The Clerk's Calendar is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

NOTICE TO APPELLANTS AND PETITIONERS

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and disposition of same expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

WILLIAM E. WALSH, *Chairman.*

RULES

COMMUNITY LAUNDRIES IN BUSINESS DISTRICTS

*Amended Resolution Adopted by the Board of Appeals,
March 16, 1920, Under Cal. No. 549-17-BZ*

WHEREAS, the board of appeals, at its regular meeting, December 16, 1919, unanimously rescinded an opinion incidentally expressed and incorporated in a resolution adopted by the board on May 28, 1917, in acting on Cal. No. 549-17-BZ. This opinion was that a laundry is not a prohibited use in a business district under the building zone resolution. The board unanimously rescinded this expression of opinion, inasmuch as a laundry is a factory within the meaning of the labor law and must be so construed under the building zone resolution in the absence of any definition therein to the contrary.

Resolved, that this shall not be construed to include within the prohibited uses specified under Section 4 of the building zone resolution a community or neighborhood laundry located in the basement or ground floor of a building within a business district and containing not more than eight (8) rotary washing machines with inside cylinders not more than 30 in. in diameter by 30 in. in length over all nor more than two 20 in. extractors, the 20 in. measurement being the diameter of the inside basket, which machines and extractors shall be operated solely by electric power and do not require the installation of steam boiler or plant.

WARNING

Notice is hereby given to all petitioners, appellants and applicants, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

First, That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

Second, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

Third, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and of the posting of the calendars on the bulletin board in the

offices of the board and of the further publication of the calendars in the daily press.

Fourth, That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

Fifth, That the business of the board is to dispose of all cases promptly, for the reason that the pendency of an appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of the appellant or petitioner to file necessary data, or by any other method of delay.

Sixth, That no appeal, application or petition will be accepted for filing unless, at the time of filing, all papers, plans and data required by law are supplied, as specified on the blank appeal, application or petition forms.

PUBLIC HEARINGS

Tuesdays, at 10 a. m. and 2 p. m.
Special meetings as published in this Bulletin.
Call of Clerk's Calendar, Tuesdays, at 2 p. m.
All hearings are held in Room 1013, Municipal Building, Manhattan.

HOURS FOR CONSULTATION

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

CALL OF CLERK'S CALENDAR

The *Clerk's Calendar* consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, September 11, 1928, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, September 18, 1928, at 2 o'clock.

The *Clerk's Calendar* is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

NOTICE TO APPELLANTS AND PETITIONERS

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and disposition of same expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

PUBLIC HEARING

PROPOSED AMENDMENT TO FUEL OIL RULES—RULE 20

(217-21-SR)
(598-19-SR)

NOTICE IS HEREBY GIVEN that a public hearing will be held by the board of standards and appeals on Tuesday, September 11, 1928, at 2 p. m., Room 1013, Municipal Building, on proposed amendments to Rule 20 of Fuel Oil Rules.

Matter in [] is old matter to be removed.

Rule 20. Fire Protection for Grade A and Grade B oil in Domestic Installations in dwellings occupied by not more than two families and in old law tenements occupied by three or more families in new law tenements and in commercial plants.

(a) No combustible material shall be stored within ten (10) feet of a furnace door.

(b) In dwellings occupied by not more than two (2) families, any woodwork, wooden lath and plaster partition, or other combustible material within four (4) feet of the sides or back, or eight (8) feet from the front of the furnace shall be covered with approved fire-retarding material; the ceiling, except it be of fireproof construction, shall be protected with approved fire-retarding material extending four (4) feet beyond the sides and back and eight (8) feet from the front of the furnace. In old law tenement houses occupied by three or more families the heating apparatus and oil burning device shall be located in an enclosure the partitions of which shall be constructed of fireproof material not less than four (4) inches in thickness with openings therein protected with self-closing, fireproof doors and the ceiling of the enclosure, if not of fireproof construction, shall be protected with approved fire-retarding material; said enclosure shall be ventilated to the outer air; all vertical openings leading

to cellar shall be protected with fireproof material not less than four (4) inches in thickness with all openings therein protected with self-closing, fireproof doors.

(c) In new law tenement houses or in commercial plants the room or rooms in which the heating apparatus and oil burning device is installed shall be cut off from the rest of the building by fireproof partitions, ceilings and floors constructed of not less than eight (8) inches for brick, not less than six (6) inches for stone or cinder concrete, or hollow blocks of terra cotta, concrete or gyp-

sum, and not less than four (4) inches for stone or cinder concrete if properly reinforced with steel, and such rooms shall have entrance from the street, court or yard [only], and shall be ventilated to the outer air.

Approved fire retarding material shall be any material complying with the rules of the Board of Standards and Appeals for fire retarding of garages.

(d) Near the furnace, and so located as to be convenient for use in emergency, there shall be provided a hand fire extinguisher of an approved type suitable for use on oil fires.

JAMES P. HOLLAND

JOHN GUILFOYLE

CHIEF JOHN KENLON

WILLIAM J. O'GORMAN, Secretary

EDWARD V. BARTON, Chief Clerk

OFFICE—Municipal Building, Rooms 1001 to 1015.

TELEPHONE—WORTH 0184.

OFFICE HOURS—9 a. m. to 4 p. m. Saturdays 9 a. m. to 12 noon.

All communications should be addressed to the chairman of the board.

CONTENTS

This issue of the Bulletin contains, in the order given—

Docket.

Notice of Adjournment.

Call of Clerk's Calendar.

The Trial Calendar.

Notices in Building Zone Cases.

Notice of Public Hearing—Amendment to Fuel Oil Rules.

Progress Report.

PUBLIC HEARINGS

Tuesdays, at 10 a. m. and 2 p. m.

Special meetings as published in this Bulletin.

Call of Clerk's Calendar, Tuesdays, at 2 p. m.

All hearings are held in Room 1013, Municipal Building, Manhattan.

HOURS FOR CONSULTATION

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

CALL OF CLERK'S CALENDAR

The Clerk's Calendar consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, September 11, 1928, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, September 18, 1928, at 2 o'clock.

The Clerk's Calendar is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

NOTICE TO APPELLANTS AND PETITIONERS

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and disposition of same expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

PUBLIC HEARING

PROPOSED AMENDMENT TO FUEL OIL RULES—RULE 20

(217-21-SR)
(598-19-SR)

NOTICE IS HEREBY GIVEN that a public hearing will be held by the board of standards and appeals on Tuesday, September 11, 1928, at 2 p. m., Room 1013, Municipal Building, on proposed amendments to Rule 20 of Fuel Oil Rules.

Matter in [] is old matter to be removed.

Rule 20. Fire Protection for Grade A and Grade B oil in Domestic Installations in dwellings occupied by not more than two families and in old law tenements occupied by three or more families in new law tenements and in commercial plants.

(a) No combustible material shall be stored within ten (10) feet of a furnace door.

(b) In dwellings occupied by not more than two (2) families, any woodwork, wooden lath and plaster partition, or other combustible material within four (4) feet of the sides or back, or eight (8) feet from the front of the furnace shall be covered with approved fire-retarding material; the ceiling, except it be of fireproof construction, shall be protected with approved fire-retarding material extending four (4) feet beyond the sides and back and eight (8) feet from the front of the furnace. In old law tenement houses occupied by three or more families the heating apparatus and oil burning device shall be located in an enclosure the partitions of which shall be constructed of fireproof material not less than four (4) inches in thickness with openings therein protected with self-closing, fireproof doors and the ceiling of the enclosure, if not of fireproof construction, shall be protected with approved fire-retarding material; said enclosure shall be ventilated to the outer air; all vertical openings leading

to cellar shall be protected with fireproof material not less than four (4) inches in thickness with all openings therein protected with self-closing, fireproof doors.

(c) In new law tenement houses or in commercial plants the room or rooms in which the heating apparatus and oil burning device is installed shall be cut off from the rest of the building by fireproof partitions, ceilings and floors constructed of not less than eight (8) inches for brick, not less than six (6) inches for stone or cinder concrete, or hollow blocks of terra cotta, concrete or gyp-

sum, and not less than four (4) inches for stone or cinder concrete if properly reinforced with steel, and such rooms shall have entrance from the street, court or yard [only], and shall be ventilated to the outer air.

Approved fire retarding material shall be any material complying with the rules of the Board of Standards and Appeals for fire retarding of garages.

(d) Near the furnace, and so located as to be convenient for use in emergency, there shall be provided a hand fire extinguisher of an approved type suitable for use on oil fires.

JOHN GUILFOYLE

CHIEF JOHN KENLON

WILLIAM J. O'GORMAN, Secretary

EDWARD V. BARTON, Chief Clerk

OFFICE—Municipal Building, Rooms 1001 to 1015.

TELEPHONE—WORTH 0184.

OFFICE HOURS—9 a. m. to 4 p. m. Saturdays 9 a. m. to 12 noon.

All communications should be addressed to the chairman of the board.

CONTENTS

This issue of the Bulletin contains, in the order given—

Docket.

Call of Clerk's Calendar.

The Trial Calendar.

Notices in Building Zone Cases.

Notice of Public Hearing—Amendment to Fuel Oil Rules.

Progress Report.

PUBLIC HEARINGS

Tuesdays, at 10 a. m. and 2 p. m.
Special meetings as published in this Bulletin.
Call of Clerk's Calendar, Tuesdays, at 2 p. m.
All hearings are held in Room 1013, Municipal Building, Manhattan.

HOURS FOR CONSULTATION

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

CALL OF CLERK'S CALENDAR

The Clerk's Calendar consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, September 11, 1928, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, September 18, 1928, at 2 o'clock.

The Clerk's Calendar is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

NOTICE TO APPELLANTS AND PETITIONERS

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and disposition of same expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

PUBLIC HEARING

PROPOSED AMENDMENT TO FUEL OIL RULES—RULE 20

(217-21-SR)
(598-19-SR)

NOTICE IS HEREBY GIVEN that a public hearing will be held by the board of standards and appeals on Tuesday, September 11, 1928, at 2 p. m., Room 1013, Municipal Building, on proposed amendments to Rule 20 of Fuel Oil Rules.

Matter in [] is old matter to be removed.

Rule 20. Fire Protection for Grade A and Grade B oil in Domestic Installations in dwellings occupied by not more than two families and in old law tenements occupied by three or more families in new law tenements and in commercial plants.

(a) No combustible material shall be stored within ten (10) feet of a furnace door.

(b) In dwellings occupied by not more than two (2) families, any woodwork, wooden lath and plaster partition, or other combustible material within four (4) feet of the sides or back, or eight (8) feet from the front of the furnace shall be covered with approved fire-retarding material; the ceiling, except it be of fireproof construction, shall be protected with approved fire-retarding material extending four (4) feet beyond the sides and back and eight (8) feet from the front of the furnace. In old law tenement houses occupied by three or more families the heating apparatus and oil burning device shall be located in an enclosure the partitions of which shall be constructed of fireproof material not less than four (4) inches in thickness with openings therein protected with self-closing, fireproof doors and the ceiling of the enclosure, if not of fireproof construction, shall be protected with approved fire-retarding material; said enclosure shall be ventilated to the outer air; all vertical openings leading

CONTENTS

This issue of the Bulletin contains, in the order given—

Docket.

Call of Clerk's Calendar.

The Trial Calendar.

Notices in Building Zone Cases.

Minutes of Regular Meeting, September 11, 1928, 10 a. m.

Minutes of Regular Meeting, September 11, 1928, 2 p. m.

Fuel Oil Rules—Rule 20.

Progress Report.

PUBLIC HEARINGS

Tuesdays, at 10 a. m. and 2 p. m.

Special meetings as published in this Bulletin.

Call of Clerk's Calendar, Tuesdays, at 2 p. m.

All hearings are held in Room 1013, Municipal Building, Manhattan.

HOURS FOR CONSULTATION

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

CALL OF CLERK'S CALENDAR

The Clerk's Calendar consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, September 18, 1928, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, September 25, 1928, at 2 o'clock.

The Clerk's Calendar is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

NOTICE TO APPELLANTS AND PETITIONERS

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and disposition of same expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

THE RESOLUTION—

(104-28-A)

WHEREAS, David E. Hurwitz, for St. Regent Bakery and Lunch, Inc., lessee, filed, February 2, 1928, an appeal from a decision of the superintendent of buildings, affecting premises 42-46 West 33rd street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered January 13, 1928, reads:

"Our Inspector reports that the following objections to the use of the above premises as a factory building must be removed before a certificate of occupancy can be issued:

"1. Floors designed for 60 lbs. per sq. ft. live load instead of for 120 lbs. per sq. ft. live load required for factory buildings.";

and

WHEREAS, the building, erected in 1920, is fireproof, six stories (74 ft.) in height, 59 ft. 5 $\frac{3}{8}$ in. by 98 ft. 9 in. in area at first story and 59 ft. 5 $\frac{3}{8}$ in. by 88 ft. 4 in. in area above; OCCUPIED: basement, storage and boiler room; 1st story, stores and restaurant, 250 persons; upper stories, offices and tenant factories, 45 persons per story; and

WHEREAS, appellant contends that the floors of the building were designed to sustain a live load of 60 pounds per square foot; that the premises cannot be rented unless light manufacturing be permitted therein; that in view of this type of manufacturing, the few machines used therein and their light weight, appellant requests permission to post the floor loads and to occupy the building as proposed.

Resolved, that the decision of the superintendent of buildings be and it hereby is *affirmed*, and the appeal be and it hereby is *denied*.

235-28-A.

APPELLANT—Petroleum Heat & Power Co., for Giberalter Lacquer Co., owner.

SUBJECT—Appeal from decision of the fire commissioner.

PREMISES AFFECTED—133-159 Ingraham street, Brooklyn.

APPEARANCES—

For Appellant: G. H. Hallock.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE RESOLUTION—

235-28-A)

WHEREAS, Petroleum Heat and Power Co., for Giberalter Lacquer Co., owner, filed, March 17, 1928, an appeal from a decision of the fire commissioner, affecting premises 133-159 Ingraham street, Borough of Brooklyn; and

WHEREAS, the decision of the fire commissioner, dated January 17, 1928 (Plan No. 167-27), reads:

"1. Boiler room must be completely cut off from

MINUTES

the rest of the building by fireproof partitions, ceiling and floor constructed of not less than 8" for brick or 6" for concrete or terra cotta.";

and

WHEREAS, the building is frame, two stories in height, 80 ft. by 62 ft. in area; OCCUPIED for the manufacture of lacquers, 5 persons in entire premises; and

WHEREAS, a fuel oil burning system has been installed consisting of a 1,100-gallon capacity fuel oil tank (buried outside the premises), a "Petro Domestic" oil burner and the necessary valves and piping for a complete equipment; and

WHEREAS, appellant contends that the boiler room is enclosed in 8-inch brick partitions with fireproof doors at the openings therein and proposes to fire-retard the ceiling with wire lath and 1-inch Portland cement in lieu of the required concrete ceiling.

Resolved, that the decision of the fire commissioner be and it hereby is *modified*, and that the appeal be and it hereby is *granted on condition* that the ceiling of the boiler room throughout shall be fire-retarded with not less than $\frac{3}{4}$ in. of cement mortar on expanded metal lath, and that the order shall be complied with in all other respects.

197-28-A.

APPELLANT—George B. Dahl, owner.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—9130 113th street, Richmond Hill, Borough of Queens.

APPEARANCES—

For Appellant: H. G. Skinner.

For Administration: Inspector Meyer of fire department.

THE RESOLUTION—

(197-28-A)

WHEREAS, George B. Dahl, owner, filed, March 3, 1928, an appeal from an order of the fire commissioner, affecting premises 9130 113th street, Richmond Hill, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated February 16, 1928, reads:

"3. Place fuel oil storage tank or tanks in permanent position and make hydrostatic test in the presence of an inspector from the Fire Department, as per Rule 7, Sec. 1-a, of the fuel oil rules.

"4. Provide a hydrostatic test of not less than one hundred pounds per square inch for all Grade B fuel oil carrying piping, as per Rule 25, Sec. 2 of the Fuel Oil Rules.";

and

WHEREAS, the building is frame, two stories in height, 30 ft. by 26 ft. in area; OCCUPIED as a dwelling; and

WHEREAS, a fuel oil burning system has been installed consisting of a 550-gallon capacity fuel oil storage tank (buried outside the premises), a Dahl oil burner and the necessary valves and piping for a complete equipment; and

WHEREAS, appellant contends that the installation was made in 1926, and since that time no leaks have developed in the system and contends, further, that the tank is a standard New York City Maxwell 550-gallon tank having dished heads $\frac{3}{16}$ inches thick; the shell being $\frac{3}{16}$ inches in thickness and outside welded and was tested at a 40 pounds hydrostatic pressure by the manufacturer.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, as to Item No. 3, on condition that a certificate of

factory test shall be filed with the fire department, and *granted*, as to Item No. 4, on condition that the fuel oil burning installation shall be equipped with standard wrought iron pipe throughout, and that the installation otherwise shall comply with the fuel oil rules in all respects.

64-28-A.

APPELLANT—John J. Gilmartin, for Langreis Company, Inc., owner.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—114-116 East 28th street, Manhattan.

APPEARANCES—

For Appellant: John J. Gilmartin.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE RESOLUTION—

(64-28-A)

WHEREAS, John J. Gilmartin, for Langreis Co., Inc., owner, filed, January 24, 1928, an appeal from orders of the fire commissioner, affecting premises 114-116 East 28th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated January 6, 1928, reads:

"1. Provide iron shutters at all openings in the exterior wall above 1st story which are distant in a direct line less than 30' from any opening in any other building and not in the same plane with said openings and which are not more than 50' above a neighboring roof at east and south sides of building, or other approved protection, as per section 375, Article 18, Chapter 5, of the Code of Ordinances.";

and

WHEREAS, the building is fireproof, seven stories in height, 40 ft. by 90 ft. in area; OCCUPIED: 1st story, store; 2nd story, office and manufacture of infants wear, 20 persons; 3rd story, office and thread winding, 20 persons; 4th story, offices and repairing rugs, 20 persons; 5th, 6th and 7th stories, offices and showrooms, 20 persons per story; and

WHEREAS, there are eight windows on each story above the first story in the easterly court within 16 ft. of openings in a neighboring ten-story office building to the east and, also, three windows on each story above the first story in the southerly wall within 50 ft. of a one-story extension roof at the rear or within 30 ft. of neighboring buildings to the south; and

WHEREAS, appellant contends that the windows forming the exposures in the building to the east are fireproof.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, only so far as it affects the windows embraced by the order, other than the two windows in the westerly wall of the easterly side court, on condition that these openings shall be equipped with approved fireproof frames and self-closing sash and glazed with wire glass; that the building shall be not increased in height or area, and so long as the adjoining exposures remain substantially unchanged.

174-28-A.

APPELLANT—Croker Nat'l Fire Prev. Eng. Co., for Ann-Row Realty Corp., owner.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—13-21 Park row and 13 Ann street, Manhattan.

THE RESOLUTION—

(174-28-A)

WHEREAS, Croker National Fire Prevention Engineering Co., for Ann-Row Realty Corp., owner, filed, February 28, 1928, an appeal from an order of the fire commissioner, affecting premises 13-21 Park Row and 13 Ann street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated April 12, 1927 (Order No. 16498-F), reads:

"1. Provide iron shutters at all openings in the exterior wall above 1st story which are distant in a direct line less than 30' from any opening in any other building and not in the same plane with said openings and which are not more than 50' above a neighboring roof at north, east and west sides of building, also in courts, or other approved protection, as per Section 375, Art. 18, Chapter 5 of the Code of Ordinances.

"8. Extend standpipe line to 26th and 27th stories and provide 2½" outlets on same with 50' of approved 2½" hose at each outlet. Section 20, Chapter 12, Code of Ordinances.

"9. Extend standpipe line to both towers and provide 2½" outlets on same at each level with 25' of approved 2½" hose at each outlet. Section 20, Chapter 12, Code of Ordinances."

and

WHEREAS, the order of the fire commissioner, dated June 10, 1925 (Order No. 79438-F), reads:

"1. Raise standpipe tank 20' above the outlet in the highest story and properly support same. Section 20, Chapter 12, Code of Ordinances."

and

WHEREAS, the building is fireproof, twenty-seven stories (341 ft. 9 in.) in height, irregular in shape, having a frontage of 104 ft. 2 in. on Park Row, 20 ft. on Ann street and 46 ft. 10½ in. on Theatre Alley; OCCUPIED: cellar, restaurant; 1st story, stores; 2nd to 26th stories, inclusive, stores, offices, 100 persons per story; 27th story, drafting rooms, 50 persons; tower floor, one office in each tower; and

WHEREAS, there are eight openings in the north wall on the seventh to eleventh stories within 50 ft. of the roof of an adjoining six-story building to the north; six windows in the east wall on each story from the second to ninth stories within 16 ft. 9 in. of opening in or within 50 ft. of the roof of a five-story and a six-story building on the opposite side of Theatre Alley; in the court of the Ann street front of the building there are approximately ten windows on the second to tenth stories, inclusive, within 30 ft. of openings in or within 50 ft. of the roof of neighboring four and six-story buildings to the south; in the south wall there are three windows on the fourth to eleventh stories, inclusive, within 50 ft. of the roofs of a three and an eight-story building to the south or within 20 ft. 3 in. of openings in the eight-story building to the south; in the south wall there is also one window on each story from the fourth to eighth stories, inclusive, within 50 ft. of the roof of an abutting three-story building to the south; and

WHEREAS the topmost outlet of the standpipe system is on the twenty-fifth story and is located 6 ft. below the bottom of the tank; and

WHEREAS, appellant contends that all openings which

directly overlook adjoining roofs are protected as required by law, also all openings which directly face exposures in the walls of other buildings are protected as required by law up to the level of the roofs of said buildings, and this appeal therefore is for the purpose of asking the board to waive the requirements in so far as it pertains to the protecting of the exposures which are at an angle from other exposures, and also the openings which are above the roof level of buildings with openings facing the building in question, and claims, also, that all openings in the exposures which directly face the building in question are now protected in accordance with the law; regarding Items 8 and 9, which require extensions to the existing standpipe system, appellant contends that it would be a great hardship to make any changes to the system at this time as this is a fireproof building and compliance with these items would necessitate the cutting of concrete floors, walls, etc., also, that this building is an existing building since 1898 and under the standpipe rules no change could properly be required, and the fire department has therefore seen fit to issue these orders under section 20 of chapter 12 of the code of ordinances; that the building is equipped with a National District watchmen's time service with station on each floor directly adjoining the elevators, and that there are also two additional watchmen's stations on each story which are visited regularly at all times when the premises are not in active operation.

Resolved, that the orders of the fire commissioner be and they hereby are *modified*, and the appeal be and it hereby is *granted*, as to Order No. 16498-F, Item No. 1, only so far as it affects windows not on the course of stair halls or corridors, and *granted*, as to Item Nos. 8 and 9, and Item No. 1 of Order No. 79438, *on condition* that the existing standpipe line shall be extended to include the base of the tower structure, to wit; the twenty-sixth and twenty-seventh stories, with hose outlets and hose sufficient to cover the tower structure above, and that the structure as now existing shall be not increased in height or area, and that the standpipe system otherwise shall conform to the rules in all respects.

BUILDING ZONE CASES

1322-27-BZ.

APPLICANT—Croker Nat'l Fire Prev. Eng. Co., for Daleson Realty Corp., owner.

THE RESOLUTION—

(71-28-BZ)

WHEREAS, Max Handel, owner, filed, January 26, 1928, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 285-289 Thatford avenue, east side, 100 ft. south of Dumont avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, September 11, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Thatford avenue, south of a point 100 ft. south of Dumont avenue, is in a business district; Dumont avenue is in an unrestricted district and Osborn street is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered January 4, 1928 (re Applic. No. 23993-1927), reads:

"1. Proposition acting contrary to zone resolution Art. D, Sec. 4, Subd. 15, is hereby denied."

and

WHEREAS, the proposed building is to be of non-fireproof construction, one story in height, with a frontage of 75 ft. and a depth of 100 ft.; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the board deemed that the applicant was not entitled to relief.

Resolved, that the decision of the superintendent of buildings be and it hereby is affirmed, and the application be and it hereby is denied.

THE RESOLUTION—

(196-28-BZ)

WHEREAS, Alfred J. Boulton, for Bayer Holding Corp., owner, filed, March 2, 1928, an application, under the building zone resolution, to permit in a residence district the extension in height and area of an existing laundry; premises 99 Tompkins place, Glendale, Borough of Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, September 11, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Tompkins place, from the north building line of Edsall avenue to a point 100 ft. north of Central avenue, is in a residence district; Edsall avenue, north side, is in a business district; Edsall avenue, south side, is in a residence district and Central avenue is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered February 6, 1928 (re Plan No. Alt. 388-28), reads:

"A laundry is a factory within the meaning of the Labor Law and must be so construed under the building zone resolution.

"The extension of a laundry in a residence district is contrary to Article 2, Section 2 and 3 of the building zone resolution."

and

WHEREAS, the existing laundry building (erected in September, 1925, in an unrestricted district) is located on the rear of the lot, non-fireproof, one story in height, having a frontage of 32 ft., a depth of 67 ft. and a width of 35 ft. across the rear; it is proposed to extend the existing building to cover the entire plot (32 ft. front and 100 ft. deep) and to add a second story (at the front of the building) having a frontage of 32 ft. and a depth of 56 ft.; there is an existing boiler room, 12 ft. by 36 ft. in area, at the northeast corner of the building; the premises to be occupied as a wet wash laundry; and

WHEREAS, the board deemed that applicant was entitled to relief under sections 7a and 7c of the building zone resolution and that to deny his extension of the existing business would constitute a hardship within the meaning of section 21 of the building zone resolution.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the building shall not exceed in height two stories above grade; that the southerly gable wall shall be unpierced throughout its entire height and length; that there shall be provided within the building above curb level a loading platform for the loading and unloading of all wares distributed or received on the premises; that any advertising display shall be restricted and limited to flat wall sign fixed to the front of the building; that all permits required shall be obtained within six months and the work fully completed within one year from the date of this action.

THE RESOLUTION—

(145-28-BZ)

WHEREAS, Daniel Campbell, for Avery Garage Corp., owner, filed, February 16, 1928, an application, under the building zone resolution, to permit the extension, from an unrestricted district into a residence district, of a proposed garage for the storage of more than five motor vehicles; premises northeast corner of Blossom avenue and Crommelin avenue, Flushing, Borough of Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, September 11, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Crommelin avenue is in an unrestricted district; Blossom avenue, east of a point 100 ft. east of Crommelin avenue, is in a residence district, and Avery avenue, east of a point 100 ft. east of Crommelin avenue, is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered January 28, 1928 (re N. B. 247-28), reads:

"1. The erection of garage for more than 5 motor vehicles, extending into a residence district is contrary to Article 2, Section 3 of the Zone Law."

and

WHEREAS, the proposed building is to be of non-fireproof construction, two stories in height on Blossom and Crommelin avenues and one story in height on Avery avenue, irregular in shape, having a frontage of 152 ft. 1 in. on Crommelin avenue, 95 ft. 3 in. on Blossom avenue and 25 ft. on Avery avenue, a gore-shaped portion of the Blossom avenue section (approximately 3,000 sq. ft.) and an irregular shaped portion of the Avery avenue section (approximately 1,200 sq. ft.) being in the residence district, the remainder of the building being in the unrestricted district; to be occupied as a garage for more than five motor vehicles; and

WHEREAS, the board deemed that owing to the irregular shape of the plot the applicant is entitled to relief under section 21 of the building zone resolution on the ground of practical difficulty and unnecessary hardship, provided the residential portion of the plot on Avery avenue is not invaded.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted*, only so far as it affects that portion of the plot on Blossom avenue with a frontage thereon of 95 ft. 3 in., running thence northerly 124 ft. 2 in., thence westerly 174.47 ft. to Crommelin avenue; thence east by south along Crommelin avenue for a distance of 152 ft. 1 in. to the point of intersection with the Blossom avenue front, *on condition* that the building shall not be erected in excess of two stories above grade and shall be constructed fireproof throughout; that the northerly and easterly walls shall be unpierced throughout their entire height and length; that any gasoline storage equipment installed shall be restricted and confined within the unrestricted area of the property; that no sign or advertisement shall be erected, maintained or displayed within the residence use area of the property; that all necessary permits shall be obtained within six months and the work completed within one year from the date of this action; that the architect shall make a return of the drawings to this board, in accordance with the foregoing conditions, for approval before submitting same to the superintendent of buildings.

896-27-BZ.

APPLICANT—Edward P. Doyle, for Charles Sengen, owner.

SUBJECT—Application for reopening—modification—re decision of superintendent of buildings under sections 7(a), 7(b) and 21 of the building zone resolution, to permit in a business district the erection in height and area of an existing building occupied as a motor vehicle repair shop and garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—13-15 Sumpter street, Brooklyn.

APPEARANCES—None.

THE RESOLUTION—

(896-27-BZ)

WHEREAS, Edward P. Doyle, for Charles Sengen, owner, filed, August 8, 1927, an application, under the building zone resolution, to permit in a business district the extension in area and height of an existing building (motor vehicle repair shop); to be occupied as a motor vehicle repair shop and garage for the storage of more than five motor vehicles; premises 13-15 Sumpter street, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, January 31, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Sumpter street is in a business district, Fulton street is in a business district and Marion street is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered August 3, 1927 (App. No. 13962-1927), reads:

"1. Proposed extension in area and additional story for use of a public garage for more than five cars and motor vehicle repair shop of present structure located in a business district is contrary to Art. II, Sec. 6, Zoning Resolutions, and is hereby denied."

and

MINUTES

WHEREAS, the premises consist of a plot of ground having a frontage of 50 ft. and a depth of 100 ft.; 5 ft. east of the westerly building line there is an existing one-story non-fireproof building, 20 ft. by 94 ft. 9 in. in area, occupied as a motor vehicle repair shop; it is proposed to increase the area and height of this building by the erection of a second story and by the erection thereto of a two-story addition having a frontage of 25 ft. and a depth of 100 ft.; the entire structure to be occupied as a motor vehicle repair shop and garage; and

WHEREAS, there is an existing garage on a portion of this plot; and

WHEREAS, the applicant has made diligent and earnest efforts to obtain 80 per cent consents of affected property owners and lacks but 67 ft. of the property required to constitute such 80 per cent of consents to bring the application under section 7, subdivision g; and

WHEREAS, applicant has filed 53 consents of owners of property within the area affected; and

WHEREAS, this application was granted by the board at its meeting, January 31, 1928, on certain conditions, and applicant requested permission to install an emergency exit at rear.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the structure shall not exceed in height a two-story building above grade, that the second story shall set back 10 ft. from the rear yard line at the second story level; that the gable and rear walls, first story, shall be unpierced throughout their entire height and length, other than for one emergency exit, not exceeding a width of 3 ft. 6 in., located in the westerly gable wall, extreme rear, first story, leading into a 5 ft. 3 in. rear yard with a 5 ft. side court direct to the street; that the building shall be constructed fireproof throughout; that the front elevation shall be of face brick and architectural terra cotta or stone trimmings; that any vehicular opening in the front of the building shall not exceed a height of 10 ft.; that all necessary permits shall be obtained within six months and the work completed within one year from the date of this action.

1231-27-BZ.

APPLICANT—Eugene De Rosa, substituted for Ferdinand Savignano, for West 8th Street Arcade, Inc., owner.

SUBJECT—Application for reopening—modification—re decision of superintendent of buildings under sections 7(b), 7(c) and 21 of the building zone resolution, to permit partly in a residence district and partly in a business district the erection and maintenance of a building to be used as a motion picture theatre, restaurants and offices and also the omission of the required legal rear yard.

THE RESOLUTION—

(1231-27-BZ)

WHEREAS, Ferdinand Savignano, for West Eighth Street

Arcade, Inc., owner, filed, November 22, 1927, an application, under the building zone resolution, to permit, partly in a residence district and partly in a business district, the erection and maintenance of a building to be used as a motion picture theatre, restaurants and offices and also the omission of the required legal rear yard; premises 52-54 West 8th street, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, May 22, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that West 8th street is in a business use and "B" area district; Waverly place is in a residence use and "B" area district; Sixth avenue is in a business district; McDougal street, from West 8th street to a point 100 ft. south, is in a business use and "B" area district; McDougal street, south of a point 100 ft. south of West 8th street, is in a residence use and "B" area district; and

WHEREAS, the decision of the superintendent of buildings, rendered November 21, 1927 (re N. B. 472-27), reads:

"1. On that portion of the lot lying within the residence district, no building may be erected, the proposed use of which is not permitted by Sec. 3 of the Building Zone Resolution.

"2. Provide a lawful rear yard as required for residence districts by Sec. 17 of the Building Zone Resolution."

and

WHEREAS, the proposed building is to be of fireproof construction, three stories and basement in height, with a frontage of 48 ft. and a depth of 142 ft., irregular; to be occupied as a motion picture theatre, restaurants and offices; and

WHEREAS, the board deemed that applicant substantiated his basis of appeal under sections 7b, 7c and 21 of the building zone resolution and was entitled to relief; and

WHEREAS, this application was granted by the board at its meeting, May 22, 1928, on certain conditions, and applicant now requests an amendment to the description of the building to a three-story instead of four stories.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted*, only so far as it affects the use of the rear of the property, within the residence use district, *on condition* that the building shall be constructed fireproof throughout; that the building within the residence use area shall not be erected in excess of 23 ft. above the curb level; that the rear of building above that level shall be confined to the business use district of the plot; that the building shall be constructed in accordance with the requirements of the building code as to use and occupancy; that the rear and gable walls within the residence use area of the premises shall be unpierced throughout their entire height and length; that the building zone resolution shall be complied with in all other respects, and that all permits required shall be obtained within six months and any work involved shall be completed within one year from the date of this action.

THE RESOLUTION—

(175-28-S)

WHEREAS, United Real Estate Owners Association, for Wander Iron Works, owner, filed, February 28, 1928, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 423 Whitlock avenue and 855 East 144th street, Borough of The Bronx; and

WHEREAS, the order of the fire commissioner, dated September 1, 1927, reads:

"1. Arrange exit doors to open outwardly as per Section 271 of the Labor Law."

and

WHEREAS, the building, facing on two street fronts, is non-fireproof, one story in height, 68 ft. by 165 ft. in area; OCCUPIED as an iron works, 15 persons in entire premises; the basement being used for storage of iron shapes, no occupants; and

WHEREAS, petitioner contends that the doors in question are large sliding doors and that owing to their weight it is impractical to hang them so as to swing; petitioner proposes to provide a swinging door, 44 in. wide, in the panel of the westerly sliding door on the East 144th street front.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted on condition that the building shall be not increased in height or area; that a wicket door, 44 in. by 84 in., swinging out, shall be provided in each sliding door opening, total of two, and this variation is granted so long as conditions as to occupancy and use remain unchanged.

313-28-S.

PETITIONER—Childs Company, owner.

SUBJECT—Variation of the labor law as cited in order of the fire commissioner.

THE RESOLUTION—

(313-28-S)

WHEREAS, Childs Company, owner, filed, April 5, 1928, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 219-221 Sixth avenue, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated January 26, 1927 (Order No. 9824-LD), reads:

"1. Arrange the fire escape on rear of building and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Sections 273 and 274 of the Labor Law and the rules of the Board of Standards and Appeals, or carry out a proper alternative method of complying with the requirements of Sec. 271 of the Labor Law.

"Among the defects noted are the following:

"No balcony at 2nd story. No means of reaching ground.

"No fireproof passageway from termination to street."

and

WHEREAS, the building is non-fireproof, four stories in height, 40 ft. by 100 ft. in area at first story and 40 ft. by 60 ft. in area above; OCCUPIED: 1st story, restaurant; 2nd story, offices; 3rd and 4th stories, manufacturing and painting glass slides, 5 persons per story; EQUIPPED with a fire alarm signal system; EXITS: an interior wooden stairway, extending from the first story to roof, enclosed in terra cotta partitions on the first story and in plaster partitions above, with kalameined doors at openings; a fire escape on the rear of the building, having metal-covered frames and wire glass windows along the course thereof, extending from the main roof to the roof of the first story extension, with EGRESS from the termination of the fire escape by means of adjoining one-story extension roofs; ROOFS of adjoining buildings are at same level; and

WHEREAS, petitioner requests, in view of the light occupancy of the premises, the acceptance of the existing means of egress.

Resolved, that the order of the fire commissioner be and it hereby is affirmed, and the petition be and it hereby is denied.

105-28-S.

PETITIONER—David E. Hurwitz, for St. Regent Bakery & Lunch, Inc.

SUBJECT—Variation of the labor law, as cited in a decision of the superintendent of buildings.

PREMISES AFFECTED—42-46 West 33rd street, Borough of Manhattan.

APPEARANCES—None.

THE RESOLUTION—

(105-28-S)

WHEREAS, David E. Hurwitz, for St. Regent Bakery and Lunch, Inc., for Robert Mc C. Marsh, trustee for Estate of Lawrence Odell, owner, filed, February 2, 1928, a petition for a variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises 42-46 West 33rd street, Borough of Manhattan; and

MINUTES

WHEREAS, the decision of the superintendent of buildings, rendered January 13, 1928, reads:

"Our inspector reports that the following objections to the use of the above premises as a factory building must be removed before a certificate of occupancy can be issued:

"2. Two fireproof enclosed interior stairways as required by Section 270 of the Labor Law not provided.

"3. Second means of exit not provided from restaurant, first floor.";

and

WHEREAS, the building, erected in 1920, is fireproof, six stories (75 ft.) in height, 59 ft. 5 $\frac{3}{8}$ in. by 98 ft. 9 in. in area at first story and 59 ft. 5 $\frac{3}{8}$ in. by 88 ft. 4 in. in area above; OCCUPIED: 1st story, stores and restaurant, 250 persons; upper stories, offices and light manufacturing (garments), 45 persons per story; EXITS: an interior 44-in. iron riser cement tread stairway, extending from the first story to roof, enclosed in fireproof partitions with fireproof doors at openings; an exterior 45-degree iron stairway on the rear of the building, having fireproof openings along the course thereof, extending from the roof to a fireproof passageway, at the mezzanine level, connecting to the main stairway; and

WHEREAS, petitioner contends that there is a secondary exit from the restaurant by means of a doorway leading into the kitchen, thence through the kitchen to a doorway leading into the main entrance hall of the building, and requests, in view of the light occupancy of the building, the acceptance of the existing means of egress.

Resolved, that the decision of the superintendent of buildings be and it hereby is affirmed, and the petition be and it hereby is denied.

181-28-S.

PETITIONER—Van F. Pruitt, for Bruck Weiss Millinery, Inc., owner.

SUBJECT—Variation of the labor law as cited in decision of the superintendent of buildings.

PREMISES AFFECTED—20-22 West 57th street, Manhattan.

APPEARANCES—

For Petitioner: Van F. Pruitt.

THE RESOLUTION—

(181-28-S)

WHEREAS, Van F. Pruitt, for Bruck Weiss Millinery Shops, Inc., owner, filed, February 29, 1928, a petition for a variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises 20-22 West 57th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, dated December 8, 1927, reads:

"22. No light of fireproof windows provided with $\frac{1}{4}$ " plate glass may exceed 720 sq. inches. Sec. 264-7c Labor Law. Reconsideration denied.";

and

WHEREAS, the building is fireproof, eight stories in height, 50 ft. by 100 ft. 5 in. in area at first story and 50 ft. by 90 ft. 5 in. in area above; OCCUPIED: 1st story, stores; upper stories, offices, showrooms and light manufacturing, 177 persons per story on the second, third and fourth stories and 75 persons per story on the upper stories; EQUIPPED with a sprinkler system and a fire alarm signal system; EXITS: two interior fireproof stairways, extending from

the first story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, there are openings on the first and second stories in the street wall of the building glazed with $\frac{1}{4}$ in. polished plate glass; the maximum area of the glass on the first story being 11 ft. by 11 ft. 6 in. and on the second story being 6 ft. by 2 ft 8 in.; and

WHEREAS, petitioner contends that a strict compliance with the labor law as to the area of the glass would destroy the intended use of the two lower stories.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted, so far as it affects the windows on the first and second stories on the street front, on condition that these openings shall be equipped with approved fireproof frames and sash, glazed with $\frac{1}{4}$ in. polished plate glass, and that no light of glass on the second story, front, shall exceed a width of 2 ft. 8 in., and that the requirements of the labor law shall be complied with in all other respects.

1030-26-S.

PETITIONER—Croker Nat'l Fire Prev. Eng. Co., for August Oppenheimer, owner.

SUBJECT—Application for reopening—modification—re variation of labor law, as cited in order of the fire commissioner.

PREMISES AFFECTED—6 East 17th street, Manhattan.

APPEARANCES—

For Petitioner: J. Burmeister.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition reopened and resolution modified.

THE VOTE TO REOPEN AND MODIFY RESOLUTION—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin.....	5
Negative	0
Absent	0

THE RESOLUTION—

(1030-26-S)

WHEREAS, Croker National Fire Prevention Engineering Co., for August Oppenheimer, owner, filed, December 20, 1926, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, dated July 29, 1926, affecting premises 6 East 17th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated July 29, 1926 (Order No. 141-LD), reads:

"1. Provide a second means of exit from 1st and 2nd story of the building in accordance with the provisions of Section 271 of the Labor Law.

"2. Extend the interior stairway at the east side of building to the roof, as per Section 271 of the Labor Law.

"3. Provide safe and unobstructed egress from the lower termination of the fire escape at rear of building by constructing a fireproof passageway with an unobstructed width of at least 3 feet throughout, leading to the street, adequately lighted at all times during working hours, or by means of providing access to an open area having communication with the street, as per Section 273 of the Labor Law.";

and

WHEREAS, the building is non-fireproof, five stories in height, 25 ft. by 86 ft. in area at first and second stories and 25 ft. by 63 ft. in area above; OCCUPIED: 1st story, restaurant, 8 persons; 2nd story, barber shop and paper ruling, 11 persons; 3rd story, decorating leather, 8 persons; 4th story, decorating cloth, 1 person; 5th story, decorating cloth, 10 persons; EXITS: an interior wooden stairway,

MINUTES

extending from the first story to top story, enclosed in wooden partitions, at second story in wood stud lath plaster partitions above, with wooden doors at openings; a ladder from stair hall at top story to roof scuttle; a fire escape on the rear of the building, having fireproof openings along the course thereof, extending from main roof to roof of second story extension, with EGRESS from the termination of the fire escape by means of an iron ladder down to adjoining extension roof at west, and also to an adjoining extension roof of the same level at east; ROOFS of adjoining buildings: same level at east; five stories higher at west; and

WHEREAS, the petitioner proposes, as to Item 1, to provide a balcony in the rear court at second story with a 60-degree stairway from the balcony to the ground level, and also a stairway from the balcony leading to the roof at second story extension; as to Item 2, the petitioner proposes to provide a double-rung iron ladder from stair hall at top story to the roof scuttle; as to Item 3, the petitioner contends that the exits, after improvements are made, will be adequate; that egress from rear fire escapes may be had through buildings adjoining at east and west, to Fifth avenue and to 17th street; and

WHEREAS, this petition was granted by the board at its meeting, February 8, 1927, on certain conditions, and petitioner requested a modification of these conditions as to egress from second story and extension.

Resolved, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is *granted*, as to Item 1, *on condition* that a fire escape balcony shall be provided at second story with connection to adjoining fire escape on building to rear with 60-degree stairs to yard, with access from the roof of the second story extension to this fire escape on premises to rear, and with egress from the extension roof by means of steps down to the levels of the adjoining extension of premises to the east and west; and as to Item 2, *on condition* that a fixed double-rung iron ladder shall be provided from the top story hall to the scuttle in the roof, and that any door at the foot of the ladder shall be removed and the opening shall be maintained unobstructed; and as to Item 3, *on condition* that the stipulations of Items 1 and 2 shall be complied with as long as the occupancy and use shall remain unchanged, and the building shall be not increased in height, area or dimensions.

RULES

FUEL OIL RULES

CONSTRUCTION AND INSTALLATION OF OIL BURNING EQUIPMENT AND STORAGE AND USE OF FUEL OILS

(217-21-SR)

Adopted by the Board of Standards and Appeals November 6, 1919, Amended January 6, 1922, January 18, 1924, October 19, 1926, and September 11, 1928

Rule 20. Fire Protection for Grade A and Grade B oil in Domestic Installations in dwellings occupied by not more than two families and in old law tenements occupied by three or more families in new law tenements and in commercial plants.

(a) No combustible material shall be stored within ten (10) feet of a furnace door.

(b) In dwellings occupied by not more than two (2) families, any woodwork, wooden lath and plaster partition, or other combustible material within four (4) feet of the sides or back, or eight (8) feet from the front of the furnace shall be covered with approved fire-retarding material; the ceiling, except it be of fireproof construction, shall be protected with approved fire-retarding material extending four (4) feet beyond the sides and back and eight (8) feet from the front of the furnace. In old law tenement houses occupied by three or more families the heating apparatus and oil burning device shall be located in an enclosure the partitions of which shall be constructed of fireproof material not less than four (4) inches in thickness with openings therein protected with self-clos-

PUBLIC HEARINGS

Tuesdays, at 10 a. m. and 2 p. m.
Special meetings as published in this Bulletin.
Call of Clerk's Calendar, Tuesdays, at 2 p. m.
All hearings are held in Room 1013, Municipal Building, Manhattan.

UNIVERSITY OF ILLINOIS HOURS FOR CONSULTATION

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

CALL OF CLERK'S CALENDAR

The Clerk's Calendar consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, September 25, 1928, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, October 2, 1928, at 2 o'clock.

The Clerk's Calendar is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

NOTICE TO APPELLANTS AND PETITIONERS

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and disposition of same expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

ACTION OF BOARD—Appeal dismissed for lack of prosecution.

THE VOTE TO DISMISS—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin..... 5

Negative 0

Absent 0

THE RESOLUTION—

(247-28-A)

WHEREAS, I. G. Hamburger, for Friars Realty Co., owner, filed, March 22, 1928, an appeal from an order of the fire commissioner, affecting premises 304-306 West 49th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated February 29, 1928 (Order No. 33398-F), reads:

"1. Provide a separate and distinct system of Automatic Sprinklers throughout building having at least one source of water supply, arranged and equipped as provided in the rules for fire extinguishing appliances adopted by the Board of Standards and Appeals, May 24th, 1927, as amended May 2nd, 1918, and January 21, 1919, effective February 17, 1919.";

and

WHEREAS, the building is non-fireproof, six stories in height, 50 ft. by 95 ft. in area; OCCUPIED: cellar, public garage; 1st story, public garage, 2 persons; 2nd story, public garage, 2 persons; 3rd story, auto repair shop, 4 persons; 4th, 5th and 6th stories, auto painting, 4 persons on each of the 4th and 5th stories and 6 persons on the 6th story; EGRESS consists of an interior stairway extending from the first story to sixth story, enclosed in terra cotta partitions on the first story and metal-covered partitions above, with self-closing, fireproof doors at the openings; a fire escape on the rear of the building, with fireproof openings along the course thereof, and egress through open court to street; and

WHEREAS, appellant contends that it is proposed to cover the floors and ceiling with fire-retarding material and provide new stairs, elevators, etc., and that a sprinkler system is not required; and

WHEREAS, no one appeared when this case was called.

Resolved, that the appeal be and it hereby is dismissed for lack of prosecution.

1313-27-A.

APPELLANT—Philip J. Sinnott, for Edlar Realty Corp., owner.

SUBJECT—Appeal from decision of the fire commissioner.

PREMISES AFFECTED—Southeast corner of Sound View avenue and Thieriot avenue, The Bronx.

APPEARANCES—

For Appellant Philip J. Sinnott.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal dismissed for lack of jurisdiction.

THE VOTE TO DISMISS—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin..... 5

Negative 0

Absent 0

THE RESOLUTION—

(1313-27-A)

WHEREAS, Philip J. Sinnott, for Edlar Realty Corp., owner, filed, December 20, 1927, an appeal from a decision of the fire commissioner, affecting premises southeast corner of Sound View avenue and Thieriot avenue, Borough of The Bronx; and

WHEREAS, the decision of the fire commissioner, rendered November 12, 1927, reads:

"Reports of inspection by the Fire Department, the Building Department, verified by the Department of

MINUTES

Education show that there is a school in the vicinity and that proposed gas station would be in violation of the Building Zone Resolution. Inasmuch as the above plans were approved, upon the sworn statement incorporated in your plans that there were no school exits within 200' along line of travel, I regret to inform you that approval of said plans must be and is hereby revoked.";

and

WHEREAS, the premises consist of a triangular plot, 114 ft. frontage on Thieriot avenue, 132 ft. frontage on Sound View avenue, by 72 ft. across the rear, with a one-story metal office, 30 ft. by 15 ft. in area, six 550-gallon underground gasoline tanks and six pumps; OCCUPIED as a gasoline service station within an unrestricted district; and

WHEREAS, the appellant claims that the alleged school within 200 ft. of the gasoline service station in question is a one-story frame structure, formerly used for school purposes, which has been abandoned and not used for school purposes since July 1, 1924, and up to and including the completion of the gasoline service station; that he has been informed that at the present time the structure is not used for school purposes; that the gasoline station was erected under plans approved September 7, 1926; and

WHEREAS, in the opinion of the board, the gasoline service station in this appeal lies in the same intersecting street in which exists public school property, occupied by more than one structure for school purposes, the board holds it has no jurisdiction in the matter.

Resolved, that the appeal be and it hereby is *dismissed* for lack of jurisdiction.

254-28-A.

APPELLANT—Petroleum Heat & Power Co., for Roman Catholic Church of Holy Trinity, owner.

SUBJECT—Appeal from decision of the fire commissioner.

PREMISES AFFECTED—212-218 West 83rd street, Manhattan.

APPEARANCES—

For Appellant: G. H. Hallock.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin.....	5
Negative	0
Absent	0

THE RESOLUTION—

(254-28-A)

WHEREAS, Petroleum Heat and Power Co., for Roman Catholic Church of Holy Trinity, filed, March 23, 1928, an appeal from a decision of the fire commissioner, affecting premises 212-218 West 83rd street, Borough of Manhattan; and

WHEREAS, the decision of the fire commissioner, rendered February 10, 1928 (Plan No. 3691-27), reads:

"6. Boiler room must have entrance from street, yard or court only.";

and

WHEREAS, the building is fireproof, four stories in height, 100 ft. by 81 ft. 6 in. in area; OCCUPIED as a school; and

WHEREAS, a fuel oil burning system has been installed consisting of a 3,000-gallon fuel oil storage tank, an approved Petro Fuel Oil burner and the necessary valves and piping for a complete equipment; and

WHEREAS, appellant contends that there is an engineer's ladder leading from the boiler room to the street and requests the acceptance of the existing exits from the boiler room; and

WHEREAS, the egress from the boiler room is to a stair hall corridor leading direct to open yard with exit therefrom to Amsterdam avenue; and

WHEREAS, there are three mullion windows on the front of the boiler room opening directly on the street.

Resolved, that the decision of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, only so far as it affects egress direct to open yard, *on condition* that there shall be not more than one door opening from the boiler room to the interior of the building leading to the corridor, said opening to be equipped with a self-closing, fireproof door, and that the oil burning equipment shall comply with the fuel oil rules in all other respects.

260-28-A.

APPELLANT—Petroleum Heat & Power Co., for Ellgold Realty Co., owner.

SUBJECT—Appeal from decision of the fire commissioner.

PREMISES AFFECTED—528 East Fordham road, The Bronx.

APPEARANCES—

For Appellant: G. H. Hallock.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin.....	5
Negative	0
Absent	0

THE RESOLUTION—

(260-28-A)

WHEREAS, Petroleum Heat and Power Co., for Ellgold Realty Co., owner, filed, March 23, 1928, an appeal from a decision of the fire commissioner, affecting premises 528 East Fordham road, Borough of The Bronx; and

WHEREAS, the decision of the fire commissioner, rendered March 13, 1928 (Plan No. 1013-27), reads:

"3. Boiler room must be completely cut off from rest of the building by fireproof partitions, ceiling and floor constructed of not less than 8" for brick or 6" for concrete or terra cotta. F. O. Rule 20.

"4. Boiler room must have entrance from street, yard or court only. F. O. Rule 20.";

and

WHEREAS, the building is non-fireproof, one story in height, 82.40 ft. by 100.04 ft. in area; OCCUPIED: retail stores, 10 persons; approximately one-quarter of the area is excavated below grade on the Bathgate avenue front for boiler room with a fuel oil burning equipment; EGRESS from the boiler room consisting of an engineer's ladder in areaway to street level on Bathgate avenue and an interior stairway to the first story; and

WHEREAS, appellant contends that the building is only one story and that it is practically impossible to provide a direct exit to the outer air; and

WHEREAS, the boiler room is now enclosed by walls of approved masonry.

Resolved, that the decision of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, as to Item 3, *on condition* that the ceiling shall be fire-retarded in accordance with the rules of the board of standards and appeals, and *granted*, as to Item 4, only so far as it affects the egress to an interior stairs, *on condition* that there shall be installed at the cellar opening self-closing, fireproof door leading to the interior stairs, and that this item otherwise shall be complied with; that the building shall be not increased in height or area, and this variation is granted only so long as conditions as to occupancy and use remain unchanged.

MINUTES

140-28-A.

APPELLANT—J. L. Hernon, for Flintlock Realty Co., owner.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—12-16 John street, Manhattan.

APPEARANCES—

For Appellant: J. L. Hernon.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition. THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin.....	5
Negative	0
Absent	0

THE RESOLUTION—

(140-28-A)

WHEREAS, J. L. Hernon, for Flintlock Realty Co., owner, filed, February 14, 1928, an appeal from an order of the fire commissioner, affecting premises 12-16 John street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated January 27, 1928 (Order No. 32084-F), reads:

"1. Provide iron shutters at all openings in the exterior wall above 1st story which are distant in a direct line less than 30' from any opening in any other building and not in the same plane with said openings and which are not more than 50' above a neighboring roof at rear and east sides of buildings, or other approved protection as per Section 375, Article 18, Chapter 5 of the Code of Ordinances.";

and

WHEREAS, the building is fireproof, twelve stories and pent house in height, 48 ft. by 52 ft. in area at the first story and 48 ft. by 40 ft. above; OCCUPIED: store and tenant factories, offices, etc., total of 122 persons; means of EGRESS: an interior stairway, extending from the first story to the roof, enclosed in fireproof partitions on three sides and opening into the corridor on the fourth side; a fire escape, with egress from the termination of the fire escape on the second story over roof of an extension; there are three mullion windows and one single window on the rear court within 13 ft. 7 in. of windows in the adjoining building of 9-13 Maiden lane and within 27 ft. 7 in. of windows in an adjoining building to the west; there are two windows in the westerly wall in the 7th, 8th, 9th, 10th and 12th stories and three windows on the 11th story which are within 50 ft. of a neighboring roof; and

WHEREAS, appellant contends that the surrounding buildings are fireproof with windows opening in the wall of the building to the south, 9-13 Maiden lane, which are equipped with iron shutters; that the windows opening in the building to the west are equipped with fireproof sash and wire glass; that the building is equipped with a standpipe system and that there are day and night watchmen service.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, only so far as it affects the windows not on the course of the elevator shaft, stair hall or fire escapes, and this variation is granted only so long as the occupancy and the adjoining exposures remain unchanged.

THE RESOLUTION—

(149-28-BZ)

WHEREAS, Peter Spinoso, for Kathryn F. Sheridan, owner, filed, February 18, 1928, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station; premises 261 Potter avenue, Astoria, Borough of Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, September 18, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Potter avenue is in a business district; Second avenue is in a business district; Fourth avenue, north of Potter avenue, is in a business district, and Fourth avenue, south of a point 100 ft. south of Potter avenue, is in a residence district; and

WHEREAS, the decision of the fire commissioner, rendered December 31, 1927 (re Plan No. 4394-27), reads:

"1. A gasoline service station may not be permitted in a business district.";

and

WHEREAS, the premises consist of an irregular shaped plot of ground having a frontage of 75 ft. and a maximum depth of 87.69 ft., upon which it is proposed to erect a one-story office, 20 ft. by 20 ft. in area, and to install the necessary tanks and pumps for a gasoline service station; and

WHEREAS, the board deemed that applicant did not substantiate his basis of appeal brought under section 21 of the building zone resolution.

Resolved, that the decision of the fire commissioner be and it hereby is affirmed, and the application be and it hereby is denied.

245-28-BZ.

APPLICANT—Thomas W. Lamb, Inc., for Highbridge Realty Corp., owner.

SUBJECT—Application (re decision of the superintendent of buildings) under sections 7c and 21 of the building zone resolution, to permit the extension from a business district into a residence district of a proposed business building (theatre).

PREMISES AFFECTED—4140-4156 Broadway, 660-662 West 176th street, 651-661 West 175th street and 40-54 Wadsworth avenue, Manhattan.

APPEARANCES—

For Applicant: Alexander McManus, Isidor Frey and Thomas W. Lamb.

For Opposition: None.

ACTION OF BOARD—Application granted on condition.

THE RESOLUTION—

(245-28-BZ)

WHEREAS, Thomas W. Lamb, Inc., for Highbridge Realty Corp., owner, filed, March 21, 1928, an application, under the building zone resolution, to permit the extension, from a business district into a residence district, of a proposed business building (theatre); premises 4140-4156 Broadway, 660-662 West 176th street, 651-661 West 175th street and 40-54 Wadsworth avenue, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, September 18, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Broadway is in a business district; Wadsworth avenue is in a residence district, West 175th street, east of a point 100 ft. east of Broadway, is in a residence district; West 176th street, east of a point 100 ft. east of Broadway, is in a residence district, and St. Nicholas avenue is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered March 16, 1928 (re N. B. 171-1928), reads:

"1. Building devoted to business purpose may not extend into a residence district. Zoning Resolution, Section 3.";

and

WHEREAS, the proposed building is to be of fireproof construction, orchestra and balcony (68 ft.) in height, with a frontage of 207 ft. 10¾ in. on Broadway, 181 ft. 10½ in. on West 176th street, 124 ft. 7 in. on West 175th street and 199 ft. 10 in. on Wadsworth avenue; to be occupied as a theatre; and

WHEREAS, the greater portion of the plot is in the business use district, the remainder being of such small area and so irregular in shape as to render it useless for any

MINUTES

other purpose in order to afford a reasonable return on the investment; and

WHEREAS, because of the conditions of the surrounding neighborhood the board deems that applicant has substantiated his basis of appeal brought under section 21 of the building zone resolution and, further, the application is justified under section 7c.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that there shall be no exits or entrances in the residence use district except the necessary emergency exits required by law; that there shall be no signs or advertising displayed within the residence use district; that the exterior of the building shall be constructed substantially in conformity with the design filed in this appeal; that the finished working drawings shall be submitted to the board for approval before submission to the building department; that all necessary permits shall be obtained within nine months and all work completed within eighteen months from the date of this action.

232-28-BZ.

APPLICANT—McCooley & Conroy, for Nostrand Holding Corp., owner.

SUBJECT—Application (re decision of the superintendent of buildings) under section 21 of the building zone resolution, to permit partly in a business district and partly in a residence district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—445 Empire boulevard, north side, 202 ft. 25/8 in. east of East New York avenue, Brooklyn.

APPEARANCES—

For Applicant: John H. McCooley, Jr.

For Opposition: Frank Reiss.

ACTION OF BOARD—Application granted on condition.

THE RESOLUTION—

(232-28-BZ)

WHEREAS, McCooley & Conroy, for Nostrand Holding Corp., owner, filed, March 15, 1928, an application, under the building zone resolution, to permit, partly in a business district and partly in a residence district, the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 445 Empire boulevard, north side,

202 ft. 25/8 in. east of East New York avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, September 18, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Empire boulevard is in a business district; New York avenue is in a business district, and Montgomery street is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered March 9, 1928 (re Applic. No. 3402-28), reads:

"Proposition contrary to the Zone Resolution, Art. II, Sec. 3 and Sec. 4a, Subdivision 15.

"The erection of a public garage for more than five motor vehicles partly in a residential and partly in a business district.";

and

WHEREAS, the proposed building is to be of non-fireproof construction, two stories in height, with a frontage of 31 ft. and a depth of 186 ft. 7 1/2 in., rear 105 ft.; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, there exists adjoining these premises on the same street front a garage of substantial area; and

WHEREAS, there exists to the rear, abutting this property, a public garage of excessive area; and

WHEREAS, the board deems the location and circumstance and ground layout of property under appeal justify a variation under section 21.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the building shall not exceed in height two stories above the Empire boulevard curb level and not more than one story in height above the private right-of-way of open roadway to the rear; that the structure shall be constructed fireproof; that all exterior walls, other than the front wall of the alleyway and the front wall on Empire boulevard, shall be unpierced throughout their entire height and length and that the frontage on the private right-of-way or northerly frontage of these premises shall be restricted to one vehicular opening to be used and maintained as an emergency exit only; that the front elevation on Empire boulevard shall be finished with face brick of light color and architectural terra cotta or natural stone trim; that the grade of any ramp incorporated in this structure shall set back not less than 10 ft. from the building line of the Empire boulevard frontage; that all permits required shall be obtained within six months and any work involved completed within one year from the date of this action.

332-28-S.

PETITIONER—Henry I. Oser, for Solid Realty Corp., owner.

SUBJECT—Variation of the labor law as cited in decision of the superintendent of buildings.

PREMISES AFFECTED—330-342 West 38th street, Manhattan.

APPEARANCES—

For Petitioner: J. Lewis.

ACTION OF BOARD—Petition granted on condition.

THE VOTE—

Affirmative: Acting Chairman Connell, Commissioners Holland and Guilfoyle and Deputy Chief Martin.....

Negative

Absent: Chairman Walsh.....

THE RESOLUTION—

(332-28-S)

WHEREAS, Henry I. Oser, for Solid Realty Corp., filed, April 9, 1928, a petition for a variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises 330-342 West 38th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered April 4, 1928 (N. B. Application No. 13-1928), reads:

"1. Windows should comply with Sec. 264 Labor Law and Rule 503 Industrial Code.";

and

WHEREAS, the building is fireproof, sixteen stories in height, 150 ft. by 98 ft. 9 in. in area; OCCUPIED: 1st story, stores; upper stories, tenant factories, 125 persons per story; EQUIPPED with a sprinkler system; EXITS: two interior fireproof stairways, extending from the first story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, there are openings on the first and second stories in the street wall of the building glazed with 1/4-inch thick polished plate glass; the maximum area of the glass on the first story being 138 in. by 128 in., and on the second story 42 in. by 92 in.; and

WHEREAS, petitioner contends that a strict compliance with the labor law as to the area of the glass would destroy the intended use of the two lower stories.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted, only so far as it affects the windows on the first and second stories on the street front, on condition that they be equipped with approved metal frames and sash glazed with 1/4-inch polished plate glass, and that the building shall conform with the labor law in all other respects; that the size of the windows shall not exceed the areas stated in the petition, on the second story to be not larger than 47 in. by 84 in., and on the first story not larger than 148 in. by 128 in.

298-28-S.

PETITIONER—Henry I. Oser, for Printarts Building, Inc., owner.

SUBJECT—Application for reopening—reconsideration—re variation of the labor law as cited in decision of the superintendent of buildings.

PREMISES AFFECTED—228-38 East 45th street and 237 East 44th street, Manhattan.

APPEARANCES—

For Petitioner: J. Lewis.

ACTION OF BOARD—Petition reopened and granted on condition.

THE VOTE TO REOPEN AND GRANT—

Affirmative: Acting Chairman Connell, Commissioners Holland and Guilfoyle and Deputy Chief Martin.....

Negative

Absent: Chairman Walsh.....

THE RESOLUTION—

(298-28-S)

WHEREAS, Henry I. Oser, for Printarts Building, Inc., owner, filed, April 2, 1928, a petition for a variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises 228-238 East 45th street and 237 East 44th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered March 28, 1928, reads:

"All windows must comply with Section 264-7 of Labor Law and Rule 503 of Industrial Code.";

and

WHEREAS, the building is fireproof, sixteen stories in height, having a frontage of 30 ft. on East 44th street, 127 ft. on East 45th street and a depth of 200 ft. 10 in.; OCCUPIED: 1st story, stores; upper stories, tenant factories, 115 persons per story; EQUIPPED with a sprinkler system; EXITS: two interior fireproof stairways, extending from the first story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, there are windows on the first and second stories, in both street fronts of the building, glazed with one-quarter-inch plate glass; the maximum area of the glass on first story being 120 in. by 132 in., and on the second story being 144 in. by 90 in.; and

WHEREAS, petitioner contends that a strict compliance with the labor law as to the area of the glass would destroy the intended use of the two lower stories; and

WHEREAS, this petition was denied by the board at its meeting, July 24, 1928, and petitioner requested a reopening and reconsideration of the case filing plans showing the size of glass proposed.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is reopened and the original application granted on condition that the variation apply to the windows on the first and second stories only, on the street front, and that they be equipped with approved metal frames and sash glazed with 1/4-inch polished plate glass; that the windows shall not exceed the area stated in the petition; on the lower story to be not larger than 128 in. by 130 in., and those on the second story to be not larger than 48 in. by 90 in., and that the requirements of the labor law be complied with in all other respects.

242-28-S.

PETITIONER—George A. Boehm, for Charlotte E. Woodbury, owner.

SUBJECT—Variation of the labor law as cited in order of the fire commissioner.

PREMISES AFFECTED—565-567 Broadway and 82-86 Prince street, Manhattan.

APPEARANCES—

For Petitioner: Terence J. McManus and George A. Boehm.

For Administration: Inspector Maher of fire department.
ACTION OF BOARD—Petition granted on condition.
THE VOTE—

Affirmative: Acting Chairman Connell, Commissioners Holland and Guilfoyle and Deputy Chief Martin..... 4
Negative 0
Absent: Chairman Walsh..... 1

THE RESOLUTION—

(242-28-S)

WHEREAS, George A. Boehm, for Charlotte E. Woodbury, filed, March 21, 1928, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 565-567 Broadway and 82-86 Prince street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated March 2, 1928 (Order No. 33498-LD), reads:

"2. Provide a second means of exit for occupants, 8th story, by providing a public corridor leading to both required means of exit, as per Section 271 of the Labor Law.

"3. Provide an exterior screened iron stairway at east side of building, as per Section 271 of the Labor Law, not less than 44" in width, extending from ground to roof, with balcony on each floor and an independent means of egress from its lowest termination by means of an open court or courts or a fireproof passageway leading to the street, constructed as per Section 268 of the Labor Law, or carry out a proper alternative method of complying with the requirements of Sec. 271 of the Labor Law.";

and

WHEREAS, the building, facing on two street fronts, is fireproof, nine stories (132 ft. 4 in.) in height, 51 ft. by

100 ft. in area; OCCUPIED: 1st story, bank; upper stories, offices and light manufacturing, 35 persons per story; EXITS: an interior or 40-inch-wide fireproof stairway, extending from the first story to roof, enclosed in fireproof partitions with fireproof doors at openings; a fire escape on the Prince street front of the building, having fireproof openings along the course thereof, extending from the top story (with gooseneck to roof) to the second story balcony, with EGRESS from the termination of the fire escape by means of counterbalanced ladder to street; ROOFS of adjoining buildings are 16 ft. higher; and

WHEREAS, petitioner contends that the premises have been occupied as a factory since prior to 1913; that in compliance with an order issued in 1912 by the fire department, certain work was done on the fire escape and same was accepted by the fire department under date of December 22, 1913; petitioner proposes to limit the occupancy of the premises to thirty-five persons per story and requests the acceptance of the existing means of egress.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted, as to Item 3, on condition that the present fire escape on the Prince street side be removed and a fire escape, meeting the requirements of the labor law and the rules of the board of standards and appeals, be substituted at window sill level with a counterbalanced stairway terminating at the street; that the requirements of the labor law shall be complied with in all other respects and that the occupancy be limited to thirty persons per story, and that the order, as to Item 2, be and it hereby is affirmed, and the petition as to this item be and it hereby is denied.

Adjourned 4 30 p. m.

WILLIAM J. O'GORMAN, Secretary.

RULES

REPORTING STRUCTURAL ALTERATIONS, ADOPTED FEBRUARY 8, 1917, UNDER CAL. 352-16-S.

Resolved, That for the purpose of establishing uniform practice with regards to the reporting of structural alterations made under the requirements of the labor law, the following rule be and it is hereby adopted:

When plans have been filed with the proper superintendent of buildings and structural alterations have been made to comply with the requirements of the labor law relating to exits and fire protection, or with an order of the State

Labor Department relating to exits issued prior to October 1, 1916, or with an order of the fire commissioner issued subsequent to October 1, 1916, a report shall be made by the superintendent of buildings to the fire commissioner stating whether the work done complies with the order of the State Labor Department, with the order of the fire commissioner, or with the provisions of the State Labor Law, as the case may be.

CONCRETE RULES

USE OF HYDRATED LIME IN CONCRETE

Adopted by the Board of Standards and Appeals, April 19, 1920, under Cal. No. 153-20-S.

The use of hydrated lime in all classes of concrete construction shall not be prohibited when used in accordance with the conditions hereinafter set forth.

The hydrated lime shall conform with the standard specifications for this material which have been adopted by the American Society for Testing Materials.

The maximum amount of hydrated lime which may be used shall conform with the following table, all weights given being the amount of lime which may be incorporated for each ninety-five pound bag of Portland cement.

1-1½-3 Mix, 4 pounds of hydrated lime per bag of cement.

1-2-4 Mix, 5 pounds of hydrated lime per bag of cement.

1-2½-5 Mix, 6 pounds of hydrated lime per bag of cement.

For hand mixed concrete, the hydrated lime and Portland cement shall be well mixed while dry.

Hydrated lime shall not be used in concrete which is to be deposited under water.

FORMS FOR NOTICES TO PROPERTY OWNERS

If applicants, under the building zone resolution, desire copies of Form 7NO, for notices to property owners, such forms are not to be supplied by this office.

The applicant is entitled only to one copy of Form 7NO, properly filled out.

If he desires additional copies for his own convenience, in notifying property owners, he can obtain such copies from The O'Connell Press, 176 Park Row, Manhattan, at three cents each, postage to be added if the forms are to be supplied by mail.

RULES

ELEVATOR RULES

RULES FOR THE CONSTRUCTION, MAINTENANCE AND OPERATION OF ELEVATORS,
ADOPTED JULY 30, 1918, BY THE BOARD OF STANDARDS AND APPEALS, EFFECTIVE
AUGUST 26, 1918; REVISED MAY 13, 1919.

Rule 1. Application of Elevator Rules. Every elevator, escalator, freight conveyor or amusement device, within the City of New York, in addition to conforming to all provisions of the labor law, building code or other laws or ordinances, as are applicable thereto, shall comply with the requirements of these rules.

Existing and future installations shall at all times be maintained by the owner in a safe condition and in conformity with the requirements of these rules.

Rule 2. Definitions Relating to Elevators.

(a) The terms "elevator," "passenger elevator," "freight elevator" and "amusement device" shall have the meanings indicated in §560 of the building code.

(b) The term "dumbwaiter" shall apply to such special form of freight elevator, whether power driven or manually operated, the dimensions of which do not exceed nine square feet in horizontal section nor four feet in height.

(c) The term "hand power elevator" shall apply to such forms of passenger or freight elevators which are manually operated and the dimensions of which exceed nine square feet in horizontal section.

(d) The term "sidewalk type elevator" shall apply to such special form of freight elevator, either power driven or manually operated, the platform of which does not exceed fifty (50) square feet in area and is suspended or supported at one or more points on the underside.

(e) The term "escalator" shall apply to a moving continuous inclined stairway or runway designed for elevating or lowering passengers.

(f) The term "freight conveyor" shall apply to a device used for elevating or lowering freight in a vertical or inclined direction on a continuous moving carrier without the services of an operator thereon.

(g) The term "future installations" shall apply to any elevator, machinery or equipment used in connection therewith, installed after these rules become effective.

(h) The term "existing installations" shall apply to any elevator, machinery or equipment used in connection therewith, either already installed, in process of installation, or for which plans are on file with the superintendent of buildings prior to August 26, 1918.

(i) The term "alteration" shall include any essential change to the elevator car, counterweights, rails, machinery, safeties or other equipment or direct motive power; except that any repair work made necessary by the ordinary operation of the elevator shall not be deemed an alteration.

(j) The term "power driven elevator" shall apply to any form of elevator except those operated by hand power, gravity in both directions, or through friction grip on the pull rope.

Rule 3. Permits. The application required by §562, building code, for the installation or alteration of elevators, amusement devices, etc., shall be in triplicate on blanks furnished by the superintendent of buildings, stating the size, manner of construction, speed, capacity, other essentials, and mode of operation of the same, and accompanied by necessary drawings; except that applications for the installation of dumbwaiters, and conveyors or hoists may consist of a notice to the superintendent of buildings that such installation is to be made.

Rule 4. Alterations. In making alterations to existing installations, the parts changed or altered must conform in every respect to the rules governing future installations, and where parts of the elevator are damaged from any cause, the damaged parts must be completely renewed, at the discretion of the superintendent of buildings.

Where hand power elevators are changed to power-driven elevators, they shall conform to every rule governing power-driven elevators, except, that when the rise is not more than thirty-five feet and the capacity is not increased, existing wood guide rails may remain in use. In such conversions the use of a power-driven friction grip device is prohibited when the capacity exceeds 800 pounds.

Rule 5. Change of Classification. In future, no freight elevator shall be used for passenger service, unless such elevator conforms to the rules governing future installations of passenger elevators in so far as they relate to safety equipment, hoist ropes, carrying capacity, car enclosure, including gates and emergency exit, shaft openings and doors, and motive power.

In existing installations where such change of classification is made and the hatchway is unenclosed, a substantial enclosure of lawful partitions extending from floor to ceiling and flush with the hatchway shall be constructed, with all openings protected by proper shaft doors.

Rule 6. Tests of New Elevators. In future installations all elevators shall be tested as follows:

The cars of all power-driven elevators shall be loaded to their maximum carrying capacity and operated up and down the shaft several times to test the lifting capacity of the machinery and the operation of the upper and lower automatic limit devices. The car shall be stopped at various levels in the shaft to test the operation of the machine brake.

The cars of all power-driven elevators having speeds exceeding one hundred (100) feet per minute, and of hand-power elevators with a rise of more than fifteen (15) feet, shall be loaded to their maximum carrying capacity, run to the top landing and made to travel downward beyond normal speed, so as to automatically operate the speed retarder or speed governor and car safety device and the slack rope device when required, and (except for hand-power elevators) to stop the machine. This rule shall not be construed, however, to require safe lift elevators to be tested with safe lift load.

The cars of power-driven elevators having speeds of one hundred (100) feet per minute or less shall be loaded to their maximum carrying capacity, run to the top landing and started down at normal speed. At this speed the governor shall be manually operated to test the action of the safety equipment.

Rule 7. Carrying Capacity. In existing installations the owner, lessee or other person having charge or control of any elevator, except a dumbwaiter, and in future installations the manufacturer of any such elevator, shall cause to be fastened in a conspicuous place in the car of said elevator a metal plate, having suitable letters and figures on same, which shall designate the number of pounds weight which said elevator can safely carry.

Future installations shall be designed to sustain in all their parts a load per square foot of platform area inside the car of not less than the following:

RULES

- (a) 75 pounds for power-driven passenger elevators;
- (b) 50 pounds for power-driven freight elevators having platform areas not exceeding 100 square feet;
- (c) 50 pounds for hand-power passenger elevators.

Rule 8. Rules to be Posted. In the car of every passenger elevator the superintendent of buildings shall cause to be posted and maintained, in a conspicuous place, for the guidance and information of operators and passengers, such of the rules relating to the operation of elevators as he may deem necessary to insure public safety, including the number of passengers that such car may carry at one time.

Rule 9. Full Automatic Push Button Elevators. In future installations full automatic push button elevators must be so designed and equipped that the car, at its rated speed and load, will automatically stop when the car floor is level with or not more than three inches from the designated landing floor.

The car gate and shaft doors shall be equipped with approved devices that will prevent the operation of the car until the car gate is closed and the shaft door is closed and locked. The shaft door shall not be capable of being opened unless the floor of the car is within three inches of the landing. A push button to operate an alarm bell shall be provided in the car, for the purpose of notifying the person in charge of the premises, in case the car becomes stopped in the shaft from any cause. The shaft doors shall be so arranged that they cannot be opened after the car leaves the landing, except in emergency cases, and then only by a special key which must be provided and kept in the possession of the person having charge of the building.

Rule 10. Belt or Chain Drives. In future installations no hoisting machine driven by a chain or belt device from a motor or countershaft shall be used in connection with any passenger elevator.

Rule 11. Shaft Openings. In shafts hereafter constructed for passenger elevators, no more than one opening shall be allowed in each story, and all openings in the several stories shall be located one above the other, except that doors may be located on opposite or adjacent sides in the several stories when the distance from the car operating device to the door lock does not exceed forty-eight inches and can at all times be fully controlled by the elevator operator without leaving the car operating device. Door openings may be located on opposite or on adjacent sides of the shaft in the first or main entrance story and in the top story, provided that the openings in the remaining stories are all on the same side of the shaft, that a satisfactory device is installed preventing the operation of the car while the car gate distant from the operator is open, that an attendant is always present to control the shaft doors located in the first or top stories, and that there are no offsets or recesses on the inside of the shaft walls.

No alteration not in compliance with the above provision shall be made to any existing passenger elevator shaft.

Rule 12. Hoistway Enclosure. In the existing and future installations where no enclosure of solid partitions is required around the hoistway by the provisions of the building code, labor law or these rules, there shall be provided a substantial vertical enclosure extending from the floor for a distance of not less than six (6) feet on the side or sides where there are no openings in the car for loading purposes. On all other sides, gates or doors must be provided. Such enclosure may be constructed of mesh work, grille work or slatted partitions, provided that when mesh work is used it shall be of not less than No. 10 U. S. gauge wire or No. 13 U. S. gauge expanded metal, with mesh not exceeding one and one-half (1½) inches; when grille

work is used there shall be not more than one and one-half (1½) inches space between any two members, except that where plain straight bars, not filled in with scroll, are used, there shall be not more than one (1) inch space between members; when wood slats are used they shall be not less than three-eighths (¾) of an inch thick, spaced not more than one (1) inch between slats.

In all cases where existing grille work permitted by law or regulation as a shaft enclosure is altered, such alteration shall be of substantial material and construction, properly braced and carried the full height of openings, with not more than one and one-half inch space between any two members; except that where straight bars, not filled in with scroll work, are used, there shall be not more than one inch between members. Where deemed necessary, existing grille work with spaces exceeding those specified in this rule shall be made safe by suitable screen or wire mesh, or wire glass construction.

Rule 13. Shaft Doors. In existing and future installations all gates or doors leading to any shaft in which power-driven passenger elevators are operated (except full automatic push button elevators) shall be locked, bolted or securely fastened on the shaft side. Such shaft doors or gates shall be closed by the operator before the car is put in motion.

In future installations of passenger elevators, keys for opening the shaft doors or gates from the outside of the shaft, in case of emergency, shall be provided and shall be restricted in use to persons in responsible charge of the building.

In existing and future installations in factory buildings only, the openings in every passenger or freight elevator shaft or hoistway enclosure shall be protected in one of the following manners:

- (a) by properly constructed sliding doors.
- (b) by combination slide and swing doors;
- (c) by hinged or swinging doors equipped with approved devices to insure the shaft doors being closed and locked before the car can start from the landing;
- (d) by hinged or swinging doors, either manually operated or self-closing, with auxiliary gates not less than five (5) feet six (6) inches in height, substantially constructed of wood or metal, with not more than two (2) inches space between any two parallel members, and the bottom of the gate not more than ten (10) inches from the floor, except at the top and bottom landings when the distance from the floor to the bottom of the gate may be increased to give the required head room, and shall close automatically upon the car leaving the landing in either direction; except further that for hand power elevators having the pull rope located in front of the shaft entrance, gates may be two (2) feet six (6) inches in height.

When shaft doors are equipped with electric contacts or other locking devices, an approved emergency release shall be provided on the car within easy reach of the operator.

Rule 14. Car Gates. In existing and future installations, all entrances to the cars of power-driven passenger elevators shall be provided with substantial folding or sliding gates or doors, and where floor tracks are used the same must be kept level with the finished floor surface of the car. All folding gates over three feet wide at the entrance to shaft or car shall have top and bottom braces, spaced not more than eighteen inches on centers when the gates are fully expanded. All car gates shall be closed by the operator before the car is put in motion.

In future installations passenger elevator car gates shall be equipped with an approved device or devices that will prevent the operation of the car while the car gates

RULES

re open, and an approved emergency release shall be provided on the car within easy reach of the operator.

Rule 15. Counterweights. In future installations all counterweights shall have their sections securely bolted together with one or more rods, as determined by the superintendent of buildings. Such rods must pass through all the sub-weights and at least one portion of the frame work. No continuous forged straps shall be permitted.

In existing and future installations where counterweights run in the same shaft as the car, they shall, when at the uppermost position, be protected on all exposed sides the full length of the counterweight with substantial and properly secured shields of iron or steel not less than No. 16 U. S. gauge; except that for plunger or fixed stroke piston hydraulic or traction type elevators no top shield shall be required. Where no compensating chains or ropes are attached to the counterweight, similar shields shall be provided eighteen inches above the bottom of the counterweight runway and extending upwards at least five feet. In existing installations, where the clearance between car and counterweight is not more than one and one-half inches, neither top nor bottom shields shall be required, but in lieu thereof bell-tale metal chains not less than five feet long, spaced not more than six (6) inches on centres from rail to rail, shall be suspended from the bottom of the counterweight.

Rule 16. Speed Governors. All power-driven elevators with a rise of more than fifteen feet not already equipped with a speed governor and safety (except sidewalk type elevators and existing freight elevators in buildings not exceeding five stories in height and direct plunger elevators) shall have at the top of the elevator shaft a governor properly connected to a safety device attached to the underside of the car platform, in such manner that the car will be brought to rest with an easy and gradual stop, or in a distance not greater than nine feet at a speed of seven hundred feet per minute, provided that on elevators having a speed of one hundred feet per minute or less, safeties of the instantaneous type may be used. Every governor operating a car safety shall be set to trip the safety at a speed not exceeding forty per cent. above the rated speed given in the application, but in no case exceeding eight hundred and fifty feet per minute; but this shall not require any governor to trip the safety at a speed less than one hundred and fifty feet per minute. When a speed governor has been set for the rated speed it shall be sealed. When safeties of the instantaneous type are used, a proper flexible means of application must be interposed between the safety and the governor.

Rule 17. Limit Devices. In future installations all power-driven elevators shall have approved limit devices as follows:

(a) for Drum Type Electric Elevators, except sidewalk type elevators with speeds not exceeding seventy-five (75) feet per minute, limit switches on the machine and in the shaft or on the car;

(b) for Traction Type Electric Elevators, limit switches in the shaft or on the car;

(c) for Electric Drum Sidewalk Type Elevators, with speeds not exceeding seventy-five (75) feet per minute, machine automatics will be required, but stopping devices on the operating rope will be accepted in lieu of limit switches in the shaft or on the car;

(d) for Hydraulic Elevators, with speeds not exceeding one hundred and fifty (150) feet per minute, stopping devices on the operating rope;

(e) for Hydraulic Elevators, with speeds exceeding one hundred and fifty (150) feet per minute, limit devices on the machine;

(f) for Lever or Crank-Operated Hydraulic Elevators, limit devices on the machine.

Rule 18. Elevator Brake. In future installations every electric elevator shall be equipped with an electric

or electro-mechanical brake that will bring the car to rest when the car operating device is brought to the stop position or when any of the electric safety devices operate.

When the elevator is driven by a belt from an electric motor, the brake must be arranged to operate should the motor belt break or leave the pulleys.

Rule 19. Operating Device. In future installations every elevator driven by electric power and operated by hand rope, lever, wheel or other non-self-centering device, shall be provided with an approved device preventing the operation of the car, after the interruption of the current, until the operating device has been first returned to the inoperative position, and electric car operating switches shall be self-centering and self-locking in the inoperative position.

Rule 20. Reverse Phase Relays. In future installations every elevator motor operated by polyphase alternating electric current shall be equipped with a reverse phase relay.

Rule 21. Slack Rope Device. In future installations all power-driven elevators, including power-driven sidewalk elevators, operated by drum hoisting machines, shall have approved automatic slack rope devices that will stop the machine if, from any cause, any car hoisting rope or chain attached to the drum becomes slack.

Rule 22. Car Locking Device. No elevator shall be used for the carrying of safes or other material of a greater weight than the normal lifting power of such elevator, unless the machine is provided with special equipment and the car is equipped with an approved locking device which will hold it at any landing, independent of the hoisting ropes while such safe or other material is being loaded or unloaded.

Rule 23. Hand-Power Elevator Safety Devices. In future installations every hand-power elevator (except sidewalk type elevators) with a rise of more than fifteen feet, shall be equipped with an approved safety device that will immediately stop and hold the car with a full load if the rope breaks, and with an approved automatic speed retarder and a hand-operated brake operating in both directions.

Grip hoists and elevators operated by gravity in both directions shall comply with the requirements for hand power elevators.

Rule 24. Escalators. In future, every escalator installed shall be equipped with an approved safety device to prevent any accidental downward reversal and with an approved stopping device.

Rule 25. Car Construction. In future installations the car and car frame of every power-driven elevator and of every hand-power elevator with a rise of more than thirty-five (35) feet shall be of incombustible materials; except that the platform may be of wood covered on the underside with incombustible materials. The car enclosure and flooring may be of hard wood. The car, car frame and enclosure of every hand-power elevator with a rise of thirty-five (35) feet or less may be constructed of wood.

Rule 26. Passenger Car Enclosures. In existing and future installations every passenger elevator car shall be fully enclosed on all sides not used for loading or unloading, and on the top, with substantial construction.

In future installations where grille work is used for the car enclosure, including the top, it shall be constructed with not more than one and one-half inch space between any two members; except that where straight bars not filled in with scroll work are used there shall be not more than one inch space between members. When the clearance between car and counterweight is less than two (2) inches, that part of the car enclosure opposite the counterweight runway shall

RULES

be of solid construction or screened with not more than one-half ($\frac{1}{2}$) inch mesh of not lighter than No. 16 U. S. gauge wire, to a height of not less than six (6) feet six (6) inches.

In existing installations in factory buildings only, where the spaces exceed those specified for future installations, it shall be deemed satisfactory if the grille work is made safe by suitable screen or wire mesh fastened to the car enclosure.

Rule 27. Emergency Exit. In future installations every power-driven passenger elevator car shall have a trap door in the top, of such a size as to afford easy egress for passengers, but not less than sixteen inches in least dimension nor less than four hundred square inches in area. When there is more than one elevator in a shaft and the vertical distance between any two consecutive shaft door openings exceeds thirty (30) feet, there shall be provided in addition to the trap door an emergency side exit to the adjacent car.

In existing installations not already provided with an emergency exit, a trap door as specified for future installations shall be provided; except that when the cross head or car top construction renders it impracticable to provide such trap door, this requirement may be waived by the superintendent of buildings, if egress, in case of emergency, is possible through shaft openings, or to an adjacent car.

Rule 28. Freight Car Enclosure. In existing and future installations in factory buildings only, every freight elevator car shall be enclosed on all sides not used for loading or unloading, with substantial construction, to a height of five (5) feet six (6) inches, or to the cross head, when this is less than five (5) feet six (6) inches above the car platform.

In future installations, where an enclosure of open construction is used, the space between any two parallel members shall not exceed one inch.

Rule 29. Freight Elevator Cover. In existing and future installations in factory buildings only, every freight elevator car shall be provided with a substantial cover or grating constructed of not less than No. 8 U. S. gauge wire or its equivalent in strength, and of a mesh that will reject a one and one-half ($1\frac{1}{2}$) inch diameter ball. Sections of the cover or grating may be arranged to swing upward for handling long material, but such cover or grating shall be closed at all other times. In covers hereafter installed (except where car gates are provided) that part of the cover facing the entrances to the hoistway, extending the full width of the car, shall be hinged on a line not less than eight (8) inches nor more than twelve (12) inches back from the edge of the landing, and the hinged section shall be self-closing.

Rule 30. Space Between Saddles and Car. In future installations there shall be not more than one and one-quarter inch, nor less than three-quarters of an inch space between the floor of the car and the floor saddles, and where the saddles project into the shaft the same shall be properly bevelled on the underside at an angle of not less than sixty degrees to the horizontal.

Rule 31. Lights. In existing and future installations the cars of all elevators shall be properly lighted at all times when in service.

Rule 32. Guide Rails. In future installations, guide rails for both car and counterweights of all elevators (except dumbwaiters, and hand-power elevators with a rise of thirty-five feet or less) shall be of iron or steel. They shall be fastened to the sides of the shaft with wrought or cast iron brackets of such strength and design and so spaced that the guide rails and their fastenings shall be able to safely withstand the application of the safety when stopping a fully loaded car under test. For elevators requiring safeties, the guiding surfaces of the car guides shall be finished smooth and joints shall be tongued and grooved or dowelled, and rails shall extend to the level of or above the overhead beams and shall be bottomed on a suitable support.

The weights of steel or iron guide rails shall be not less than given in the following table:

WEIGHT OF GUIDE RAILS PER LINEAL FOOT.

Total Weight of Car and Live Load, or Weight of Counterweight	Weight of Car Guide Rails		Weight of Counterweight Guide Rails	
	With Guide Rail Safeties.	Without Guide Rail Safeties.	With Guide Rail Safeties.	Without Guide Rail Safeties.
0-4000 lbs.....	7½	7½	7½	6½
4001-15000 ".....	14	14	14	7½
15001-40000 ".....	30	30	30	7½

Rule 33. Ropes. In future installations, all elevators (except dumbwaiters) shall have not less than two ropes independently connected to the car and to each set of counterweights. In drum type machines, the lifting and counterweight ropes shall have at least one full turn of the rope on the drum when they have reached the limit of travel. Every rope hereafter used shall have a factor of safety of not less than six for freight elevators, and not less than eight for passenger elevators. The diameter of any hoist or counterweight rope hereafter installed (except for hand-power elevators and sidewalk type elevators) shall be not more than one-fortieth ($1/40$) of the diameter of any sheave or drum over which it passes. All ropes used in the operation of elevators shall be of steel, iron or marlin covered steel. Ropes of other material than metal may be used as hand ropes and brake ropes in hand power elevators or as centering ropes in power driven elevators with hand rope control. Where overhead machines are used, equalizer arms will be permitted on the car and counterweights. Nothing in this rule shall prohibit the use of chains on sidewalk elevators instead of ropes.

Rule 34. Auxiliary Freight Compartments. In future installations no elevator shall be permitted to have attached above, below or on the side of the car a freight compartment or similar device.

In existing installations, entrances to freight compartments shall be protected by folding gates, as required for passenger elevators, and so arranged that the elevator cannot be operated until the gate is closed.

Rule 35. Overhead Gratings. In every elevator shaft (except existing elevator shafts, dumbwaiter shafts or the shafts of sidewalk elevators outside the building line) immediately under the sheaves at the top of the shaft, or when the machine is located at the top of the shaft, at the level of the top of the machine beams, there shall be provided and placed in a substantial grating of iron or steel capable of sustaining not less than seventy-five pounds per square foot. No two members of such grating shall be spaced more than one and one-half inches apart. When such grating does not extend over the entire area of the shaft, the open edges shall be protected by substantial screened railings not less than three feet high. Every such grating shall extend at least two and one-half feet beyond the general contour of the sheaves or machinery. Deflecting sheaves extending below the machine level, or hoist and counterweight sheaves located at the sides of the shaft, shall be protected by gratings or cradles of a construction similar to that required for the gratings. Fireproof floor construction shall be accepted as the equivalent of the gratings.

Nothing in this rule shall prevent the placing of a trap door in such a grating where other suitable access cannot be had.

Any grating hereafter placed in an existing elevator shaft shall conform to the requirements of this rule.

Rule 36. Elevator Pit. In every elevator shaft hereafter constructed (except shafts for dumbwaiters, for sidewalk elevators and for hand-power elevators with a rise of less than thirty-five feet), the distance from the floor saddle of the lowest landing to the bottom of the pit shall not be less than four feet when the speed does not exceed two hundred and fifty feet per minute, not less than

RULES

five feet when the speed exceeds two hundred and fifty but does not exceed four hundred feet per minute, and not less than six feet when the speed exceeds four hundred feet per minute, and in no case shall there be less than two feet in the clear between the bottom of the pit and the lowest point of the underside of the car floor framing when the car is at the lowest possible position. In the case of power-driven sidewalk type elevators, the clear space between the bottom of the pit and underside of the car floor structure shall be not less than six inches. The pits herein required at the bottom of elevator shafts shall not be used for piping, machinery, or for any purpose not required for the elevator equipment; but this shall not prevent the encroachment upon such pits, in the case of new elevators installed in existing buildings, of the foundations of bearing walls and columns to an extent not exceeding twenty-five per cent. of the area of the pit.

Rule 37. Overhead Clearance for Cars. For all elevator shafts hereafter installed (except shafts for sidewalk type elevators) there shall be provided a sufficient clear space, when the car is at the top landing, to allow a run-by of not less than two feet for elevators having a speed not exceeding one hundred feet per minute, not less than three feet for elevators having a speed exceeding one hundred feet per minute and not exceeding three hundred and fifty feet per minute, and not less than five feet for elevators having a speed exceeding three hundred and fifty feet per minute.

Rule 38. Overhead Clearance for Counterweights. In future installations there shall be provided in all elevator shafts a sufficient clear space when the car has completely compressed the pit buffers to allow of a run-by of the counterweight of not less than two (2) feet for traction and hydraulic type elevators, and not less than three (3) feet for drum type elevators.

Rule 39. Machinery Room. All parts of the elevator machinery for power-driven elevators shall be properly enclosed, and suitable light provided. In buildings hereafter

erected free and safe access must be provided to all parts of the elevator machinery, and there shall be not less than twelve (12) inches clearance at limit stop devices on machine and outboard bearings of motor. In future installations in existing buildings, such clearance shall be provided as deemed necessary by the superintendent of buildings, but need not exceed that specified for buildings hereafter erected. When the machine is located at the bottom of the shaft, it shall be protected with a substantial pit pan.

Rule 40. Speed. The speed of all power-driven elevators shall not exceed seven hundred feet per minute.

Rule 41. Buffers. In future installations for all power-driven elevators (except sidewalk type elevators) there shall be provided substantial spring buffers, pneumatic buffers, or oil buffers for the car and counterweights provided that for the cars and counterweights of all elevators having speeds of more than three hundred and fifty feet per minute, substantial oil buffers shall be installed.

Rule 42. Supporting Beams. Supporting beams hereafter installed for elevator sheaves or machinery (except in dumbwaiter shafts) shall be of iron or steel.

Rule 43. Determination of Questions. When any existing installation for either passenger or freight service is deemed by the Superintendent of Buildings to be in an unsafe or dangerous condition it shall be made safe in such manner as he shall prescribe, and all defective parts necessary of replacement shall conform, in so far as possible, with the rules governing future installations.

Where there are practical difficulties in the way of carrying out the strict letter of the foregoing rules, the Superintendent of Buildings shall have power to vary their provisions so that the spirit of the law shall be observed and public safety secured and substantial justice done, provided that whenever such variations are granted by a superintendent of buildings it shall be indorsed in writing upon the permit over the signature of such superintendent.

RULES

COMMUNITY LAUNDRIES IN BUSINESS DISTRICTS

*Amended Resolution Adopted by the Board of Appeals,
March 16, 1920, Under Cal. No. 549-17-BZ*

WHEREAS, the board of appeals, at its regular meeting, December 16, 1919, unanimously rescinded an opinion incidentally expressed and incorporated in a resolution adopted by the board on May 28, 1917, in acting on Cal. No. 549-17-BZ. This opinion was that a laundry is not a prohibited use in a business district under the building zone resolution. The board unanimously rescinded this expression of opinion, inasmuch as a laundry is a factory within the meaning of the labor law and must be so construed under the building zone resolution in the absence of any definition therein to the contrary.

Resolved, that this shall not be construed to include within the prohibited uses specified under Section 4 of the building zone resolution a community or neighborhood laundry located in the basement or ground floor of a building within a business district and containing not more than eight (8) rotary washing machines with inside cylinders not more than 30 in. in diameter by 30 in. in length over all nor more than two 20 in. extractors, the 20 in. measurement being the diameter of the inside basket, which machines and extractors shall be operated solely by electric power and do not require the installation of steam boiler or plant

WARNING

Notice is hereby given to all petitioners, appellants and applicants, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

First, That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

Second, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

Third, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and of the posting of the calendars on the bulletin board in the

offices of the board and of the further publication of the calendars in the daily press.

Fourth, That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

Fifth, That the business of the board is to dispose of all cases promptly, for the reason that the pendency of an appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of the appellant or petitioner to file necessary data, or by any other method of delay.

Sixth, That no appeal, application or petition will be accepted for filing unless, at the time of filing, all papers, plans and data required by law are supplied, as specified on the blank appeal, application or petition forms.

Minutes of Regular Meeting September 25, 1928, 10 a. m.

Minutes of Regular Meeting, September 25, 1928, 2 p. m.

Correction.

Fire Retarding Rules.

Reserve Calendar.

Appliances Approved.

Notice of Public Hearing on Amendments to Fuel Oil Rules.

Progress Report.

PUBLIC HEARINGS

Tuesdays, at 10 a. m. and 2 p. m.
Special meetings as published in this Bulletin.
Call of Clerk's Calendar, Tuesdays, at 2 p. m.
All hearings are held in Room 1013, Municipal Building, Manhattan.

HOURS FOR CONSULTATION

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

CALL OF CLERK'S CALENDAR

The Clerk's Calendar consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, October 2, 1928, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, October 9, 1928, at 2 o'clock.

The Clerk's Calendar is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

NOTICE TO APPELLANTS AND PETITIONERS

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and disposition of same expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

MINUTES

BOARD OF STANDARDS AND APPEALS

REGULAR MEETING

TUESDAY MORNING, SEPTEMBER 25, 1928.

Present: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin.

The minutes of the regular meeting of the board held on Tuesday morning, September 18, 1928, and the minutes of the regular meeting of the board held Tuesday afternoon, September 18, 1928, were approved as printed in the Bulletin, No. 39, Vol. XIII.

APPEALS FROM ADMINISTRATIVE ORDERS 233-28-A.

APPELLANT—J. M. Coward, 2nd, for the Coward Shoe, owner.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—260-274 Greenwich street, Manhattan.

APPEARANCES—

For Appellant: C. G. Lippencott.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Laid over to October 9, 1928, at 10 a. m., on request of appellant's representative.

291-28-A.

APPELLANT—David Kaufman, for William Levine, owner.

SUBJECT—Appeal from decision of the fire commissioner.

PREMISES AFFECTED—37-53 89th street, Jackson Heights, Borough of Queens.

APPEARANCES—

For Appellant: David Kaufman.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal denied.

THE VOTE TO GRANT—

Affirmative 0

Negative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin..... 5

Absent 0

THE RESOLUTION—

(291-28-A)

WHEREAS, David Kaufman, for William Levine, filed, March 31, 1928, an appeal from a decision of the fire commissioner, affecting premises 37-53 89th street, Jackson Heights, Borough of Queens; and

WHEREAS, the decision of the fire commissioner, rendered January 31, 1928 (Plan No. 2915-27), reads:

"8. Anti-syphon device may not be used unless special permission is given by proper official.";

and
WHEREAS, the building is non-fireproof, four stories in height, 140 ft. by 88 ft. in area; OCCUPIED as an apartment house; and

WHEREAS, a fuel oil burning system has been installed consisting of a 3,500-gallon fuel oil tank (located outside the building at an elevation above the burner), an approved type May Oil Burner and the necessary valves and piping for a complete installation; and

WHEREAS, the applicant contends that if the fuel oil tank was placed at a lower elevation it would endanger the foundation walls of the building and contends that an American Schaeffer and Budenberg anti-syphon valve is installed at the highest point in the suction line to prevent syphoning; appellant contends, further, that the valve has been approved by the Fire Underwriters' Laboratories.

Resolved, that the decision of the fire commissioner be and it hereby is affirmed, and the appeal be and it hereby is denied.

312-28-A.

APPELLANT—Fred T. Ley & Co., Inc., owner.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—2706-2712 40th avenue, Long Island City, Borough of Queens.

APPEARANCES—

For Appellant: E. W. Higgs.

For Administration: Inspector Meyer of fire department.

ACTION OF BOARD—Appeal denied.

THE VOTE TO GRANT—

THE RESOLUTION—

(312-28-A)

WHEREAS, Fred T. Ley & Co., Inc., owner, filed, April 5, 1928, an appeal from an order of the fire commissioner, affecting premises 2706-2712 40th avenue, Long Island City, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated December 23, 1927 (Order No. 14157-LC), reads:

"You are hereby notified that an inspection of the above premises, used as a non-storage garage shows that the following must be done before the permit requested by you can be issued:

FORTHWITH

"Separate the boiler from remainder of building by an enclosure of solid masonry at least 8 inches in thickness. Entrance to the boiler room to be from exterior of building only.";

and

WHEREAS, the building is fireproof on the basement story and non-fireproof above, two stories and basement in height, 42 ft. by 44 ft. in area; OCCUPIED: basement, boiler room and storage; 1st story, private garage; 2nd story, dwelling, 4 persons; and

WHEREAS, applicant contends that the basement story of the building is fireproof; that a fore and aft brick wall has been erected in the basement story (with a fireproof, self-closing sliding door at the opening therein) separating the boiler room from the remainder of the basement, and that there has been provided at the opening leading from the cellar to the interior stairway a fireproof, self-closing sliding door.

Resolved, that the order of the fire commissioner be and it hereby is affirmed, and the appeal be and it hereby is denied.

282-28-A.

APPELLANT—William F. Doyle, for Textile Properties, Inc., owner.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—285-293 Fifth avenue, Manhattan.

APPEARANCES—

For Appellant: William F. Doyle.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal dismissed.

THE VOTE TO DISMISS—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin..... 5

Negative 0

Absent 0

THE RESOLUTION—

(282-28-A)

WHEREAS, William F. Doyle, for Textile Properties, Inc.,

MINUTES

filed, March 29, 1928, an appeal from an order of the fire commissioner, affecting premises 285-293 Fifth avenue, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated March 7, 1928 (Order No. 30587-LD), reads:

"1. Discontinue the use of the above premises for factory purpose occupied in violation of Section 270 of the Labor Law and Certificate of Occupancy 3331-21 issued by the Superintendent of Buildings.

"Defects noted as follows:

"(a) Stairways not extended to roof.

"(b) Exit doors opening to stairways not 44" wide.

"(c) Partitions not constructed of incombustible material."

and

WHEREAS, the building, facing on three street fronts, is fireproof, sixteen stories in height, 197 ft. 6 in. by 200 ft. in area; OCCUPIED: 1st story, store, 60 persons; upper stories, offices and showrooms, 75 persons per story; and

WHEREAS, appellant contends that there is no factory occupancy in the building; that it is given over exclusively as showrooms for imported and domestic rugs and offices and the only work done is that which is incidental to the placing of these rugs on display.

Resolved, that the order of the fire commissioner be and it hereby is *dismissed* as not enforceable, as the work described and conceded by the representative of the fire department is but work incidental to the display of the merchandise in these premises.

270-28-A.

APPELLANT—Petroleum Heat & Power Co., for M. Greenberg, owner.

SUBJECT—Appeal from decision of the fire commissioner.

PREMISES AFFECTED—27 Skillman street, Brooklyn.

APPEARANCES—

For Appellant: None.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE RESOLUTION—

(270-28-A)

WHEREAS, Petroleum Heat and Power Co., for M. Greenberg, filed, March 27, 1928, an appeal from a decision of the fire commissioner, affecting premises 27 Skillman street, Borough of Brooklyn; and

WHEREAS, the decision of the fire commissioner, dated January 16, 1928 (Order No. 1937-27), reads:

"3. Boiler room ceiling must be of fireproof construction."

and

WHEREAS, the building is non-fireproof, two stories in height, 100 ft. by 100 ft. in area; OCCUPIED: 1st story, boiler room and office, 15 persons; 2nd story, furniture storage, 15 persons; and

WHEREAS, a fuel oil burning system has been installed consisting of a 1,100-gallon capacity fuel oil storage tank, a Petro Oil Burner and the necessary valves and piping for a complete installation; and

WHEREAS, appellant contends that the ceiling of the boiler room consists of wood lath and plaster covered with 26 gauge sheet metal and, in lieu of the required fireproof ceiling, proposes to provide a fire retarding ceiling constructed of 1/2-inch plaster board covered with 26 gauge sheet metal; and

WHEREAS, the building is but two stories in height, equipped throughout with an approved sprinkler system embracing the boiler room.

Resolved, that the decision of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the building shall be not increased in height or area and that the ceiling of the boiler room shall be fire-retarded with 1/2-inch plaster board covered with 26 gauge metal, lapped seams.

273-28-A.

APPELLANT—Gilbert Photo Novelty Company, for A. F. Cook, lessee.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—8 Cooper Square, Manhattan.

APPEARANCES—

For Appellant: Morton Gilbert.

For Administration: Inspector Meyer of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE RESOLUTION—

(273-28-A)

WHEREAS, Gilbert Photo Novelty Co., for A. F. Cook, filed, March 28, 1928, an appeal from an order of the fire commissioner, affecting premises 8 Cooper square, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated March 6, 1928 (Order No. 417441-C), reads:

"1. All vertical openings throughout building must be protected as specified in Articles 8 and 18 Building Code.

"4. Discontinue use of gas radiators and any other fire or flame."

and

WHEREAS, the building is non-fireproof, four stories in height, 15 ft. 10 in. by 63 ft. 8 in. in area at first story and 15 ft. 10 in. by 41 ft. 8 in. in area above; OCCUPIED: 1st story, tinsmith, 3 persons; 2nd story, photo novelties, 5 persons; 3rd story, office, 1 person; 4th story, vacant at present; and

WHEREAS, appellant, the occupant of the second story, contends that the maximum quantity of celluloid stored in the premises is ten pounds; that it is used to cover small photographs; that there is no heating plant in the building, but the loft is kept warm during the winter by means of a gas radiator, which is located 40 ft. from the metal cabinet containing the celluloid; that the stairs are constructed of wood, enclosed in wood lath and plaster partitions, and extend from the first to the top story with an iron ladder leading to a scuttle in the roof.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that not more than five (5) pounds of celluloid in sheet form shall be maintained on the premises at any one time and shall be kept and stored in an approved metal box, and that no heating apparatus or other open flame of any nature or description shall be maintained on the premises within 40 ft. of this celluloid storage.

199-28-A.

APPELLANT—Golden Hill Corporation, Inc., owner.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—97-101 John street and 1-13 Cliff street, Manhattan.

MINUTES

APPEARANCES—

For Appellant: I. Vernon Weisbrod.
For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.
THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin.....	5
Negative	0
Absent	0

THE RESOLUTION—

(199-28-A)

WHEREAS, Golden Hill Corporation, Inc., owner, filed, March 3, 1928, an appeal from an order of the fire commissioner, affecting premises 97-101 John street and 1-13 Cliff street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated May 14, 1927 (Order No. 20695-F), reads:

"1. Provide approved fireproof windows, with metal or kalameined frames, glazed with wired glass for all openings in the exterior wall above the 1st story, which are distant in a direct line less than 30' from any opening in any other building and not in the same plane with said openings and which are not more than 50' above a neighboring roof at west side of building, or other approved protection as per Sec. 375, Art. 18, Ch. 5 of the Code of Ordinances."

and
WHEREAS, the building is fireproof, eight and ten stories in height, 71 ft. 11 in. by 137 ft. 10 5/8 in., irregular, in area; OCCUPIED as an office building, not more than 68 persons on a story; and

WHEREAS, the appellant has filed plans which indicate that sixteen windows on each of the second to seventh stories, inclusive, fourteen windows on the eighth story and seven windows on each of the ninth and tenth stories are affected by the fire department order; and

WHEREAS, the appellant contends that most of the windows in question are distant 26 ft. 2 in. to 30 ft. from the adjoining building at west; furthermore, that to comply with the order would cost approximately \$20,000.

Resolved, that the order of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted, only so far as it affects the windows not on the course of elevator shafts, stair halls or public corridors, so long as conditions as to occupancy and use remain unchanged and that the exposures of adjoining building shall remain substantially unchanged.

315-28-A.

APPELLANT—James W. Byrnes, for Ridgewood Plumbing Supply Co., Inc., owner.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—Northeast corner of Sprague street and Varian place (76th street), Glendale, Borough of Queens.

APPEARANCES—

For Appellant: James W. Byrnes.
For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.
THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin.....	5
Negative	0
Absent	0

THE RESOLUTION—

(315-28-A)

WHEREAS, James W. Byrnes, for Ridgewood Plumbing Supply Co., filed, April 5, 1928, an appeal from an order of the fire commissioner, affecting premises northeast corner of Sprague street and Varian place (76th street), Glendale, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated March 13, 1928 (Order No. 33826-F), reads:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch with necessary check valve and 2 1/2 inch regulation Fire Department outlets.

"Each outlet to be provided with a sufficient amount of 2 1/2 inch standard hose not exceeding 100 feet and in lengths not greater than 50 feet, etc.";

and

WHEREAS, the building is non-fireproof, one story and mezzanine (21 ft.) in height, having a frontage of 170 ft. on Varian place and 85.45 ft. on Sprague street, a total area of approximately 13,000 sq. ft., the mezzanine story being approximately 2,000 sq. ft. in area; OCCUPIED: basement, storage of plumbing supplies and boiler room, no occupants; 1st story, storage of plumbing supplies and garage, 5 persons; mezzanine, office, 2 persons; and

WHEREAS, the appellant proposes to provide a fire door on each side of the opening on the westerly partition wall in the basement; to provide a self-closing, fireproof door in the westerly partition wall on the first story; to brick up the opening in the easterly partition wall between the garage and the warehouse on the first story and to have but one fireproof window in the wall between the mezzanine story and the warehouse; appellant contends that the building is low in height; that there are city fire hydrants in the immediate vicinity and that the materials stored in the building are incombustible.

Resolved, that the order of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted on condition that the building shall be not increased in height or area; that the garage portion of structure shall be cut off from the portion of the warehouse by unpierced wall of approved masonry; that there shall be not more than one opening from the westerly section to warehouse section from the basement and first story; that each opening shall be equipped with an approved self-closing, fireproof door, and this variation is granted so long as conditions as to occupancy and use remain unchanged.

THE RESOLUTION—

(910-26-BZ)

WHEREAS, John Linn, for Carl Dingfelder and Benjamin Balish, owners, filed, November 8, 1926, an application, under the building zone resolution, to permit in a residence district the erection and maintenance of an apartment house with stores on the first story; premises 2657-2671 Ocean avenue, southwest corner of Neck road, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, January 25, 1927, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Ocean avenue is in a residence district; Kenmore place is in a residence district, and Avenue V, 100 ft. east of Ocean avenue, is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered October 19, 1926 (Applic. 19289-1926), reads:

"Proposition contrary to the Zone Resolution, Art. II, Sec. 3.

"The erection of stores in a residential district."

and

WHEREAS, the proposed building is of non-fireproof construction, six stories in height, with a frontage of 127 ft. on Ocean avenue and 111 ft. 4½ in. on Neck road; to be occupied as an apartment house with stores on the first story; and

WHEREAS, the board deemed that applicant was entitled to relief under section 21 of the building zone resolution on the ground of practical difficulty and unnecessary hardship, in that a like and similar variation had been granted on Neck road frontage on the corner opposite formed by the same intersecting streets; and

WHEREAS, this application was granted by the board at its meeting, January 25, 1927, on certain conditions, and applicant requested a modification of the time limit imposed and now requests a further extension.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted*, only so far as it affects the first story fronting on Neck road of the proposed structure of otherwise conforming use, namely a six-story tenement house, to be developed at the same time in conjunction with the store use; that the business use shall be restricted to the conduct and operation of retail stores, specifically prohibiting, though, the conduct of any fish store, meat market or delicatessen store on the premises, *on condition* that the store use shall be separated from the apartment house use on the first story by unpierced walls of approved masonry; that the street wall of Ocean avenue shall return on the Neck road front not less than sixteen inches; that there shall be no openings on the Ocean avenue front from the corner store, other than two windows at the rear of the stores, the sills of which shall be not less than 6 ft. above the sidewalk level; that the entire premises otherwise shall be maintained for conforming residential use and occupancy; that there shall be no signs erected on the premises; that any advertising displayed shall be restricted to fixed letters on the plate glass show windows of the store fronts; that there shall be no produce or merchandise exposed or displayed on the exterior of the building; that all permits required shall be obtained within nine months and the building completed within eighteen months from the date of expiration of former action.

THE RESOLUTION—

(960-27-BZ)

WHEREAS, William F. Doyle, for Thomas Realty Co., owner, filed, August 30, 1927, an application, under the building zone resolution, to permit, partly in a business district and partly in a residence district, the erection and maintenance of a garage for the storage of more than five motor vehicles; premises east side of Boston road, 122.08 ft. south of Vyse avenue, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, January 24, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Boston road is in a business district; Vyse avenue is in a residence district, and East 176th street is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered August 24, 1927 (N. B. 1860-27), reads:

"1. Erection of garage for storage of more than five motor vehicles partly in business district and partly in a residence district is contrary to provisions of building zone resolution."

and

WHEREAS, the proposed building is to be of non-fireproof construction, two stories in height, with a frontage of 299.51 ft. on Boston road and 325.31 ft. on Vyse avenue, and a depth of 63.03 ft. and 205.57 ft., irregular; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the board deemed that applicant was entitled to relief under section 21 in view of the abutting and surrounding conditions; and

WHEREAS, this application was granted by the board at its meeting, January 24, 1928, on certain conditions, and applicant requested a modification of the time limit.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the building shall be constructed fireproof throughout; that the structure shall be restricted to a two-story building above grade; that the facade on the street fronts shall be finished with light-colored glazed brick with architectural terra cotta or stone trimmings, of Gothic-type design, and that the architect shall make a return of drawings to this board for approval in accordance with the foregoing stipulations before submission to the superintendent of buildings; that there shall be no vehicular entrance of any nature or description within the residence use area of the plot; that the building shall be divided approximately into two sections and there shall be but one vehicular entrance from each section on the Vyse avenue front the width of said vehicular entrance not to exceed 9 ft. in the clear; that the northerly and southerly gable walls shall be unpierced throughout their entire height and length; that no advertising of any nature or description shall be permitted on the Vyse avenue front; that no roof sign shall be erected or maintained on any part of structure; that any signs erected on the Boston road front shall be the electric, projecting type, indicating the name and title of business conducted on the premises; that there shall be no portable gasoline tanks maintained or operated on the premises; that any gasoline storage equipment installed shall be located on the Boston road front, and that all permits required shall be obtained within six months and any work involved shall be completed within eighteen months from the date of this action—September 25, 1928.

BOARD OF STANDARDS AND APPEALS

REGULAR MEETING

TUESDAY AFTERNOON, SEPTEMBER 25, 1928

Present: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin.

APPEALS FROM ADMINISTRATIVE ORDERS

143-28-A.

APPELLANT—Wm. J. Cherry, for Lidgerwood Mfg. Co., lessee.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—96-98 Liberty street, Manhattan.

APPEARANCES—

For Appellant: Wm. J. Cherry.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal withdrawn—to comply with order.

THE VOTE TO WITHDRAW—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin..... 5

Negative 0

Absent 0

969-21-A.

APPELLANT—Oscar Parenti, for Charles B. Dillingham, owner.

SUBJECT—Application for reopening—extension of permit—re appeal from decision of superintendent of buildings and decision of the fire commissioner.

PREMISES AFFECTED—151 East 63rd street, Manhattan.

MINUTES

APPEARANCES—

For Appellant: Ralph Long.

ACTION OF BOARD—Appeal reopened and resolution modified.

THE VOTE TO REOPEN AND MODIFY—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin..... 5
Negative 0
Absent 0

THE RESOLUTION—

(969-21-A)

WHEREAS, Oscar Parenti, for Charles B. Dillingham, owner, filed, August 23, 1921, an appeal with the board of appeals, from a decision of the superintendent of buildings and a decision of the fire commissioner, affecting premises 151 East 63rd street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered August 8, 1921, in acting on Alt. App. No. 1809-1921, reads:

"1. Private garages are not permitted in dwellings having more than two stories above the garage floor. Chapter 10, Code of Ordinances, Par. 154.";

and

WHEREAS, the decision of the fire commissioner, rendered August 5, 1921, in acting on Alt. No. 948-1921, reads:

"No. 8. Not more than two stories above the garage may be used for living apartments.";

and

WHEREAS, the building is of non-fireproof construction, located in a residence district inside the fire limits, three stories and basement in height, 16 ft. by 50 ft. in area; proposed occupancy to be a dwelling with the private garage of the owner of premises on the basement floor; and

WHEREAS, appellant states that the first story is not intended for use as a living apartment but as a private gymnasium for the owner, who lives in the adjoining building; and

WHEREAS, this appeal was granted by the board at its meeting, October 11, 1921, on certain conditions, and appellant requested a modification of the conditions and a substitution of a fire escape on the rear of the building in lieu of the party wall fire escape, as the building in question is of greater depth than the building adjoining, and requested a modification as to the ownership.

Resolved, that the decisions of the superintendent of buildings and the fire commissioner be reversed, and the appeal be and it hereby is granted on condition that a fire escape be provided on the rear of the building with landing on roof of rear extension and with a fixed double-rung ladder from extension roof to yard.

Resolved, further, that the appeal be granted only so long as the premises remain in single tenancy, use and ownership and the garage be confined to the use of not more than three cars, the property of the tenant.

BUILDING ZONE CASES

116-28-BZ.

APPLICANT—Edward L. Kelly, for Clifbert Realty Corp., owner.

SUBJECT—Application (re decision of the fire commissioner) under sections 21 and 7g of the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station.

PREMISES AFFECTED—865-877 Ralph avenue, Brooklyn.

APPEARANCES—

For Applicant: Edward J. Farrell.

For Opposition: None.

ACTION OF BOARD—Laid over to October 2, 1928, at 10 a. m., on request of applicant.

1322-27-BZ.

APPLICANT—Croker Natl. Fire Prev. Eng. Co., for Daleson Realty Corp., owner.

SUBJECT—Application (re decision of the superintendent of buildings) under section 21 of the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station.

PREMISES AFFECTED—8100 Jerome avenue, southeast corner of 81st street, Woodhaven, Borough of Queens.

APPEARANCES—

For Applicant: Herman E. Horwood and Michael Le Vine.

For Opposition: John Pasta and Edward M. Ladden.

ACTION OF BOARD—Application withdrawn.

THE VOTE—

101-28-BZ.

APPLICANT—John J. Dunnigan, for Ahneman & Younkheere, Inc., owner.

SUBJECT—Application (re decision of the superintendent of buildings) under sections 7e and 7c of the building zone resolution, to permit in a business district the alteration and extension of a garage for the storage of more than five (5) motor vehicles and also the omission of the required rear yard.

PREMISES AFFECTED—3402 Bailey avenue, east side, 761.43 feet north of Summit place, The Bronx.

APPEARANCES—

For Applicant: John J. Dunnigan.

For Opposition: Mary Ventarola and K. E. Enright.

ACTION OF BOARD—Application denied.

THE VOTE TO GRANT—

Affirmative 0
Negative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin..... 5
Absent 0

THE RESOLUTION—

(101-28-BZ)

WHEREAS, John J. Dunnigan, for Ahneman & Younkheere, Inc., owner, filed, February 2, 1928, an application, under the building zone resolution, to permit in a business district the alteration and extension of a garage for the storage of more than five motor vehicles and, also, the omission of the required rear yard; premises 3402 Bailey avenue, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, September 25, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Bailey avenue is in a business district; Bailey place is in a business district, and Independence street is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered February 2, 1928 (re Applic. Alt. 37-28), reads:

"1. Proposed alteration and extension of garage for storage of more than five motor vehicles in business district is contrary to provisions of Building Zone resolution.

"2. Rear yard must be provided behind second story of garage to comply with requirements of Building Zone Resolution.";

and

MINUTES

WHEREAS, the existing garage is non-fireproof, two stories in height, 50 ft. by 130 ft. 9 $\frac{7}{8}$ in.; it is proposed to erect an extension to the south of the existing garage; extension to be non-fireproof, two stories in height, 50 ft. frontage on Bailey avenue, 155 ft. deep and 52 ft. across the rear; proposes to use the entire structure as a garage for the storage of more than five motor vehicles; and

WHEREAS, the board deemed that it would not be justified in granting a variation in this case in view of the fact that the adjoining property is also owned by the owners in this application, and that it would be a commitment of the adjacent property and all other vacant property on this avenue front to non-conforming use and this would be a change and not an adjustment of the zoning resolution.

Resolved, that the decision of the superintendent of buildings be and it hereby is affirmed, and the application be and it hereby is denied.

179-28-BZ.

APPLICANT—John J. Dunnigan, for May Bloom, owner.

SUBJECT—Application (re decision of the superintendent of buildings) under section 21 of the building zone resolution, to permit the extension in area of an existing gasoline service station.

PREMISES AFFECTED—2504 Boston (Post road, northeast corner of Mace avenue, The Bronx.

APPEARANCES—

For Applicant: John J. Dunnigan, Albert Bloom and Milton Weil.

For Opposition: Joseph B. Finkelstein, Richard C. Buck and R. Secondi.

ACTION OF BOARD—Application granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Holland and Guilfoyle and Deputy Chief Martin	4
Negative: Commissioner Connell.....	1
Absent	0

THE RESOLUTION—

(179-28-BZ)

WHEREAS, John J. Dunnigan, for May Bloom, owner, filed, February 29, 1928, an application, under the building zone resolution, to permit in a business district the extension in area of an existing gasoline service station; premises 2504 Boston Post road, northeast corner of Mace avenue, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, September 25, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Boston road is in a business district; that Mace avenue, north side, east of Wallace avenue, is in a residence district, and that Mace avenue, south side, east of a point 100 ft. east of Boston road, is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered February 18, 1928 (re N. B. 309-28), reads:

"1. Erection and maintenance of gasoline service station in business district is contrary to provisions of Building Zone Resolution.";

and

WHEREAS, the existing gasoline service station has a frontage of 25 ft. on Boston road, 17 ft. on Mace avenue, 17 ft. on Wallace avenue and a depth of 87.42 ft.; the plot on which it is proposed to erect the gas station under consideration is gore shaped, having a frontage of 85.32 ft. on Boston road, 122.15 ft. on Mace avenue and a distance of 87.42 ft. across the rear; it is proposed to erect on this plot a one-story office, 16 ft. by 12 ft. in area, and to install the necessary pumps and tanks for a gasoline service station; and

WHEREAS, this property forms a substantial part of a triangular plot or block lying at the intersection of three highways and now occupied in part by a prohibited use in the nature of a gasoline service station, the board deems that development for conforming use is unlikely to bring reasonable return and therefore that, in the exercise of its discretion, applicant should have relief under section 21 of the building zone resolution on the ground of practical difficulty and unnecessary hardship.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that there shall be erected on the building line of the property, other than a vehicular entrance on each street front, a concrete curbing not less than 12 in. in height above the fixed curb; that the use, operation and conduct of these premises for the sale of gasoline shall be limited to and within the property line exclusively; that no grease or crank case service racks or pits shall be erected or operated on the premises; that all necessary permits shall be obtained within six months and the work completed within eighteen months from the date of this action.

180-28-BZ.

APPLICANT—John J. Dunnigan, for Horace Smith, owner.

SUBJECT—Application (re decision of the superintendent of buildings) under section 21 of the building zone resolution, to permit in a business district the alteration and extension in area of a garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—410 City Island avenue, east side, 100.41 feet north of Ditmars street, The Bronx.

APPEARANCES—

For Applicant: John J. Dunnigan.

For Opposition: None.

ACTION OF BOARD—Application granted on condition.

THE RESOLUTION—

(180-28-BZ)

WHEREAS, John J. Dunnigan, for Horace Smith, owner, filed, February 29, 1928, an application, under the building zone resolution, to permit in a business district the alteration and extension in area of a garage for the storage of more than five motor vehicles; premises 410 City Island avenue, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals at its regular meeting, September 25, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that City Island avenue is in a business district; that Ditmars street, west of a point 100 ft. east of City Island avenue, is in a business district; that Ditmars street, east of a point 100 ft. east of City Island avenue, is in a business district, and that Minniford avenue is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered February 23, 1928, reads:

"1. Proposed extension of garage for more than five motor vehicles in business district is contrary to provisions of Building Zone Resolution.";

and

MINUTES

WHEREAS, under Cal. No. 10-20-BZ, the board granted permission for the extension of an existing frame garage located on the premises in question; under Cal. No. 229-20-BZ, permission was granted to tear down the frame garage and to erect in its stead a one-story non-fireproof garage, 50.2 ft. front by 71 ft. deep; under Cal. No. 610-20-BZ, permission was granted to extend this garage to the south; the proposed extension at the south end to be 100.4 ft. frontage by 69.56 ft. (along Ditmars street); the owner did not erect the garage 50.2 ft. front by 71 ft. deep granted under Cal. No. 229-20-BZ, but did erect the southerly garage (100.4 ft. by 69.56 ft.) granted under Cal. No. 610-20-BZ; it is now proposed to erect an extension to the north of the existing garage, one story in height, 50.02 ft. front and 73.13 ft. deep (similar to that granted under Cal. No. 229-20-BZ) and to use the entire structure as a garage for the storage of more than five motor vehicles; and

WHEREAS, the authority of the board in the exercise of its discretion under rule 7, subdivision e, warrants a variation in this instance; and

WHEREAS, the board deems that applicant is entitled to relief under section 21.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the building shall not be erected more than two stories in height above grade; that the northerly and rear gable walls shall be unpierced throughout their entire height and length; that the exterior of street front shall be finished with face brick with architectural terra cotta or natural stone trimmings; that there shall be not more than one vehicular entrance to this proposed structure; that there shall be no signs or advertising display on the exterior of the building other than one projecting or one flat wall sign; that there shall be no additional gasoline storage equipment installed in this structure, and that all permits required shall be obtained within nine months and any work involved thereby shall be completed within eighteen months from the date of this action.

380-27-BZ.

APPLICANT—Irving Seelig, for S. Dietz, owner.

SUBJECT—Application for reopening—extend permit—re application (decision of superintendent of buildings) under sections 7(g) and 21 of the building zone resolution to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles.

PREMISES AFFECTED—304-322 Brighton Beach avenue, Brooklyn.

APPEARANCES—

For Applicant: John Miller.

For Opposition: None.

ACTION OF BOARD—Application reopened and an extension of six months granted to complete work.

THE VOTE TO REOPEN AND EXTEND TIME—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and

Deputy Chief Martin.....	5
Negative	0
Absent	0

THE RESOLUTION—

(380-27-BZ)

WHEREAS, Irving Seelig, for S. Dietz, owner, filed, April 11, 1927, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 304-322 Brighton Beach avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by

the board of standards and appeals, at its regular meeting, May 31, 1927, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Brighton Beach avenue, East 3rd street and East 4th street are in business districts; and

WHEREAS, the decision of the superintendent of buildings, rendered March 21, 1927 (App. No. 4172-1927), reads:

"Proposition contrary to the Zone Resolution Art. II, Sec. 4(a), Subdivision 15. The erection of a building to be used in part as a public garage for more than five motor vehicles.";

and

WHEREAS, the proposed building is to be of non-fireproof construction, two stories in height, with a frontage of 158 ft. 2 in. and a depth of 112 ft. and 104 ft., irregular; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, applicant filed 62.41 per cent of consents of owners of property deemed affected by the board and was precluded from obtaining 80 per cent because property owners on the north side of Brighton Beach avenue, precluded by restrictive covenants against garage use in their deeds, refuse to subscribe to this proposed variation, and the board considered the project in the nature of a public and local convenience and that to require strict compliance with section 7g, owing to inability to obtain further consents would work an unnecessary hardship in the development of the property; and

WHEREAS, this application was granted by the board at its meeting, May 31, 1927, on certain conditions, and applicant requested a modification of the time limit imposed and has requested a further modification.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the structure shall not exceed in height a building more than two stories above grade and shall be constructed fireproof throughout; that the gable walls shall be unpierced throughout their entire height and length, other than an emergency exit not exceeding a width of 3 ft. 8 in. to the rear on each gable wall; that the frontage on Brighton Beach avenue, first story, other than two vehicular exits and entrances, shall be restricted to the use and occupancy of stores, retail shops or mercantile business, for a depth of not less than 25 ft.; that the rear yard requirements shall be complied with at the second story level at the rear of the building; that the front elevation shall be finished in face brick with architectural terra cotta or stone trimmings, substantially in accordance with the design of the front elevation filed in this case; that there shall be no roof signs erected or maintained; that there shall be no advertising display or signs on the gable or rear walls; that any skylights installed shall be glazed with plain glass protected with wire guards above and below; that any gasoline storage equipment installed shall be located within the building and that no portable gasoline tanks shall be operated or maintained on any part of the premises nor on the street in front of same; that all required permits shall be obtained within four months and the work completed within six months from December 26, 1928.

829-25-BZ.

APPLICANT—Tobias Goldstone, for Estate of George E. Eddy; Geo. E. Eddy, executor, owner.

SUBJECT—Application for reopening—modification—application re (decision of superintendent of buildings) under section 7-b of the building zone resolution to permit the erection on a plot partly in an unrestricted and partly in a business district of a proposed garage for the storage of more than five (5) motor vehicles.

THE RESOLUTION—

(829-25-BZ)

WHEREAS, Tobias Goldstone, for Estate of George E. Eddy, owner, filed, August 13, 1925, an application, under the building zone resolution, to permit the erection, under section 7b, on a plot partly in an unrestricted district and partly in a residence district, of a proposed garage for the storage of more than five (5) motor vehicles; premises 345-355 Classon avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, December 15, 1925, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Lafayette avenue is in a residence district; that Classon avenue is in an unrestricted district, and that Taaffe place is in an unrestricted district; and

WHEREAS, the decision of the superintendent of buildings, rendered July 14, 1925, reads:

"Proposition contrary to zone resolution, Art. II, Sec.

3. (The erection of a public garage partly in a residential district.);"

and

WHEREAS, the proposed building is to be of non-fireproof construction, one story in height, with a frontage of 125 ft. and a depth of 183 ft. 10 in.; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the entire plot has been in the same ownership for many years prior to the adoption of the zone resolution; and

WHEREAS, there exist on this same plot non-conforming uses, and the surrounding buildings are mostly dilapidated frame structures, and the board deemed the applicant was entitled to relief under section 7 (b and c); and

WHEREAS, an objection has been raised to the use of a portion of these premises for minor alterations and repairs, the objection of the superintendent of buildings, dated September 13, 1928, reading:

"Proposal to change occupancy of part of building located on Taaffe Pl. from public garage to automobile repair shop is subject to decision of board of standards and appeals.";

and

WHEREAS, the board deemed the resolution should be amended.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the building shall be restricted to a one-story structure in height above grade; that the rear and gable walls shall be unpierced throughout their entire height and length; that the southerly portion on Classon avenue frontage for not less than 20 ft. shall be maintained and reserved to office use and conduct in conjunction with the proposed garage; that no vehicular entrance on Classon avenue frontage shall be located within 130 ft. northerly from the Lafayette avenue corner; that there shall be not more than

one vehicular entrance on the Taaffe place front, located directly in the center of the Taaffe place elevation; that no skylight shall be installed within 25 ft. of the southerly gable wall; that all skylights shall be glazed with plain glass, protected with wire guards above and below; that the street fronts of building shall be finished with face brick and architectural terra cotta or stone trim, other than the office show window, which shall be finished with polished plate glass, and for such minor repairs and adjustments, incidental to the conduct of this garage, as are performed by manual operation, on condition that there shall be no motor-driven machinery, other than a one-half horse power electric drill or punch; that the exterior of the southerly gable wall shall be finished with light-color face brick throughout, above grade; that any gasoline storage equipment installed shall be located at the Classon avenue front, at the extreme northerly end of the structure; that there shall be no advertising signs erected or maintained within the residence use area of the structure; that any advertising within the residence area on Classon avenue shall be restricted to the plate glass office show window, and that all permits necessary for the prosecution of the work shall be obtained within nine months and the work completed within eighteen months from the date of this action.

AREAS FIXED.

(160-28-BZ)

The chairman read a communication from Edward J. Bausch, requesting the board to fix the area deemed affected and within which to obtain consents to permit in a business district the erection and maintenance of a gasoline service station; premises northwest corner of Margaret place and 82nd avenue, Glendale, Borough of Queens.

The following area was approved by the board:

Both sides of Woodhaven boulevard from Margaret place to a point 400 ft. west of premises in question; both sides of Margaret place from 81st avenue (Nannie place) to a point 400 ft. south of premises in question, not including the unrestricted district; both sides of 82nd avenue (Olivia place) from Woodhaven boulevard to L. I. R. R., not including the unrestricted district; the south side of 81st avenue (Nannie place) from Woodhaven boulevard to Margaret place.

MINUTES

(223-26-BZ)

The chairman read a communication from Ed. J. Foy, requesting the board to fix the area deemed affected and within which to obtain consents to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles and, also, a gasoline service station; premises 329-353 Skillman avenue, north side, 11 ft. east of Lowery street, Long Island City, Borough of Queens.

The following area was approved by the board:

Both sides of Skillman avenue from a point 100 ft. east of Harold (39th street) avenue to 42nd street; both sides of 40th (Lowery) street from a point 100 ft. north of Skillman avenue to a point 200 ft. south of Skillman avenue.

(660-28-BZ)

The chairman presented and read a communication from

Charles L. Craig, requesting the board to fix the area deemed affected and within which to obtain consents to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 130-138 Brighton Beach avenue, Borough of Brooklyn.

The following area was approved by the board:

Both sides of Brighton Beach avenue from Ocean Parkway to a point 400 ft. east of premises in question; both sides of East 2nd street from Brighton Beach avenue to a point 100 ft. north of Brighton Beach avenue; both sides of R.R. right of way, also both sides of Parkway (Calm street) court from Brighton Beach avenue to the Boardwalk.

CONCRETE RULES

USE OF HYDRATED LIME IN CONCRETE

Adopted by the Board of Standards and Appeals, April 19, 1920, under Cal. No. 153-20-S.

The use of hydrated lime in all classes of concrete construction shall not be prohibited when used in accordance with the conditions hereinafter set forth.

The hydrated lime shall conform with the standard specifications for this material which have been adopted by the American Society for Testing Materials.

The maximum amount of hydrated lime which may be used shall conform with the following table, all weights given being the amount of lime which may be incorporated for each ninety-five pound bag of Portland cement.

1-1½-3 Mix, 4 pounds of hydrated lime per bag of cement.

1-2-4 Mix, 5 pounds of hydrated lime per bag of cement.

1-2½-5 Mix, 6 pounds of hydrated lime per bag of cement.

For hand mixed concrete, the hydrated lime and Portland cement shall be well mixed while dry.

Hydrated lime shall not be used in concrete which is to be deposited under water.

RULES

FIRE RETARDING RULES

Adopted by the Board of Standards and Appeals August 30, 1927; Amended November 1, 1917, and Feb. 3, 1922.

Rule 1. Fire Retarding Materials for Garages, Motor Vehicle Repair Shops and Oil Selling Stations. In garages, motor vehicle repair shops and all selling stations any material or form of construction shall be deemed fire-retarding within the meaning of §73, subdivision 3, of the building code, that resists the action of flame and heat when subjected to a continuous fire for one hour at an average temperature of seventeen hundred (1700) degrees Fahrenheit without the passage of flame, and with a maximum temperature rise to four hundred (400) degrees Fahrenheit on the side away from the fire. The point at which the temperature of transmitted heat is measured shall be protected from external air and weather conditions.

When the test specimen is in the form of partition construction, the area under test shall be not less than one hundred (100) square feet and least dimension shall be not less than nine (9) feet. When in the form of floor construction, the area under test shall be not less than two hundred (200) square feet and the least dimension shall be not less than fourteen (14) feet.

During the fire, the floor construction shall support the live load for which it is designed, and after the fire shall safely sustain twice the designed live load with a maximum deflection of not more than one two-hundredth ($1/200$) part of the span.

Rule 2. Wood Joisted Floor Construction. Wood joisted floor construction shall be accepted as fire-retarding construction in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations when the beams are protected on the upper and under sides with the fire-retarding materials specified in rules for floor and ceiling coverings.

Rule 3. Floor Covering. Any one of the following forms of construction shall be accepted as fire-retarding for the covering of the upper sides of wood floor beams in joisted floor construction in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations:

(a) Seven-eighths ($7/8$) inch wood underflooring protected with a membrane of two-ply waterproofing covered with not less than two and one-half ($2\frac{1}{2}$) inches of 1:2½:5 concrete or better, reinforced with not less than one-fourth ($1/4$) of one (1) per cent of steel mesh.

(b) Two and one-half ($2\frac{1}{2}$) inches of 1:2:4 concrete applied directly to the top of the joists, with or without temporary support, reinforced with not less than one-fourth of one per cent steel rods, mesh or steel lath, and having the tops of the joists coated with approved waterproof paint or protected by tar paper on the top and on the sides for a distance of three inches from the top. (Amendment, Nov. 1, 1917.)

Rule 4. Ceiling Covering. Any one of the following forms of construction shall be accepted as fire-retarding for the covering of the undersides of wood floor beams in joisted floor construction in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations:

(a) One-half ($1/2$) inch plaster boards, or three-eighths ($3/8$) inch gypsum wall boards weighing not less than 16 pounds per square yard with pointed joints covered with No. 26 U. S. gauge sheet metal with one (1) inch lapped seams nailed to the wood beams when spaced not more than sixteen (16) inches on centers, or nailed to furring strips when the floor beams are spaced more than sixteen (16) inches on centers;

(b) Two thicknesses of one-quarter ($1/4$) inch asbestos board laid with tight staggered joints and nailed to the beams, when spaced not more than sixteen (16) inches on centers, or nailed to furring

strips when the floor beams are more than sixteen (16) inches on centers.

(c) Metal lath weighing not less than three pounds per square yard, attached to furring strips and plastered with Portland cement mortar at least three-quarters ($3/4$) inch thick.

Rule 5. Attachment to Ceiling. Fire-retarding ceilings in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations shall be attached to wood floor beams and girders in such manner as to maintain an air space between the wood beams, and all wood beams shall be seasoned before applying the protective coat.

Rule 6. Openings in Fire-Retarding Floors. Pipes or conduits which pass through floors shall be fitted with metal thimbles and made watertight for a height of three (3) inches above the floor.

Rule 7. Columns. All structural posts and columns in non-fireproof buildings required to be fire-retarded shall be protected with the fire-retarding materials specified for ceiling coverings in these rules, or with any of the materials accepted in fireproof construction; except that an air space shall not be required around steel or cast iron columns.

Where necessary for protection against mechanical injury, the fire-retarding protection on columns shall be jacketed to a height of five (5) feet from the ground with No. 4 U. S. gauge metal.

Rule 8. Girders. All girders in non-fireproof buildings required to be fire-retarded shall be protected with the fire-retarding materials specified for ceiling coverings in these rules, or with any of the materials acceptable in fireproof construction; except that an air space need not be provided around steel girders.

Rule 9. Shaft Enclosures. Existing stairways and vertical shafts in non-fireproof business buildings hereafter converted to be used as garages, motor vehicle repair shops or oil selling stations shall be enclosed in fire-retarding partitions continued through the non-fireproof floor construction, and when unfilled wood stud partitions are used, the space between the floor beams shall be fire-stopped with incombustible materials. All openings in such partitions shall be protected with accepted metal-covered fire doors or windows. Wherever necessary for protection against mechanical injury, the partition shall be jacketed to a height of five (5) feet on the garage side with No. 4 U. S. gauge metal. Any one of the following forms of partitions shall be accepted for the enclosure:

(a) Two by four inch wood studs, spaced not more than sixteen (16) inches on centers, covered both sides with metal lath weighing not less than three pounds per square yard, attached to furring strips and plastered with Portland cement mortar at least three-quarters ($3/4$) of an inch thick;

(b) Two by four inch wood studs placed not more than sixteen (16) inches on centers, covered both sides with seven-eighths ($7/8$) inch wood sheathing, one-half ($1/2$) inch plaster boards with pointed joints and No. 26 U. S. gauge sheet metal with one-inch lapped seams;

(c) Two by four inch wood studs spaced not more than sixteen (16) inches on centers, covered both sides with seven-eighths ($7/8$) inch wood sheathing, two thicknesses of one-quarter ($1/4$) inch asbestos boards laid with tight staggered joints and jacketed with No. 16 U. S. gauge metal on the garage side to a height of five (5) feet.

(d) Two by four inch wood studs spaced not more than sixteen (16) inches on centers, filled in solidly between the studs with four inches of approved fireproof materials and covered on both sides with No. 26 U. S. gauge metal;

(e) Existing wood stud, lath and plaster partitions covered on the garage side with No. 26 U. S. gauge sheet metal with one-inch lapped seams.

FORMS FOR NOTICES TO PROPERTY OWNERS

If applicants, under the building zone resolution, desire copies of Form 7NO, for notices to property owners, such forms are not to be supplied by this office.

The applicant is entitled only to one copy of Form 7NO, properly filled out.

If he desires additional copies for his own convenience, in notifying property owners, he can obtain such copies from The O'Connell Press, 176 Park Row, Manhattan, at three cents each, postage to be added if the forms are to be supplied by mail.

PUBLIC HEARING

PROPOSED AMENDMENTS TO FUEL OIL RULES

[217-21-SR]

NOTICE IS HEREBY GIVEN that a public hearing will be held by the board of standards and appeals on Friday, October 19, 1928, at 2 p. m., Room 1013, Municipal Building, on proposed amendments to Fuel Oil Rules.

Matter in *italics* is new. Matter in brackets [] to be omitted.

Rule 1. Definition.

For the purpose of these rules the following terms shall be interpreted in accordance with these definitions.

DISCHARGE LINE shall be the line between the discharge outlet of the pump and the burner oil inlet connection.

FIRM FOUNDATION: A firm foundation is one which will carry the maximum load to which it will be subjected without exceeding the safe bearing capacity of the soil.

FIRE RETARDING MATERIALS:

(a) One-half ($\frac{1}{2}$) inch plaster boards or asbestos board, or three-eighths ($\frac{3}{8}$) inch gypsum wall boards weighing not less than 16 pounds per square yard with pointed joints covered with No. 26 U. S. gauge sheet metal with one (1) inch lapped seams nailed to the wood beams when spaced not more than sixteen (16) inches on centers, or nailed to furring strips when the floor beams are spaced more than sixteen (16) inches on centers, or

(b) Two thicknesses of one-quarter ($\frac{1}{4}$) inch asbestos boards laid with tight staggered joints and nailed to the beams, when spaced not more than sixteen (16) inches on centers, or nailed to furring strips when the floor beams are more than sixteen (16) inches on centers, or

(c) Metal lath weighing not less than three pounds per square yard, attached to furring strips and plastered with Portland cement mortar at least three-quarters ($\frac{3}{4}$) inch thick.

FILL LINE is the line between the fill box and the fill pipe connection in the storage tank.

FUEL OIL, any liquid mixture, substance or compound, derived from petroleum, which does not emit an inflammable vapor below a temperature of 125°F. when tested in a Tagliabue open cup tester (Chapter X Article I Code of Ordinance).

GAUGING DEVICE: A means by which the level of the oil in a storage tank may be indicated.

HEATERS: A device for heating fuel oil for the purpose of decreasing the viscosity.

OIL BURNER: A device designed for the purpose of burning fuel oil.

OVERFLOW PIPE: A pipe which conveys by gravity the oil from the maximum level of an auxiliary tank to the storage tank or from the pump to the storage tank.

RELIEF VALVE: A valve held shut by a spring or other means to automatically relieve pressure in excess of its setting.

REMOTE CONTROL: A hand, electric or mechanically operated device to the oil supply shut off.

RETURN LINE: A line for the purpose of conveying by-passed oil to a storage tank.

SWING JOINT: A connection made in a pipe line by means of a combination of fittings so that the tank can settle naturally without breaking the line or impairing the efficiency of the connection.

SUPPLY LINE: That portion of the line between the storage tank and the oil pump inlet connection. Where a pump is not used it shall be that portion of the line between Storage Tank and the burner oil inlet connection.

SCAVENGING LINE: A line installed to permit the removal of water or foreign matter from a storage tank.

SHUT-OFF VALVE: A device that can be actuated to prevent the flow of liquid in a line of pipe.

[The term "fuel oil" under these rules shall include any liquid or mobile mixture, substance or compound derived

from or including petroleum, which does not emit an inflammable vapor below a temperature of one hundred and thirty-five (135) degrees Fahrenheit, when tested in a Tagliabue or Pensky-Martens closed cup tester; and such oil shall be classified as either Grade A Fuel Oil or Grade B Fuel Oil.

(a) Grade A Fuel Oil Shall Include:

All oil used for fuel purposes under these rules which shall show a flashpoint of not less than one hundred and fifty (150) degrees Fahrenheit when tested in a Tagliabue or Pensky-Martens closed cup tester.

(b) Grade B Fuel Oil Shall Include:

All oil used for fuel purposes under these rules which shall show a flash point of not less than one hundred and thirty-five (135) degrees Fahrenheit when tested in a Tagliabue or Pensky-Martens closed cup tester.]

OILS NOT PERMITTED:

Oils derived from or including petroleum that have a flashpoint below a temperature of 125 degrees Fahrenheit, when tested in a Tagliabue or Pensky-Martens closed cup tester, shall not be used as a fuel to produce heat or light.

[(d) Where the Use of Grade B Fuel Oil Is Permitted.]

FUEL OIL:

[Grade B] Fuel Oil, within the meaning of these rules, having a flashpoint between 125 degrees and 150 degrees may be used for domestic heating in buildings occupied by not more than two (2) families and in tenement houses and commercial plants. If used in tenement houses or commercial plants, a certificate of fitness for the operator of the plant will be required as per Rule 15.

[(e) Where Grade A oil is used in place of Grade B oil in domestic installations it may be used under the requirements for Grade B installations.]

DEVICES:

[(f)] No person, firm, company or corporation shall within the limits of the City of New York use any device or apparatus for burning fuel oil within the meaning of these rules unless such device or apparatus shall have been approved by the Board of Standards and Appeals.

Rule 2. Manner of Storage for Fuel Oil.

Fuel oil, to be used for heating and power purposes, shall be at all times stored in metal tanks with all openings or connections through the tops of the tanks *except as otherwise provided in these rules.*

Rule 3. General Location of Tanks for Fuel Oil.

(a) In all buildings fuel oil storage tanks shall be buried below the floor of the lowest story or, if in the judgment of the Superintendent of Buildings the burial of tanks is not practicable by reason of soil, foundation or structural conditions, the tanks may be placed in the lowest story, subject to the requirements hereinafter set forth.

(b) Along the line of subways no tank shall be placed within twenty (20) feet of any wall separating a building from the subway and, if practical, tanks shall be placed in a lower position than the roadbed of the subway.

Rule 4. Location, Protection and Capacity of Tanks for the Storage of Fuel Oil.

[Subdivision A. Grade A Fuel Oil.]

Section 1. Inside of Buildings Above Ground.

(a) **OVER 275 GALLONS CAPACITY.** Where tank cannot be buried as required in subdivision c of this rule,

PUBLIC HEARING

storage tanks exceeding 275 gallons capacity, or any part of such tanks, when located above the floor level of the lowest story of any building shall each be placed in an enclosure of inside dimensions of 6 inches greater on all sides than the outside dimensions of the tank. The walls of the enclosure shall be constructed of concrete not less than 6 inches in thickness or 8 inches in thickness of brick masonry. The walls shall be carried up to a height not less than 12 inches above the top of the tank and the space between the tank and the walls and top of the enclosure shall be filled with sand or well tamped earth. Enclosure shall not be constructed until after tank inspection is made.

[(a) Where tanks cannot be buried and are located in the lowest story of any building, they shall be placed in an enclosure, the walls, floor and roof of which shall be constructed of reinforced concrete not less than eight (8) inches in thickness, or of twelve (12) inches of masonry and of dimensions six (6) inches greater on all sides than the outside dimensions of the tank.

(b) The walls of the enclosure shall be carried up to a height not less than one (1) foot above the tank and roofed over with reinforced concrete or similar fireproof construction capable of sustaining a load of three hundred (300) pounds per square foot.

(c) The roof of every enclosure shall contain a manhole with fireproof cover properly weighted, but not fastened, placed immediately above the manhole in the top of the tank.

(d) A space of at least two (2) feet shall be maintained between the top of the roof of the enclosure and the ceiling immediately above.

(e) The space between the tank and the walls and roof of the enclosure shall be completely filled with dry upland sand or earth well tamped.]

(b) Not more than one tank shall be placed in an enclosure.

(c) In non-fireproof or frame buildings the total storage capacity of tanks shall not exceed five thousand (5,000) gallons, except as stated in subdivision "d."

(d) In any building, if tanks properly enclosed or covered as above required are located in a fireproof or detached room which is cut off from the rest of the building vertically and horizontally in an approved manner and if such room is ventilated to the outside air, the total storage capacity shall not exceed fifty thousand (50,000) gallons, with an individual tank capacity of not exceeding twenty thousand (20,000) gallons.

(e) 275 GALLONS CAPACITY AND LESS. Storage tanks of 275 gallons capacity and less may be installed in the lowest story so that the bottom of tank shall not be more than 2 feet above the burner oil inlet connection. The tank shall be set on and firmly anchored to a concrete or rock base which base shall be equivalent in weight to at least 15 cubic feet of concrete. Not more than one tank shall be permitted for any one building.

(f) OVER 275 GALLONS CAPACITY. Storage tanks exceeding 275 gallons capacity shall be buried below the level of the lowest floor and below the level of the burner oil inlet connection except where the burial of tanks below the level of the burner oil inlet connection is impractical:

(a) by reason of rock or water conditions.

(b) where the bottom of the tank will be below the level of the foundation footing and where the angle of repose cannot be maintained as certified by the Superintendent of Buildings.

Under conditions (a) and (b) a syphon breaking device provided for in these rules shall be used and the tank shall be placed at the lowest practical level. The top of the tank shall be protected by not less than 12 inches of sand or dry earth or 4 inches of concrete. Tanks shall be placed on firm soil and surrounded with soft earth or sand.

[Section 2. Inside Buildings Below Ground.

(a) When a tank is buried beneath a building its

capacity may be increased one hundred (100) per cent above that allowed for an inside tank as established in connection with buildings of such construction as specified in Rule 4, Subdivision A, Section 1 (g) and (h).

(b) Tanks shall be buried underground below the level of any piping to which they may be connected, with the tops of the tanks not less than two (2) feet below the surface of the ground; or, in lieu of the two (2) foot cover of earth, tanks may be buried under twelve (12) inches of earth, covered by at least six (6) inches of concrete which shall extend at least one foot beyond the horizontal outline of tanks in all directions. Where necessary to prevent floating, tanks shall be securely anchored.

(c) Tanks shall be set on concrete or metal cradles which shall be placed on firm soil and surrounded with soft earth or sand. Tanks shall be completely encased with six (6) inches of concrete when buried in soil the nature of which would make additional protection necessary.]

Section [3] 2. Outside of Buildings Above Ground.

(a) Where vertical tanks of one hundred and fifty thousand (150,000) gallons capacity or less are located outside of buildings and placed above ground, the tanks shall be not less than one and one-fourth (1¼) tank diameters, and in no case less than ten (10) feet, from the line of adjoining property, or the nearest building or adjacent tank.

(b) Where horizontal tanks are located outside of buildings and placed above ground, the tanks shall be not less than one and one-quarter (1¼) tank diameters measured from the end of the tanks and not less than two (2) tank diameters measured from the side of the tanks, and in no case less than ten (10) feet from the line of adjoining property, or the nearest building or adjacent tank.

(c) Where existing outside above ground storage tanks have been placed closer together than one and one-quarter (1¼) tank diameters, a fire wall shall be built to a height of at least two (2) feet above the height of the highest tank completely separating the tanks for their full diameters or lengths.

(d) Tanks placed above ground shall be set on firm foundations and, if elevated, their supports shall be constructed of fireproof materials. All tanks shall be electrically grounded.

Section [4] 3. Outside of Buildings Below Ground.

(a) Tanks buried outside of buildings below ground shall have the top of the tanks not less than 2 feet below the surface of the ground and below the level of the burner oil inlet connection to which the tanks may be connected, except where the burial of tanks below the level of the burner oil inlet connection to which the tank may be connected is impractical:

(a) by reason of rock or water condition.

(b) where the bottom of the tank will be below the level of the foundation footing and where the angle of repose cannot be maintained as certified by the Superintendent of Buildings.

Under conditions (a) and (b) a syphon breaking device provided for in these rules shall be used.

[(a) Tanks shall be buried underground below the level of any piping to which they may be connected, with the tops of the tanks not less than two (2) feet below the surface of the ground; or, in lieu of the two (2) foot cover of earth, tanks may be buried under twelve (12) inches of earth, well tamped, covered by at least six (6) inches of concrete, which shall extend at least one foot beyond the horizontal outline of tanks in all directions. Where necessary to prevent floating, tanks shall be securely anchored.

(b) Tanks shall be set on concrete or metal cradles which shall be placed on firm soil and surrounded with

PUBLIC HEARING

soft earth or sand well tamped. Tanks shall be completely encased with six (6) inches of concrete when buried in soil the nature of which would make additional protection necessary.

Subdivision B. Grade B Fuel Oil.

Section 1. Location.

(a) Storage tanks shall preferably be buried either outside of a building or below the lowest floor level. When not buried and located inside of a building they shall be placed on the lowest floor level and shall be enclosed in four inches of terra cotta or eight inches of approved masonry, and the aggregate capacity of such storage tanks shall not exceed 275 gallons.

(b) Tanks, when buried, shall be placed with top of tanks not less than 2 feet below the surface of the ground and below the level of any piping to which the tanks may be connected, except that, in lieu of the 2-foot earth cover, tanks may be buried under 12 inches of earth and a cover of reinforced concrete at least 6 inches in thickness extending at least one foot beyond the horizontal outline of tank in all directions; concrete slab to be set on a firm soil foundation.

(c) Tanks shall be set on firm soil and surrounded with soft earth or sand and shall be completely encased with (6) inches of concrete, where soil conditions require.

(d) Where in the opinion of the Fire Commissioner extreme difference of grade or soil conditions would work a hardship an anti-syphon valve or other mechanical device to prevent syphoning approved by the U. S. Bureau of Standards, Fire Underwriters Laboratories or other laboratory recognized by the Board of Standards and Appeals, may be used.]

Section 4. Capacity.

The total storage capacity of fuel oil with flashpoint between 125 degrees and 150 degrees F. shall not exceed 1,100 gallons.

Rule 5. [Enclosure and Protection of Tanks for the Storage of Grade A Fuel Oil.]

[Section 1.] Embankments and Dikes.

(a) Above ground storage tanks shall be protected by an embankment or a dike. Such protection shall have a capacity of not less than one and one-half ($1\frac{1}{2}$) times the capacity of the tank so surrounded, and shall be at least four (4) feet high, but in no case higher than one-fourth ($\frac{1}{4}$) the height of the tank when the height of the tank exceeds sixteen (16) feet. Embankments or dikes shall be made of earth-work with clay core; of masonry or of impervious reinforced concrete. Earth-work embankments shall be firmly and compactly built of good earth from which stones, vegetable matter, etc., have been removed, and shall have a flat section at top of not less than three (3) feet and a slope of at least one and one-half ($1\frac{1}{2}$) to one (1) on both sides. Concrete or masonry dikes shall be so designed as to safely carry the entire volume of the oil in the tank so surrounded.

(b) Embankments or dikes shall be continuous and unpierced. Piping shall be carried either over or under embankments or dikes in such a manner as not to interfere with the efficiency of the enclosure.

Rule 5A. Fire Extinguishing Equipment.

(a) Every tank with a capacity of over five thousand (5,000) gallons inside of buildings and ten thousand two hundred (10,200) gallons outside of buildings shall be equipped with a system of steam pipes, blanketing gas or other approved system for use in case of fire, so arranged and installed as to adequately protect the buildings or surrounding property.

(b) When steam is used, the steam supply pipe shall not be less than one-half ($\frac{1}{2}$) inch in size. The boilers

shall be conveniently located, and the steam to the extinguisher lines shall be controlled by easily accessible valves.

(c) Near each boiler of fuel oil burning unit there shall be kept ready for use two portable fire extinguishers of not less than 1 quart capacity or other equivalent fire extinguishers for extinguishing oil fires.

Rule 6. Material and Construction of Tanks for the Storage of Fuel Oil.

Section 1. Cylindrical Tanks (except vertical tanks located outside of Buildings above Ground).

(a) All tanks for the storage of fuel oil shall be built of steel plates made by the Open Hearth Process and known to the trade as "Tank Steel." Such plates shall be free from physical imperfections, such as laminations, cracks, etc. All steel must be new, in good condition and free from rust. The thickness of steel required and the size and spacing of rivets shall be as stated in the table given below.

(b) All tanks must be welded, riveted and caulked, or riveted and welded. Flanges or other pipe connections may be welded. All caulking shall be done with round nose tools and without injury to the plates.

(c) Thickness of cylindrical tanks.

Tanks 36 in. in diameter and less— $\frac{1}{4}$ in. shell, $\frac{1}{4}$ in. heads.

Tanks 37 to 72 in. in diameter— $\frac{1}{4}$ in. shell, $\frac{5}{16}$ in. heads.

Tanks 73 to 120 in. in diameter— $\frac{5}{16}$ in. shell, $\frac{3}{8}$ in. heads.

Tanks over 120 inches in diameter to be of $\frac{3}{8}$ in. steel and to be stiffened by angle rings or equivalent members so as to retain their cylindrical form.

(d) All cylindrical tanks shall preferably be built with dished heads. Should flat heads be used, they must be braced in the same manner as described for the bracing of flat sides of rectangular tanks.

(e) Diameter and Spacing of Rivets.

Riveting in single lap seams shall not exceed a pitch as follows:

In shell $\frac{1}{4}$ in. thick, $\frac{5}{8}$ in. diameter rivets $2\frac{1}{4}$ in. pitch.

In shell $\frac{5}{16}$ in. thick, $\frac{5}{8}$ in. diameter rivets $2\frac{3}{8}$ in. pitch.

In shell $\frac{3}{8}$ in. thick, $\frac{3}{4}$ in. diameter rivets $2\frac{1}{2}$ in. pitch.

Section 2. Rectangular Tanks.

(a) All rectangular tanks shall be built of steel plates of the quality required for cylindrical tanks, and of a thickness of not less than $\frac{5}{16}$ of an inch.

(b) Corners may be made up by bending the plates or by the use of angles.

(c) Rivets in seams shall be $\frac{5}{8}$ of an inch in diameter and spaced not more than $2\frac{1}{4}$ inches center to center.

(d) All flat surfaces of rectangular tanks are to be braced. Bracing shall be done either by using structural members, which will act as girders and which will safely carry the load with a factor of safety of five (5), or by using bars from side to side, end to end and top to bottom of the tank, as the case may be.

(e) When structural members are used, such as angles, channels or beams, etc., the distance from center to center of the rivet lines on these members must not be in excess of twenty-four inches, and the rivet spacing must be such that it will develop the full strength of the member. In no case shall the rivets be in excess of six (6) inches center to center on these members.

(f) When structural reinforcing members are tied together with braces, in order to reduce the effective length, the braces shall not be stressed higher than nine thousand (9,000) pounds per square inch taken on the minimum net section.

(g) If structural members are omitted and the sides

PUBLIC HEARING

of the tank are braced by means of rods or bars, these members should not be spaced farther apart than twenty-four (24) inches center to center in all directions. The unit stress permitted in these members shall not be in excess of nine thousand (9,000) pounds per square inch on the minimum net section.

(h) The fastening between these members and the sides of the tank must in all cases be such that it will develop the full net sections of the bars so that the bar will break before the connection will let go.

Section 3. Vertical Storage Tanks Over 1,000 Gallons Capacity Located Outside of Building Above Ground.

(a) Vertical tanks located outside of buildings above ground shall be built of steel plates of the quality required for cylindrical tanks.

(b) The minimum thickness of shell or bottom plates shall be $\frac{1}{4}$ inch and the minimum thickness of roof plates $\frac{1}{8}$ inch.

The thickness of shell plates shall be figured in accordance with the following formula:

$$t \text{ equals } \frac{P \times r \times F}{T \times E}$$

P equals head pressure at bottom of ring under consideration.

r equals radius of shell in inches.

F equals factor of safety (taken as 5).

T equals tensile strength of plate in pounds per square inch (55,000 pounds per square inch).

E equals efficiency of vertical joint in ring under consideration (calculations to be based on formulas as given in Bulletin No. 14 of the New York State Industrial Commission).

(c) Roof plates shall have single riveted water tight seams and the roof shall be built to shed water. Bottom plates shall have single lap riveted seams. Shell plate seams shall be designed, with proper efficiency to meet requirements of above formula for shell plates.

(d) In all cases, steel tanks for the storage of fuel oil must be built metal to metal. No filler of any kind will be permitted.

(e) Tanks for storage of grade B oil shall be constructed in accordance with the requirements of this rule, except that tanks of a capacity of over 60 gallons and not more than 550 gallons may be constructed of steel not less than $\frac{3}{16}$ inches in thickness.

(f) Auxiliary supply tanks of 60 gallons or less capacity may be constructed of brass, copper, steel or wrought iron of not less than No. 14 U. S. Gauge.

Section 4. Welding.

(a) Where welding is to be used for a part or for the entire tank, the tank shall be fabricated as required under Rule 6, Section 1.

(b) All welded seams of plates shall be lapped or butted.

When the joint is a lapped joint, the sheet shall be lapped not less than two inches and welded both inside and outside. The plates shall be pulled up tight, metal to metal, before welding and kept tight together during welding. Both inside and outside welds shall be of full 45 degree fillet.

Where a butt joint is used, it shall be of the 90 deg. double V type welded both inside and outside and reinforced to a total thickness of at least one and one-half times the plate thickness.

(c) All heads shall be flanged, the straight part of the flange being not less than as follows:

For $\frac{3}{16}$ inch heads, $1\frac{1}{4}$ inch flange.

For $\frac{1}{4}$ inch heads, 2 inch flange.

For $\frac{5}{16}$ inch heads, 2 inch flange.

For $\frac{3}{8}$ inch heads, $2\frac{1}{4}$ inch flange.

For heads over 120 inches diameter the flange shall be increased in length by one-half inch for each increase in diameter of 2 feet.

Where heads are set into the shell, they shall be a driving fit and the shell shall fit the head closely all around. If of over 1,100 gallon capacity they shall be welded inside and outside with full fillet welds. If of 1,100 gallon capacity or less and not over 48 inches in diameter, welding on the outside only will be sufficient.

Where the heads are butt welded to the shell, the head welds for tanks of 1,100 gallon capacity or less and not over 48 inches in diameter, shall be of the 90 deg. single V type welded entirely through and reinforced not more than one-quarter of the shell thickness. For tanks of over 1,100 gallon capacity the head welds shall be of the 90 deg. double V type welded inside and out and reinforced to a total thickness of not less than one and one-half times the shell thickness.

(d) Where tanks are made up of two or more rings the welded longitudinal joints of adjacent sections shall break joints. At no point of a butt girth joint shall the sheet on one side be offset with the sheet on the other side in excess of one-half of the thickness of the plate. All butt girth joints shall be welded inside and out and reinforced to at least one and one-half times the plate thickness, except that for tanks of 1,100 gallon capacity or less and not over 48 inches diameter, they may be of the same construction as the head seams.

(e) Where braces are welded to the plates the welding shall be done in such a manner as to develop the full net sections of the braces; in other words, the brace will break before the connection will let go.

Braces made in more than one piece shall not be joined together by any method of welding.

Section 5. Rust Proofing.

All tanks shall be thoroughly coated on the outside with tar, asphaltum or other suitable rust resisting material. Where soil contains corrosive substances, special protection may be required. Tanks shall not be coated until after the necessary tests have been made.

Section 6. Venting of Tanks.

All tanks shall be vented. (See Rule 8, Section 6, for installation of vent pipes.)

Section 7. Manhole Covers.

Manhole covers shall be of cast iron, cast steel or of the same material as used in the construction of the tanks. On tanks placed inside buildings, the manhole shall be bolted or otherwise secured to the tank and made gas tight. All tanks over 1,100 gallons capacity shall be provided with a manhole of at least 11 in. by 16 in.

Rule 7. Tests of Tanks for the Storage of Fuel Oil.

Tanks and piping to burner shall be tested hydrostatically at a pressure, except as otherwise stated, of not less than 10 pounds per square inch. Those parts subjected to a pressure exceeding 10 pounds per square inch shall be tested at a pressure of not less than $1\frac{1}{2}$ times the maximum pressure to which it is subjected. The hydrostatic pressure on a tank shall be determined by measuring in feet the height from the lowest point in the tank to the highest oil reservoir from which the tank may be filled. This distance divided by 2.3 will give the equivalent pressure in pounds per square inch at the bottom of the tank. When there is danger of freezing, tanks and piping may be tested with oil provided the installation is complete and the pressure applied at the burner end of the supply line. There shall be no fire or flame in the room or rooms in which the test is being conducted. All tests shall be conducted in the presence of a representative of the Fire Commissioner and shall be continued for thirty minutes.

The contractor shall furnish all the necessary equipment for conducting the tests.

PUBLIC HEARING

[Section 1. Inside of Buildings Above or Below Ground or Outside of Buildings Below Ground.]

(a) All tanks located inside of buildings, either on or below the lowest floor level, and outside buried tanks, shall withstand after being set in place, a hydrostatic or air test for at least thirty (30) minutes and shall show no leaks.

(b) The hydrostatic pressure on a tank shall be determined by measuring in feet the height from the lowest point in the tank to the highest oil reservoir from which the tank may be filled. This distance divided by 2.3 will give the equivalent pressure in pounds per square inch at the bottom of the tank. The hydrostatic test pressure shall be not less than thirty (30) pounds per square inch for welded tanks, nor less than twenty-five (25) pounds per square inch for riveted tanks.

(c) Tanks when subjected to an air pressure test shall be equipped with a safety relief valve set at not more than 32 lbs. per sq. in., and the air compressor device employed in the air testing of the tank shall be of low pressure type, equipped with an automatic pressure regulator set at not less than 35 lbs.

Section 2. Horizontal Tanks Outside of Building, Above Ground.

Horizontal tanks outside of buildings and above ground shall stand, without leaking, a hydrostatic or air test of twenty-five (25) pounds per square inch for at least thirty (30) minutes and shall show no leaks.

Section 3. Vertical Tanks Outside of Buildings Above Ground.

Vertical tanks designed for outside above ground storage, having a cover of lighter material than that of the sides of the tank, shall withstand without leaking a head of water equal to that of the depth of the tank.

Section 4. Test for Tanks. How Conducted.

(a) Tests shall be conducted in the presence of a representative of the Fire Commissioner. The contractor shall furnish all the equipment necessary for conducting the tests. Access to the inside and outside of tanks shall be maintained until the necessary tests are completed.

(b) Welded tanks shall, while under the hydrostatic or air test as hereinbefore specified, be subjected to a thorough hammer or impact test. The test shall consist of striking the sheet on both sides of the welded seam a sharp, vibratory blow with a 2 to 6 lb. hammer, the blows to be struck 2 to 3 inches apart and within 2 or 3 inches of, and on each side of, the seam, the blows to be as rapid as a man can conveniently strike a sharp, swinging blow, and as hard as can be struck without indenting or distorting the metal of the sheet.]

Rule 8. Piping for Fuel Oil.

Section 1. Installation of Piping.

(a) Piping shall be run in a substantial and workmanlike manner and provision made for expansion, contraction and settlement. Exposed piping shall be protected against mechanical injury and shall be securely supported with rigid metal fasteners or hangers. Where the top of the tank is below the level of the burner oil inlet connection, the supply line from the tank shall be run above the level of the bottom of the tank so as to prevent syphoning. Cross connections permitting gravity flow from one tank to another are prohibited. All pipes connected to tank except measuring well or gauge pipe shall be provided with double swing joints at tank. All threaded joints shall be made tight with litharge and glycerine or equivalent suitable pipe compound.

[(a) Piping shall be run as directly as practicable without sags, and, except as provided in Rule 11A, e, shall be laid so that where practicable pipes shall pitch toward the

supply tank without traps; provision shall be made for expansion, contraction, jarring and vibration.

(b) Cross connections permitting gravity flow from one tank to another shall be prohibited.

(c) Pipes conveying oil, if laid inside of a building, shall be either buried or exposed to view. Where piping is exposed, it shall be easily accessible for inspection at all times and protected against injury. Exposed piping shall be hung or supported on fireproof materials to prevent falling in case of fire.

(d) Pipes laid below ground or subject to corrosion shall be protected.]

Section 2. Type and Material

(a) All piping shall be of standard full weight brass, copper, wrought iron or steel for working pressures less than one hundred (100) pounds; for working pressures in excess of one hundred (100) pounds, extra heavy seamless drawn tubing and drop forged fittings shall be used. No pipe less than one-half ($\frac{1}{2}$) inch inside diameter shall be permitted; except that for Grade B oil $\frac{1}{4}$ -inch diameter pipes may be used.

(b) All connections shall be tight and shall have well-fitted joints.

(c) Tubing and couplings, where used in connection with mechanical burners, shall be capable of withstanding a pressure equal to the piping to which it is connected and shall be constructed of fire resisting materials. No soldered connection shall be used. The length of tubing shall not exceed that required for direct connections to coupling.

Section 3. Tests for Piping. [Grade A.]

Piping for systems with working pressures under one hundred (100) pounds, after installation, shall be tested and proven tight at a hydrostatic pressure of not less than one hundred and fifty (150) pounds per square inch; where working pressure exceeds one hundred (100) pounds, piping shall be tested and proven tight at a hydrostatic pressure of not less than one and one-half ($1\frac{1}{2}$) times the maximum working pressure. The maximum working pressure shall be noted on the plans. Tests shall continue for thirty (30) minutes.

[Section 3a. Tests for Piping. Grade B.]

All piping after installation shall be tested and proven tight at a hydrostatic pressure of one hundred (100) pounds per square inch.]

Section 3a. Overflow Pipes from Burners and Auxiliary Tanks.

Overflow pipes, when required, shall be not less than one size larger than supply pipe.

Section 4. Relief Valves.

[(a) All piping or heaters which can be separated from the source of supply and in which a dangerous pressure can be generated either by the action of the pump or by steam, shall be protected by an automatic pressure relief valve. Such automatic pressure relief valve shall discharge into the storage tank, or into the suction line provided there are no shut off valves in the suction line between the pressure relief valve discharge connection and the storage tank. No valves shall be installed in the safety valve lines. Automatic pressure relief valves shall be not less than $\frac{1}{2}$ in. by $\frac{1}{2}$ in., of the spring type with working parts of non-corrosive construction and shall be set to discharge at not more than fifty (50) per cent above the maximum working pressure.

(b) An automatic by-pass valve of size equivalent to that of the discharge line shall be installed between each pump and the first discharge shut-off valve. The automatic by-pass valve shall discharge into the suction line near the pump, or into the storage tank as described in the preceding paragraph. The automatic by-pass valve shall be constructed as described in the preceding paragraph with

PUBLIC HEARING

the exception that the setting mechanism shall be so designed as to prevent the complete closing of the valve.]

(a) *Where a shut-off valve is installed in the discharge line from an oil pump a relief valve shall be installed in the discharge line between the pump and the first shut-off valve. The relief line shall be returned to storage tank or to supply line near pump. There shall be no shut-off valves in the relief line.*

(b) *All heaters shall be provided with a relief valve to prevent excessive oil pressure.*

(c) *Relief valves shall be set to discharge at not more than 1½ times the maximum working pressure of the system.*

Syphon Breaking Devices—Syphon breaking devices, where permitted, shall be constructed in such a manner that the admission of air at any point in the supply line will break the syphon. Where installed, such a device shall not be accepted until it has been effectively demonstrated in the presence of a representative of the Bureau of Fire Prevention.

Section 5. Fill Pipes.

(a) *Each tank shall be provided with a separate fill pipe which shall be carried below the discharge line in the tank or otherwise trapped to prevent escape of oil vapor. The fill pipe shall be made up with screwed or flanged fittings securely held in place and shall be oil tight. Each fill pipe shall be provided with a receiver terminal or fill box or casing provided with means for locking and located as remote as practicable from any building opening or subway grating. Where the fill box terminal is below the level of the top of the tanks, the fill pipe shall terminate at the top of the tank; a check valve and a gate valve shall be installed in the fill box terminal (at the tank).*

[(a) Each fuel oil tank shall be provided with a separate fill pipe. Fill pipes when installed near any building opening shall be as remote therefrom as practicable so as to prevent liability of flow of oil or vapor through building opening.

(b) The receiver terminal of each fill pipe shall be located in a tight metal box or casing provided with means for locking. The delivery terminal shall be connected through the top of the tank.

(c) The fill pipe shall be provided with a trap or seal or carried within four (4) inches of the lowest point in the tank.

(d) The fill pipe shall be made up with screwed or flanged fittings and shall be oil tight and securely held in place.]

Section 6. Vent Pipes.

(a) An open, galvanized or painted iron vent pipe without trap and draining to the tank shall be provided for each tank. The lower end of the vent pipe shall not extend through the top of the tank more than one inch.

(b) Where a battery of tanks designed to hold the same class of liquids is installed, vent pipes may be run into a main header. Connections to the header shall not be less than one foot above the level of the top of the highest reservoir from which the tanks may be filled. The main vent pipe from the header shall be screened. The main vent pipe and header shall be of an area equal to the aggregate area of vent pipes connected thereto.

(c) Vent openings in tanks shall be screened by 40 mesh non-corrodible wire screen, and shall be of sufficient area to adequately vent the tank during the filling operation. Vents shall be not less than two (2) inches in diameter for tanks over 1,100 gallons capacity, and in no case less than one and one-quarter (1¼) inches in diameter.

(d) Vent pipes shall be provided with weather proof hoods and terminate outside the building above the street surface, not less than six (6) feet nor more than twelve (12) feet above the fill pipe. Such vent outlet shall not be located within three (3) feet in any direc-

tion of a window or other opening, or an exterior stairway, or fire escape, nor shall vent pipes be placed in elevator or dumb-waiter shafts, or in an enclosed court.

(e) If compelled, because of structural conditions, to carry the vent outlet higher than twelve (12) feet above the fill box, and if the fill lines are connected to tank trucks by tight connections and filled by pressure, a one (1) inch line shall be connected to tank and shall parallel the fill line and terminate in the fill box with unthreaded end. A check valve shall be installed in the line so as to permit excess oil in the tank to flow to the fill box and shall be so set as to prevent the passage of vapor to the street.

Section 7. Return [Pipes] Line from Burners.

Return lines from burners, where [necessary shall be not less than the diameter of the supply line to the burner. Return lines shall be run as direct as possible, and shall be connected into the suction line near the pump or into the storage tank.] *used, shall not be smaller in diameter than the discharge outlet from the pump. They shall be connected into the supply line near the pump or into the storage tank without shut-off valve in the return line. No oil shall be returned to the storage tank at a temperature higher than one hundred and forty (140) degrees Fahrenheit.*

Section 8. Heating Coils in Tanks.

All heating to reduce viscosity of Grade A fuel oils in storage tanks in any building shall be only by means of hot water coils thermostatically controlled and the oil shall not be heated above one hundred and forty (140) degrees Fahrenheit.

Rule 9. Valves and Control of Flow for Fuel Oil.

[Subdivision A. Grade A Fuel Oil.

(a) Control valves at the burners shall be of a substantial type, provided with a stuffing box of liberal size containing a removable cupped gland designed to compress the packing against the valve stem and so arranged as to facilitate removal. Valves shall be designed to close against the supply and to prevent withdrawal of the stems by continued operation of the hand-wheel. The use of packing which may be affected by oil or heat is prohibited.

(b) A shut-off valve shall be provided in discharge and suction lines near each pump; in discharge line from each tank as near the tank as practicable, and in branch lines near each burner.

Subdivision B. Grade B Fuel Oil.

(a) Readily accessible valves shall be provided near each burner and in the discharge line from each storage tank.

(b) A remote control for shutting off the supply of oil to the burners shall be provided.

(c) An automatic by-pass valve of a size equivalent to that of the discharge line shall be installed between each pump and the first discharge shut-off valve. The automatic by-pass valve shall discharge into the suction line near the pump or into the storage tank. The automatic by-pass valve shall be constructed of non-corrosive materials and so designed as to prevent the complete closing of the valve.]

(a) *In all installations a shut-off valve shall be provided at or on each burner. Where the top of the storage tank is located above the oil inlet connection to the burner at shut-off valve shall be provided in the supply line inside the building as near the tank as practicable.*

(b) *In systems where either steam or air is used for atomizing the oil, the oil and atomizing supply shall be interlocked so that in case of interruption of the atomizing supply, the oil will immediately be cut off.*

Automatic by-pass valves shall be set at not more than fifty (50) per cent above the maximum working pressure

PUBLIC HEARING

This rule shall not apply to burners and pumps approved as a unit when provided with a pressure relief device.

Rule 10. Oil Level Indicating Device for [Grade A] Fuel Oil.

[A test well or gauging device shall be installed and so designed as to prevent the escape of oil or vapor within the building at any time. The top of the well when located outside of a building shall be sealed and kept locked when not in use.]

(a) Oil level indicating devices shall be constructed of substantial materials so designed that there can be no leakage of fuel oil or vapor. Test wells shall not be permitted in tanks located inside the building. Test wells when located outside the building shall be capped oil tight and kept closed when not in use.

Rule 11. Pumps for Fuel Oil.

[Subdivision A. Grade A Fuel Oil.]

(a) Pumps shall be of a recognized standard mechanical construction approved by the Board of Standards and Appeals.

(b) Pumps shall be installed in duplicate where fire protection equipment is dependent on the use of fuel oil for heating or steam.

(c) Pumps located in the same room where burners are installed shall be provided with a remote control.

(d) Pumps used in connection with outside above ground storage tanks shall be located outside embankment walls, and at such a point that they will be accessible at all times, even if the oil in the tank or reservoir should be on fire.

(e) Pumps may be located below the top of the oil storage tank or tanks where heavy oil is used having a gravity of not more than eighteen (18) degrees Baume and where the top of the tank or tanks is not more than ten (10) feet above the pump or pumps, except as otherwise stated in these rules.

[Subdivision B. Grade B Fuel Oil.]

[(a)] (f) Oil pumps used for supplying oil to the burners shall be rigidly fastened in place and secure against leaks.

(g) Where a pump is part of a burner unit and is used for atomizing purposes, an additional approved pump may be used without the disconnection of the unit.

[(b)] Pumps shall be of approved design as described in Rule 11A (a).]

Rule 12. Burners for Fuel Oil.

The burner mechanism shall be of a recognized type approved by the Board of Standards and Appeals. In domestic installations the burner shall be equipped with an overflow attachment or an automatic control to prevent flooding.

Where an approved burner unit includes a pump as part of the unit, said pump or burner may be disconnected and used in conjunction with any other approved burner or pump.

A remote control shall be provided whereby the flow of oil to the burner can be stopped and such control shall be located either inside or outside the entrance to the room in which the burner is located and as close to such entrance as practicable.

Installations in which burners are located on different floors of a building and are supplied with oil from the same source, a remote control shall be provided on each floor on which burners are located. This remote control to be such that its operation will stop the flow of oil to all burners on that particular floor, and such control shall be located either inside or outside an accessible entrance to the floor or room containing the burners as close to the entrance as practicable.

The damper shall be so constructed that it cannot completely cut off the passage of the flue gases at any time.

Adequate ventilation at least equivalent to area of the smoke pipe at the point where it enters the flue shall be provided in all rooms in which burners are installed.

Rule 13. General Devices for [Grade A] Fuel Oil.

(a) Devices which are subject to breakage and escape of oil shall be prohibited.

(b) Thermometers with large clear reading scales, placed in thermometer wells with screwed top connections, shall be installed at convenient and prominent positions in the oil supply pipe lines between the service tank and the pumps, and also between the pumps and the burner, to indicate the temperature of the oil.

Rule 14. Instruction Cards.

Cards giving complete instructions for the care and operation of the fuel oil system shall be permanently fixed near the apparatus and maintained in readable condition.

Rule 15. Operation of Plant Other Than Domestic Installation Using [Grade A] Fuel Oil.

No fuel oil burning plant, other than domestic installations, shall be operated unless in charge of a person holding a certificate of fitness as issued by the fire department. A certificate of fitness will be required for each person who is directly in charge of the operation of the plant at any and all times.

[This certificate of fitness will be required for all Grade A installations, and Grade B installations in dwellings for more than two families and in commercial plants. This requirement as to Grade A installations shall not apply to dwellings of less than three families equipped with Grade B installations using Grade A oil.]

Rule 16. Installation.

No fuel oil installation shall be operated or oil placed in the system until after a permit has been issued by the Fire Commissioner. Plans for each fuel oil installation shall be submitted to the Fire Commissioner for approval, together with a Certificate of the Superintendent of Buildings indicating that the proposed construction of the enclosure and the location of the tanks is in accordance with the requirements of the Building Code and these Rules.

Rule 17. Auxiliary Tanks for [Grade B] Fuel Oil.

(a) Auxiliary supply tanks may be of the gravity type if suitable automatic safeguards to prevent abnormal discharge of oil at the burner are provided. The total capacity of such tank or tanks in any building shall not exceed 60 gallons.

(b) Auxiliary supply tanks, or storage tanks, shall not be located within ten (10) feet of any fire or flame, and where practicable shall be placed at an interior angle of the cellar, formed by the walls of the building.

(c) Auxiliary supply tanks shall be substantially and rigidly supported on metal frames or cradles and secured by 2x1/8-inch straps riveted or bolted to frame and securely fastened to wall of building by rigid metal braces.

(d) Where only an auxiliary tank as prescribed in these rules is used it shall in addition to complying with the requirements for auxiliary tanks comply with all requirements for the protection of a storage tank other than the enclosure.

Rule 18. Pilot Light.

Automatic systems unless electrically ignited shall be so designed that the flame cannot be extinguished by operation of the automatic control valve and a pilot light of adequate intensity shall be provided in each combustion chamber, so arranged as not to be easily extinguished.

PUBLIC HEARING

Rule 19. Furnaces and Ranges.

(a) Stoves, ranges, hot air furnaces or other devices, originally designed for use of fuel other than oil, shall not be used in connection with oil burners unless spaces in which vapors might collect are adequately vented, and if used shall be of such construction as to withstand the maximum temperature which the oil burning device to be installed may generate.

(b) No damper for closing of more than eighty (80) per cent of the effective area of the flue shall be permitted in a smoke pipe or flue.

Rule 20. Fire Protection [for Grade A and B oil in Domestic Installations] in dwellings, [occupied by not more than two families and in] old [law tenements occupied by three or more families in] and new law tenements, [and in] commercial and industrial plants.

(a) No combustible material shall be stored within ten (10) feet of a furnace door.

(b) In dwellings occupied exclusively by not more than two (2) families, any woodwork, wooden lath and plaster partition, or other combustible material within four (4) feet of the sides or back, or eight (8) feet from the front of the furnace or boiler shall be covered with approved fire retarding material and the ceiling, except it be of fireproof construction, and within two (2) feet of the top of the furnace or boiler, shall be protected with approved fire retarding material extending four (4) feet beyond the sides and back and eight (8) feet from the front of the furnace or boiler, except that when the top of furnace or boiler is within six (6) inches of a combustible ceiling the ceiling shall be protected with two layers of approved fire retarding material with one inch air space between layers, and any combustible ceiling, partition or other combustible material within nine (9) inches of any smoke pipe shall be covered with approved fire retarding material extending at least one (1) foot beyond each side of the smoke pipe. [In old law tenement houses occupied by three or more families the heating apparatus and oil burning device shall be located in an enclosure the partitions of which shall be constructed of fireproof material not less than four (4) inches in thickness with openings therein protected with self-closing fireproof doors and the ceiling of the enclosure, if not of fireproof construction, shall be protected with approved fire retarding material; said enclosure shall be ventilated to the outer air; all vertical openings leading to cellar shall be protected with fireproof material not less than four (4) inches in thickness with all openings therein protected with self-closing fireproof doors.]

(c) In old and new law tenement houses, [or in] commercial and industrial plants [the room or rooms in which the heating apparatus and oil burning device is installed shall be cut off from the rest of the building by fireproof partitions, ceilings and floors constructed of not less than eight (8) inches for brick, not less than six (6) inches for stone or cinder concrete, or hollow blocks of terra cotta, concrete or gypsum, and not less than four (4) inches for stone or cinder concrete if properly reinforced with steel, and such rooms shall have entrance from the street, court or yard only, and shall be ventilated to the outer air.] of non-fireproof construction the heating apparatus and oil burning device shall be located in an enclosure, the partitions of which shall be constructed of fireproof material not less than four (4) inches in thickness with any opening therein protected with self-closing fireproof door the sill of which shall be not less than twelve (12) inches above boiler room floor level; and the ceiling of the enclosure if not of fireproof construction shall be protected with approved fire retarding material, except that when the top of the furnace or boiler is within twelve (12) inches of a combustible ceiling,

the ceiling shall be protected with two (2) layers of approved fire retarding material with one (1) inch air space between layers, any vertical openings extending in the boiler room proper to be protected with self-closing fireproof doors and four (4) inch partition of approved fireproof material, said enclosure shall be ventilated to the outer air. Any smoke pipe within eighteen (18) inches of a combustible ceiling, partition, or other combustible material, the ceiling, partition, or other combustible material, shall be protected with approved fire retarding material extending at least one (1) foot beyond each side of the smoke pipe. All vertical openings in old law tenement houses shall be protected in cellar with fireproof material not less than four (4) inches in thickness with openings therein protected with self-closing fireproof doors.

(d) In new law tenement houses, commercial and industrial plants of fireproof construction the heating apparatus and oil burning device shall be located in an enclosure constructed of fireproof material not less than four (4) inches in thickness with any opening therein protected with self-closing fireproof door, said enclosure shall be ventilated to the outer air.

(e) Furnished room houses, boarding houses and non-housekeeping apartments, dormitories and day nurseries and similar occupancies with not more than ten (10) sleeping rooms, also convents, rectories, monasteries and churches, the fire protection shall be the same as that required for dwellings occupied exclusively by not more than two families.

(f) Dwellings occupied by not more than two (2) families and stores the occupancy of which is considered hazardous and requires a permit from the fire department, except stores for which a permit is required for the use and operation of soda water fountains, furnished room and boarding houses, non-housekeeping apartments, dormitories, day and night nurseries, with more than ten (10) sleeping rooms and similar occupancies, the fire protection shall be the same as that required for old law tenement houses.

[Approved fire retarding material shall be any material complying with the rules of the Board of Standards and Appeals for fire retarding of garages.]

(g) Near the furnace, and so located as to be convenient for use in emergency, there shall be provided a hand fire extinguisher of an approved type suitable for use on oil fires.

Rule 21. Systems Prohibited [Where Grade B Fuel Oil Is Used.]

The use of auxiliary tanks between pump and burner unit of the pressure type are prohibited. Systems, fed by gravity between the storage tank and the pump, or force systems, are prohibited. Pressure in storage tanks for the purpose of discharging oil are prohibited.

Rule 22. Use of [Grade A or Grade B] Fuel Oil.

(a) These Rules shall not apply to gas companies storing or using fuel oil in the manufacture of illuminating gas for public use.

(b) The use of oil stoves, oil heaters or oil lamps commonly used for household purposes which employ a wick to absorb such oil in its combustion shall not be prohibited; or shall the use of such oil be prohibited when used in a plumber's torch or similar apparatus.

(c) Modification: When for any reason it may be impracticable to comply strictly with the foregoing rules the fire commissioner shall have power to modify their provisions so that the spirit and substance thereof shall be complied with. Such modification shall be endorsed upon the permit over the signature of the fire commissioner.

WILLIAM E. WALSH, Chairman.

WILLIAM I. O'GORMAN, Secretary.

WARNING

Notice is hereby given to all petitioners, appellants and applicants, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

First. That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

Second. That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

Third. That no plea of ignorance of the date of the hearing can be entertained in view of this publication and of the posting of the calendars on the bulletin board in the

offices of the board and of the further publication of the calendars in the daily press.

Fourth. That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

Fifth. That the business of the board is to dispose of all cases promptly, for the reason that the pendency of an appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of the appellant or petitioner to file necessary data, or by any other method of delay.

Sixth. That no appeal, application or petition will be accepted for filing unless, at the time of filing, all papers, plans and data required by law are supplied, as specified on the blank appeal, application or petition forms.

BOARD OF STANDARDS AND APPEALS

WILLIAM E. WALSH, Chairman

HENRY L. CONNELL

JAMES P. HOLLAND

JOHN GUILFOYLE

CHIEF JOHN KENLON

WILLIAM J. O'GORMAN, Secretary

EDWARD V. BARTON, Chief Clerk

OFFICE—Municipal Building, Rooms 1001 to 1015.

TELEPHONE—WORTH 0184.

OFFICE HOURS—9 a. m. to 5 p. m. Saturdays 9 a. m. to 12 noon.

All communications should be addressed to the chairman of the board.

CONTENTS

This issue of the Bulletin contains, in the order given—

Docket.

Call of Clerk's Calendar.

The Trial Calendar.

Notices in Building Zone Cases.

Minutes of Regular Meeting, October 2, 1928, 10 a. m.

Minutes of Regular Meeting, October 2, 1928, 2 p. m.

Third Quarterly Report.

Factory Exit Rules.

Progress Report.

PUBLIC HEARINGS

Tuesdays, at 10 a. m. and 2 p. m.
Special meetings as published in this Bulletin.
Call of Clerk's Calendar, Tuesdays, at 2 p. m.
All hearings are held in Room 1013, Municipal Building, Manhattan.

HOURS FOR CONSULTATION

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

CALL OF CLERK'S CALENDAR

The Clerk's Calendar consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, October 9, 1928, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, October 16, 1928, at 2 o'clock.

The Clerk's Calendar is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

NOTICE TO APPELLANTS AND PETITIONERS

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and disposition of same expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

CALL OF CLERK'S CALENDAR

TUESDAY, OCTOBER 9, 1928, 2 P. M.

Building Zone Cases.

377-28-BZ.
APPLICANT—Philip J. Sinnott, for Valley Holding Corp., owner.
PREMISES—998 Sound View avenue, The Bronx.
APPLICATION, under section 21 of the building zone resolution,
TO PERMIT in a business district the erection and maintenance of a gasoline service station.

382-28-BZ.

APPLICANT—Emil Guterman, for Abe Schiller, owner.
PREMISES—22601-22605 Northern boulevard (Jackson avenue), northeast corner of 226th street, Bayside, Borough of Queens.

APPLICATION, under section 21 of the building zone resolution,
TO PERMIT in a business district, extending from an unrestricted district, the erection and maintenance of a gasoline service station.

389-28-BZ.

APPLICANT—William F. Doyle, for Minnie Weber, owner.
PREMISES—2385-2393 Utica avenue, northeast corner of Avenue S, Brooklyn.

APPLICATION, under section 21 of the building zone resolution,
TO PERMIT in a business district the erection and maintenance of a gasoline service station.

395-28-BZ.

APPLICANT—William F. Doyle, for Weis Buck Garage Co., Inc., owner.
PREMISES—1139 Prospect avenue and 153 Terrace place, northeast corner, Brooklyn.

APPLICATION, under section 21 of the building zone resolution,
TO PERMIT in a business district the erection and maintenance of a gasoline service station.

438-28-BZ.

APPLICANT—Morris & Morris, for Frances Rosenthal, owner.
PREMISES—1984 82nd street and 8202-8212 20th avenue, southwest corner, Brooklyn.

APPLICATION, under sections 7c and 21 of the building zone resolution,
TO PERMIT in a residence district the erection and maintenance of a business building.

435-28-BZ.

APPLICANT—Edward P. Doyle, for James P. Walsh, owner, and Pancliff Holding Corp., lessee (63-year lease).

PREMISES—141 West 69th street, Manhattan.
APPLICATION, under sections 21 and 7c of the building zone resolution,
TO PERMIT in a residence district, extending from a business district, the alteration and conversion of a dwelling into a store and dwelling.

406-28-BZ.

APPLICANT—Edward L. Kelly, for Anna Stanaitis, owner.
PREMISES—53-16 to 53-20 Metropolitan avenue and 301-305 Grandview avenue, northeast corner, Ridgewood, Borough of Queens.

APPLICATION, under section 21 of the building zone resolution,
TO PERMIT in a business district the erection and maintenance of a gasoline service station.

407-28-BZ.

APPLICANT—William F. Doyle, for Mere Holding Corp., owner.
PREMISES—West side of Morrison avenue, 100 ft. south of Westchester avenue, The Bronx.

APPLICATION, under sections 7c and 21 of the building zone resolution,
TO PERMIT the extension, from a business district into a residence district, of a proposed business building (stores).

CALENDAR

441-28-BZ.

APPLICANT—Corn-Kelly Corp., owner.

PREMISES—501-529 Avenue P, north side, between East 5th street and Ocean Parkway, Brooklyn.

APPLICATION, under section 21 of the building zone resolution,

TO PERMIT in a residence district the erection and maintenance of a gasoline service station.

451-28-BZ.

APPLICANT—William F. Doyle, for Alexander Ginsburg, owner.

PREMISES—1969-1979 Cropsey avenue and 8796-8818 20th avenue, northwest corner, Brooklyn.

APPLICATION, under section 21 of the building zone resolution,

TO PERMIT in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

460-28-BZ.

APPLICANT—James W. Byrnes, for Reuben Schwartzberg, owner.

PREMISES—1073 Willoughby avenue, Brooklyn.

APPLICATION, under section 21 of the building zone resolution,

TO PERMIT in a business district the change of occupancy of an existing garage for the storage of five (5) motor vehicles to a motor vehicle repair shop.

268-28-BZ.

APPLICANT—William Richter, for Henry C. Behrens, owner.

PREMISES—878-886 Gravesend avenue, west side, 160 feet south of Avenue F, Brooklyn.

APPLICATION, under sections 7g and 21 of the building zone resolution,

TO PERMIT in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

OCTOBER 9, 1928, 10 A. M.

Appeals from Administrative Orders.

182-28-A—1155-1205 Manhattan avenue and 99-105 Commercial street, Brooklyn.

233-28-A—260-274 Greenwich street, Manhattan.

238-28-A—38-11 Second avenue, Long Island City, Borough of Queens.

252-28-A—119-131 East 32nd street, 118-130 East 33rd street and 198-212 Lexington avenue, Manhattan.

344-28-A—310-322 East 75th street, Manhattan.

358-28-A—238-240 Melrose street, Brooklyn.

359-28-A—1384-1388 Broadway and 118 West 38th street, southeast corner, Manhattan.

373-28-A—305-307 East 61st street, Manhattan.

374-28-A—155 Perry street, Manhattan.

375-28-A—447-457 Sutter avenue and 259 Junius street, Brooklyn.

379-28-A—1556-1560 Broadway and 157-165 West 46th street, Manhattan.

381-28-A—7 Great Jones street, Manhattan.

385-28-A—15 East 31st street, Manhattan.

390-28-A—210 Furman street, Brooklyn.

Building Zone Applications.

NOTICE IS HEREBY GIVEN by the board of standards and appeals of a public hearing under the provisions of the building zone resolution, *Tuesday morning, October 9, 1928, at 10 o'clock, in Room 1013, Municipal Building, on the following matters:*

CAL. NO. 165-28-BZ—Application, February 24, 1928, under section 21 of the building zone resolution, of Philip Freshman, applicant, on behalf of Roma Development Corp., owner, to permit in a business district the erection of a garage for the storage of more than five (5) motor vehicles; premises 1535-1547 Gravesend avenue, east side, 300 ft. south of Avenue M, Brooklyn.

CAL. NO. 211-28-BZ—Application, March 8, 1928, under section 21 of the building zone resolution, of William A. Schroeder, owner, to permit, partly in a business district and partly in a residence district, the erection and maintenance of a gasoline service station; premises North side of Braddock street (Rocky Hill road), 155 ft. east of 244th street, Queens Village, Borough of Queens.

CAL. NO. 264-28-BZ—Application, March 26, 1928, under sections 7g and 21 of the building zone resolution, of William F. Doyle, applicant, on behalf of Lottie Cutler, owner, to permit, partly in a business district and partly in a residence district the erection and maintenance of a gasoline service station; premises 120-06 Sutphin boulevard and 147-24 120th avenue, southwest corner, Jamaica, Borough of Queens.

CAL. NO. 49-28-BZ—Application, January 18, 1928, under section 21 of the building zone resolution, of Harry Rutheiser, applicant, on behalf of Gotham Realty Corp., owner, to permit in a residence district the erection and maintenance of a building to be used as stores on the first story and as dwellings above; premises 1710 University avenue, east side, 50 ft. north of Brandt place, The Bronx.

CAL. NO. 222-28-BZ—Application, March 12, 1928, under section 21 of the building zone resolution, of William F. Doyle, applicant, on behalf of Angelina R. Schad, owner, to permit in a business district the erection and maintenance of a gasoline service station; premises 1173-1179 Myrtle avenue and 2-8 Troutman street, Brooklyn.

CAL. NO. 38-28-BZ—Application, January 16, 1928, under section 21 of the building zone resolution, of Philip J. Sinnott, applicant, on behalf of Roth Estate, owner, to permit, partly in a business district and partly in a residence district, the erection and maintenance of a building to be used as a motor vehicle repair shop and garage for the storage of more than five (5) motor vehicles; premises 192-208 East 98th street, west side, 84 ft. 9 7/8 in. north of Kings Highway, Brooklyn.

CALENDAR

CAL. NO. 74-28-BZ—Application, January 26, 1928, under sections 7c and 21 of the building zone resolution, of Croker National Fire Prevention Engineering Co., applicant, substituted for Fox, Well & Wintner, on behalf of Roland Lievendag, owner, to permit, partly in a business district and partly in a residence district the alteration and extension in area of a garage for the storage of more than five (5) motor vehicles; premises 45-76 to 45-80 164th street (24th street), southwest corner of 46th avenue (Queens avenue), Flushing, Borough of Queens.

CAL. NO. 314-28-BZ—Application, April 5, 1928, under section 21 of the building zone resolution, of William F. Doyle, applicant, on behalf of 1738 Crotona Park Co., owner, to permit in a business district the erection and maintenance of a gasoline service station; premises 902-914 Westchester avenue, The Bronx.

CAL. NO. 14-27-BZ—Application, January 15, 1927, under section 21 of the building zone resolution, of McCooey & Conroy, applicants, substituted for James W. Byrnes, on behalf of Prior Realty Co., Inc., owner, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles (previously denied); premises 92-110 East 98th street, west side, 140 ft. south of Rutland road, Brooklyn.

WILLIAM E. WALSH, *Chairman.*

THE RESOLUTION—

(350-28-A)

WHEREAS, Crocker National Fire Prevention Engineering Co., for Maria J. Doscher, owner, filed, April 16, 1928, an appeal from an order of the fire commissioner, affecting premises 330 Rivington street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated April 14, 1927 (Order No. 15372-F), reads:

"1. Provide a separate and distinct system of auto-

matic sprinklers throughout building having at least one source of water supply, arranged and equipped as provided in the rules for fire extinguishing appliances adopted by the Board of Standards and Appeals May 24, 1917, as amended May 2, 1918, and January 21, 1919, effective February 17, 1919.";

and

WHEREAS, the building is non-fireproof, seven stories (62 ft. 3 in.) in height, 19 ft. 11 in. by 76 ft. 6 in., about 1,400 sq. ft. floor area; OCCUPIED: 1st, 2nd and 3rd stories, carpenter shop, total of 5 persons; 4th story, vacant; 5th story, manufacture of trunks, 2 persons; 6th and 7th stories, manufacture of radio cabinets, total of 3 persons; and

WHEREAS, the appellant claims that the exits are adequate, the building is only 62 ft. 3 in. in height, the floor areas are exceptionally small, the present conditions have existed for a great many years and the order is not a mandatory requirement of the law; in lieu of complying with the order the appellant proposes to provide such additional fire pails, bucket tanks, fire extinguishers, etc., as may be required.

Resolved, that the order of the fire commissioner be and it hereby is affirmed, and the appeal be and it hereby is denied.

326-28-A.

APPELLANT—Shreve & Lamb, for 521 Fifth Avenue, Inc., owner.

SUBJECT—Appeal from decision of the superintendent of buildings.

PREMISES AFFECTED—519-21 Fifth avenue and 2-4 East 44th street, Manhattan.

APPEARANCES—

For Appellant: Bassett Jones and Irwin Clavan.

For Administration—None.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

THE RESOLUTION—

(326-28-A)

WHEREAS, Shreve & Lamb, for 521 Fifth Avenue, Inc., owner, filed, April 6, 1928, an appeal from a decision of the superintendent of buildings, affecting premises 519-521 Fifth avenue and 2-4 East 44th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered March 25, 1928, reads:

"This amendment is disapproved with the following objection:

"14. Not more than two elevators must be placed in one shaft. Section 373, subdivision 13.";

and

WHEREAS, the building under construction is fireproof, thirty-seven stories in height, 104 ft. by 184 ft. 4 in. in area; OCCUPANCY: cellar, restaurant, 470 persons; 1st story, stores, 75 persons; 2nd story, offices, 100 persons; upper stories, offices, 85 persons on each story; and

WHEREAS, the appellant proposes to install three banks of elevators, one bank consisting of four elevators in a shaft with dividing partition, and two banks of three elevators each within a single shaft without dividing partitions; and

WHEREAS, the appellant claims that the emergency exit could not be used to advantage if one of the three cars were separated by a partition; furthermore, the appellant contends that greater safety and ease of removal of passengers from stalled or damaged cars would be attained if each of the three-car groups be operated within a single enclosure; and

MINUTES

WHEREAS, the elevator equipment of this building is laid out in three banks, one bank of two shafts with two cars to each shaft and two banks with three cars, these banks having public corridor intervening.

Resolved, that the decision of the superintendent of buildings be and it hereby is *modified*, and the appeal be and it hereby is *granted*, only as far as it affects the northerly and southerly banks of elevator, *on condition* that not more than three cars shall be incorporated in either bank, and that the requirements of the elevator rules shall be complied with in all other respects.

318-28-A.

APPELLANT—Segman & Abrahams, lessees.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—102 Fulton street, Manhattan.

APPEARANCES—

For Appellant: Robert Tipping.

For Administration: Inspector Meyer of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE RESOLUTION—

(318-28-A)

WHEREAS, Segman & Abrahams, for Bing & Bing, Inc., owner, filed, April 5, 1928, an appeal from an order of the fire commissioner, affecting premises 102 Fulton street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated March 19, 1928 (Order No. 42019-LC), reads:

"You are hereby notified that an inspection of premises, 102 Fulton St., Manhattan, used for the storage and use of oxygen and hydrogen, shows that the following must be done before permit requested by you can be issued:

"1. Have each operator of a blowpipe or other similar device or apparatus for heating, melting or welding apply for and secure a Certificate of Fitness;"

and

WHEREAS, the building is fireproof, eight stories in height, 50 ft. by 79 ft. 7 in. in area; OCCUPIED: 1st story, stores; upper stories, offices and tenant factories, 15 persons per story; appellant occupying the westerly portion of the Fulton street front of the seventh story of the building as a manufacturing jeweler; and

WHEREAS, appellant contends that there are two cylinders, each containing 220 cubic feet of oxygen, stored in the premises; that the persons operating the individual torches do not operate the oxygen regulator; that the large torch, for melting the platinum at the tank side, is operated by a member of the firm who has a certificate of fitness; and

WHEREAS, the operation of the equipment noticed in the order of the fire commissioner requires the use of oxygen and illuminating gas.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the operator of the oxygen tank shall obtain a certificate; that all heating devices and tanks containing gases shall be of an approved type as indorsed by the fire commissioner, and that the installation shall otherwise comply with all laws and requirements.

352-28-A.

APPELLANT—Croker Natl. Fire Prev. Eng. Co., for Davon Realty Corp., owner.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—57-59 East 11th street, Manhattan.

APPEARANCES—

For Appellant: Herman E. Horwood.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE RESOLUTION—

(352-28-A)

WHEREAS, Croker National Fire Prevention Engineering Co., for Davon Realty Corp., owner, filed, April 16, 1928, an appeal from an order of the fire commissioner, affecting premises 57-59 East 11th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated October 18, 1927 (Order No. 27336-F), reads:

"1. Provide a tank on roof of at least 3,500 gallons for the standpipe system, said tank to be so elevated that the bottom will be not less than 20 feet above the roof level. Sec. 20, Ch. 12, Code of Ordinances and the rules of the Board of Standards and Appeals;"

and

WHEREAS, the building is fireproof, eleven stories in height, 54 ft. by 103 ft. 3 in. in area; OCCUPIED: 1st story, shipping, 5 persons; 2nd story, offices, 22 persons; 3rd story, shipping, 7 persons; 4th story, winding yarn on spools, 25 persons; 5th and 6th stories, manufacture of clothing, 8 persons on each story; 7th story, manufacture of leather goods, 20 persons; 8th story, manufacture of clothing, 20 persons; 9th story, manufacture of knit goods, 20 persons; 10th story, cutting clothing, 6 persons; 11th story, manufacture of clothing, 20 persons; and

WHEREAS, the appellant claims that the building is fireproof and has been used practically the same as at present since 1902, the date of its erection; the premises are equipped with a two-source sprinkler system with central office connection; that the bottom of the existing 5,000-gallon roof tank is 10 ft. 1½ in. above the highest outlet and 22 ft. 7½ in. above the outlet in the highest full story; furthermore, the appellant proposes to connect the house supply to the side of the roof tank above the 3,500-gallon mark, leaving the reserve solely for standpipe purposes.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that there shall be maintained in the existing roof tank a reserve of not less than 3,500 gallons for the standpipe supply; that the building shall be equipped throughout with an approved two-source wet sprinkler system, with central office connection; that the standpipe system shall comply in all respects with the rules for an existing standpipe installation, and granted only so long as conditions as to use and occupancy remain substantially unchanged.

343-28-A.

APPELLANT—Samuel Rosenblum, for Astorloid Mfg. Co., Inc., lessee.

SUBJECT—Appeal from decision of the fire commissioner.

PREMISES AFFECTED—17-19 Hopkins street, north side of Hopkins street, 175 feet east of Nostrand avenue, Brooklyn.

APPEARANCES—

For Appellant: Samuel Rosenblum.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE RESOLUTION—

(343-28-A)

WHEREAS, Samuel Rosenblum, for the Astoroid Manufacturing Co., Inc., lessee, filed, April 13, 1928, an appeal from a decision of the fire commissioner, affecting premises 17-19 Hopkins street, Borough of Brooklyn; and

WHEREAS, the decision of the fire commissioner, rendered March 23, 1928 (re Alt. App. No. 123-1928), reads:

"1. Building must be equipped with an approved two-source sprinkler system consisting of a pressure tank and gravity tank supply."

and

WHEREAS, the building is non-fireproof, one story and basement in height, 50 ft. by 100 ft. in area; OCCUPIED by one tenant for the manufacture of celluloid novelties, 30 persons in the entire premises; and

WHEREAS, appellant contends that the building is equipped with an automatic sprinkler system, supplied from a 10,000-gallon tank situated on the roof of the four-story building adjoining to the west, and, in lieu of the required pressure tank, proposes to provide a 6-inch street connection to the city main; the main being fed two ways and the pressure being 45 pounds; and

WHEREAS, the owner of the premises under appeal, with the consent of the adjoining owner of the abutting four-story building, proposes to provide the sprinkler system with tank supply from the tank of the adjoining four-story building, together with a direct 6-inch street connection to the city main on his own premises.

Resolved, that the decision of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that these premises shall not be increased in height, area or dimension, and that the adjoining, abutting premises from which it is proposed to maintain the tank supply shall not be increased in height, area or dimension; that the second source of supply shall be maintained by providing a 6-inch street connection to a city main, fed two ways, and with a pressure at said street main of not less than 45 pounds at the front of the building, and that the sprinkler equipment on these premises shall comply with the rules and regulations in all other respects.

351-28-A.

APPELLANT—Croker Natl. Fire Prev. Eng. Co., for Sildon Realty Corp., owner.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—28-30 East 10th street, Manhattan.

APPEARANCES—

For Appellant: Herman E. Horwood.

For Administration: Inspector Maher of fire department.

THE RESOLUTION—

(351-28-A)

WHEREAS, Croker National Fire Prevention Engineering Co., for Sildon Realty Corp., owner, filed, April 16, 1928, an appeal from an order of the fire commissioner, affecting premises 28-30 East 10th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated March 28, 1928 (Order No. 23951-F), reads:

"1. Provide a tank on roof of at least 3,500 gallons capacity for the standpipe system, said tank to be so elevated that the bottom will be not less than 20 feet above the roof level. Section 20, Chapter 12, Code of Ordinances."

and

WHEREAS, the building is fireproof, twelve stories in height, 46 ft. 1 in. by 92 ft. 3½ in. in area; OCCUPIED: 1st story, stores, 17 persons; 2nd and 3rd stories, vacant; 4th story, office and printing, 20 persons; 5th story, manufacture of clothing, 15 persons; 6th story, manufacture of suits, 7 persons; 7th story, manufacture of novelty goods, 20 persons; 8th story, printing, 10 persons; 9th story, manufacture of shoes, 40 persons; 10th story, manufacture of tools and jewelry, 20 persons; 11th story, staining glass, 12 persons; 12th story, manufacture of coats, 19 persons; and

WHEREAS, the appellant claims that the building is fireproof and has been used practically the same as at present since 1902, the date of its erection; that the premises are equipped with a two-source sprinkler system, with central office connection; also a standpipe system, fed from a 3,000-gallon tank located 9 ft. above the outlet in top story hall; furthermore, the appellant contends that the present condition has been acceptable to the fire department since 1902 under the standpipe rules; and

WHEREAS, the existing standpipe equipment complies in all respects other than the height and capacity of the roof tank.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the premises shall be equipped throughout with an approved two-source wet sprinkler system, provided with a central office connection, and that the standpipe equipment shall be maintained in all other respects in accordance with the rules for an existing installation, and *on condition* that the building shall not be increased in height, area or dimension, and that the use and occupancy of the premises remains substantially unchanged.

THE RESOLUTION—

(116-28-BZ)

WHEREAS, Edward L. Kelly, for Cliffert Realty Corp., owner, filed, February 7, 1928, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station; premises 865-877 Ralph avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, October 2, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Remsen avenue, Ralph avenue and Church avenue are in business districts; and

WHEREAS, the decision of the fire commissioner, rendered December 24, 1927 (re Plan No. 4250-27), reads:

"1. A gasoline service station may not be permitted in a business district. Appeal may be taken to the Board of Standards and Appeals.";

and

WHEREAS, it is proposed to erect an office, bury four 550-gallon tanks and erect four pumps for the purpose of conducting a gasoline service station within a business district; and

WHEREAS, the board deemed that applicant was not entitled to relief under the provisions of section 21 of the building zone resolution on the ground of practical difficulty and unnecessary hardship.

Resolved, that the decision of the fire commissioner be and it hereby is affirmed, and that the application be and it hereby is denied.

THE RESOLUTION—

(414-20-BZ)

WHEREAS, Ashley & Booth, for Mark Ash, owner, filed, June 24, 1920, an application, under the building zone resolution, to permit in a residence district the erection and maintenance, for a temporary period of two years, of 80 individual garages, to be rented to persons not residing on premises; premises southwest corner of 186th street and Laurel Hill terrace, block 2149, lots 84, 86 and 87, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of appeals, at its special meeting, July 20, 1920, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Laurel Hill terrace and West 186th street are in business districts; and

WHEREAS, the decision of the superintendent of buildings, rendered May 26, 1920, in acting on N. B. 177-20, reads:

"1. The erection of the proposed garages in a residence district is unlawful, section 3, building zone resolution."

and

WHEREAS, each of the proposed buildings is to be of metal construction, one story in height, with a frontage of 10 ft. and a depth of 18 ft.; it is proposed to erect 80 of the buildings and to rent them to persons not residing on the premises; and

WHEREAS, the premises is located in an undeveloped section; and

WHEREAS, the application was granted July 20, 1920, for a temporary period and the period extended July 11, 1922, July 15, 1924, September 22, 1925, and September 20, 1927, and applicant requested a further extension of time.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted, for a temporary period of one year from the date of this action, limited to 80 single car garages, on block 2149, lot 84.

266-28-BZ.

APPLICANT—Samuel Rosenblum, for Forrest Park Mortgage Corp., Inc., owner.

SUBJECT—Application (re decision of the superintendent of buildings) under sections 7b, 7c and 21 of the building zone resolution, to permit the extension from a business district into a residence district of a proposed business building (store).

PREMISES AFFECTED—2370-2386 Myrtle avenue, southwest corner of Summerfield street, Ridgewood, Borough of Queens.

THE RESOLUTION—

(266-28-BZ)

WHEREAS, Samuel Rosenblum, for Forrest Park Mortgage Corp., Inc., owner, filed, March 26, 1928, an application, under the building zone resolution, to permit the extension, from a business district into a residence district, of a proposed business building (store); premises 2370-2386 Myrtle avenue, Ridgewood, Borough of Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting,

October 2, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Myrtle avenue, north side, west of 60th lane, is in a business district; Myrtle avenue, south side, west of a point 100 ft. west of Decatur avenue, is in a business district; Myrtle avenue, south side, east of a point 100 ft. west of Decatur avenue, is in an unrestricted district; Summerfield street, south of a point 100 ft. south of Metropolitan avenue, is in a residence district, and Forest avenue is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered March 5, 1928 (re Plan No. Alt. 779-28), reads:

"1. Extending a store into a residence district is contrary to Zone Law."

and

WHEREAS, the premises consist of an irregular shaped plot of ground having a frontage of 177.38 ft. on Myrtle avenue and 167.36 ft. on Summerfield street, upon which, on the Myrtle avenue front, there are located eight one-story stores; it is proposed to construct, on the Summerfield street front of the plot an additional store having a frontage of 72.36 ft. and one story and mezzanine (19 ft.) in height; an irregular portion of this store (approximately 1,000 sq. ft.) extends 23 ft. into the residence district, the remainder of the plot being in the business district; and

WHEREAS, the board deemed that applicant established his basis of appeal under sections 7b and 7c of the building zone resolution and that case comes within the provision of practical difficulty and unnecessary hardship under section 21 in that it would manifestly be a hardship to deprive the man of the reasonable use of his land which is an irregular lot and adjoins an iron foundry.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the use of the premises shall be restricted to retail mercantile stores or shops; that there shall be no roof signs erected, and that all necessary permits shall be obtained within six months and the work involved completed within nine months from the date of this action.

244-28-BZ.

APPLICANT—William R. Bayes, for Gravesend Realty Corp., owner.

SUBJECT—Application (re decision of the superintendent of buildings) under sections 7c and 21 of the building zone resolution, to permit in a residence district extending from a business district the erection and maintenance of a business building.

PREMISES AFFECTED—1602-1604 Kings highway, southeast corner of East 16th street, Brooklyn.

APPEARANCES—

For Applicant: George A. Marshall.

For Opposition: Grace Adelson and Nathan Kliger.

THE RESOLUTION—

(244-28-BZ)

WHEREAS, William R. Bayes, for Gravesend Realty Corp., owner, filed, March 21, 1928, an application, under the building zone resolution, to permit in a residence district, extending from a business district, the erection and maintenance of a business building; premises 1602-1604 Kings Highway, southeast corner of East 16th street, Borough of Brooklyn; and

MINUTES

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, October 2, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Kings Highway is in a business district; East 16th street is in a residence district, and Quentin road is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered March 6, 1928, reads:

"1. Application for proposed business structure extending into residential district is contrary to Art. II, Sec. 3, Zoning Resolution, and is hereby denied."

and
WHEREAS, the proposed building is to be of non-fireproof construction, three stories in height, with a frontage of 29 ft. 1 in. and a depth of 112 ft. 10½ in.; to be occupied as a business building with bank and stores on first story; and

WHEREAS, the board deemed that applicant substantiated his basis of appeal under section 7, subdivision c, and was entitled to a variation for that portion of his property within the residence use district.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted* for the erection and maintenance of a business building not exceeding three stories in height, *on condition* that no manufacturing use of any nature or description shall be conducted on any portion of these premises; that the portion of the premises within the residence use area shall not be conducted or maintained for any business permitted by law to operate on Sundays; that there shall be no advertising display of any nature or description within the residence use area of the premises; that the front elevation of the structure shall be of attractive architectural design, and that all permits required shall be obtained within nine months and any work involved shall be completed within eighteen months from the date of this action.

344-26-BZ.

APPLICANT—William F. Doyle, for Maple Court Garage, Inc., and Jennie Sorock, owners.

SUBJECT—Application for reopening—extension of time to procure permits—re application (decision of superintendent of buildings) under section 21 of the building zone resolution, to permit partly in a business district and partly in a residence district the alteration and extension in height of a garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—1612-1626 Church avenue, Brooklyn.

APPEARANCES—

For Applicant: William F. Doyle.

For Opposition: None.

ACTION OF BOARD—Application reopened and six months extension of time to obtain permits granted.

THE VOTE TO REOPEN AND EXTEND TIME—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle.... 4

Negative 0

Absent: Deputy Chief Martin..... 1

THE RESOLUTION—

(344-26-BZ)

WHEREAS, William F. Doyle, for Maple Court Garage, Inc., owner, filed, April 20, 1926, an application, under the building zone resolution, to permit, partly in a business district and partly in a residence district, the alteration and extension in height of a garage for the storage of more

than five motor vehicles; premises 1612-1626 Church avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, July 6, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Church avenue is in a business and residence district, Buckingham road is in a residence district and East 18th street is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered April 1, 1926, in acting on App. 4401-1926, reads:

"Contrary to Building Zone Resolution, Article 2, Par. 6 (Extension of garage in business and residential district).";

and

WHEREAS, the existing building is of non-fireproof construction, two stories in height, with a frontage of 136 ft. 3 in. and a depth of 148 ft.; occupied as a garage for the storage of more than five motor vehicles; it is proposed to extend second story portion to cover entire area; and

WHEREAS, the board deemed that applicant was entitled to relief under section 21 of the building zone resolution on the ground of practical difficulties and unnecessary hardship; and

WHEREAS, this application was granted by the board at its meeting, July 6, 1926, March 29, 1927, and December 27, 1927, on certain conditions, and applicant requested an extension of the time limit for obtaining permits and completing the work, which request was granted by vote of the board.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted* for the proposed extension as to the existing two-story building, *on condition* that rear yard of not less than 10 ft. in depth shall be maintained throughout the entire width of the property at the grade of the second floor level; that a skylight shall be provided at this level, glazed with wire glass, with fixed metal louvres attached to the rear wall; that there shall be no advertising or signs of any nature or description permitted on the rear or gable walls; that any ramps, if incorporated for the use of the second story shall set back from the Church avenue street front not less than 20 ft.; that there shall be no advertising display on the front of the building other than one projecting electric sign indicating the name and title of the garage, or flat wall signs as now exist; that any gasoline storage equipment installed shall be located at the street front, approximately at the center of the building; that the front elevation shall be finished in material and design substantially in accordance with the existing structure; that all required permits shall be obtained and the work completed within nine months from October 2, 1928.

253-28-BZ.

APPLICANT—William F. Doyle, for Ryan Bros., owners.

SUBJECT—Application (re decision of the fire commissioner) under sections 21, 7a, 7b and 7g of the building zone resolution, to permit partly in a business district and partly in a residence district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—7817-7825 Third avenue and 301-313 79th street, northeast corner, Brooklyn.

THE RESOLUTION—

(253-28-BZ)

WHEREAS, William F. Doyle, for Ryan Brothers, owner, filed, March 23, 1928, an application, under the building zone resolution, to permit, partly in a business district and partly in a residence district, the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 7817-7825 Third avenue and 301-313 79th street, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, October 2, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Third avenue is in a business district, 78th street is in a residence district and 79th street is in a residence district; and

WHEREAS, the decision of the fire commissioner, rendered March 22, 1928 (re Alt. No. 698-1928), reads:

"1. This garage may not be permitted at this location which is situated in a business and residence zone. Sec. 3-4 B. Z. Appeal may be taken to the Board of Standards and Appeals."

and

WHEREAS, the proposed building is to be of non-fireproof construction, two stories in height, with a frontage of 80 ft. on Third avenue, 120 ft. on 79th street and a depth of 92 ft. 10½ in., irregular; to be occupied as a garage for more than five motor vehicles and a gasoline selling station; and

WHEREAS, the board deemed that applicant substantiated his basis of appeal under section 7, subdivision g, and was therefore entitled to a variation.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the building shall not be erected in excess of two stories above grade; that there shall be no vehicular entrance of any nature or description within the residence use area of the premises; that the northerly and easterly walls shall be unpierced throughout their entire height and length; that the area of gasoline service station on 79th street shall not exceed a depth of 60 ft. easterly from Third avenue; that there shall be erected at the building line of the gasoline service station area a reinforced concrete curbing not less than 12 inches in height with vehicular driveways not exceeding 10 ft. in width; that the operation of the gasoline service station on these premises shall be confined exclusively and restricted to within the property lines of the premises; that there shall be no portable gasoline tanks or pumps permitted on any portion of the premises; that the exterior of the building on street front shall be finished with light-color face brick with architectural terra cotta or natural stone trimmings; that no advertising signs shall be erected or displayed, other than on electrically illuminated lamps of the gasoline pumps on any portion of the 79th street front; that there shall be no roof sign erected on any portion of the premises, and that all permits required shall be obtained within nine months and any work involved shall be completed within one year from the date of this action.

THE RESOLUTION—

(265-28-BZ)

WHEREAS, William F. Doyle, for Flostrand Realities, Inc., owner, filed, March 26, 1928, an application, under the building zone resolution, to permit, partly in a business district and partly in a residence district, the erection and maintenance of a garage for the storage of more than five motor vehicles; premises west side of Westchester avenue, 161.14 ft. south of Wilkinson avenue, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, October 2, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Westchester avenue, Wilkinson avenue and Sands place are in business districts; and

WHEREAS, the decision of the superintendent of buildings, rendered March 19, 1928 (re Applic. No. 842-27), reads:

"1. Erection of public garage for storage of more than five motor vehicles in business and residence district is contrary to provisions of Building Zone Resolution."

and

WHEREAS, the proposed building is to be of non-fireproof construction, one story and cellar in height, with a frontage of 104.46 ft. and a depth of 116.36 ft. and 136.24 ft., irregular; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the board disregarded the question of hardship in this application; and

WHEREAS, the board deemed that applicant substantiated his basis of appeal under section 7, subdivision g, and was therefore entitled to a variation; and

WHEREAS, the board deemed that the granting of this application under this basis of appeal will estop a further invasion of the street and shall not be held to be a commitment by this board of that street to prohibitive uses.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the structure shall not exceed in height one story above grade; that the rear and side walls shall be unpierced throughout their entire height and length; that the building shall be constructed fireproof throughout; that the exterior of the building on Westchester avenue front shall be finished with light-color face brick with architectural terra cotta or natural stone trimmings; that there shall be no advertising display of any nature or description, other than one projecting electric sign, located approximately at the center of the building on street front, and that all permits

MINUTES

required shall be obtained within nine months and any work involved shall be completed within one year from the date of this action.

AREAS FIXED.

(482-28-BZ)

The chairman presented and read a communication from Herman Levine requesting the board to fix the area deemed affected and within which to obtain consents for the erection and maintenance of a motor vehicle repair shop and garage; premises 403-413 West 124th street, Borough of Manhattan.

The following area was approved by the board:

Both sides of West 124th street from Amsterdam avenue to a point 100 ft. east of Morningside avenue and the property at the rear and within 50 ft. of the side lot lines of the premises in question.

(713-28-BZ)

The chairman presented and read a communication from Thomas W. Nunley requesting the board to fix the area deemed affected and within which to obtain consents for the erection and maintenance of a gasoline service station; premises 76 Metcalfe street and 425 Vanderbilt avenue and east side of Targes street, Stapleton, Borough of Richmond.

The following area was approved by the board:

Both sides of Targes (Simonson place) street, from a point 100 ft. south of Vanderbilt avenue to a point 400 ft. north of premises in question; both sides of Metcalfe street from Vanderbilt avenue to a point 400 ft. northwest of premises in question; both sides of Vanderbilt avenue from a point 100 ft. west of Hillside avenue to a point 400 ft. east of premises in question.

THE RESOLUTION—

(218-28-S)

WHEREAS, William F. Doyle, for Abraham Katz, owner, filed, March 12, 1928, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner and a decision of the superintendent of buildings, affecting premises 1793-1799 Jerome avenue, Borough of The Bronx; and

WHEREAS, the order of the fire commissioner, dated February 15, 1928 (Order No. 32755-LD), reads:

"1. Extend the interior stairway at the north side of building to the roof, as per Section 270 of the Labor Law.";

and

WHEREAS, the decision of the superintendent of buildings, dated July 24, 1928, reads:

"Slip Application 930-28 is disapproved with the following objections, viz:

"1. Northerly stair does not extend to the roof.
"2. The number of stairs required by the Labor Law not provided on all floors.";

and

WHEREAS, the building is non-fireproof, two stories in height, 75 ft. by 75 ft. in area; OCCUPIED: 1st story, stores, 12 persons; 2nd story, printing and photo novelties 16 persons; EXITS: two interior concrete stairways, the southerly stairway extending from the first story to roof, the northerly stairway extending from first to second story, enclosed in fire-resisting partitions with fireproof doors at openings; ROOFS of adjoining buildings: 15 ft. lower at north, 2 ft. lower at south; and

WHEREAS, the petitioner claims that the northerly stairway is provided with a skylight over; that the occupancy is very light and the exits are adequate.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted, only so far as it affects the northerly stairway, on condition that there shall be installed in the top stair hall a fixed double-rung iron ladder to scuttle in the roof, with egress from the roof to the building abutting at the south, on condition that the building shall be not increased in height or area and that the requirements of the labor law be complied with in all other respects.

296-28-S.

PETITIONER—M. J. Frank & Co., Inc., for Fifteen West Thirty-Ninth Street, Inc., owner.

SUBJECT—Variation of the labor law as cited in order of the fire commissioner.

THE RESOLUTION—

(296-28-S)

WHEREAS, M. J. Frank & Co., Inc., for Fifteen West Thirty-Ninth Street, Inc., owner, filed, April 2, 1928, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 15-19 West 39th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated July 14, 1926 (Order No. 99027-LD), reads:

"1. Remove all partitions not built of incombustible material, as per sections 263 and 270 of the Labor Law.";

and

WHEREAS, the building is fireproof, sixteen stories in height, 62 ft. 6 in. by 98 ft. 9 in. in area; OCCUPIED: ground floor, offices and salesroom, 25 persons; mezzanine, same occupancy, 15 persons; 2nd floor, manufacture of men's neckwear, 50 persons; 3rd floor, manufacture of hat frames, 40 persons; 4th, 5th, 6th, 7th, 8th, 9th, 10th and 11th floors, manufacture of ladies' hats, 60 persons per floor; 13th and 14th floors, offices, 15 persons per story; 15th floor, manufacture of ladies' hats, 40 persons; 16th floor, showroom and offices, 10 persons; pent house apartment, 2 persons; means of EGRESS consisting of two interior fireproof stairways, extending from the first story to the roof; partitions have been erected in the stair on the first story and on the mezzanine of wood, 7 ft. high; also wainscoting, approximately 7 ft. high, has been erected behind shelves on the first story; and

WHEREAS, petitioner contends that his lease expires in 1936; that the premises are equipped with a 100 per cent sprinkler system; that the store floor is entirely segregated from the public entrance or exits to any part of the building and from any portion of said building occupied by other tenants.

Resolved, that the order be and it hereby is affirmed, and that the petition be and it hereby is denied.

THE RESOLUTION—

-(439-28-S)

WHEREAS, Samuel Rosenblum, for 16 East 52nd Street Corp., owner, filed, May 10, 1928, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 16-20 East 52nd street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated November 7, 1927 (Order No. 28398-LD), reads:

"1. Enclose the accommodation stairway at east and west side of building at mezzanine and 1st story in partitions of fireproof material, all openings in same to be protected with approved fire doors, as per Section 270 of the Labor Law."

and

WHEREAS, the building is fireproof, fifteen stories in height, 75 ft. by 100 ft. 5 in. in area; OCCUPIED: 1st story, stores, 80 persons; 2nd to 8th stories, inclusive, show-rooms and factories, 60 persons each story; 9th to 15th stories, inclusive, offices, 60 persons each story; EQUIPPED with a sprinkler system and a fire alarm signal system; EXITS: two interior fireproof stairways, extending from the first story to the roof, enclosed in fireproof partitions with fireproof doors at openings; also a fireproof accommodating stairway, extending from cellar to second story, enclosed in fireproof partitions at cellar and second story, with fireproof doors, unenclosed at first and mezzanine stories; ROOFS of adjoining buildings: 6 stories lower at west and 13 stories lower at east; and

WHEREAS, the petitioner claims that the accommodating stairway was built when the building was erected and certificate of occupancy was issued which is still in force; that the stairway is used by one tenant who does no manufacturing; furthermore, that the stairway is shut off at top and bottom by fireproof enclosures.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted only on condition that the floor space through which these stairs pass shall remain in single tenancy, and that the opening at the cellar level shall be equipped with self-closing, fire-proof doors.

THE RESOLUTION—

(627-28-S)

WHEREAS, Sigmund Schuler, for Semon Bache & Co., filed, July 20, 1928, a petition for a variation from the requirements of the labor law, as cited in orders of the fire commissioner, affecting premises 636 Greenwich street, Borough of Manhattan; and

WHEREAS, the orders of the fire commissioner, dated July 5, 1928, read:

"Order No. 40346-LD:

"1. Enclose the interior stairway at the front of the building (Greenwich Street side) on the 1st story with partitions of fire resisting material, as per Section 271 of the Labor Law."

and

"Order No. 40347-LD:

"1. Remove the panic locks from all doors used for factory purposes on all floors leading to interior stairway at front of building (Greenwich Street), as per Section 272 of the Labor Law."

and

WHEREAS, the building is fireproof, eight stories (112 ft.) in height, 100 ft. 3 in. by 98 ft. 4 in. in area; OCCUPIED: 1st to 7th stories, inclusive, glass factory; 8th story, offices; 1st story, 21 persons; 2nd story, 11 persons; 3rd story, 19 persons; 4th story, 23 persons; 5th story, 29 persons; 6th story, none; 7th story, 30 persons; 8th story, 50 persons; EQUIPPED with a sprinkler system; EXITS: a fireproof stairway, extending from the first story to roof on the west side of the building, with EGRESS from the first story to Morton street; a non-fireproof stairway, enclosed from second story to roof in fireproof partition on the east side of the building, with EGRESS from Greenwich street on the first story through a corridor enclosed in partitions of plate glass; the doors to this stairway being equipped with panic bolts; a 45-degree fire escape in the rear court, extending from the roof to the first story, with EGRESS to the street through first story fireproof corridor; and

WHEREAS, petitioner requests permission to maintain panic bolts on the easterly stairway door and the glass enclosure in the first story of this stairway, and contends that there are two other standard means of egress and that the factory occupancy is non-hazardous, being glass cutting and silvering of mirrors.

Resolved, that the orders of the fire commissioner be and they hereby are affirmed, and that the petition be and it hereby is denied.

THE RESOLUTION—

(295-28-S)

WHEREAS, Shiman Brothers & Co., Inc., for Sobel-Mirken Holding Corp., owner, filed, April 2, 1928, a petition for a variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises 234-242 West 39th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered April 5, 1926 (Violation 1192-1926), reads:

"You are hereby notified that the building occupied as a storage, store and light mfg. and known as Number

MINUTES

234-242 West 39th Street, in the Borough of Manhattan, in the City of New York, does not conform to Section 270 LABOR LAW of the Building Code, in the respects noted below:

"In that of having erected partitions of combustible material on first to tenth floors inclusive, contrary to Section 270 of the Labor Law.

"You are hereby directed to remove said partitions forthwith.";

and

WHEREAS, the building is fireproof, ten stories in height, 84 ft. 3 $\frac{3}{4}$ in. by 105 ft. in area; OCCUPIED as a tenant factory (mostly cloaks and suits), 30 persons per story; petitioner occupying the tenth story for manufacturing jewelry, 50 persons; EQUIPPED with a sprinkler system; EXITS: two interior fireproof stairways, extending from the first story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, partitions constructed of combustible materials have been erected on the tenth story of the building; and

WHEREAS, petitioner contends that the 8 ft. high wood partitions in question form four small offices at the front of the building and that they do not interfere with the sprinkler system or with the exits of the building; and

WHEREAS, these partitions, separating exhibition booths within fireproof enclosed walls at the front of the building on the tenth story in single tenancy.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted on condition that these booths shall be located at the front of the building on the tenth story, located within a fireproof enclosed room, the entire floor in single tenancy and operation, on condition that the partitions shall not interfere with the operation of the sprinkler system.

440-28-S.

PETITIONER—Croker Natl. Fire Prev. Eng. Co., for 535 West 26th Street Corp., owner.

SUBJECT—Variation of the labor law as cited in order of the fire commissioner.

THE RESOLUTION—

(440-28-S)

WHEREAS, Croker National Fire Prevention Engineering Co., for 535 West 26th Street Corp., owner, filed, May 11, 1928, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 525-531 West 26th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated March 3, 1928, reads:

"Order No. 12829-LD:

"1. Enclose both interior stairways with partitions of fire-resisting material on the 1st and 3rd stories, east and west stairways, as per Rule 2, Board of Standards and Appeals, adopted July 29, 1924.";

and

WHEREAS, the building is non-fireproof, four stories in height, 85 ft. by 92 ft. 4 in. in area; OCCUPIED: 1st story, manufacture of paper boxes, 23 persons; 2nd story, manufacture of iron novelties, 40 persons; 3rd story, dyeing,

10 persons; 4th story, repairing utensils, 8 persons; EQUIPPED with a sprinkler system; EXITS: two interior wood stairways, extending from the first story to roof, enclosed in wood partitions with wood doors at openings; two fire escapes on the front of the building, having non-fireproof openings along the course thereof, extending from the second story to top story, and counterbalanced stairway to sidewalk; ROOFS of adjoining buildings: four stories higher at east; three stories lower at west; and

WHEREAS, the petitioner claims that the dyeing establishment on the third story uses 10 gallons of fluid, consisting of carbon tetrachloride and gasoline in equal parts, each week; that there are four means of exit from each story of the building; furthermore, the petitioner contends that the hallway and the partitions surrounding the same are protected by sprinkler heads, and under rule 6 of the board the stairways of a four-story building are not required to be enclosed; and

WHEREAS, the building is equipped throughout with an approved sprinkler system.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted on condition that the stair hall enclosures of the first story, left loft side, shall be covered with fire-retarding material; that at no time shall the combustible material stored and maintained on the third story exceed ten gallons; that any openings on the stair hall enclosures, first story, shall be equipped with self-closing fireproof doors; that the building shall be not increased in height or area, and this variation is granted so long as conditions as to occupancy and use remain unchanged.

81-27-S.

PETITIONER—William F. Doyle, substituted for Thomas B. Leahy, for Birdco Realty Corp., owner.

SUBJECT—Variation of the labor law, as cited in a decision of the superintendent of buildings (previously denied).

PREMISES AFFECTED—48-56 West 48th street, Manhattan.

APPEARANCES—

For Petitioner: William F. Doyle.

For Administration: Inspector Maher of fire department.

THE RESOLUTION—

(81-27-S)

WHEREAS, Thomas B. Leahy, for Birdco Realty Corp., owner, filed, January 25, 1927, a petition for a variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises 48-56 West 48th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered January 24, 1927, reads:

"1. Building is designed for 60 lbs. floor loads. 120 lbs. floor load required for factory use.

"2. Egress from interior stairways must be through a fireproof passageway direct to street.

"3. Area of glass in exterior windows must not exceed 720 sq. in. and said windows must be provided with self-closing devices.";

and

WHEREAS, the building is sixteen stories and mezzanine in height, 95 ft. by 100 ft. 5 in. in area; OCCUPIED as certified in Certificate of Occupancy No. 10866-1926: cellar,

MINUTES

storage, 39 persons; 1st story, stores, 75 persons; mezzanine, offices, 48 persons; 2nd to 16th stories, offices, 75 persons per story; it is proposed to maintain on the 12th, 13th and 16th stories several persons mending and cleaning watches in conjunction with jewelry trade occupying building; the means of EGRESS consisting of two interior fireproof stairways, one stairway extending from the roof to the mezzanine floor with fireproof passageway along the mezzanine to street, the other stairway extending from the roof to the first story with egress from the termination through 12 ft. 6 in. wide corridor in the first story to street, there being plate glass windows opening into this corridor approximately 594 sq. in. in area with panels of leaded colored glass above; windows on the rear and side of the building are glazed with wire glass 806 sq. in. in area; there are show windows in the first story 6 ft. by 5 ft. 6 in.; the upper windows in the front are 7 sq. ft. in area; and

WHEREAS, since the erection of these premises the building has been occupied principally by the jewelry trade, employing one or two craftsmen in the conduct of work incidental to the sale and exchange of gems and the adjustment of watch works to watch cases.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted, for a temporary period pending the expiration of the existing leases conducting such business, not to extend beyond 1931, on condition that the alleged manufacturing work extending throughout these premises, in small numbers, on either floor shall be restricted exclusively to the craftsmanship of the jewelry trade, such as setting and resetting of jewels and adjustment of watch works to watch cases; that the floors shall be posted not exceeding the present load, namely 60 pounds, and granted so long as the requirements of the certificate of occupancy as issued by the superintendent of buildings at the time of its completion shall be maintained.

THE RESOLUTION—

(429-28-S)

WHEREAS, Samuel Rosenblum, for 310 East 75th Street Corp., owner, filed, May 8, 1928, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 318-320 East 75th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated November 11, 1927 (Order No. 28494-LD), reads:

"Arrange the fire escape at rear of building serving as a required means of exit to conform to Sec. 274 of the Labor Law.

"Defects noted as follows:

"1. No safe egress from termination of fire escape to street."

and

WHEREAS, the building is non-fireproof, five stories in height, 49 ft. 4 in. by 90 ft. in area; OCCUPIED for the manufacture of furniture and cabinets; 1st story, 5 persons; 2nd story, 24 persons; 3rd story, 10 persons; 4th story, 9 persons; 5th story, 7 persons; EQUIPPED with a

sprinkler system and a fire alarm signal system; EXITS: an interior wooden stairway, extending from the first story to roof, enclosed in fire-retarding partitions with fireproof doors at openings; a fire escape on the rear of the building, having fireproof openings along the course thereof, extending from the second story to the roof and counterbalanced stairs to yard, with EGRESS from the termination of the fire escape to open yard adjoining at west; ROOFS of adjoining buildings: same level at east and west; and

WHEREAS, the petitioner claims that there is no fence on west side of yard where egress may be had to yard adjoining at west which is under the same ownership and control; furthermore, the petitioner contends that there is a passageway through the adjoining premises at west on first story leading direct to the street; and

WHEREAS, the stairs empty into the adjoining yard with egress therefrom through enclosed passageway direct to the street; these premises and the two adjoining premises in single ownership.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted on condition that the partition enclosing passageway on the easterly side shall have the space between the studs filled with terra cotta blocks, covered with cement mortar, and that the ceiling shall be fire-retarded in accordance with the rules of the board of standards and appeals or fire-retarded with cement mortar on wire lath supported on "T" iron construction, and so long as these premises and the two adjoining premises shall remain in single ownership.

THE RESOLUTION—

(513-28-S)

WHEREAS, Sigmund Schuler, for Anna Cohen, lessee, filed, June 5, 1928, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 1233 Second avenue, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated April 5, 1928 (Order No. 35034-LD), reads:

"1. Extend the interior stairway to the roof, as per Sec. 271 of the Labor Law.

"2. Provide an additional means of egress from 1st story remote from existing exit. Sec. 271 of the Labor Law.

"3. Arrange the fire escape at rear of building serving as a required means of egress so that same will conform to Sec. 271 of the Labor Law and the rules of the Board of Standards and Appeals, adopted Feb. 23rd, 1927.

"Defects noted as follows:

"1. No stairway from top balcony to roof.

"2. No safe egress from termination of fire escape to street.

"3. No fire doors opening to balconies.

"4. Windows on course of fire escape not fireproof, self-closing."

and

MINUTES

WHEREAS, the building is non-fireproof, three stories (35 ft.) in height, 25 ft. by 105 ft. in area at first story and 25 ft. by 75 ft. in area above; OCCUPIED as a carpenter's shop, 10 persons per story; EXITS: an interior wooden stairway, extending from the first story to top story (with iron ladder leading to scuttle in roof), enclosed in wooden partitions with wood doors at openings; a fire escape on the rear of the building having unprotected openings along the course thereof, extending from the top story to the one-story extension roof, with EGRESS from the termination of the fire escape by means of drop ladder from extension roof to 10 ft. wide open driveway to street; there is also a proposed doorway from rear of first story to this driveway; ROOFS of adjoining buildings: one story lower to south; and

WHEREAS, petitioner proposes to provide a fixed iron ladder to the scuttle in the roof and to provide a gooseneck ladder from top balcony to fire escape to the roof; to provide fire windows along the course of the fire escape; a hooked ladder on roof of extension, and a door from rear of first story to driveway and requests the acceptance of the proposed means of egress.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted, as to item 1, on condition that a double-rung iron ladder shall be provided from the top story to the scuttle in the roof; granted, as to item 2, on condition that the existing window at the rear of the first story shall be cut down, providing an open doorway to extend at the rear, first story, with egress by means of a 3 ft. 8 in. door to the yard to the north, with egress from the yard to Second avenue by means of covered driveway, both properties in the same ownership; granted, as to item 3, defect No. 1, on condition that a gooseneck ladder shall be provided from the top balcony to the roof; as to defect No. 2, on condition that a balcony, independent of roof construction, shall be provided at second story level connecting with property to the south; as to defects Nos. 3 and 4, on condition that at least one opening to fire escape on the second and third story shall be equipped with casement door; that the building shall be not increased in height or area, and this variation is granted so long as conditions as to occupancy and use remain unchanged.

THE RESOLUTION—

(421-28-S)

WHEREAS, Croker National Fire Prevention Engineering Co., for Yontiff L. Stern, et al., owners, filed, May 3, 1928, a petition for a variation from the requirements of the labor law, as cited in orders of the fire commissioner, affecting premises 244 Canal street, Borough of Manhattan; and

WHEREAS, the orders of the fire commissioner, dated November 9, 1927, read:

"Order No. 28460-LD:

"1. Enclose the interior stairway in partitions of fire resisting material from floor to ceiling at 1st story with approved fire doors at all openings, as per rules of the Board of Standards and Appeals adopted February 23rd, 1927.

"2. Provide an unobstructed passageway around hoistway leading from the foot of the stairway at east side of building to the street, said passageway to be not less than 3' in width as per Section 272 of the Labor Law.";

and

"Order No. 28461-LD:

"1. Arrange the fire escape at front of building which serves as a required means of exit so that same will conform to Section 271 of the Labor Law and the rules of the Board of Standards and Appeals, adopted February 23rd, 1927.

"Defects noted as follows:

(a) Windows opening to fire escape not fireproof, self-closing.

(b) No fire doors opening to balconies provided.

(c) Stairways connecting balconies not at an angle of 60 degrees.

(d) No stairway from lowest balcony to ground.

(e) No steps to sills provided.";

and

WHEREAS, the building is non-fireproof, five stories in height, 23 ft. by 60 ft. 4 in. in area at first story and 23 ft. by 32 ft. in area above; OCCUPIED: 1st story, store and restaurant, 6 persons; 2nd and 3rd stories, machine shop, 2 persons each story; 4th story, metal spinning, 6 persons; 5th story, brass turning, 7 persons; EXITS: an interior wooden stairway, extending from the first story to roof, enclosed in wood partitions with wood doors at openings; a fire escape on the front of the building, having fireproof openings along the course thereof, extending from the second story and drop ladder to sidewalk; ROOFS of adjoining buildings: same level at east and west; and

WHEREAS, the petitioner proposes to comply with all items of Order No. 28461-LD, except providing a counterbalanced stairway which, if provided, would decrease the light in store windows and obstruct the main entrance door; as to Order No. 28460-LD, item 1, the petitioner claims that the stairway is in the men's furnishing store, which occupancy is not one requiring the enclosure under the rules; as to item 2, that there is a wooden bulkhead platform about 7 ft. 2 in. above the floor on the first story and the requirement for a 3 ft. passageway, if provided, would destroy the use of the adjacent store; and

WHEREAS, there exists an unpierced partition substantially dividing the first story with the stairway in the easterly portion.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted, as to Order No. 28460-LD, item 1; granted, as to item 2, on condition that a substantial iron and steel platform bulkhead shall be substituted for the existing wooden bulkhead at entrance stair hall; granted, as to Order No. 28461-LD, only so far as it affects the counterbalanced stairway from the lowest balcony to ground, on condition that a drop ladder in guides shall be provided at both ends of the lowest balcony of the fire escape; that the building shall be not increased in height or area, and this variation is granted so long as conditions as to occupancy and use remain substantially unchanged.

WHEREAS, Samuel Rosenblum, for 310 East 75th Street Corp., owner, filed, May 8, 1928, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 310-316 East 75th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated November 11, 1927 (Order No. 28498-LD), reads:

"1. Arrange the fire escape at rear of building which serves as a required means of exit so that same will conform to Sec. 274 of the Labor Law and the rules of the Board of Standards and Appeals, adopted Feb. 23, 1927.

"Defects noted are as follows:

* * * * *

"3. No safe egress from termination of fire escape to street.";

and

WHEREAS, the building is non-fireproof, five stories in height, 100 ft. 8 in. by 60 ft. in area; OCCUPIED for the manufacture of mirrors, furniture, sashes, doors and pearl buttons: 1st story, 7 persons; 2nd story, 10 persons; 3rd story, 20 persons; 4th story, 19 persons; 5th story, 27 person; EQUIPPED with a sprinkler system and a fire alarm signal system; EXITS: an interior wooden stairway, extending from the first story to roof, enclosed in fire-retarding partitions with fireproof doors at openings; three fire escapes, one on the rear and two on the front of the building, having fireproof openings along the course thereof, extending from the second story to top story, with a counterbalanced stairs and drop ladder to sidewalk; the rear fire escape extending from ground to roof, with egress from termination of fire escapes to open yard adjoining at east; and

WHEREAS, the petitioner claims that there is no fence on east side of yard where egress may be had to yard adjoining at east which is under the same ownership and control; furthermore, the petitioner contends that there is also a passageway through the premises in question at the westerly end of first story leading direct to the street; and

WHEREAS, the stairs empty into the adjoining yard with egress therefrom through enclosed passageway direct to the street, these premises and the two adjoining premises in single ownership.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted on condition that the partition enclosing passageway on the easterly side shall have the space between the studs filled with terra cotta blocks covered with cement mortar, and that the ceiling shall be fire-retarded in accordance with the rules of the board of standards and appeals or fire-retarded with cement mortar on wire lath supported on "T" iron construction, and so long as these premises and the two adjoining premises shall remain in single ownership.

Adjourned 6.00 p. m.

WILLIAM J. O'GORMAN, Secretary.

CONCRETE RULES

USE OF HYDRATED LIME IN CONCRETE

Adopted by the Board of Standards and Appeals, April 19, 1920, under Cal. No. 153-20-S.

The use of hydrated lime in all classes of concrete construction shall not be prohibited when used in accordance with the conditions hereinafter set forth.

The hydrated lime shall conform with the standard specifications for this material which have been adopted by the American Society for Testing Materials.

The maximum amount of hydrated lime which may be used shall conform with the following table, all weights given being the amount of lime which may be incorporated for each ninety-five pound bag of Portland cement.

1-1½-3 Mix, 4 pounds of hydrated lime per bag of cement.

1-2-4 Mix, 5 pounds of hydrated lime per bag of cement.

1-2½-5 Mix, 6 pounds of hydrated lime per bag of cement.

For hand mixed concrete, the hydrated lime and Portland cement shall be well mixed while dry.

Hydrated lime shall not be used in concrete which is to be deposited under water.

FORMS FOR NOTICES TO PROPERTY OWNERS

If applicants, under the building zone resolution, desire copies of Form 7NO, for notices to property owners, such forms are not to be supplied by this office.

The applicant is entitled only to one copy of Form 7NO, properly filled out.

If he desires additional copies for his own convenience, in notifying property owners, he can obtain such copies from The O'Connell Press, 176 Park Row, Manhattan, at three cents each, postage to be added if the forms are to be supplied by mail.

RULES

FACTORY EXIT RULES ADOPTED FEBRUARY 23, 1927.

64-27-SR

STANDARD FACTORY EXITS

Section 1—Fire Escapes.

Rule 1. In any building erected prior to October 1, 1913, now occupied or to be occupied as a factory, more than five stories in height and not exceeding nine stories in height, nor in any case more than 90 ft. from curb level to top floor level, one of the required means of exit or escape under Section 271-1 of the Labor Law may consist of an outside fire escape, provided that:

(a) Any such fire escape hereafter erected shall comply with all the provisions of Section 273, labor law, and in addition thereto:

(1) The balconies and stairs shall be protected on the outside by substantial railings to a height of at least 4 ft. 6 in., measured from floor of balcony or center of stair tread, constructed of bars at least one-half ($\frac{1}{2}$) inch in diameter, spaced not more than six (6) inches on centers, or of substantial grille work, or of screening not less than No. 10 U. S. gauge wire with not more than one and one-half ($1\frac{1}{2}$) inch mesh, all rigidly braced;

(2) When there is safe egress from the roof of the building to any adjoining structure, the fire escape stairway shall continue to the roof, and if there be no safe means of egress, a gooseneck ladder shall be provided from the top story balcony to the roof.

(b) Any such fire escape erected prior to October 1, 1913, shall conform in every respect with the requirements of paragraph (a) of this rule, except that balconies may be not less than 3 feet in width; the connecting stairs not less than 20 inches in width, and placed at an angle not exceeding 60 degrees if the building is not over six stories in height, otherwise at an angle of 45 degrees.

Rule 2. In any building erected prior to October 1, 1913, now occupied or to be occupied as a factory, five stories or less in height, one of the required means of exit under Section 271 of the Labor Law may consist of an outside iron fire escape, provided that:

(a) Any such fire escape hereafter erected shall comply with all the provisions of Section 273, Labor Law.

(b) Existing fire escapes shall comply with all the provisions of Section 274, Labor Law and in addition thereto

(1) The balconies shall be not less than 3 feet in width.

(2) The rails around balconies and well holes and on stairways shall be not less than 3 feet in height.

(3) Passageways on the balconies shall be not less than 14 inches in the clear.

(4) At least one opening to each balcony shall be a single fireproof casement door at least 2 feet wide and at least 6 feet in height, except that where the distance between the sill and lintel will not permit of an opening 6 feet in height, a casement door not less than 4 ft. 6 in. in height will be permitted.

RULES

Rule 3. The single fireproof casement doors leading to all fire escape balconies shall open out and shall be self-closing. An easily operated door lock with knobs on both sides of the door shall be provided.

Such fire doors may be at window sill level if fixed iron step at least two feet wide, with risers not exceeding eight (8) inches, and treads not less than eight (8) inches are provided on the inside from floor level to sills properly secured.

Rule 4 (a) Any such fire escape erected subsequent to October 1, 1913, and prior to these rules taking effect, unless previously accepted as one of the required means of exit or escape by the administrative official having jurisdiction, shall conform in every respect to the provisions of these rules.

(b) A fire escape shall not hereafter be accepted as constituting one of the required means of exit or escape under Section 271-1 of the Labor Law, in any building erected prior to October 1, 1913, now occupied or to be occupied as a factory, exceeding nine stories in height, or more than 90 feet from curb level to top floor level.

Rule 5. All fire escapes shall be maintained structurally safe, properly painted, and kept clear of all obstructions.

Section 2—Enclosure of Factory Stairways.

Rule 6. Except as herein provided, in all factory buildings five stories or less in height, erected prior to October 1, 1913, in which there are more than twenty-five persons employed above the second story, all interior stairways, serving as required means of exit, and the landings, platforms and passageways connected therewith, shall be enclosed on all sides by partitions of fire-resisting material extending continuously from the lowest point of the stairway in accordance with the following schedule:

Number of stories	Contents combustible, no sprinkler	Contents non-combustible, no sprinkler	Contents combustible, and sprinkler	Contents non-combustible, and sprinkler
Three	Stairways Enclosed			
Four	Stairways Enclosed	Stairways Enclosed		
Five	Stairways Enclosed	Stairway Enclosed	Stairways Enclosed	

The term "contents" as used above means articles, goods, wares and merchandise, packed, stored, manufactured or in the process of manufacture.

The term "combustible" as used above means articles, goods, wares or merchandise which will burn or support combustion.

The term "sprinkler" as used above means an adequate automatic sprinkler equipment installed and maintained in good working order on each floor.

The term "story" as used above means that part of a building between any floor and the floor or roof next above;—the first story is that part of a building which is more than 50 per cent above the floor below and the floor next above the curb or average grade level.

Where the stairway extends to the top floor of the building, such partitions shall extend to the under side of the roof boarding. That portion of the under side of the roof beams within the stair enclosure shall be covered with fire resisting material, except in buildings with roofs of non-combustible material, in which case the partitions may stop at the under side of the roof.

Where the stairway is required to extend to the roof, the enclosure shall be so built as to form a bulkhead. The enclosure shall be ventilated by a skylight in the roof with louvres or ventilators, or exterior windows with ventilating sections at the top floor.

All openings in such partitions shall be provided with approved self-closing fire doors, except where such openings are in the exterior wall of the building.

The bottom of the enclosure shall be of fireproof material at least four inches thick unless the partition extends to the cellar bottom.

A horizontal exit, as defined in section 267 of the Labor Law, will be accepted as a compliance with this rule when both sides of the fire wall or walls are occupied on any factory floor by the same occupant.

Rule 7. Where there are occupancies on any story or part of a story involving the storage or use below the top story of the following materials and exceeding the amount specified, and there are more than 5 persons employed at manufacturing above such occupancy, the interior stairway serving as required means of egress shall be enclosed on that story with fire resisting material from floor to under side of floor above, including any exposed stair soffits, landings and passageways; openings shall be provided with approved self-closing fire doors.

Nitrocellulose in any shape or form, 10 lbs.

Volatile inflammable oils, 1 gal.

Volatile inflammable mixtures, 5 gals.

Combustible mixtures, 10 gals.

Paints, varnishes and lacquers, 10 gals.

Upholstering or mattresses, manufacturing or repairing

Cotton, rag and paper sorting, 1 ton.

Paper box manufacturing.

Restaurants and lunch rooms with cooking (not including tea, coffee or similar beverages).

The Board shall rule upon new occupancies as they arise and pass upon points under dispute.

When more than two stories are to be segregated, as above, the entire stairway shall be enclosed in fire-resisting material where there are more than 5 persons employed at manufacturing above the first story.

Rule 8. Required Exits and Enclosures of Stairways in Two-story Factory Buildings.

1. Required Exits.—In every two-story factory building erected prior to October 1, 1913, in which more than five persons are employed at manufacturing, there shall be provided from each story at least two means of exit or escape from fire remote from each other, one of which from every floor above or below grade shall lead to or open on an interior stairway which shall be enclosed, as hereinafter provided, or on an exterior enclosed stairway. The other may lead to such a stairway, or to a horizontal or grade exit, or to an exterior screened stairway, or to a fire escape conforming to section 273, Labor Law, or rule 2 of these rules. Except that exit door shall be a fire door, with substantial steps to the sills properly secured when sill is more than 8 inches above the floor level; and where there is no safe egress from the roof, a gooseneck ladder shall be provided from top balcony to the roof, except on the front of buildings.

Unobstructed egress from the foot of the fire escape or exterior screened stairway shall be as required by section 273, Labor Law, or to open adjoining yard with egress to the street. No point on any floor of such building shall be more than one hundred and fifty (150) feet distant from such an exit.

Rule 9. Enclosure of Stairways.—In two-story buildings where there are occupancies on any story or part

RULES

of a story involving the storage or use below the top story of any of the materials exceeding the amounts specified in Rule 7 and there are more than 5 persons employed at manufacturing above such occupancy, all interior stairways serving as required means of exit shall be enclosed from the lowest point of such stairway to the ceiling of the first floor by partitions of fire-resisting material, unless the building is provided with a wet sprinkler system, in which case such enclosure of stairways shall not be required. Such enclosures shall lead directly to a door opening outwardly to a street or road, or an open area affording unobstructed passage to a street or road. All openings in such enclosure shall be provided with fire doors equipped with self-closing devices.

All reference herein to "Enclosure of Stairways" shall be considered as applying only to required stairways.

Rule 10. Storage of Combustible Material Within Factory Stairway Enclosures.

In all factory buildings no articles or wares of any nature shall be kept or stored inside the limits of any stairway enclosure or unenclosed stairway, or on the landings, platforms or passageways connected therewith.

Section 3—Safe Egress from Roofs of Factory Buildings.

Rule 11. Interior stairways serving as required means of exit in factory buildings erected after October 1, 1913, and not exceeding five stories in height, and in buildings erected before October 1, 1913, now occupied or to be occupied as a factory, shall not be required to extend to the roof where there is no safe egress from the roof, under Sections 270, 271 and 272, Labor Law.

(a) When the roofs, or the top of the parapet wall of an adjoining building are more than eight feet below or more than five feet above the top of the parapet wall of the building in question, and there is no outside party wall fire escape, party wall exterior screened stairway, party wall balconies or bridges, or where any outside exits do not connect to adjoining buildings at roof level, or where there are no unbarred window openings five feet above the roof or parapet wall of the building in question.

(b) When the roof of the building in question has a pitch exceeding one foot in six feet of horizontal run.

Rule 12. (a) When there is no safe egress from the roof, as above described, there shall be in all cases at least a double-rung ladder at the top of the interior stairway, and within the interior stairway enclosure when stairway is enclosed. Such ladder shall be at least 18 inches in width and shall be properly secured at top and bottom. The ladder shall lead to a scuttle opening not less than 2 feet by 3 feet or be of such additional area as may be required to provide ample head room. The scuttle cover shall be hinged and of light weight construction, or be counter-balanced. An easily operated hook may be provided on scuttle cover.

(b) Where the stair bulkhead door opens within 10 feet from the open edge of the roof, an iron railing properly braced at least 3 feet high and at least 10 feet long shall be provided at the edge of roof.

SUBSTANDARD FACTORY EXITS.

Section 4—Fire Escapes.

Rule 13. When in addition to the required exits from any factory or factory building, there exist other means of egress which are not entirely in accordance with the requirements of the Labor Law and the Rules of the Board of Standards and Appeals, such means of egress may be retained under the following conditions:

(a) Fire Escapes.—All substandard fire escapes on factory buildings shall be maintained structurally safe, properly painted, and with the openings leading thereto, kept in good repair.

In lieu of a counter-balanced stairway, a drop ladder in guides with a back-drop gravity hook may be provided.

The drop ladder shall be of sufficient length to reach from the lowest balcony to the ground or safe landing place, with a passageway opening cut in the balcony rail, which rail shall be properly braced.

When such substandard fire escapes are located in a court, side or rear of a building, proper egress to a point of safety shall be provided, either to open adjoining yards, or the lowest balcony may be connected to an adjoining fire escape, exterior stairway, to the roof of adjoining extensions, or other means of egress satisfactory to the authorities having jurisdiction.

Substandard fire escapes shall be kept clear of all obstructions, shall not be used for fire drills, and shall not be considered as a basis for increase in occupancy.

Section 5—Stairways and Bridges.

Rule 14.—Interior Stairways.—All interior stairways not conforming to the requirements of the Labor Law or rules of the Board of Standards and Appeals may be retained, provided that egress to same is maintained unobstructed, halls are properly lighted, and all landings, passageways, etc., are maintained free and unobstructed. An easily operated panic bolt or other similar device may be installed at street exit door.

Rule 15.—Exterior Screened Stairways.—Exterior screened stairways not serving as a required means of egress shall be maintained structurally safe and properly painted, exits thereto and all platforms and passageways thereof shall be maintained unobstructed, and egress from termination shall be provided as required for substandard fire escapes in subdivision a.

Rule 16.—Horizontal Bridges.—Horizontal bridges and party wall balconies between buildings shall be maintained structurally safe and properly painted, and access thereto, and all passageways thereof shall be maintained unobstructed.

Rule 17. No sign of any character shall be placed at openings leading to these sub-standard exits.

WARNING

Notice is hereby given to all petitioners, appellants and applicants, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

First. That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

Second. That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

Third. That no plea of ignorance of the date of the hearing can be entertained in view of this publication and of the posting of the calendars on the bulletin board in the

offices of the board and of the further publication of the calendars in the daily press.

Fourth. That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

Fifth. That the business of the board is to dispose of all cases promptly, for the reason that the pendency of an appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of the appellant or petitioner to file necessary data, or by any other method of delay.

Sixth. That no appeal, application or petition will be accepted for filing unless, at the time of filing, all papers, plans and data required by law are supplied, as specified on the blank appeal, application or petition forms.

JOHN GUILFOYLE

CHIEF JOHN KENLON

WILLIAM J. O'GORMAN, Secretary

EDWARD V. BARTON, Chief Clerk

OFFICE—Municipal Building, Rooms 1001 to 1015.

TELEPHONE—WORTH 0184.

OFFICE HOURS—9 a. m. to 5 p. m. Saturdays 9 a. m. to 12 noon.

All communications should be addressed to the chairman of the board.

CONTENTS

This issue of the Bulletin contains, in the order given—

Docket.

Call of Clerk's Calendar.

The Trial Calendar.

Notices in Building Zone Cases.

Minutes of Regular Meeting, October 9, 1928, 10 a. m.

Minutes of Regular Meeting, October 9, 1928, 2 p. m.

Notice of Public Hearing on Amendments to Fuel Oil Rules.

Progress Report.

PUBLIC HEARINGS

Tuesdays, at 10 a. m. and 2 p. m.
Special meetings as published in this Bulletin.
Call of Clerk's Calendar, Tuesdays, at 2 p. m.
All hearings are held in Room 1013, Municipal Building, Manhattan.

HOURS FOR CONSULTATION

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

CALL OF CLERK'S CALENDAR

The Clerk's Calendar consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, October 16, 1928, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, October 23, 1928, at 2 o'clock.

The Clerk's Calendar is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

NOTICE TO APPELLANTS AND PETITIONERS

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and disposition of same expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

CALL OF CLERK'S CALENDAR

TUESDAY, OCTOBER 16, 1928, AT 2 P. M.

Building Zone Cases.

133-28-BZ.

APPLICANT—340 West 57th Street Corp., owner.
PREMISES—229-235 East 85th street, Manhattan.
APPLICATION, under sections 7e and 21 of the building
zone resolution,
TO PERMIT in a business district the erection and main-
tenance of a garage for the storage of more than
five (5) motor vehicles.

540-28-BZ.

APPLICANT—J. G. Shea, for Martin Lindky and Arthur
T. Doyle, owners.

PREMISES—70-01 36th avenue and 35-41 Kittay street
(Sprague street), northeast corner, Woodside, Bor-
ough of Queens.

APPLICATION, under section 21 of the building zone
resolution,
TO PERMIT the erection of a garage for more than five
(5) motor vehicles in a residence district.

894-28-BZ.

APPLICANT—Harry B. Kelter, for Max Epstein, owner.
PREMISES—16221 Willets Point boulevard and 15-02
Utopia parkway, southwest corner, Whitestone, Bor-
ough of Queens.

APPLICATION, under section 21 of the building zone
resolution,
TO PERMIT in a business district the erection and main-
tenance of a gasoline service station and a motor
vehicle repair shop.

369-28-BZ.

APPLICANT—Charles Kreymborg and Son, for Lojo
Realty Co., Inc., owner.

PREMISES—110-118 East 157th street and 745-759 Gerard
avenue, southwest corner, The Bronx.

APPLICATION, under sections 7b and 7c of the building
zone resolution,
TO PERMIT in a residence district, extending from a busi-
ness district, the erection of an apartment house
with stores on the first story.

1059-26-BZ.

APPLICANT—The John C. Wandell Co., for Sara G.
Thomas, owner.

PREMISES—153-10 to 153-16 Kissena road, northwest
corner of West avenue, Flushing, Borough of
Queens.

APPLICATION, under section 21 of the building zone
resolution,
TO PERMIT in a business district the erection and main-
tenance of a gasoline service station (previously
withdrawn).

557-28-BZ.

APPLICANT—William R. White, for Richard Carroll,
Inc., owner.

PREMISES—2717 Reservoir avenue, The Bronx.

APPLICATION, under section 21 of the building zone
resolution,
TO PERMIT in a residence district the erection and main-
tenance of sixteen (16) one-car garages and a
gasoline service station.

461-28-BZ.

APPLICANT—Edward L. Kelly, for Lewol Realty Corp.,
owner.

PREMISES—533-543 Glenmore avenue and 241-245 Van
Sicklen avenue, northeast corner, Brooklyn.

APPLICATION, under section 21 of the building zone
resolution,
TO PERMIT in a business district the erection and main-
tenance of a gasoline service station.

477-28-BZ.

APPLICANT—John J. Dunnigan, for The Roman Catholic
Church of The Holy Spirit, owner.

PREMISES—Southwest corner of Burnside avenue and
Grand Concourse, The Bronx.

APPLICATION, under sections 7c and 21 of the building
zone resolution,
TO PERMIT, partly in a business district and partly in a
residence district, the erection and maintenance of a
business building (stores).

CALENDAR

499-28-BZ.

APPLICANT—William P. Thomas, for Farlow Associates, Inc., owner.

PREMISES—Southeast corner of Undercliff avenue and West 175th street, The Bronx.

APPLICATION, under section 21 of the building zone resolution,

TO PERMIT in a residence district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

500-28-BZ.

APPLICANT—William P. Thomas, for Fort Lee Ferry Garage, Inc., owner.

PREMISES—Northwest corner of Bailey avenue and West Kingsbridge road, The Bronx.

APPLICATION, under section 21 of the building zone resolution,

TO PERMIT in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

501-28-BZ.

APPLICANT—William P. Thomas, for Patrick J. Murphy, owner.

PREMISES—Southwest corner of Cedar avenue and West Tremont avenue, The Bronx.

APPLICATION, under section 21 of the building zone resolution,

TO PERMIT in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

OCTOBER 16, 1928, 10 A. M.

Appeals from Administrative Orders.

465-28-A—850 ft. south of Goethal Bridge and 6,000 ft. east of Arthur Kill, Borough of Richmond.

468-28-A—544-546 West 43rd street, Manhattan.

469-28-A—124 Bleecker street, Manhattan.

552-28-A—880-890 Columbus avenue, Manhattan.

Building Zone Applications.

NOTICE IS HEREBY GIVEN by the board of standards and appeals of a public hearing under the provisions of the building zone resolution, *Tuesday morning, October 16, 1928, at 10 o'clock, in Room 1013, Municipal Building, on the following matters:*

CAL. NO. 178-28-BZ—Application, February 29, 1928, under section 21 of the building zone resolution, of Rosenson & Lorence, applicants, on behalf of Charles Uhlinger, owner, to permit in a business district the erection and maintenance of a gasoline service station; premises 2-6 Herbert street and 153-159 Richardson street, Brooklyn.

CAL. NO. 569-27-BZ—Application, May 20, 1927, under sections 7g and 21 of the building zone

resolution, of William F. Doyle, applicant, on behalf of Delaney & Otten Co., Inc., owner, to permit in a business district the erection and maintenance of a gasoline service station (previously denied); premises southeast corner of Fourth avenue and 12th street, Brooklyn.

CAL. NO. 540-27-BZ—Application, May 16, 1927, under sections 7g and 21 of the building zone resolution, of F. Matthew Buermann, applicant, substituted for Henry J. Nurick, on behalf of Abraham Goldinger, owner, to permit in a business district the erection and maintenance of a gasoline service station (previously denied); premises 725-727 Bedford avenue, Brooklyn.

CAL. NO. 1237-27-BZ—Application, April 24, 1927, under sections 7g and 21 of the building zone resolution, of Kate Ruchlis and Israel Berkenfeld, applicants and owners, to permit in a business district the erection and maintenance of a gasoline service station (previously withdrawn); premises 897-901 Bedford avenue, northeast corner of Willoughby avenue, Brooklyn.

THE RESOLUTION—

(390-28-A)

WHEREAS, L. E. Driver, chief engineer, for New York Dock Co., owner, filed, April 24, 1928, an appeal from an order of the fire commissioner, affecting premises 210 Furman street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated March 17, 1928 (Order No. 33979-F), reads:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure."

and

WHEREAS, the building is of reinforced concrete construction, four stories (52 ft. 3 in.) in height, 100 ft. by 200 ft. (20,000 sq. ft.) in area; OCCUPIED for the storage of automobile tires: 1st story, 19 persons; 2nd, 3rd and 4th stories, total of 14 persons; and

WHEREAS, the appellant claims that the building is provided with an approved automatic sprinkler system; that the immediate vicinity is well supplied with fire hydrants and fire alarm boxes; furthermore, that the exit facilities consist of two remote means of egress.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and that the appeal be and it hereby is *granted*, so long as the premises remain in single tenancy and operation and that the building shall be not increased in height, area or dimension.

252-28-A.

APPELLANT—New York Furniture Exchange Bldg., Inc., lessee.

SUBJECT—Appeal from order of the superintendent of buildings.

PREMISES AFFECTED—119-131 East 32nd street, 118-130 East 33rd street, and 198-212 Lexington avenue, Manhattan.

APPEARANCES—

For Appellant: Robert H. Koehler.

ACTION OF BOARD—Appeal denied.

THE VOTE TO GRANT—

Affirmative 0
Negative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon 5
Absent 0

THE RESOLUTION—

(252-28-A)

WHEREAS, New York Furniture Exchange Building, Inc., for Thirty-Third Street Realty Holding Corp., owner, filed, March 23, 1928, an appeal from an order of the superintendent of buildings, affecting premises 119-131 East 32nd street, 118-130 East 33rd street and 198-212 Lexington avenue, Borough of Manhattan; and

WHEREAS, the order of the superintendent of buildings, dated January 25, 1928 (Order No. 405-28), reads:

"You are hereby notified that the building occupied as offices and showrooms and known as Number 119-31

E. 32nd St., 118-30 E. 33rd St. and 198-212 Lexington Avenue, in the Borough of Manhattan, in The City of New York, does not conform to section 355 of the Building Code, in the respects noted below:

"In that of erecting and maintaining unlawful combustible partitions on all floors of the above fireproof building;"

and

WHEREAS, the building is fireproof, sixteen stories in height, 197 ft. 6 in. by 150 ft. in area; OCCUPIED: 1st story, stores; upper stories, exhibition and showrooms for wholesale furniture, approximately 30 persons per story; and

WHEREAS, partitions constructed of combustible materials have been erected on all stories above the first story of the building; and

WHEREAS, appellant contends that the partitions in question form offices which occupy a very small area of the spaces rented; that there are several sprinkler heads in each office; that the partitions do not interfere with the sprinkler system or with the exits from the building.

Resolved, that the order of the superintendent of buildings be and it hereby is *affirmed*, and that the appeal be and it hereby is *denied*.

359-28-A.

APPELLANT—Bark & Djourup, Inc., for Alan Realty Co., owner.

SUBJECT—Appeal from decision of the superintendent of buildings.

PREMISES AFFECTED—1384-1388 Broadway and 118 West 38th street, southeast corner, Manhattan.

APPEARANCES—

For Appellant: Erhard Djourup.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE TO GRANT—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon 5
Negative 0
Absent 0

THE RESOLUTION—

(359-28-A)

WHEREAS, Bark & Djourup, Inc., for Alan Realty Co., owner, filed, April 17, 1928, an appeal from a decision of the superintendent of buildings, affecting premises 1384-1388 Broadway and 118 West 38th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered April 11, 1928, reads:

"28. Not more than 2 elevators may be permitted in a single shaft. Section 373, subdivision 13 of Building Code;"

and

WHEREAS, the building under construction is fireproof, twenty-three stories in height, 78 ft. ¼ in. by 120 ft. 2 in., irregular, in area; OCCUPIED: 1st story, stores, 30 persons; 2nd story, bank, 30 persons; upper stories, 25 per cent manufacturing, 73 persons on each story; and

WHEREAS, the appellant proposes to install four passenger cars separated in pairs by a fireproof partition and three combination freight and passenger cars in a single shaft without dividing partitions; and

WHEREAS, the appellant claims that in case of emergency greater safety would be attained in the removal of passengers when there is no single elevator isolated by dividing partitions; furthermore, the appellant contends that all other requirements of the law will be complied with.

Resolved, that the decision of the superintendent of buildings be and it hereby is *modified*, and that the appeal be and it hereby is *granted*, only so far as it affects the service bank of elevators, on condition that this service elevator shaft shall not at any time be equipped with more than

MINUTES

three elevator cars and that the elevator equipment shall be installed and maintained in accordance with the rules in all other respects.

385-28-A.

APPELLANT—Daniel J. McParland, for Vivian Investing Corp., owner.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—15 East 31st street, Manhattan.

APPEARANCES—

For Appellant: Charles H. Young.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon 5

Negative 0

Absent 0

THE RESOLUTION—

(385-28-A)

WHEREAS, Daniel J. McParland, for Vivian Investing Corp., owner, filed, April 24, 1928, an appeal from an order of the fire commissioner, affecting premises 15 East 31st street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated February 15, 1928 (Order No. 32925-F), reads:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure."

and

WHEREAS, the building is fireproof, eight stories (87 ft. 1 in.) in height, 20 ft. by 86 ft. in area; OCCUPIED: 1st story, restaurant, 4 persons; 2nd to 8th stories, inclusive, stock rooms of women's clothing, not more than 5 persons on each story; one person employed at factory work on each of the 7th and 8th stories; and

WHEREAS, the appellant claims the building is provided with an automatic wet sprinkler and all necessary fire appliances on each story; that the building has no hazardous exposures and is accessible to fire apparatus from East 31st street, also from a rear court yard; furthermore, that the height of the building is only 2 ft. 1 in. above the height which would not require the installation of standpipes; and

WHEREAS, the premises are equipped throughout with a sprinkler system with a 3,500-gallon tank supply.

Resolved, that the order of the fire commissioner be and it hereby is modified, and that the appeal be and it hereby is granted on condition that the building shall be not increased in height or area, and so long as conditions as to occupancy and use remain substantially unchanged.

381-28-A.

APPELLANT—Croker Natl. Fire Prev. Eng. Co., for Meyer Auerbach, owner.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—7 Great Jones street, Manhattan.

APPEARANCES—

For Appellant: Herman E. Horwood.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon 5

Negative 0
Absent 0

THE RESOLUTION—

(381-28-A)

WHEREAS, Croker National Fire Prevention Engineering Co., for Meyer Auerbach, owner, filed, April 23, 1928, an appeal from an order of the fire commissioner, affecting premises 7 Great Jones street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated June 11, 1927 (Order No. 22668-F), reads:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure."

and

WHEREAS, the building is fireproof, eight stories (97 ft. 8 in.) in height, 25 ft. 1 in. by 100 ft. in area at first story and 25 ft. 1 in. by 90 ft. in area above; OCCUPIED: 1st story, paper store, 2 persons; 2nd and 3rd stories, millinery, total of 21 persons; 4th story, tailor, 7 persons; 5th story, stock room, 1 person; 6th and 7th stories, millinery, 10 persons on each story; 8th story, vacant; and

WHEREAS, the appellant claims that the interior stairs are enclosed with fireproof material; a fire escape is provided on the rear of the building; the premises are equipped with an interior fire alarm system; fire pails and fire extinguishers are distributed throughout; the floor areas are small and the occupancy is light; furthermore, the appellant contends that the building has been used in the same manner since 1897, the date of erection, at which time it complied with the standpipe requirements; and

WHEREAS, the building complied with the then existing rules when erected.

Resolved, that the order of the fire commissioner be and it hereby is modified, and that the appeal be and it hereby is granted on condition that the building shall be not increased in height or area; that there shall be distributed throughout the premises, as directed by the fire commissioner, such auxiliary fire-fighting appliances as he shall deem necessary, and so long as conditions as to occupancy and use remain substantially unchanged.

374-28-A.

APPELLANT—Croker Natl. Fire Prev. Eng. Co., for Lathrop Paper Co., Inc., owner.

SUBJECT—Appeal from order of the fire commissioner.

THE RESOLUTION—

(374-28-A)

WHEREAS, Croker National Fire Prevention Engineering Co., for Lathrop Paper Co., Inc., owner, filed, April 20, 1928, an appeal from an order of the fire commissioner, affecting premises 155 Perry street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated January 25, 1928 (Order No. 41093-LC), reads:

"1. Cut off the room or rooms in which the heating apparatus and oil burning device is installed from the

MINUTES

rest of the building by fireproof partitions, ceilings and floors constructed of not less than 8 inches for brick, not less than six inches for stone or cinder concrete, or hollow blocks of terra cotta, concrete or gypsum, and not less than 4 inches for stone or cinder concrete if properly reinforced with steel, and such rooms shall have entrance from the street, court or yard only and shall be ventilated to the outer air, as per Rule 20-C of the Fuel Oil Rules.”;

and

WHEREAS, the building is fireproof, eight stories in height, 65 ft. 5 in. by 92 ft. 2 in. in area; OCCUPIED: cellar, paper storage, no occupancy; 1st story, shipping, 6 persons; 2nd story, offices, 25 persons; 3rd story, shipping, 6 persons; upper stories, storage, 10 persons throughout; a fuel oil burning system having been installed, consisting of a tank buried below the cellar floor, connected by piping to a burner located in the cellar; and

WHEREAS, the appellant claims that the ceiling of the room in which the burner is located is fireproof, the enclosing walls are 3-inch gypsum blocks with a fireproof self-closing door communicating with the cellar, also an engineer's ladder extending to an iron grating trap door in shipping platform at first story; furthermore, the applicant contends that the building is provided with a standpipe system and a sprinkler system; that the premises were erected in 1912 and are occupied throughout by one tenant.

Resolved, that the order of the fire commissioner be and it hereby is affirmed, and the appeal be and it hereby is denied.

375-28-A.

APPELLANT—Croker Natl. Fire Prev. Eng. Co., for Simon Gasner & Sons Co., owner.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—447-457 Sutter avenue and 259 Junius street, Brooklyn.

APPEARANCES—

For Appellant: Herman E. Horwood.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

Absent	0

THE RESOLUTION—

(375-28-A)

WHEREAS, Croker National Fire Prevention Engineering Co., for Simon Gasner and Sons Co., owner, filed, April 20, 1928, an appeal from an order of the fire commissioner, affecting premises 447-457 Sutter avenue and 259 Junius street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated January 21, 1928 (Order No. 31751-F), reads:

“1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure.”;

and

WHEREAS, the building is fireproof, basement, one and two stories in height, 241 ft. by 23 ft. 10 in. and 105 ft., irregular (19,000 sq. ft. area), at basement and first story and 61 ft. by 105 ft. (6,400 sq. ft. area) at second story; OCCUPIED: basement, storage of plumbing fixtures, no occupancy; 1st story, stores and shipping, 30 persons; 2nd story, music studio and business school, 50 persons; and

WHEREAS, the appellant claims that the first story is divided into two floor areas, the larger being 9,500 sq. ft.:

furthermore, the appellant contends that the premises are open and accessible from all sides, also that fire pails and fire extinguishers are distributed throughout; and

WHEREAS, the order is predicated on the area of the premises only, the building being but one story in height with a two-story frontage at the intersection of the two street fronts.

Resolved, that the order of the fire commissioner be and it hereby is modified, and that the appeal be and it hereby is granted on condition that the building shall be not increased in height, area or dimension, and that there shall be distributed throughout the premises such auxiliary fire-fighting appliances as shall be directed by the fire commissioner.

373-28-A.

APPELLANT—Croker Natl. Fire Prev. Eng. Co., for Day & Meyer-Murray & Young, Inc., owner.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—305-307 East 61st street, Manhattan.

APPEARANCES—

For Appellant: Herman E. Horwood.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

THE RESOLUTION—

(373-28-A)

WHEREAS, Croker National Fire Prevention Engineering Co., for Day & Meyer-Murray & Young, Inc., owner, filed April 20, 1928, an appeal from an order of the fire commissioner, affecting premises 305-307 East 61st street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated December 28, 1927 (Order No. 17527-F), reads:

“1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure.”;

and

WHEREAS, the building is fireproof, ten stories in height, 49 ft. 6 in. by 125 ft. 6 in. (6,200 sq. ft. area) at first story and 49 ft. 6 in. by 120 ft. (5,900 sq. ft. area) above; OCCUPIED: 1st story, office, 7 persons; upper stories, household storage, total of 5 persons; and

WHEREAS, the appellant claims that the building is provided with a standpipe system consisting of a 2½ inch riser located adjacent to stair hall, 2½ inch outlets on each story, a 5,000-gallon roof tank, the bottom of which is 11 ft. 6½ in. above the outlet in top story and fed by an electric pump in the cellar; that the building is provided with an automatic fire alarm system with two central office boxes, and the premises are inspected hourly by means of a watchman's clock system; furthermore, the appellant contends that the existence of the present standpipe system during the past thirty years is sufficient evidence of its acceptance by the fire department.

Resolved, that the order of the fire commissioner be and it hereby is modified, and that the appeal be and it hereby is granted on condition that a 4-inch standpipe shall be installed in place of the existing 2½-inch, connecting to the existing tank; that the building shall be equipped with an automatic fire alarm system with central office connection, and that the equipment otherwise shall comply with the rules in all respects.

THE RESOLUTION—

(233-28-A)

WHEREAS, The Coward Shoe Co., owner, filed, March 15, 1928, an appeal from an order of the fire commissioner, affecting premises 260-274 Greenwich street and 263-265 Washington street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated February 15, 1927 (Order No. 10086-F), reads:

"1. Install a standpipe system with risers 4 inches in diameter, tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure. Each outlet to be provided with sufficient feet of 2½ inch standard hose attached thereto."

and

WHEREAS, the premises consist of a group of non-fireproof three, four and five-story buildings with a total frontage of 165 ft. and a depth of 83 ft. 6 in.; one building known as No. 268 Greenwich street, extending through to 265 Washington street, the division walls having been removed in the first story to make an open store; portions of the upper stories being still subdivided; means of EGRESS consist of an interior fireproof stairway at the northerly end of the Greenwich street front, extending from the first story to the third story, enclosed in fireproof partitions with fireproof doors at the openings; a fireproof enclosed stairway on the Murray street front, extending from the first story to the fifth story, with fireproof doors at the openings; a non-fireproof stairway at the Greenwich street front in building known as No. 264 Greenwich street, extending from the first story to the fourth story, enclosed in fireproof partitions in the first story and wood partitions above; the stairway in premises No. 266 Greenwich street extending from the second story to the roof is enclosed in fireproof partitions in the second story and wood partitions in the third story; a stairway in the Washington street section of the building extending from the first story to the third story, enclosed in wood partitions; and

WHEREAS, appellant contends that there is only one building of approximately 1,700 sq. ft., which is five stories in height, all the other portions of the structure not exceeding 40 ft. in height, and that the building is equipped with a one-source sprinkler system with a 10,000-gallon gravity tank and a 7,500-gallon pressure tank and supervised watchman's service and that fire pails and fire extinguishers are placed throughout the premises; and

WHEREAS, the building is equipped with an approved sprinkler system.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and that the appeal be and it hereby is *granted on condition* that the building shall be not increased in height or area and shall be maintained in single tenancy and operation, so long as conditions as to occupancy and use remain unchanged, and that the existing sprinkler equip-

ment shall be maintained in accordance with the rules now in force.

182-28-A.

APPELLANT—Pressinger, Newcombe, Cunningham & Wigg, for Chelsea Fibre Mills, owner.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—1155-1205 Manhattan avenue and 99-105 Commercial street (Bldgs. Nos. 1, 2, 3, 4, 5, 6, 8, 9 and 10), Brooklyn.

APPEARANCES—

THE RESOLUTION—

(182-28-A)

WHEREAS, Pressinger, Newcombe, Cunningham & Wigg, for Chelsea Fibre Mills, owner, filed, February 29, 1928, an appeal from an order of the fire commissioner, affecting premises 1155-1205 Manhattan avenue and 99-105 Commercial street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated January 12, 1928 (Order No. 31421-F), reads:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure. Each outlet to be provided with sufficient feet of 2½ inch standard hose attached thereto."

and

WHEREAS, the premises consist of a series of buildings along Newtown Creek and Manhattan avenue, occupied by the plant of Chelsea Fibre Mills, the center portion of the plant being a one-story building, 37,500 sq. ft. in area; on the Newtown Creek front there is a six-story building, 16,500 sq. ft. in area, also an eight-story building, 5,700 sq. ft. in area; on the Manhattan avenue front there is a four and five-story building, 9,000 sq. ft. in area, and a six-story building, 7,700 sq. ft. in area, and on the Commercial street front there is a six-story building, 4,600 sq. ft. in area; there are two other one-story structures, one 3,000 sq. ft. in area and one 3,500 sq. ft. in area, the buildings being non-fireproof, mill type construction and are used for dyeing, packing, spinning and carpet and weaving departments and storage and shipping; the buildings being EQUIPPED with a 100 per cent sprinkler system and a dry standpipe system, having four-inch risers, the risers being located in the enclosed fireproof stairways; the system is supplied from a twenty-inch suction line from Newtown Creek and has three pumps, two steam pumps and a one-thousand-gallon-per-minute electrical pump; the buildings are equipped with an internal mill fire alarm system having twenty-seven stations with break-glass tops; the premises are also equipped with a fire brigade; the means of EGRESS are four enclosed fireproof stairways, one in section No. 1 on the Newtown Creek front, two in Section No. 2 and one in Section No. 4; there are fire escapes on the Newtown Creek front and on the Manhattan avenue front; and

WHEREAS, appellant contends that there is auxiliary fire equipment in the nature of 220 fire pails and 117 two and one-half gallon extinguishers.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and that the appeal be and it hereby is

MINUTES

granted, only so far as it affects the roof tank for standpipe supply, on condition that a 6-inch branch shall be taken from the existing 8-inch city main connection to supply the standpipe; that there shall be installed on the Manhattan avenue frontage two 6-inch siamese connections; that all standpipe risers shall be connected to common header and fire pumps shall be checked against the siamese; that the building shall be not increased in height or area, so long as conditions as to occupancy and use remain substantially unchanged.

344-28-A.

APPELLANT—Samuel Rosenblum, for 310 East 75th Street Corp., owner.

SUBJECT—Appeal from orders of the fire commissioner.

PREMISES AFFECTED—310-322 East 75th street, Manhattan.

APPEARANCES—

For Appellant: Samuel Rosenblum.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.
THE VOTE—

Absent 0

THE RESOLUTION—

(344-28-A)

WHEREAS, Samuel Rosenblum, for 310 East 75th Street Corp., owner, filed, April 13, 1928, an appeal from orders of the fire commissioner, affecting premises 310-322 East 75th street, Borough of Manhattan; and

WHEREAS, the orders of the fire commissioner, dated November 11, 1927, read:

“Order No. 28489-F:

“1. Provide iron shutters at all openings in the exterior wall above 1st story * * * at east and south sides of building. * * *”;
and

“Order No. 28490-F:

“1. Provide iron shutters at all openings in the exterior wall above 1st story * * * at east and west sides of building. * * *”;
and

“Order No. 28493-F:

“1. Replace the missing shutters with proper iron shutters at all openings in the exterior wall above 1st story * * * at rear of building. * * *”;
and

WHEREAS, the premises consist of a group of buildings, non-fireproof, five stories in height, with a total frontage of 175 ft. and depths of 60 ft., 70 ft. and 90 ft.; OCCUPIED—No. 310-316: 1st story, manufacturing mirrors and machinery, 7 persons; 2nd story, manufacturing furniture and upholstery and storage, 10 persons; 3rd story, manufacturing furniture and cabinets, 20 persons; 4th story, manufacture of furniture, sash and doors, 19 persons; 5th story, manufacturing furniture and pearl buttons, 27 persons; No. 318-320: 1st story, manufacturing cabinets, 5 persons; 2nd story, manufacturing furniture, 24 persons; 3rd story, manufacturing cabinets, 10 persons; 4th story, architectural woodworking, 9 persons; 5th story, manufacturing furniture, 7 persons; No. 322: 1st story, wood carving, 5 persons; 2nd story, manufacturing cabinets, 15 persons; 3rd story, manufacturing cabinets and office, 6 persons; 4th story, woodworking, 4 persons; 5th story, manufacturing pearl buttons, 7 persons; the buildings, except No. 322, being protected by automatic sprinkler systems; EXITS: an interior stairway in No. 314, providing egress for Nos. 310 and 314, enclosed in fire-retarding partitions, fireproof doors at the openings and a similar stairway in

No. 318 and a wooden stairway with wood enclosure in No. 322; a party wall fire escape on the rear of Nos. 310 and 314; a 60-degree fire escape on the rear of No. 318 and also No. 322 and a 60-degree fire escape on the front of No. 310 and also No. 314; and

WHEREAS, appellant contends that the windows affected in sections A and B are exposed to windows in section C which is under the same ownership and is connected by opening in section B in the second and third stories and also exposed to the roof of one-story building under the same ownership and on the same property.

Resolved, that the orders of the fire commissioner be and they hereby are modified, and that the appeal be and it hereby is granted, only so far as it affects windows not on the course of stairway, elevator shaft or fire escapes, so long as the premises remain in single tenancy and operation, and that this and the adjoining exposures remain substantially unchanged.

BUILDING ZONE CASES

211-28-BZ.

APPLICANT—William A. Schroeder, owner.

SUBJECT—Application (re decision of the superintendent of buildings) under section 21 of the building zone resolution, to permit partly in a business district and partly in a residence district the erection and maintenance of a gasoline service station.

PREMISES AFFECTED—North side of Braddock street (Rocky Hill road), 155 feet east of 244th street, Queens Village, Borough of Queens.

APPEARANCES—

For Applicant: William A. Schroeder.

For Opposition: None.

THE RESOLUTION—

(230-26-BZ)

WHEREAS, Frederick J. Flynn, for Metropolitan Realty, Inc., owner, filed, March 18, 1926, an application, under the building zone resolution, to permit in a residence district the erection and maintenance of a building for business occupancy; premises 24-26 East 40th street, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, June 22, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that East 40th street is in a residence and business district, Madison avenue is in a business district and that East 39th street is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered March 8, 1926 (N. B. 106-26), reads:

"1. Proposed occupancy is unlawful within a residence district. Section 3 of Building Zone Resolution.";

and

MINUTES

WHEREAS, the proposed building is to be of fireproof construction, fifteen stories and pent house in height, with a frontage of 50 ft. and a depth of 98 ft. 9 in.; to be occupied as stores and offices; and

WHEREAS, this application was granted by the board at its meeting, June 22, 1926, the following resolution being adopted:

"WHEREAS, the board deemed it would be a hardship to restrict this property in view of the fact that the premises are now occupied for garage use and that applicant was entitled to relief under section 21 of the building zone resolution.

"Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the use and occupancy of the premises shall be restricted to the conduct and operation of executive offices throughout; that the building zone resolution as to height, area and rear yard shall be complied with in all respects; that the facade of the building shall be of attractive architectural design; that all permits required shall be obtained within nine months and the building completed within eighteen months from the date of this action."

and

WHEREAS, the present owner of the property joins with the former owner in requesting a reopening of the case and a rescindment of the resolution.

Resolved, that the above resolution adopted by the board at its meeting, June 22, 1926, be and it hereby is rescinded.

THE RESOLUTION—

(264-28-BZ)

WHEREAS, William F. Doyle, for Lottie Cutler, owner, filed, March 26, 1928, an application, under the building zone resolution, to permit, partly in a business district and partly in a residence district, the erection and maintenance of a gasoline service station; premises 120-06 Sutphin boulevard and 147-24 120th avenue, Jamaica, Borough of Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, October 9, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Sutphin boulevard is in a business district; 120th avenue, west of a point 100 ft. west of Sutphin avenue and 120th avenue, east of a point 100 ft. east of Sutphin avenue are in residence districts, and 147th street is in a residence district; and

WHEREAS, the decision of the fire commissioner, rendered March 20, 1928, reads:

"1. A gasoline service station at this location may not be permitted which is a business extending into a residence district."

and

WHEREAS, the premises consist of a plot of ground having a frontage of 125.11 ft. on 120th avenue and 103.08 ft. on Sutphin boulevard, upon which it is proposed to erect a small one-story office and accessory store and to install the necessary tanks and pumps for a gasoline service station; and

WHEREAS, the application is supported by 79 per cent consents of an area fixed by the board and deemed affected, which embraces all contiguous, abutting and adjoining property on both street fronts in both directions showing a preponderance of consents of owners immediately affected; and

WHEREAS, the board deems that applicant is entitled to relief under section 21 of the building zone resolution due to the surrounding conditions which are of an unimproved and dilapidated nature.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that there shall be erected on the southerly and westerly property lines of the premises a wall of approved masonry not less than 8 ft. in height, finished on the exterior with light-colored face brick and on the interior with white enameled brick, the wall to be coped with architectural terra cotta or natural stone; that there shall be located at the building line on both street fronts a concrete curbing not less than 12 inches in height; that there shall be not more than two vehicular entrances on either street front not exceeding a width of 10 ft.; that the pumps shall be set back not less than 10 ft. from the building line on both street fronts; that the use, operation and conduct of the business shall be restricted and limited to and within the property; that all permits required shall be obtained within six months and any work involved completed within one year from the date of this action.

222-28-BZ.

THE RESOLUTION—

(222-28-BZ)

WHEREAS, William F. Doyle, for Angelina R. Schad, owner, filed, March 12, 1928, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station; premises 1173-1179 Myrtle avenue and 2-8 Troutman street, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, October 9, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

MINUTES

WHEREAS, the use district maps accompanying the building zone resolution show that Myrtle avenue is in a business district, Troutman street is in an unrestricted district and Bushwick avenue is in unrestricted, business and residence districts; and

WHEREAS, the decision of the fire commissioner, rendered March 12, 1928 (re App. Plan No. 622-28), reads:

"1. A gasoline service station may not be permitted in a business district. Appeal may be taken to the Board of Standards and Appeals. Section 4-6, Building Zone Resolution."

and

WHEREAS, it is proposed to erect a one-story office, bury four 550-gallon tanks and erect five pumps for the purpose of conducting a gasoline service station within a business district; and

WHEREAS, there is a preponderance of consents of all owners within an area of this entire block and, due to the surrounding conditions and the irregular shape of the plot and its location, the board deems that applicant is entitled to relief under section 21 of the building zone resolution.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted*, for that portion of the triangular plot formed by the intersection of Troutman street and Myrtle avenue, with a frontage of approximately 92 ft. on Myrtle avenue, *on condition* that there shall be erected on the rear property line of the premises a wall of approved masonry not less than 8 ft. in height, faced with enameled brick; that the structure proposed thereon shall not be erected in excess of one story above grade in height and shall be finished with enameled brick with light architectural terra cotta trimming; that there shall be no signs erected or advertising displayed other than that on the illuminating globes of the gasoline pumps; that there shall be a triangular concrete platform not less than 10 ft. in depth from the apex formed by the intersection of Troutman street and Myrtle avenue; that the use, operation and conduct of the gasoline service shall be restricted to and within the confines of the property; that all permits required shall be obtained within six months and any work involved completed within one year from the date of this action.

38-28-BZ.

APPLICANT—Philip J. Sinnott, for Roth Estate, owner.

SUBJECT—Application (re decision of the superintendent of buildings) under section 21 of the building zone resolution, to permit partly in a business district and partly in a residence district the erection and maintenance of a building to be used as a motor vehicle repair shop and garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—192-208 East 98th street, west side, 84 feet 9 $\frac{7}{8}$ inches north of Kings highway, Brooklyn.

APPEARANCES—

For Applicant: Philip J. Sinnott.

For Opposition: K. Karl Klein.

ACTION OF BOARD—Application granted on condition.

THE VOTE—

THE RESOLUTION—

(38-28-BZ)

WHEREAS, Philip J. Sinnott, for Roth Estate, owner, filed, January 16, 1928, an application, under the building zone

resolution, to permit, partly in a business district and partly in a residence district, the erection and maintenance of a building to be used as a motor vehicle repair shop and garage for the storage of more than five motor vehicles; premises 192-208 East 98th street, west side, 84 ft. 9 $\frac{7}{8}$ in. north of Kings Highway, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, October 9, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that East 98th street is in a business district, Rockaway Parkway is in a residence district and Kings Highway, north of Dumont avenue, is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered November 18, 1927 (re App. No. 21327-27), reads:

"1. Proposition is contrary to Art. II, Section 4a, No. 15 and No. 29 of the building zone resolution, the erection of a building to be used as a public garage for more than 5 vehicles and as a repair shop for motor vehicles in a business use district."

and

WHEREAS, the proposed building is to be of non-fireproof construction, one story in height, with a frontage of 164 ft. 1 $\frac{1}{2}$ in. and a depth of 120 ft., irregular; to be occupied as a motor vehicle repair shop and garage for the storage of more than five motor vehicles; and

WHEREAS, the board has granted a variation of the building zone resolution for a garage on this street front, abutting the premises under appeal; and

WHEREAS, because of the irregularity of the shape of the plot in question it does not lend itself readily to a conforming use and the board deems that applicant is therefore entitled to relief under section 21 of the building zone resolution; and

WHEREAS, the application is supported by a substantial number of consents on the same street front between the intersecting streets, comprising the consents of all but one plot, said plot being now maintained in a non-conforming use, as a gasoline service station, the board believes that, inasmuch as the application is supported by a substantial number of consents, it would be an arbitrary discrimination and hardship to deny the variation.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the building shall not exceed one story in height above grade; that the rear and gable walls shall be unpierced throughout their entire height and length; that the front elevation shall be finished with a light-colored face brick with architectural terra cotta or stone trimming; that the parapet wall on the street front shall be of substantial height to permit of attractive architectural treatment with pediments over all doorways; that there shall be no roof signs erected or any advertising displayed on the street front other than one projecting electric sign, indicating the name and title of the business; that all permits required shall be obtained within six months and any work involved thereby completed within one year from the date of this action.

14-27-BZ.

APPLICANT—McCoey & Conroy, substituted for James W. Byrnes, for Prior Realty Co., Inc., owner.

SUBJECT—Application (re decision of the superintendent of buildings) under section 21 of the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles (previously denied).

MINUTES

THE RESOLUTION—

(14-27-BZ)

WHEREAS, McCooey & Conroy, substituted for James W. Byrnes, for Prior Realty Co., Inc., owner, filed, January 15, 1927, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 92-110 East 98th street, west side, 140 ft. south of Rutland road, Borough of Brooklyn; and

WHEREAS, this application was denied by the board at its meeting, May 24, 1927, and reopened by vote of the board at its meeting, July 10, 1928, on the basis of changed conditions; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, October 9, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that East 98th street is in a business district, Ralph avenue is in a business district, Rutland road is in a business district and Rockaway Parkway is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered December 24, 1926 (re App. No. 19375-26), reads:

"Proposition contrary to the Zone Resolution, Art. II, Sec. 4a, subdivision 15.

"The erection of a garage for more than five motor vehicles in a business district.";

and

WHEREAS, the proposed building is to be of non-fireproof construction, one story in height, with a frontage of 180 ft. and a depth of 100 ft.; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the board has in two prior cases granted public garages on the same side of the street, between intersecting streets immediately abutting the site under appeal; and

WHEREAS, the board believes the denial of this application would be an arbitrary discrimination and feels, therefore, that under section 21 of the building zone resolution it is justified, in view of its former actions with regard to the granting of garages on the same side of the street, to vary the zoning law, and as there exists a fixed public utility immediately to the north of the property stopping the likely further extension of garage development to Rutland road.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the building shall be erected fireproof throughout and shall not exceed one story in height above grade; that the front elevation shall be finished with light-colored face brick with architectural terra cotta or natural stone trimming; that the parapet wall at the front shall be of substantial height above the roof with architectural ornamental treatment; that there shall be no signs erected on the roof or any advertising displayed on the front of the building other than two projecting electric signs; there shall be no portable gasoline tanks operated or maintained outside the structure of these premises; that the rear wall shall be unpierced

throughout its entire height and length; the exterior of the rear wall to be finished in light-colored face brick; that all permits required shall be obtained within nine months and any work involved thereby completed within eighteen months from the date of this action.

THE RESOLUTION—

(314-28-BZ)

WHEREAS, William F. Doyle, for 1738 Crotona Park Co., owner, filed, April 5, 1928, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station; premises 902-914 Westchester avenue, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, October 9, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Westchester avenue is in a business district, East 163rd street is in a business district and Rogers place, from a point 100 ft. south of East 163rd street to a point 100 ft. north of Westchester avenue, is in a business district; and

WHEREAS, the decision of the fire commissioner, rendered March 28, 1928 (re Plan No. 826-28), reads:

"1. A gasoline service station at the above location being in a business district may not be permitted.";

and

WHEREAS, the premises consist of an irregularly shaped plot of ground having a frontage of 123.72 ft. on East 163rd street, 150.37 ft. on Westchester avenue and 85.47 ft. on Rogers place; it is proposed to remove the existing stores and to erect upon the plot a small one-story office and accessory store and, also, to install the necessary tanks and pumps for a gasoline service station; and

WHEREAS, the premises consist of a triangular island plot, lying in the bed of two highways, each being 100 ft. in width, said premises facing on three street fronts; and

WHEREAS, the premises have been occupied with a one-story store building for a number of years, making no return on the investment, the board believes that applicant is entitled to relief under section 21 of the building zone resolution.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the proposed building to be erected for the accommodation and shelter of the operators and patrons of the gasoline service station shall not exceed one story in height, located approximately in the center of the plot, and shall be finished on the exterior with light enameled brick with architectural terra cotta or stone trimming; that there shall be incorporated at the building line throughout the premises a

MINUTES

concrete curbing not less than 12 inches in height; that there shall be located at the apex formed by Westchester avenue and 163rd street a concrete platform not less than 12 inches in height and not less than 20 ft. in length; that the gasoline pumps shall be located not less than 10 ft. from the building line on any street front; that the operation, use and conduct of the premises shall be restricted and confined within the limits of the property; that there shall be no grease racks, crankcase service pits installed or operated on the premises; that there shall be no signs or advertising displayed other than that on the illuminated globes of the gasoline pumps and an illuminated sign on the ridge of the proposed building; that all permits required shall be obtained within six months and any work involved completed within one year from the date of this action.

APPROVAL OF PLANS

114-28-BZ.

APPLICANT—Byrnes & Buckley, for Louis Tufano, owner.

SUBJECT—Application (re decision of the fire commissioner) under sections 7e and 21 of the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles. Approval of plans.

PREMISES AFFECTED—109-07 to 109-17 101st avenue (4453-4459 Jerome avenue), Richmond Hill, Queens.

APPEARANCES—None.

ACTION OF BOARD—Chairman read engineer's report; engineer's report adopted; plans approved in accordance therewith.

THE VOTE TO ADOPT ENGINEER'S REPORT AND TO APPROVE PLANS—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle....	4
Negative	0
Absent: Chief Kenlon.....	1

1190-27-BZ.

APPLICANT—Charles A. Peabody, owner.

SUBJECT—Application (re decision of the superintendent of buildings) under sections 7e and 21 of the building zone resolution, to permit partly in a business district and partly in a residence district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles, also a gasoline service station. Approval of plans.

PREMISES AFFECTED—404-414 West 155th street and 91-99 St. Nicholas place, southwest corner, Manhattan.

APPEARANCES—None.

ACTION OF BOARD—Chairman read engineer's report; engineer's report adopted; plans approved in accordance therewith.

THE VOTE TO ADOPT ENGINEER'S REPORT AND TO APPROVE PLANS—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle....	4
Negative	0
Absent: Chief Kenlon.....	1

AREA FIXED.

(453-28-BZ)

The chairman presented and read a communication from Emil Guterman, requesting the board to fix an area deemed affected and within which to obtain consents to permit in a business district the erection and maintenance of a gasoline service station; premises 10003 Astoria (avenue) boulevard, Elmhurst, Borough of Queens.

The following area was approved by the board:

Both sides of Astoria avenue, from Kearney street to a point 400 ft. west of premises in question; both sides of 100th street, from 31st (Patterson) avenue to Astoria avenue; also the southwest side of Kearney street, from Astoria avenue to a point 320 ft. north of Astoria avenue.

Adjourned 1.30 p. m.

WILLIAM J. O'GORMAN, *Secretary*.

THE RESOLUTION—

(432-28-S)

WHEREAS, Western Union Telegraph Co., for The R. W. Realty Co., Inc., owner, filed, May 9, 1928, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 189-195 Hudson street and 1-3 Desbrosses street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated April 19, 1928 (Order No. 33756-LD), reads:

"1. Remove all partitions not built of incombustible material as per Sections 270 and 263 of the Labor Law.";

and

WHEREAS, the building is fireproof, cellar and six stories in height, 110 ft. 3½ in. by 121 ft. ¾ in. in area; OCCUPIED: cellar, shoe repairing, 35 persons; 1st story, office, 108 persons; 2nd story, office, 127 persons; 3rd story, laboratory, 40 persons; 4th, 5th and 6th stories, vacant; EQUIPPED with a sprinkler system, standpipe system and a fire alarm signal system; EXITS: an interior fireproof stairway, extending from the first story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, the petitioner claims that this petition affects the combustible partitions only on the first, second and third stories as shown on plans; that there is no hazardous condition; that the building is equipped with a standpipe system, and fire extinguishers are distributed in convenient locations; furthermore, the petitioner contends that the shoe repair shop in basement is the only factory occupancy.

Resolved, that the order of the fire commissioner be and it hereby is affirmed, and that the petition be and it hereby is denied.

491-28-S.

PETITIONER—Thomas J. McManus, for McManus Studios, lessee.

SUBJECT—Variation of the labor law as cited in order of the fire commissioner.

PREMISES AFFECTED—32-34 West 39th street, Manhattan.

APPEARANCES—

For Petitioner: Thomas J. McManus.

For Administration: Inspector Maher of fire department.

THE RESOLUTION—

(491-28-S)

WHEREAS, Thomas J. McManus, for McManus Studios, lessee, filed, May 28, 1928, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 32-34 West 39th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner reads as follows:

"1. Remove all partitions not built of incombustible material as per Sections 263 and 270 of the Labor Law.";

and

WHEREAS, the building is fireproof, fourteen stories in height, 50 ft. by 98 ft. in area at first story and 50 ft. by 88 ft. in area above; OCCUPIED: 1st story, stores; upper stories, tenant factories, principally for the manufacture of women's hats, approximately 20 persons per story; petitioner occupying the rear of the fourth story as

a photographer's studio; EQUIPPED with a sprinkler system and a fire alarm signal system; EXITS: two interior fireproof stairways, extending from the first story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, partitions constructed of combustible materials have been erected on the rear portion of the fourth story of the building; and

WHEREAS, petitioner contends that the partitions in question are constructed of sheet rock and are so painted and decorated as to form backgrounds which are essential in the conduct of the photographic business.

Resolved, that the order of the fire commissioner be and it hereby is affirmed, and that the petition be and it hereby is denied.

434-28-S.

PETITIONER—Victor Mayer, for Varick Dominick Corporation, lessee.

SUBJECT—Variation of the labor law as cited in decision of the superintendent of buildings.

PREMISES AFFECTED—119-123 Varick street and 26-30 Dominick street, Manhattan.

APPEARANCES—

For Petitioner: Victor Mayer.

THE RESOLUTION—

(434-28-S)

WHEREAS, Victor Mayer, for Varick Dominick Corp., filed, May 9, 1928, a petition for a variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises 119-123 Varick street and 26-30 Dominick street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered April 18, 1928, reads:

"9. Windows should comply with Sec. 264 Labor Law and rule 503 Industrial Code.";

and

WHEREAS, the building is fireproof, twelve stories in height, 75 ft. by 130 ft. 5 in. in area; OCCUPIED for showrooms, also as a tenant factory, 50 persons each story; EQUIPPED with a sprinkler system; EXITS: two interior fireproof stairways, extending from the first story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, the petitioner proposes to use ¼-inch plate glass in windows on both street fronts, at first and second stories, the maximum size light 7 ft. 6 in. by 10 ft. on each story; furthermore, the petitioner contends that smaller lights would detract from the architectural appearance of the building and decrease the rentals.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted, only so far as it affects the windows on the street front of the first and second stories, on condition that all openings be equipped with approved fireproof frames and sash, glazed with ¼-inch polished plate glass; that no light of glass on the second story shall exceed a width of 4 ft., and that the requirements of the labor law shall be complied with in all other respects.

419-28-S.

THE RESOLUTION—

(419-28-S)

WHEREAS, Max Pusar, for Gronenberg & Leuchtag, for Horan Realty Co., owner, filed, May 2, 1928, a petition for a variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises 227-233 East 45th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings reads:

"N. B. App. No. 197-1928. 2. Windows should comply with Sec. 264 Labor Law and rule 503 Industrial Code.";

and

WHEREAS, the building is fireproof, sixteen stories in height, 100 ft. by 100 ft. 5 in. in area; OCCUPIED: 1st story, stores; upper stories, offices, showrooms and 25 per cent manufacturing, approximately 55 persons per story; EQUIPPED with a sprinkler system and a fire alarm signal system; EXITS: two interior fireproof stairways, extending from first story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, there are openings on the first and mezzanine stories glazed with 1/4-inch plate glass, the maximum area of the glass on the first story being 15 ft. by 8 ft., and in the mezzanine story being 1 ft. 6 in. by 4 ft. in area; and

WHEREAS, petitioner contends that a strict compliance with the labor law as to the area of the glass would destroy the intended use of the first and mezzanine story of the building.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted, only so far as it affects the windows on the street front of the first and mezzanine floors, on condition that all openings be equipped with approved fireproof frames and sash, glazed with 1/4-inch polished plate glass; that no light of glass on the mezzanine shall exceed a width of 4 ft., and that the requirements of the labor law shall be complied with in all other respects.

THE RESOLUTION—

(494-28-S)

WHEREAS, Samuel Rosenblum, for Orvista Realty Co., Inc., filed, May 31, 1928, a petition for a variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises 115 West 54th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered May 25, 1928, reads:

"With reference to your application for Certificate of Occupancy we beg to advise you that the following objections must be removed before the Certificate can be issued:

"1. Interior stairs of building must be extended to roof, Section 271, Labor Law.

"2. A second means of exit must be provided from every floor, Section 271 Labor Law.";

and

WHEREAS, the building is non-fireproof, three stories (36 ft.) in height, 25 ft. by 95 ft. in area at first story and 25 ft. by 40 ft. in area above; OCCUPIED for the manufacture of picture frames: 1st story, 3 persons; 2nd story, 7 persons; 3rd story, 5 persons; EXITS: an interior wooden stairway, extending from the first story to top story (with iron ladder to scuttle in roof), enclosed in fire-retarding partitions on the first story and in wood board above, with wood doors at openings; a fire escape on the rear of the building, having unprotected openings along the course thereof, extending from the third story to the roof of the first story extension; EGRESS from the termination of the fire escape by means of an iron stair leading to the balcony of the four-story building to the east, and, also, by means of a ladder at the rear of the extension roof leading to the rear yard, then by means of door in the fence opening to yard of premises to rear; ROOFS of adjoining buildings: to east, two stories higher; to west, same level; and

WHEREAS, petitioner, in view of the small height, area and occupancy of the building, requests the acceptance of the existing means of egress.

Resolved, that the decision of the superintendent of buildings be and it hereby is affirmed, and that the petition be and it hereby is denied.

502-28-S.

PETITIONER—Samuel Rosenblum, for 132 West 31st Street Realty Corp., owner.

THE RESOLUTION—

(502-28-S)

WHEREAS, Samuel Rosenblum, for 132 West 31st Street Realty Corp., owner, filed, July 1, 1928, a petition for a variation from the requirements of the labor law, as cited in orders of the fire commissioner, affecting premises 128-136 West 31st street and 127-133 West 30th street, Borough of Manhattan; and

WHEREAS, the orders of the fire commissioner, dated October 19, 1927, read:

"Order No. 27426-LF:

"1. Install an adequate interior electric fire alarm system in accordance with the rules of the Board of Standards and Appeals and the enclosed approved layout L.L. 279.";

and

"Order No. 27427-LF:

"An inspection of premises 127-33 W. 30th St. and 128-36 W. 31st St., Borough of Manhattan, shows that a fire drill should be established and maintained therein according to the requirements of Section 279 of the Labor Law. The Labor Law specifically charges the Fire Commissioner with the duty of enforcing the provisions of the Law as to fire drills.";

and

MINUTES

WHEREAS, the building is fireproof, seventeen stories in height, 99 ft. frontage on 30th street, extending 197 ft. 6 in. through the block with 125 ft. frontage on 31st street: OCCUPIED: 1st story, stores; 2nd story, office and factory, 60 persons; 3rd story, continuation school, 300 persons; 4th story, office, showroom and factory, 85 persons; 5th story, office, showroom and factory, 125 persons; upper stories, offices, showrooms and factory, an average of 60 persons on each story; EQUIPPED with a sprinkler system; EXITS: three interior fireproof stairways, extending from the first story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, the petitioner claims that the third story, used for a needle trade school, is equipped with a fire alarm system which meets the requirements as to its occupancy; furthermore, the petitioner contends that under the labor law where there is an automatic sprinkler system covering the entire floor area and the occupancy does not exceed more than 50 per cent of the exits, the fire alarm system and fire drill may be omitted; and

WHEREAS, the entire building is equipped with an approved sprinkler system with the exception of the boiler room, main corridor, first story, tank house and pump room.

Resolved, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is *granted on condition* that the building as now equipped with a sprinkler system shall remain substantially unchanged, and that the sprinkler system shall be kept and maintained in accordance with the rules of the board of standards and appeals.

THE RESOLUTION—

(480-28-S)

WHEREAS, John Dwight Sullivan, for Estate of John Reber, owner, filed May 23, 1928, a petition for variation from the requirements of the labor law as cited in decision of the superintendent of buildings affecting premises 521-523 West 47th street, Manhattan; and

WHEREAS, the decision of the superintendent of buildings dated November 4, 1927 (Applic. No. 2082-1926), is:

"1. Two stairs enclosed in fireproof partitions must be provided;"

and

WHEREAS, the building is fireproof, 4 stories in height, 50 ft. by 100 ft. 5 in. in area at first story and 50 ft. by 90 ft. 5 in. in area above; OCCUPIED: 1st story, shipping rooms, 2 persons; 2nd story, bakery, 8 persons; 3rd story, bakery, 8 persons; 4th story, bakery, 8 persons; EXITS: an interior fireproof stairway, extending from the 1st story to roof; enclosed in fireproof partitions with fireproof doors at openings; an exterior iron stairway on the rear of the building, having fireproof openings along the course thereof, extending from the roof to the 1st story; with EGRESS from the termination of the fire escape by means of a proposed fireproof passageway leading to the main entrance hall on the 1st story; ROOFS of adjoining buildings are 20 ft. higher, and

WHEREAS, petitioner requests the acceptance of the existing exterior iron stairway at the rear of the building, with the proposed fire passage, in lieu of the required stairway.

Resolved, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is *granted on condition* that an exterior screened stairway at the rear of the building shall be provided in lieu of the additional fireproof stairway, and that there shall be a fireproof passageway on the first floor providing egress from the termination of the exterior stairway direct to the street, *on condition* that the building be not increased in height or area and that the labor law be complied with in all other respects.

THE RESOLUTION—

(450-28-S)

WHEREAS, Croker National Fire Prev. Eng. Co., for Herman Gabbe & Bro., Inc., owner, filed May 17, 1928, a petition for variation from the requirements of the labor law as cited in order of the fire commissioner affecting premises 207 Starr street, Brooklyn; and

WHEREAS, the order of the fire commissioner, dated November 26, 1927, is as follows:

"1. Enclose the interior stairway at the east and at the west sides of building serving as required means of exit in partitions of fire resisting material extending from cellar to 3' above the roof as per Section 271 of the Labor Law and the rules of the Board of Standards and Appeals, adopted Feb. 23, 1927";

and

WHEREAS, the building is non-fireproof, 3 stories in height, 100 ft. by 100 ft. in area at 1st story, and 100 ft. by 90 ft. in area above; OCCUPIED for dressing, bleaching and dyeing fur; 1st story, 10 persons; 2nd story, 50 persons; 3rd story, 50 persons; EQUIPPED with a fire alarm signal system; EXITS: two interior wooden stairways, extending from the 1st story to roof; enclosed in fireproof partitions along the line of the strings (necessitating entering the loft on each story) with fireproof doors at openings; a fire escape on the rear of the building, having plain glass wood sash openings along the course thereof, extending from the top story to the yard; with EGRESS from the termination of the fire escape by means of an open yard of the building at rear, then through said building to street; ROOFS of adjoining building to west 2 stories lower; and

WHEREAS, petitioner contends that a previous order which called for the enclosure of the easterly stairway and the arranging of the fire escape on the rear of the building was rescinded by the fire department in 1918; that this order was rescinded by the fire department on an opinion of the corporation counsel which stated that this occupancy was not considered combustible, and there has been no change in the occupancy or use of the premises, and rule No. 6 of the board of standards and appeals adopted Feb-

MINUTES

ruary 23, 1927, also waives the enclosure of interior stairways in three story buildings with non-combustible occupancy.

Resolved, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is *granted on condition* that the order be complied with on the second story, that direct egress to the street be provided and that the stairway in the first and third story be enclosed or boxed in approved masonry, and *on condition* that the building be not increased in height or area and so long as conditions as to occupancy and use remain unchanged.

THE RESOLUTION—
(185-28-S)
WHEREAS, Pressinger, Newcombe, Cunningham & Wigg, for Chelsea Fibre Mills, owner, filed February 29, 1928, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 1205 Manhattan avenue (Bldg. No. 1), Borough of Brooklyn; and
WHEREAS, the order of the fire commissioner, dated January 12, 1928 (Order No. 31412-LD), reads:
"1. Provide an enclosure of fire resisting material from floor to ceiling at 1st story and extending continuously from termination of stairway at southwest and at southeast side of building to the street. Section 271 of the Labor Law."

and
WHEREAS, the building in question (No. 1) is the northerly one of a group of buildings comprising the plant of the Chelsea Fibre Mills; it is non-fireproof, 6 stories in height, having a frontage of 61 ft. on Manhattan avenue and a depth of 291 ft. along Newtown Creek; OCCUPIED for the manufacture of rope; 1st story, 12 persons; 2nd story, 75 persons; 3rd story, 69 persons; 4th story, 70 persons; 5th story, 24 persons; 6th story, 34 persons; EQUIPPED with a sprinkler system and a fire alarm signal system; EXITS: two interior slate treads on iron stringer stairway, enclosed in fireproof partitions with fireproof doors at openings; the southwest stairway extending from the roof and terminating at the 2nd story at a point 39 feet south of the exit door in the north wall of the building which opens on the grade of the concrete dock along Newtown Creek; thence easterly along the dock to Manhattan Avenue; the southeast stairway terminates on the first story in a fireproof passageway leading to the grade of the concrete dock at a point 20 feet to the west of Manhattan Avenue; and
WHEREAS, petitioner requests the acceptance of the existing stairways and contends that if ordered to build the required passageways it would necessitate the removal of heavy piping, tanks, etc., and would otherwise interfere with the process of manufacture carried on in this portion of the plant;
Resolved, that the board of standards and appeals does

hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is *granted* only so far as the westerly stairs in Building No. 2 is concerned, *on condition* that a fire resisting partition providing a stair hall enclosure shall be erected on the first story, providing thereby a continuous corridor direct to Manhattan avenue, with fire doors at openings; *granted* as to the stairs in Building No. 1, basement story, *on condition* that the stair hall enclosure, first story, shall be carried to the front of the building by corridor enclosed in fireproof partition, with doorway provided therein opening directly to the dock, with iron steps to make up the difference in level at the dock front; and granted so long as conditions as to occupancy and use remain substantially unchanged and that the building shall be not increased as to height or area.

WHEREAS, the order of the fire commissioner, dated July 11, 1927, reads:
"Arrange the fire escape on the rear of the building and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Section 273-4 of the Labor Law and the rules of the Board of Standards and Appeals or carry out a proper alternative method of complying with the requirements of Section 271 of Labor Law.
"Defects:
"1. No 60 degree stairways connecting balconies.
"2. Not continued to yard.
"3. No fireproof passageway to street.
"4. Door openings 2' x 6' not provided."

and
WHEREAS, the premises consist of two non-fireproof buildings, 6 stories in height (the easterly building has a roof pent house), 43 feet by 98 feet 9 inches and 95 feet 1 inch in area at 1st story, and 43 feet by 88 feet 9 inches and 90 feet in area above. OCCUPIED: 1st story, stores, 6 persons; 2nd story, office and embroidery, 28 persons; 3rd story vacant; 4th story, millinery, 13 persons; 5th story manufacture of hats and leather goods, 22 persons; 6th story, manufacture of hats and jewelry, 24 persons; pent house is occupied by tenant on 6th story; EQUIPPED with a fire alarm signal system; EXITS: an interior fireproof stairway in westerly building, an interior wood stairway in easterly building, extending from the 1st story to roof, enclosed in brick walls in westerly building and in fire-retarding partitions in easterly building, with fireproof doors at openings; a party wall fire escape on the rear of
(Continued on page 1020)

PUBLIC HEARING

PROPOSED AMENDMENTS TO FUEL OIL RULES

[217-21-SR]

NOTICE IS HEREBY GIVEN that a public hearing will be held by the board of standards and appeals on Friday, October 19, 1928, at 2 p. m., Room 1013, Municipal Building, on proposed amendments to Fuel Oil Rules.

Matter in *italics* is new. Matter in brackets [] to be omitted.

Rule 1. Definition.

For the purpose of these rules the following terms shall be interpreted in accordance with these definitions.

DISCHARGE LINE shall be the line between the discharge outlet of the pump and the burner oil inlet connection.

FIRM FOUNDATION: A firm foundation is one which will carry the maximum load to which it will be subjected without exceeding the safe bearing capacity of the soil.

FIRE RETARDING MATERIALS:

(a) One-half ($\frac{1}{2}$) inch plaster boards or asbestos board, or three-eighths ($\frac{3}{8}$) inch gypsum wall boards weighing not less than 16 pounds per square yard with pointed joints covered with No. 26 U. S. gauge sheet metal with one (1) inch lapped seams nailed to the wood beams when spaced not more than sixteen (16) inches on centers, or nailed to furring strips when the floor beams are spaced more than sixteen (16) inches on centers, or

(b) Two thicknesses of one-quarter ($\frac{1}{4}$) inch asbestos boards laid with tight staggered joints and nailed to the beams, when spaced not more than sixteen (16) inches on centers, or nailed to furring strips when the floor beams are more than sixteen (16) inches on centers, or

(c) Metal lath weighing not less than three pounds per square yard, attached to furring strips and plastered with Portland cement mortar at least three-quarters ($\frac{3}{4}$) inch thick.

FILL LINE is the line between the fill box and the fill pipe connection in the storage tank.

FUEL OIL, any liquid mixture, substance or compound, derived from petroleum, which does not emit an inflammable vapor below a temperature of 125°F. when tested in a Tagliabue open cup tester (Chapter X Article I Code of Ordinance).

GAUGING DEVICE: A means by which the level of the oil in a storage tank may be indicated.

HEATERS: A device for heating fuel oil for the purpose of decreasing the viscosity.

OIL BURNER: A device designed for the purpose of burning fuel oil.

OVERFLOW PIPE: A pipe which conveys by gravity the oil from the maximum level of an auxiliary tank to the storage tank or from the pump to the storage tank.

RELIEF VALVE: A valve held shut by a spring or other means to automatically relieve pressure in excess of its setting.

REMOTE CONTROL: A hand, electric or mechanically operated device to the oil supply shut off.

RETURN LINE: A line for the purpose of conveying by-passed oil to a storage tank.

SWING JOINT: A connection made in a pipe line by means of a combination of fittings so that the tank can settle naturally without breaking the line or impairing the efficiency of the connection.

SUPPLY LINE: That portion of the line between the storage tank and the oil pump inlet connection. Where a pump is not used it shall be that portion of the line between Storage Tank and the burner oil inlet connection.

SCAVENGING LINE: A line installed to permit the removal of water or foreign matter from a storage tank.

SHUT-OFF VALVE: A device that can be actuated to prevent the flow of liquid in a line of pipe.

[The term "fuel oil" under these rules shall include any liquid or mobile mixture, substance or compound derived

from or including petroleum, which does not emit an inflammable vapor below a temperature of one hundred and thirty-five (135) degrees Fahrenheit, when tested in a Tagliabue or Pensky-Martens closed cup tester; and such oil shall be classified as either Grade A Fuel Oil or Grade B Fuel Oil.

(a) Grade A Fuel Oil Shall Include:

All oil used for fuel purposes under these rules which shall show a flashpoint of not less than one hundred and fifty (150) degrees Fahrenheit when tested in a Tagliabue or Pensky-Martens closed cup tester.

(b) Grade B Fuel Oil Shall Include:

All oil used for fuel purposes under these rules which shall show a flash point of not less than one hundred and thirty-five (135) degrees Fahrenheit when tested in a Tagliabue or Pensky-Martens closed cup tester.]

OILS NOT PERMITTED:

Oils derived from or including petroleum that have a flashpoint below a temperature of 125 degrees Fahrenheit, when tested in a Tagliabue or Pensky-Martens closed cup tester, shall not be used as a fuel to produce heat or light.

[(d) Where the Use of Grade B Fuel Oil Is Permitted.]

FUEL OIL:

[Grade B] Fuel Oil, within the meaning of these rules, having a flashpoint between 125 degrees and 150 degrees may be used for domestic heating in buildings occupied by not more than two (2) families and in tenement houses and commercial plants. If used in tenement houses or commercial plants, a certificate of fitness for the operator of the plant will be required as per Rule 15.

[(e) Where Grade A oil is used in place of Grade B oil in domestic installations it may be used under the requirements for Grade B installations.]

DEVICES:

[(f)] No person, firm, company or corporation shall within the limits of the City of New York use any device or apparatus for burning fuel oil within the meaning of these rules unless such device or apparatus shall have been approved by the Board of Standards and Appeals.

Rule 2. Manner of Storage for Fuel Oil.

Fuel oil, to be used for heating and power purposes, shall be at all times stored in metal tanks with all openings or connections through the tops of the tanks *except as otherwise provided in these rules.*

Rule 3. General Location of Tanks for Fuel Oil.

(a) In all buildings fuel oil storage tanks shall be buried below the floor of the lowest story or, if in the judgment of the Superintendent of Buildings the burial of tanks is not practicable by reason of soil, foundation or structural conditions, the tanks may be placed in the lowest story, subject to the requirements hereinafter set forth.

(b) Along the line of subways no tank shall be placed within twenty (20) feet of any wall separating a building from the subway and, if practical, tanks shall be placed in a lower position than the roadbed of the subway.

Rule 4. Location, Protection and Capacity of Tanks for the Storage of Fuel Oil.

[Subdivision A. Grade A Fuel Oil.]

Section 1. Inside of Buildings Above Ground.

(a) **OVER 275 GALLONS CAPACITY.** Where tank cannot be buried as required in subdivision c of this rule,

PUBLIC HEARING

storage tanks exceeding 275 gallons capacity, or any part of such tanks, when located above the floor level of the lowest story of any building shall each be placed in an enclosure of inside dimensions of 6 inches greater on all sides than the outside dimensions of the tank. The walls of the enclosure shall be constructed of concrete not less than 6 inches in thickness or 8 inches in thickness of brick masonry. The walls shall be carried up to a height not less than 12 inches above the top of the tank and the space between the tank and the walls and top of the enclosure shall be filled with sand or well tamped earth. Enclosure shall not be constructed until after tank inspection is made.

[(a) Where tanks cannot be buried and are located in the lowest story of any building, they shall be placed in an enclosure, the walls, floor and roof of which shall be constructed of reinforced concrete not less than eight (8) inches in thickness, or of twelve (12) inches of masonry and of dimensions six (6) inches greater on all sides than the outside dimensions of the tank.

(b) The walls of the enclosure shall be carried up to a height not less than one (1) foot above the tank and roofed over with reinforced concrete or similar fireproof construction capable of sustaining a load of three hundred (300) pounds per square foot.

(c) The roof of every enclosure shall contain a manhole with fireproof cover properly weighted, but not fastened, placed immediately above the manhole in the top of the tank.

(d) A space of at least two (2) feet shall be maintained between the top of the roof of the enclosure and the ceiling immediately above.

(e) The space between the tank and the walls and roof of the enclosure shall be completely filled with dry upland sand or earth well tamped.]

(b) Not more than one tank shall be placed in an enclosure.

(c) In non-fireproof or frame buildings the total storage capacity of tanks shall not exceed five thousand (5,000) gallons, except as stated in subdivision "d."

(d) In any building, if tanks properly enclosed or covered as above required are located in a fireproof or detached room which is cut off from the rest of the building vertically and horizontally in an approved manner and if such room is ventilated to the outside air, the total storage capacity shall not exceed fifty thousand (50,000) gallons, with an individual tank capacity of not exceeding twenty thousand (20,000) gallons.

(e) 275 GALLONS CAPACITY AND LESS. Storage tanks of 275 gallons capacity and less may be installed in the lowest story so that the bottom of tank shall not be more than 2 feet above the burner oil inlet connection. The tank shall be set on and firmly anchored to a concrete or rock base which base shall be equivalent in weight to at least 15 cubic feet of concrete. Not more than one tank shall be permitted for any one building.

(f) OVER 275 GALLONS CAPACITY. Storage tanks exceeding 275 gallons capacity shall be buried below the level of the lowest floor and below the level of the burner oil inlet connection except where the burial of tanks below the level of the burner oil inlet connection is impractical:

(a) by reason of rock or water conditions.

(b) where the bottom of the tank will be below the level of the foundation footing and where the angle of repose cannot be maintained as certified by the Superintendent of Buildings.

Under conditions (a) and (b) a syphon breaking device provided for in these rules shall be used and the tank shall be placed at the lowest practical level. The top of the tank shall be protected by not less than 12 inches of sand or dry earth or 4 inches of concrete. Tanks shall be placed on firm soil and surrounded with soft earth or sand.

[Section 2. Inside Buildings Below Ground.

(a) When a tank is buried beneath a building its

capacity may be increased one hundred (100) per cent above that allowed for an inside tank as established in connection with buildings of such construction as specified in Rule 4, Subdivision A, Section 1 (g) and (h).

(b) Tanks shall be buried underground below the level of any piping to which they may be connected, with the tops of the tanks not less than two (2) feet below the surface of the ground; or, in lieu of the two (2) foot cover of earth, tanks may be buried under twelve (12) inches of earth, covered by at least six (6) inches of sary to prevent floating, tanks shall be securely anchored. horizontal outline of tanks in all directions. Where neces-

(c) Tanks shall be set on concrete or metal cradles which shall be placed on firm soil and surrounded with soft earth or sand. Tanks shall be completely encased with six (6) inches of concrete when buried in soil the nature of which would make additional protection necessary.]

Section [3] 2. Outside of Buildings Above Ground.

(a) Where vertical tanks of one hundred and fifty thousand (150,000) gallons capacity or less are located outside of buildings and placed above ground, the tanks shall be not less than one and one-fourth (1¼) tank diameters, and in no case less than ten (10) feet, from the line of adjoining property, or the nearest building or adjacent tank.

(b) Where horizontal tanks are located outside of buildings and placed above ground, the tanks shall be not less than one and one-quarter (1¼) tank diameters measured from the end of the tanks and not less than two (2) tank diameters measured from the side of the concrete which shall extend at least one foot beyond the tanks, and in no case less than ten (10) feet from the line cent tank.

(c) Where existing outside above ground storage tanks have been placed closer together than one and one-quarter (1¼) tank diameters, a fire wall shall be built to a height of at least two (2) feet above the height of the highest tank completely separating the tanks for their full diameters or lengths.

(d) Tanks placed above ground shall be set on firm foundations and, if elevated, their supports shall be constructed of fireproof materials. All tanks shall be electrically grounded.

Section [4] 3. Outside of Buildings Below Ground.

(a) Tanks buried outside of buildings below ground shall have the top of the tanks not less than 2 feet below the surface of the ground and below the level of the burner oil inlet connection to which the tanks may be connected, except where the burial of tanks below the level of the burner oil inlet connection to which the tank may be connected is impractical:

(a) by reason of rock or water condition.

(b) where the bottom of the tank will be below the level of the foundation footing and where the angle of repose cannot be maintained as certified by the Superintendent of Buildings.

Under conditions (a) and (b) a syphon breaking device provided for in these rules shall be used.

[(a) Tanks shall be buried underground below the level of any piping to which they may be connected, with the tops of the tanks not less than two (2) feet below the surface of the ground; or, in lieu of the two (2) foot cover of earth, tanks may be buried under twelve (12) inches of earth, well tamped, covered by at least six (6) inches of concrete, which shall extend at least one foot beyond the horizontal outline of tanks in all directions. Where necessary to prevent floating, tanks shall be securely anchored.

(b) Tanks shall be set on concrete or metal cradles which shall be placed on firm soil and surrounded with of adjoining property, or the nearest building or adja-

PUBLIC HEARING

soft earth or sand well tamped. Tanks shall be completely encased with six (6) inches of concrete when buried in soil the nature of which would make additional protection necessary.

Subdivision B. Grade B Fuel Oil.

Section 1. Location.

(a) Storage tanks shall preferably be buried either outside of a building or below the lowest floor level. When not buried and located inside of a building they shall be placed on the lowest floor level and shall be enclosed in four inches of terra cotta or eight inches of approved masonry, and the aggregate capacity of such storage tanks shall not exceed 275 gallons.

(b) Tanks, when buried, shall be placed with top of tanks not less than 2 feet below the surface of the ground and below the level of any piping to which the tanks may be connected, except that, in lieu of the 2-foot earth cover, tanks may be buried under 12 inches of earth and a cover of reinforced concrete at least 6 inches in thickness extending at least one foot beyond the horizontal outline of tank in all directions; concrete slab to be set on a firm soil foundation.

(c) Tanks shall be set on firm soil and surrounded with soft earth or sand and shall be completely encased with (6) inches of concrete, where soil conditions require.

(d) Where in the opinion of the Fire Commissioner extreme difference of grade or soil conditions would work a hardship an anti-syphon valve or other mechanical device to prevent syphoning approved by the U. S. Bureau of Standards, Fire Underwriters Laboratories or other laboratory recognized by the Board of Standards and Appeals, may be used.]

Section 4. Capacity.

The total storage capacity of fuel oil with flashpoint between 125 degrees and 150 degrees F. shall not exceed 1,100 gallons.

Rule 5. [Enclosure and Protection of Tanks for the Storage of Grade A Fuel Oil.]

[Section 1.] Embankments and Dikes.

(a) Above ground storage tanks shall be protected by an embankment or a dike. Such protection shall have a capacity of not less than one and one-half ($1\frac{1}{2}$) times the capacity of the tank so surrounded, and shall be at least four (4) feet high, but in no case higher than one-fourth ($\frac{1}{4}$) the height of the tank when the height of the tank exceeds sixteen (16) feet. Embankments or dikes shall be made of earth-work with clay core; of masonry or of impervious reinforced concrete. Earth-work embankments shall be firmly and compactly built of good earth from which stones, vegetable matter, etc., have been removed, and shall have a flat section at top of not less than three (3) feet and a slope of at least one and one-half ($1\frac{1}{2}$) to one (1) on both sides. Concrete or masonry dikes shall be so designed as to safely carry the entire volume of the oil in the tank so surrounded.

(b) Embankments or dikes shall be continuous and unpierced. Piping shall be carried either over or under embankments or dikes in such a manner as not to interfere with the efficiency of the enclosure.

Rule 5A. Fire Extinguishing Equipment.

(a) Every tank with a capacity of over five thousand (5,000) gallons inside of buildings and ten thousand two hundred (10,200) gallons outside of buildings shall be equipped with a system of steam pipes, blanket-gas or other approved system for use in case of fire, so arranged and installed as to adequately protect the buildings or surrounding property.

(b) When steam is used, the steam supply pipe shall not be less than one-half ($\frac{1}{2}$) inch in size. The boilers

shall be conveniently located, and the steam to the extinguisher lines shall be controlled by easily accessible valves.

(c) Near each boiler of fuel oil burning unit there shall be kept ready for use two portable fire extinguishers of not less than 1 quart capacity or other equivalent fire extinguishers for extinguishing oil fires.

Rule 6. Material and Construction of Tanks for the Storage of Fuel Oil.

Section 1. Cylindrical Tanks (except vertical tanks located outside of Buildings above Ground).

(a) All tanks for the storage of fuel oil shall be built of steel plates made by the Open Hearth Process and known to the trade as "Tank Steel." Such plates shall be free from physical imperfections, such as laminations, cracks, etc. All steel must be new, in good condition and free from rust. The thickness of steel required and the size and spacing of rivets shall be as stated in the table given below.

(b) All tanks must be welded, riveted and caulked, or riveted and welded. Flanges or other pipe connections may be welded. All caulking shall be done with round nose tools and without injury to the plates.

(c) Thickness of cylindrical tanks.

Tanks 36 in. in diameter and less— $\frac{1}{4}$ in. shell, $\frac{1}{4}$ in. heads.

Tanks 37 to 72 in. in diameter— $\frac{1}{4}$ in. shell, $\frac{5}{16}$ in. heads.

Tanks 73 to 120 in. in diameter— $\frac{5}{16}$ in. shell, $\frac{3}{8}$ in. heads.

Tanks over 120 inches in diameter to be of $\frac{3}{8}$ in. steel and to be stiffened by angle rings or equivalent members so as to retain their cylindrical form.

(d) All cylindrical tanks shall preferably be built with dished heads. Should flat heads be used, they must be braced in the same manner as described for the bracing of flat sides of rectangular tanks.

(e) Diameter and Spacing of Rivets.

Riveting in single lap seams shall not exceed a pitch as follows:

In shell $\frac{1}{4}$ in. thick, $\frac{5}{8}$ in. diameter rivets $2\frac{1}{4}$ in. pitch.

In shell $\frac{5}{16}$ in. thick, $\frac{5}{8}$ in. diameter rivets $2\frac{3}{8}$ in. pitch.

In shell $\frac{3}{8}$ in. thick, $\frac{3}{4}$ in. diameter rivets $2\frac{1}{2}$ in. pitch.

Section 2. Rectangular Tanks.

(a) All rectangular tanks shall be built of steel plates of the quality required for cylindrical tanks, and of a thickness of not less than $\frac{5}{16}$ of an inch.

(b) Corners may be made up by bending the plates or by the use of angles.

(c) Rivets in seams shall be $\frac{5}{8}$ of an inch in diameter and spaced not more than $2\frac{1}{4}$ inches center to center.

(d) All flat surfaces of rectangular tanks are to be braced. Bracing shall be done either by using structural members, which will act as girders and which will safely carry the load with a factor of safety of five (5), or by using bars from side to side, end to end and top to bottom of the tank, as the case may be.

(e) When structural members are used, such as angles, channels or beams, etc., the distance from center to center of the rivet lines on these members must not be in excess of twenty-four inches, and the rivet spacing must be such that it will develop the full strength of the member. In no case shall the rivets be in excess of six (6) inches center to center on these members.

(f) When structural reinforcing members are tied together with braces, in order to reduce the effective length, the braces shall not be stressed higher than nine thousand (9,000) pounds per square inch taken on the minimum net section.

(g) If structural members are omitted and the sides

PUBLIC HEARING

of the tank are braced by means of rods or bars, these members should not be spaced farther apart than twenty-four (24) inches center to center in all directions. The unit stress permitted in these members shall not be in excess of nine thousand (9,000) pounds per square inch on the minimum net section.

(h) The fastening between these members and the sides of the tank must in all cases be such that it will develop the full net sections of the bars so that the bar will break before the connection will let go.

Section 3. Vertical Storage Tanks Over 1,000 Gallons Capacity Located Outside of Building Above Ground.

(a) Vertical tanks located outside of buildings above ground shall be built of steel plates of the quality required for cylindrical tanks.

(b) The minimum thickness of shell or bottom plates shall be $\frac{1}{4}$ inch and the minimum thickness of roof plates $\frac{1}{8}$ inch.

The thickness of shell plates shall be figured in accordance with the following formula:

$$t \text{ equals } \frac{P \times r \times F}{T \times E}$$

P equals head pressure at bottom of ring under consideration.

r equals radius of shell in inches.

F equals factor of safety (taken as 5).

T equals tensile strength of plate in pounds per square inch (55,000 pounds per square inch).

E equals efficiency of vertical joint in ring under consideration (calculations to be based on formulas as given in Bulletin No. 14 of the New York State Industrial Commission).

(c) Roof plates shall have single riveted water tight seams and the roof shall be built to shed water. Bottom plates shall have single lap riveted seams. Shell plate seams shall be designed, with proper efficiency to meet requirements of above formula for shell plates.

(d) In all cases, steel tanks for the storage of fuel oil must be built metal to metal. No filler of any kind will be permitted.

(e) Tanks for storage of grade B oil shall be constructed in accordance with the requirements of this rule, except that tanks of a capacity of over 60 gallons and not more than 550 gallons may be constructed of steel not less than $\frac{3}{16}$ inches in thickness.

(f) Auxiliary supply tanks of 60 gallons or less capacity may be constructed of brass, copper, steel or wrought iron of not less than No. 14 U. S. Gauge.

Section 4. Welding.

(a) Where welding is to be used for a part or for the entire tank, the tank shall be fabricated as required under Rule 6, Section 1.

(b) All welded seams of plates shall be lapped or butted.

When the joint is a lapped joint, the sheet shall be lapped not less than two inches and welded both inside and outside. The plates shall be pulled up tight, metal to metal, before welding and kept tight together during welding. Both inside and outside welds shall be of full 45 degree fillet.

Where a butt joint is used, it shall be of the 90 deg. double V type welded both inside and outside and reinforced to a total thickness of at least one and one-half times the plate thickness.

(c) All heads shall be flanged, the straight part of the flange being not less than as follows:

For $\frac{3}{16}$ inch heads, $1\frac{1}{4}$ inch flange.

For $\frac{1}{4}$ inch heads, 2 inch flange.

For $\frac{5}{16}$ inch heads, 2 inch flange.

For $\frac{3}{8}$ inch heads, $2\frac{1}{4}$ inch flange.

For heads over 120 inches diameter the flange shall be increased in length by one-half inch for each increase in diameter of 2 feet.

Where heads are set into the shell, they shall be a driving fit and the shell shall fit the head closely all around. If of over 1,100 gallon capacity they shall be welded inside and outside with full fillet welds. If of 1,100 gallon capacity or less and not over 48 inches in diameter, welding on the outside only will be sufficient.

Where the heads are butt welded to the shell, the head welds for tanks of 1,100 gallon capacity or less and not over 48 inches in diameter, shall be of the 90 deg. single V type welded entirely through and reinforced not more than one-quarter of the shell thickness. For tanks of over 1,100 gallon capacity the head welds shall be of the 90 deg. double V type welded inside and out and reinforced to a total thickness of not less than one and one-half times the shell thickness.

(d) Where tanks are made up of two or more rings the welded longitudinal joints of adjacent sections shall break joints. At no point of a butt girth joint shall the sheet on one side be offset with the sheet on the other side in excess of one-half of the thickness of the plate. All butt girth joints shall be welded inside and out and reinforced to at least one and one-half times the plate thickness, except that for tanks of 1,100 gallon capacity or less and not over 48 inches diameter, they may be of the same construction as the head seams.

(e) Where braces are welded to the plates the welding shall be done in such a manner as to develop the full net sections of the braces; in other words, the brace will break before the connection will let go.

Braces made in more than one piece shall not be joined together by any method of welding.

Section 5. Rust Proofing.

All tanks shall be thoroughly coated on the outside with tar, asphaltum or other suitable rust resisting material. Where soil contains corrosive substances, special protection may be required. Tanks shall not be coated until after the necessary tests have been made.

Section 6. Venting of Tanks.

All tanks shall be vented. (See Rule 8, Section 6, for installation of vent pipes.)

Section 7. Manhole Covers.

Manhole covers shall be of cast iron, cast steel or of the same material as used in the construction of the tanks. On tanks placed inside buildings, the manhole shall be bolted or otherwise secured to the tank and made gas tight. All tanks over 1,100 gallons capacity shall be provided with a manhole of at least 11 in. by 16 in.

Rule 7. Tests of Tanks for the Storage of Fuel Oil.

Tanks and piping to burner shall be tested hydrostatically at a pressure, except as otherwise stated, of not less than 10 pounds per square inch. Those parts subjected to a pressure exceeding 10 pounds per square inch shall be tested at a pressure of not less than $1\frac{1}{2}$ times the maximum pressure to which it is subjected. The hydrostatic pressure on a tank shall be determined by measuring in feet the height from the lowest point in the tank to the highest oil reservoir from which the tank may be filled. This distance divided by 2.3 will give the equivalent pressure in pounds per square inch at the bottom of the tank. When there is danger of freezing, tanks and piping may be tested with oil provided the installation is complete and the pressure applied at the burner end of the supply line. There shall be no fire or flame in the room or rooms in which the test is being conducted. All tests shall be conducted in the presence of a representative of the Fire Commissioner and shall be continued for thirty minutes.

The contractor shall furnish all the necessary equipment for conducting the tests.

PUBLIC HEARING

[Section 1. Inside of Buildings Above or Below Ground or Outside of Buildings Below Ground.

(a) All tanks located inside of buildings, either on or below the lowest floor level, and outside buried tanks, shall withstand after being set in place, a hydrostatic or air test for at least thirty (30) minutes and shall show no leaks.

(b) The hydrostatic pressure on a tank shall be determined by measuring in feet the height from the lowest point in the tank to the highest oil reservoir from which the tank may be filled. This distance divided by 2.3 will give the equivalent pressure in pounds per square inch at the bottom of the tank. The hydrostatic test pressure shall be not less than thirty (30) pounds per square inch for welded tanks, nor less than twenty-five (25) pounds per square inch for riveted tanks.

(c) Tanks when subjected to an air pressure test shall be equipped with a safety relief valve set at not more than 32 lbs. per sq. in., and the air compressor device employed in the air testing of the tank shall be of low pressure type, equipped with an automatic pressure regulator set at not less than 35 lbs.

Section 2. Horizontal Tanks Outside of Building, Above Ground.

Horizontal tanks outside of buildings and above ground shall stand, without leaking, a hydrostatic or air test of twenty-five (25) pounds per square inch for at least thirty (30) minutes and shall show no leaks.

Section 3. Vertical Tanks Outside of Buildings Above Ground.

Vertical tanks designed for outside above ground storage, having a cover of lighter material than that of the sides of the tank, shall withstand without leaking a head of water equal to that of the depth of the tank.

Section 4. Test for Tanks. How Conducted.

(a) Tests shall be conducted in the presence of a representative of the Fire Commissioner. The contractor shall furnish all the equipment necessary for conducting the tests. Access to the inside and outside of tanks shall be maintained until the necessary tests are completed.

(b) Welded tanks shall, while under the hydrostatic or air test as hereinbefore specified, be subjected to a thorough hammer or impact test. The test shall consist of striking the sheet on both sides of the welded seam a sharp, vibratory blow with a 2 to 6 lb. hammer, the blows to be struck 2 to 3 inches apart and within 2 or 3 inches of, and on each side of, the seam, the blows to be as rapid as a man can conveniently strike a sharp, swinging blow, and as hard as can be struck without indenting or distorting the metal of the sheet.]

Rule 8. Piping for Fuel Oil.

Section 1. Installation of Piping.

(a) Piping shall be run in a substantial and workmanlike manner and provision made for expansion, contraction and settlement. Exposed piping shall be protected against mechanical injury and shall be securely supported with rigid metal fasteners or hangers. Where the top of the tank is below the level of the burner oil inlet connection, the supply line from the tank shall be run above the level of the bottom of the tank so as to prevent syphoning. Cross connections permitting gravity flow from one tank to another are prohibited. All pipes connected to tank except measuring well or gauge pipe shall be provided with double swing joints at tank. All threaded joints shall be made tight with litharge and glycerine or equivalent suitable pipe compound.

[(a) Piping shall be run as directly as practicable without sags, and, except as provided in Rule 11A, e, shall be laid so that where practicable pipes shall pitch toward the

supply tank without traps; provision shall be made for expansion, contraction, jarring and vibration.

(b) Cross connections permitting gravity flow from one tank to another shall be prohibited.

(c) Pipes conveying oil, if laid inside of a building, shall be either buried or exposed to view. Where piping is exposed, it shall be easily accessible for inspection at all times and protected against injury. Exposed piping shall be hung or supported on fireproof materials to prevent falling in case of fire.

(d) Pipes laid below ground or subject to corrosion shall be protected.]

Section 2. Type and Material.

(a) All piping shall be of standard full weight brass, copper, wrought iron or steel for working pressures less than one hundred (100) pounds; for working pressures in excess of one hundred (100) pounds, extra heavy seamless drawn tubing and drop forged fittings shall be used. No pipe less than one-half ($\frac{1}{2}$) inch inside diameter shall be permitted; except that for Grade B oil $\frac{1}{4}$ -inch diameter pipes may be used.

(b) All connections shall be tight and shall have well-fitted joints.

(c) Tubing and couplings, where used in connection with mechanical burners, shall be capable of withstanding a pressure equal to the piping to which it is connected and shall be constructed of fire resisting materials. No soldered connection shall be used. The length of tubing shall not exceed that required for direct connections to coupling.

Section 3. Tests for Piping. [Grade A.]

Piping for systems with working pressures under one hundred (100) pounds, after installation, shall be tested and proven tight at a hydrostatic pressure of not less than one hundred and fifty (150) pounds per square inch; where working pressure exceeds one hundred (100) pounds, piping shall be tested and proven tight at a hydrostatic pressure of not less than one and one-half ($1\frac{1}{2}$) times the maximum working pressure. The maximum working pressure shall be noted on the plans. Tests shall continue for thirty (30) minutes.

[Section 3a. Tests for Piping. Grade B.

All piping after installation shall be tested and proven tight at a hydrostatic pressure of one hundred (100) pounds per square inch.]

Section 3a. Overflow Pipes from Burners and Auxiliary Tanks.

Overflow pipes, when required, shall be not less than one size larger than supply pipe.

Section 4. Relief Valves.

[(a) All piping or heaters which can be separated from the source of supply and in which a dangerous pressure can be generated either by the action of the pump or by steam, shall be protected by an automatic pressure relief valve. Such automatic pressure relief valve shall discharge into the storage tank, or into the suction line provided there are no shut off valves in the suction line between the pressure relief valve discharge connection and the storage tank. No valves shall be installed in the safety valve lines. Automatic pressure relief valves shall be not less than $\frac{1}{2}$ in. by $\frac{1}{2}$ in., of the spring type with working parts of non-corrosive construction and shall be set to discharge at not more than fifty (50) per cent above the maximum working pressure.

(b) An automatic by-pass valve of size equivalent to that of the discharge line shall be installed between each pump and the first discharge shut-off valve. The automatic by-pass valve shall discharge into the suction line near the pump, or into the storage tank as described in the preceding paragraph. The automatic by-pass valve shall be constructed as described in the preceding paragraph with

PUBLIC HEARING

the exception that the setting mechanism shall be so designed as to prevent the complete closing of the valve.]

(a) Where a shut-off valve is installed in the discharge line from an oil pump a relief valve shall be installed in the discharge line between the pump and the first shut-off valve. The relief line shall be returned to storage tank or to supply line near pump. There shall be no shut-off valves in the relief line.

(b) All heaters shall be provided with a relief valve to prevent excessive oil pressure.

(c) Relief valves shall be set to discharge at not more than $1\frac{1}{2}$ times the maximum working pressure of the system.

Syphon Breaking Devices—Syphon breaking devices, where permitted, shall be constructed in such a manner that the admission of air at any point in the supply line will break the syphon. Where installed, such a device shall not be accepted until it has been effectively demonstrated in the presence of a representative of the Bureau of Fire Prevention.

Section 5. Fill Pipes.

(a) Each tank shall be provided with a separate fill pipe which shall be carried below the discharge line in the tank or otherwise trapped to prevent escape of oil vapor. The fill pipe shall be made up with screwed or flanged fittings securely held in place and shall be oil tight. Each fill pipe shall be provided with a receiver terminal or fill box or casing provided with means for locking and located as remote as practicable from any building opening or subway grating. Where the fill box terminal is below the level of the top of the tanks, the fill pipe shall terminate at the top of the tank; a check valve and a gate valve shall be installed in the fill box terminal (at the tank).

[(a) Each fuel oil tank shall be provided with a separate fill pipe. Fill pipes when installed near any building opening shall be as remote therefrom as practicable so as to prevent liability of flow of oil or vapor through building opening.

(b) The receiver terminal of each fill pipe shall be located in a tight metal box or casing provided with means for locking. The delivery terminal shall be connected through the top of the tank.

(c) The fill pipe shall be provided with a trap or seal or carried within four (4) inches of the lowest point in the tank.

(d) The fill pipe shall be made up with screwed or flanged fittings and shall be oil tight and securely held in place.]

Section 6. Vent Pipes.

(a) An open, galvanized or painted iron vent pipe without trap and draining to the tank shall be provided for each tank. The lower end of the vent pipe shall not extend through the top of the tank more than one inch.

(b) Where a battery of tanks designed to hold the same class of liquids is installed, vent pipes may be run into a main header. Connections to the header shall not be less than one foot above the level of the top of the highest reservoir from which the tanks may be filled. The main vent pipe from the header shall be screened. The main vent pipe and header shall be of an area equal to the aggregate area of vent pipes connected thereto.

(c) Vent openings in tanks shall be screened by 40 mesh non-corrodible wire screen, and shall be of sufficient area to adequately vent the tank during the filling operation. Vents shall be not less than two (2) inches in diameter for tanks over 1,100 gallons capacity, and in no case less than one and one-quarter ($1\frac{1}{4}$) inches in diameter.

(d) Vent pipes shall be provided with weather proof hoods and terminate outside the building above the street surface, not less than six (6) feet nor more than twelve (12) feet above the fill pipe. Such vent outlet shall not be located within three (3) feet in any direc-

tion of a window or other opening, or an exterior stairway, or fire escape, nor shall vent pipes be placed in elevator or dumb-waiter shafts, or in an enclosed court.

(e) If compelled, because of structural conditions, to carry the vent outlet higher than twelve (12) feet above the fill box, and if the fill lines are connected to tank trucks by tight connections and filled by pressure, a one (1) inch line shall be connected to tank and shall parallel the fill line and terminate in the fill box with unthreaded end. A check valve shall be installed in the line so as to permit excess oil in the tank to flow to the fill box and shall be so set as to prevent the passage of vapor to the street.

Section 7. Return [Pipes] Line from Burners.

Return lines from burners, where [necessary shall be not less than the diameter of the supply line to the burner. Return lines shall be run as direct as possible, and shall be connected into the suction line near the pump or into the storage tank.] used, shall not be smaller in diameter than the discharge outlet from the pump. They shall be connected into the supply line near the pump or into the storage tank without shut-off valve in the return line. No oil shall be returned to the storage tank at a temperature higher than one hundred and forty (140) degrees Fahrenheit.

Section 8. Heating Coils in Tanks.

All heating to reduce viscosity of Grade A fuel oils in storage tanks in any building shall be only by means of hot water coils thermostatically controlled and the oil shall not be heated above one hundred and forty (140) degrees Fahrenheit.

Rule 9. Valves and Control of Flow for Fuel Oil.

[Subdivision A. Grade A Fuel Oil.

(a) Control valves at the burners shall be of a substantial type, provided with a stuffing box of liberal size containing a removable cupped gland designed to compress the packing against the valve stem and so arranged as to facilitate removal. Valves shall be designed to close against the supply and to prevent withdrawal of the stems by continued operation of the hand-wheel. The use of packing which may be affected by oil or heat is prohibited.

(b) A shut-off valve shall be provided in discharge and suction lines near each pump; in discharge line from each tank as near the tank as practicable, and in branch lines near each burner.

Subdivision B. Grade B Fuel Oil.

(a) Readily accessible valves shall be provided near each burner and in the discharge line from each storage tank.

(b) A remote control for shutting off the supply of oil to the burners shall be provided.

(c) An automatic by-pass valve of a size equivalent to that of the discharge line shall be installed between each pump and the first discharge shut-off valve. The automatic by-pass valve shall discharge into the suction line near the pump or into the storage tank. The automatic by-pass valve shall be constructed of non-corrosive materials and so designed as to prevent the complete closing of the valve.]

(a) In all installations a shut-off valve shall be provided at or on each burner. Where the top of the storage tank is located above the oil inlet connection to the burner a shut-off valve shall be provided in the supply line inside the building as near the tank as practicable.

(b) In systems where either steam or air is used for atomizing the oil, the oil and atomizing supply shall be interlocked so that in case of interruption of the atomizing supply, the oil will immediately be cut off.

Automatic by-pass valves shall be set at not more than fifty (50) per cent above the maximum working pressure

PUBLIC HEARING

This rule shall not apply to burners and pumps approved as a unit when provided with a pressure relief device.

Rule 10. Oil Level Indicating Device for [Grade A] Fuel Oil.

[A test well or gauging device shall be installed and so designed as to prevent the escape of oil or vapor within the building at any time. The top of the well when located outside of a building shall be sealed and kept locked when not in use.]

(a) Oil level indicating devices shall be constructed of substantial materials so designed that there can be no leakage of fuel oil or vapor. Test wells shall not be permitted in tanks located inside the building. Test wells when located outside the building shall be capped oil tight and kept closed when not in use.

Rule 11. Pumps for Fuel Oil.

[Subdivision A. Grade A Fuel Oil.]

(a) Pumps shall be of a recognized standard mechanical construction approved by the Board of Standards and Appeals.

(b) Pumps shall be installed in duplicate where fire protection equipment is dependent on the use of fuel oil for heating or steam.

(c) Pumps located in the same room where burners are installed shall be provided with a remote control.

(d) Pumps used in connection with outside above ground storage tanks shall be located outside embankment walls, and at such a point that they will be accessible at all times, even if the oil in the tank or reservoir should be on fire.

(e) Pumps may be located below the top of the oil storage tank or tanks where heavy oil is used having a gravity of not more than eighteen (18) degrees Baume and where the top of the tank or tanks is not more than ten (10) feet above the pump or pumps, except as otherwise stated in these rules.

[Subdivision B. Grade B Fuel Oil.]

[(a)] (f) Oil pumps used for supplying oil to the burners shall be rigidly fastened in place and secure against leaks.

(g) Where a pump is part of a burner unit and is used for atomizing purposes, an additional approved pump may be used without the disconnection of the unit.

[(b)] Pumps shall be of approved design as described in Rule 11A (a).]

Rule 12. Burners for Fuel Oil.

The burner mechanism shall be of a recognized type approved by the Board of Standards and Appeals. In domestic installations the burner shall be equipped with an overflow attachment or an automatic control to prevent flooding.

Where an approved burner unit includes a pump as part of the unit, said pump or burner may be disconnected and used in conjunction with any other approved burner or pump.

A remote control shall be provided whereby the flow of oil to the burner can be stopped and such control shall be located either inside or outside the entrance to the room in which the burner is located and as close to such entrance as practicable.

Installations in which burners are located on different floors of a building and are supplied with oil from the same source, a remote control shall be provided on each floor on which burners are located. This remote control to be such that its operation will stop the flow of oil to all burners on that particular floor, and such control shall be located either inside or outside an accessible entrance to the floor or room containing the burners as close to the entrance as practicable.

The damper shall be so constructed that it cannot completely cut off the passage of the flue gases at any time.

Adequate ventilation at least equivalent to area of the smoke pipe at the point where it enters the flue shall be provided in all rooms in which burners are installed.

Rule 13. General Devices for [Grade A] Fuel Oil.

(a) Devices which are subject to breakage and escape of oil shall be prohibited.

(b) Thermometers with large clear reading scales, placed in thermometer wells with screwed top connections, shall be installed at convenient and prominent positions in the oil supply pipe lines between the service tank and the pumps, and also between the pumps and the burner, to indicate the temperature of the oil.

Rule 14. Instruction Cards.

Cards giving complete instructions for the care and operation of the fuel oil system shall be permanently fixed near the apparatus and maintained in readable condition.

Rule 15. Operation of Plant Other Than Domestic Installation Using [Grade A] Fuel Oil.

No fuel oil burning plant, other than domestic installations, shall be operated unless in charge of a person holding a certificate of fitness as issued by the fire department. A certificate of fitness will be required for each person who is directly in charge of the operation of the plant at any and all times.

[This certificate of fitness will be required for all Grade A installations, and Grade B installations in dwellings for more than two families and in commercial plants. This requirement as to Grade A installations shall not apply to dwellings of less than three families equipped with Grade B installations using Grade A oil.]

Rule 16. Installation.

No fuel oil installation shall be operated or oil placed in the system until after a permit has been issued by the Fire Commissioner. Plans for each fuel oil installation shall be submitted to the Fire Commissioner for approval, together with a Certificate of the Superintendent of Buildings indicating that the proposed construction of the enclosure and the location of the tanks is in accordance with the requirements of the Building Code and these Rules.

Rule 17. Auxiliary Tanks for [Grade B] Fuel Oil.

(a) Auxiliary supply tanks may be of the gravity type if suitable automatic safeguards to prevent abnormal discharge of oil at the burner are provided. The total capacity of such tank or tanks in any building shall not exceed 60 gallons.

(b) Auxiliary supply tanks, or storage tanks, shall not be located within ten (10) feet of any fire or flame and where practicable shall be placed at an interior angle of the cellar, formed by the walls of the building.

(c) Auxiliary supply tanks shall be substantially and rigidly supported on metal frames or cradles and secured by 2x1/8-inch straps riveted or bolted to frame and securely fastened to wall of building by rigid metal brace.

(d) Where only an auxiliary tank as prescribed in these rules is used it shall in addition to complying with the requirements for auxiliary tanks comply with the requirements for the protection of a storage tank other than the enclosure.

Rule 18. Pilot Light.

Automatic systems unless electrically ignited shall be designed that the flame cannot be extinguished by operation of the automatic control valve and a pilot light of adequate intensity shall be provided in each combustion chamber, so arranged as not to be easily extinguished.

PUBLIC HEARING

Rule 19. Furnaces and Ranges.

(a) Stoves, ranges, hot air furnaces or other devices, originally designed for use of fuel other than oil, shall not be used in connection with oil burners unless spaces in which vapors might collect are adequately vented, and if used shall be of such construction as to withstand the maximum temperature which the oil burning device to be installed may generate.

(b) No damper for closing of more than eighty (80) per cent of the effective area of the flue shall be permitted in a smoke pipe or flue.

Rule 20. Fire Protection [for Grade A and B oil in Domestic Installations] in dwellings, [occupied by not more than two families and in] old [law tenements occupied by three or more families in] and new law tenements, [and in] commercial and industrial plants.

(a) No combustible material shall be stored within ten (10) feet of a furnace door.

(b) In dwellings occupied exclusively by not more than two (2) families, any woodwork, wooden lath and plaster partition, or other combustible material within four (4) feet of the sides or back, or eight (8) feet from the front of the furnace or boiler shall be covered with approved fire retarding material and the ceiling, except it be of fireproof construction, and within two (2) feet of the top of the furnace or boiler, shall be protected with approved fire retarding material extending four (4) feet beyond the sides and back and eight (8) feet from the front of the furnace or boiler, except that when the top of furnace or boiler is within six (6) inches of a combustible ceiling the ceiling shall be protected with two layers of approved fire retarding material with one inch air space between layers, and any combustible ceiling, partition or other combustible material within nine (9) inches of any smoke pipe shall be covered with approved fire retarding material extending at least one (1) foot beyond each side of the smoke pipe. [In old law tenement houses occupied by three or more families the heating apparatus and oil burning device shall be located in an enclosure the partitions of which shall be constructed of fireproof material not less than four (4) inches in thickness with openings therein protected with self-closing fireproof doors and the ceiling of the enclosure, if not of fireproof construction, shall be protected with approved fire retarding material; said enclosure shall be ventilated to the outer air; all vertical openings leading to cellar shall be protected with fireproof material not less than four (4) inches in thickness with all openings therein protected with self-closing fireproof doors.]

(c) In old and new law tenement houses, [or in] commercial and industrial plants [the room or rooms in which the heating apparatus and oil burning device is installed shall be cut off from the rest of the building by fireproof partitions, ceilings and floors constructed of not less than eight (8) inches for brick, not less than six (6) inches for stone or cinder concrete, or hollow blocks of terra cotta, concrete or gypsum, and not less than four (4) inches for stone or cinder concrete if properly reinforced with steel, and such rooms shall have entrance from the street, court or yard only, and shall be ventilated to the outer air.] of non-fireproof construction the heating apparatus and oil burning device shall be located in an enclosure, the partitions of which shall be constructed of fireproof material not less than four (4) inches in thickness with any opening therein protected with self-closing fireproof door the sill of which shall be not less than twelve (12) inches above boiler room floor level; and the ceiling of the enclosure if not of fireproof construction shall be protected with approved fire retarding material, except that when the top of the furnace or boiler is within twelve (12) inches of a combustible ceiling,

the ceiling shall be protected with two (2) layers of approved fire retarding material with one (1) inch air space between layers, any vertical openings extending in the boiler room proper to be protected with self-closing fireproof doors and four (4) inch partition of approved fireproof material, said enclosure shall be ventilated to the outer air. Any smoke pipe within eighteen (18) inches of a combustible ceiling, partition, or other combustible material, the ceiling, partition, or other combustible material, shall be protected with approved fire retarding material extending at least one (1) foot beyond each side of the smoke pipe. All vertical openings in old law tenement houses shall be protected in cellar with fireproof material not less than four (4) inches in thickness with openings therein protected with self-closing fireproof doors.

(d) In new law tenement houses, commercial and industrial plants of fireproof construction the heating apparatus and oil burning device shall be located in an enclosure constructed of fireproof material not less than four (4) inches in thickness with any opening therein protected with self-closing fireproof door, said enclosure shall be ventilated to the outer air.

(e) Furnished room houses, boarding houses and non-housekeeping apartments, dormitories and day nurseries and similar occupancies with not more than ten (10) sleeping rooms, also convents, rectories, monasteries and churches, the fire protection shall be the same as that required for dwellings occupied exclusively by not more than two families.

(f) Dwellings occupied by not more than two (2) families and stores the occupancy of which is considered hazardous and requires a permit from the fire department, except stores for which a permit is required for the use and operation of soda water fountains, furnished room and boarding houses, non-housekeeping apartments, dormitories, day and night nurseries, with more than ten (10) sleeping rooms and similar occupancies, the fire protection shall be the same as that required for old law tenement houses.

[Approved fire retarding material shall be any material complying with the rules of the Board of Standards and Appeals for fire retarding of garages.]

(g) Near the furnace, and so located as to be convenient for use in emergency, there shall be provided a hand fire extinguisher of an approved type suitable for use on oil fires.

Rule 21. Systems Prohibited [Where Grade B Fuel Oil Is Used.]

The use of auxiliary tanks between pump and burner unit of the pressure type are prohibited. Systems, fed by gravity between the storage tank and the pump, or force systems, are prohibited. Pressure in storage tanks for the purpose of discharging oil are prohibited.

Rule 22. Use of [Grade A or Grade B] Fuel Oil.

(a) These Rules shall not apply to gas companies storing or using fuel oil in the manufacture of illuminating gas for public use.

(b) The use of oil stoves, oil heaters or oil lamps commonly used for household purposes which employ a wick to absorb such oil in its combustion shall not be prohibited; or shall the use of such oil be prohibited when used in a plumber's torch or similar apparatus.

(c) Modification: When for any reason it may be impracticable to comply strictly with the foregoing rules the fire commissioner shall have power to modify their provisions so that the spirit and substance thereof shall be complied with. Such modification shall be endorsed upon the permit over the signature of the fire commissioner.

WILLIAM E. WALSH, Chairman.
WILLIAM I. O'GORMAN, Secretary.

the building, having fireproof openings along the course thereof, extending from the second story balcony to roof, and stationary iron drop ladder in adjoining yard at south; ROOFS of adjoining buildings: 4 stories higher at west; 3 stories higher at east; and

WHEREAS, the petitioner claims that the windows on rear fire escape when open have a clearance of 4 feet 6 inches by 3 feet to 4 feet 2 inches by 4 feet 6 inches in width; that similar orders pertaining to the fire escape were issued by the fire department in August of 1918 and were subsequently modified; furthermore, the petitioner contends that the exits are adequate in that the rear party wall fire escape serves as a horizontal exit from one building to the other at each story; and

WHEREAS, the stairways are subdivided by walls of approved masonry from the front area and there is a party wall fire escape;

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted as to items 3 and 4, and denied as to other items, on condition that connecting stairways, not more than 60 degrees, shall be provided; that a stairway shall be provided from the lowest balcony to yard in rear, with egress to adjoining premises directly to the rear; that the occupancy shall be limited to 50 per cent of the legal capacity of each stairway in each building, with the exception of the westerly section, second story, in which the occupancy shall not exceed 25 persons at any one time; that the building shall be not increased in height or area, and this variation is granted so long as conditions as to occupancy and use remain substantially unchanged.

Adjourned, 4.15 p. m.

WILLIAM J. O'GORMAN, Secretary.

BOARD OF STANDARDS AND APPEALS

WILLIAM E. WALSH, Chairman

HENRY L. CONNELL

JAMES P. HOLLAND

JOHN GUILFOYLE

CHIEF JOHN KENLON

WILLIAM J. O'GORMAN, Secretary

EDWARD V. BARTON, Chief Clerk

PUBLIC HEARINGS

Tuesdays, at 10 a. m. and 2 p. m.
Special meetings as published in this Bulletin.
Call of Clerk's Calendar, Tuesdays, at 2 p. m.
All hearings are held in Room 1013, Municipal Building, Manhattan.

HOURS FOR CONSULTATION

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

CALL OF CLERK'S CALENDAR

The *Clerk's Calendar* consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, October 23, 1928, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, October 30, 1928, at 2 o'clock.

The *Clerk's Calendar* is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

NOTICE TO APPELLANTS AND PETITIONERS

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and disposition of same expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

CALL OF CLERK'S CALENDAR

TUESDAY, OCTOBER 23, 1928, AT 2 P. M.

Building Zone Cases.

523-28-BZ.
APPLICANT—Emil Guterman, for Herman Schlossman,
owner.

PREMISES—16806-16808 Union Turnpike, south side,
40.22 ft. east of 168th street (Ackroyd avenue),
Hillcrest, Borough of Queens.
APPLICATION, under section 21 of the building zone
resolution,
TO PERMIT in a business district the erection and main-
tenance of a gasoline service station.

THE RESOLUTION—

(430-28-A)

WHEREAS, David Kaufman, for Alida Realty Corp., owner, filed, May 8, 1928, an appeal from an order of the fire commissioner, affecting premises 87-15 Britton avenue, northwest corner of Elbertson street, Jackson Heights, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated April 16, 1928, reads:

"3. Brick up opening now protected by fireproof self-closing door which leads from inside of building to boiler room as per plan 2220-27.

"4. Provide an outside exit with engineer's ladder from boiler room as per F.D. Plan 2220-27.";

and

WHEREAS, the building is non-fireproof, four stories in height, 50 ft. by 87 ft. 6 in. in area; OCCUPIED as a new law tenement, four families on each story; a fuel oil burning system having been installed consisting of a 1,500-gallon outside storage tank buried under yard and connected by piping to an approved May Oil Burner located in the cellar, using Grade A oil; and

WHEREAS, the appellant claims that the burner is located in the boiler room which is entirely enclosed with fireproof materials; that a direct exit to the street is impossible without an expensive alteration; that in case of accident the present exit is adequate.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that an engineer's ladder shall be provided on the south wall of the boiler room leading to an opening 3 ft. 3 in. wide and 24 in. high to Britton avenue; that the extension of the 8-inch brick wall on the south end of the westerly wall of the boiler room shall be provided with a self-closing fireproof door, and *granted on condition* that the fuel oil rules shall be complied with in all other respects.

263-28-A.

APPELLANT—Vincent Libretti, for H. Horn Realty Co., lessee.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—648 Broadway, Manhattan.

APPEARANCES—

For Appellant: Vincent Libretti.

For Administration: Inspector Meyer of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Acting Chairman Connell, Commissioners Holland and Guilfoyle and Deputy Chief Martin..... 4

Negative 0

Absent: Chairman Walsh..... 1

THE RESOLUTION—

(263-28-A)

WHEREAS, Vincent Libretti, for H. Horn Realty Co., lessee, filed, March 26, 1928, an appeal from an order of the fire commissioner, affecting premises 648 Broadway, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated January 23, 1928, reads:

"Referring to your application for a permit to drill and ornament articles made of nitro-cellulose material you are hereby notified that such permit cannot be granted because the building is over three stories in height and not of fireproof construction.

"You are therefore hereby ordered to:

"1. Discontinue storing, having, keeping or working any nitro-cellulose material, other than finished articles, on these premises.";

and

WHEREAS, the building is non-fireproof, ten stories (128 ft.) in height, 30 ft. 5 in. by 150 ft. in area; OCCUPIED: 1st story, restaurant; upper stories, tenant factories (manufacture of shirts and millinery), approximately 25 persons per story; appellant occupying space at the northeast portion of the tenth story for the manufacture of celluloid novelties and ornaments; and

WHEREAS, appellant contends that the building is equipped with a sprinkler system and a standpipe system; that the celluloid articles are delivered in finished form and the work done on the premises consists in the decoration of same and setting rhinestones therein; that the maximum amount of celluloid on hand is ten (10) pounds and that the stock is stored in a fireproof cabinet.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that all celluloid used shall be maintained in an approved metal box and that not more than five pounds of celluloid shall be maintained in this portion of the premises at any one time; that the work performed on the celluloid shall be confined to the setting of rhinestones into finished celluloid products; further, *on condition* that the building shall be equipped with a one-source wet sprinkler system; that the celluloid occupancy shall be confined to the top story of the building and that all other requirements of the fire department shall be complied with.

278-28-A.

APPELLANT—Leon Hoffman, for H. Horn Realty Co., lessee.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—648 Broadway, Manhattan.

APPEARANCES—

For Appellant: Leon Hoffman.

For Administration: Inspector Meyer of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Acting Chairman Connell, Commissioners Holland and Guilfoyle and Deputy Chief Martin..... 4

Negative 0

Absent: Chairman Walsh..... 1

THE RESOLUTION—

(278-28-A)

WHEREAS, Leon Hoffman, for H. Horn Realty Co., lessee, filed, March 29, 1928, an appeal from an order of the fire commissioner, affecting premises 648 Broadway, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated March 12, 1928 (Order No. 41027-LC), reads:

"Referring to your application for a permit to drill and ornament articles made of nitro-cellulose material you are hereby notified that such permit cannot be granted because the building is over three stories in height and not of fireproof construction.

"You are therefore hereby ordered to

"1. Discontinue storing, having, keeping or working any nitro-cellulose material other than finished articles on these premises.";

and

WHEREAS, the building is non-fireproof, ten stories (128 ft.) in height, 30 ft. 5 in. by 150 ft. in area; OCCUPIED: 1st story, restaurant; upper stories, tenant factories (manufacture of shirts and millinery), approximately 25 persons per story; appellant occupying space at the south center portion of the tenth story for the manufacture of celluloid novelties and ornaments; and

WHEREAS, appellant contends that the building is equipped with a sprinkler and a standpipe system; that the celluloid articles are delivered in finished form and the work done

MINUTES

on the premises consists in the decoration of same and setting rhinestones therein; that the maximum amount of celluloid on hand is ten (10) pounds and that the stock is stored in a fireproof cabinet.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that all celluloid used shall be maintained in an approved metal box and that not more than five pounds of celluloid shall be maintained in this portion of the premises at any one time; that the work performed on the celluloid shall be confined to the setting of rhinestones into finished celluloid products; further, *on condition* that the building shall be equipped with a one-source wet sprinkler system; that the celluloid occupancy shall be confined to the top story of the building and that all other requirements of the fire department shall be complied with.

BUILDING ZONE CASES

198-28-BZ.

APPLICANT—Walter Pfaendler, for Lantic Corporation, owner.

SUBJECT—Application (re decision of the superintendent of buildings) under sections 7c and 21 of the building zone resolution, to permit in a business district extending from an unrestricted district the alteration and extension of a garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—505-517 Pacific street, northeast corner of Third avenue, Brooklyn.

APPEARANCES—

For Applicant: Walter Pfaendler.
For Opposition: None.

ACTION OF BOARD—Application granted on condition.

THE VOTE—

Affirmative: Acting Chairman Connell, Commissioners Holland and Guilfoyle and Deputy Chief Martin..... 4
Negative 0
Absent: Chairman Walsh..... 1

THE RESOLUTION—

(198-28-BZ)

WHEREAS, Walter Pfaendler, for Lantic Corp., owner, filed, March 3, 1928, an application, under the building zone resolution, to permit in a business district, extending from an unrestricted district, the alteration and extension of a garage for the storage of more than five motor vehicles; premises 505-517 Pacific street, northeast corner of Third avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, October 16, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Pacific street is in an unrestricted district; Third avenue is in a business and an unrestricted district, and Atlantic avenue is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered February 14, 1928 (re App. No. 23944-27), reads:

"In view of the fact that this garage was granted by Board of Appeals as per resolution (617-24-BZ) for a two-story garage 100' x 180' in size, proposed extension and additions thereto although in an unrestricted zone designation should be referred back to the Board of Appeals as it will be part of the original structure.

"Denied as contrary to resolution of Board of Appeals as above noted.";

and

WHEREAS, the building is of non-fireproof construction, two stories in height, with a frontage of 180 ft. and a depth of 100 ft.; occupied as a garage for the storage of more than five motor vehicles; it is proposed to erect a two-story extension entirely in the unrestricted district 69 ft. 4 in. by 90 ft. in area; and

WHEREAS, the board deemed that applicant was entitled to the relief requested under section 7c of the building zone resolution and that denial of relief would constitute a hardship within the meaning of section 21.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted, permitting extension of the rear of the garage in the unrestricted district only, on condition that the former resolution adopted

by this board under Calendar No. 617-24-BZ be complied with in all other respects.

276-28-BZ.

APPLICANT—Palmer H. Ogden, for Cannabbe Holding Corp., and 31st Street Holding Corp., owners.

SUBJECT—Application (re decision of the superintendent of buildings) under section 21 of the building zone resolution, to permit in a two times height district the erection of the street wall of a building to a height not exceeding the limit set by the zone resolution.

PREMISES AFFECTED—142-162 West 31st street and 371-377 Seventh avenue, southeast corner, Manhattan.

APPEARANCES—

For Applicant: John F. Keating.
For Opposition: None.

ACTION OF BOARD—Application granted on condition.

THE VOTE—

Affirmative: Acting Chairman Connell, Commissioners Holland and Guilfoyle and Deputy Chief Martin..... 4
Negative 0
Absent: Chairman Walsh..... 1

THE RESOLUTION—

(276-28-BZ)

WHEREAS, Palmer H. Ogden, for Canabbe Holding Corp. and Thirty-first Street Holding Corp., owners, filed, March 28, 1928, an application, under the building zone resolution, to permit in a two times height district the erection of the street wall of a building to a height exceeding the limit set by the zone resolution; premises 142-162 West 31st street and 371-377 Seventh avenue, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, October 16, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the district maps accompanying the building zone resolution show that Seventh avenue, south of a point 100 ft. south of West 31st street, is in an unrestricted use and two times height district; Seventh avenue, north of a point 100 ft. south of West 31st street, is in a business use and two times height district, and West 31st street is in a business use and two times height district; and

WHEREAS, the decision of the superintendent of buildings, rendered January 14, 1928 (re N. B. 562-27), reads:

"1. Height of building and portions thereof should comply with Article 3 Building Zone Resolution.";

and

WHEREAS, the proposed building is to be of fireproof construction, thirty-one stories (342 ft. 9 in.) in height, with a frontage of 88 ft. 3 in. on Seventh avenue and 200 ft. 6 in. on West 31st street; to be occupied as a hotel; and

WHEREAS, Seventh avenue is 100 ft. in width and West 31st street is 60 ft. in width; it is proposed to extend above the legal height a portion of West 31st street wall of the building; this portion of the building being 10 ft. wide and located at a point 150 ft. west of Seventh avenue; the limiting height being 193.33 ft.; it is proposed to erect the street wall at this 10 ft. wide portion in question to a height of 293 ft. 7 in. to correspond to the other architectural features of the building; and

WHEREAS, the board deemed that applicant was entitled to the relief requested under section 21 of the building zone resolution on the ground of practical difficulty and unnecessary hardship.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the height district regulations of the building zone resolution, and that the application be and it hereby is granted, for that portion of the building indicated by shadow lines on the plan filed

MINUTES

with this board for a width of ten (10) ft., starting at a point 150 ft. east of Seventh avenue and extending to a point 160 ft. east of Seventh avenue, along the line of 31st street, to allow a height of 293 ft. 7 in., *on condition* that the building shall conform with the building zone resolution in all other respects.

1237-27-BZ.

APPLICANT—Kate Ruchlis and Israel Berkenfeld, owners.

SUBJECT—Application (re decision of the superintendent of buildings) under sections 7g and 21 of the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station (previously withdrawn).

PREMISES AFFECTED—897-901 Bedford avenue, northeast corner of Willoughby avenue, Brooklyn.

APPEARANCES—

For Applicant: William F. Doyle.

For Opposition: Leonard E. Ruisi, Andrew Tarpey and W. Tarpey.

ACTION OF BOARD—Application granted on condition.

THE VOTE—

Affirmative: Acting Chairman Connell, Commissioners Holland and Guilfoyle and

Deputy Chief Martin..... 4

Negative 0

Absent: Chairman Walsh..... 1

THE RESOLUTION—

(1237-27-BZ)

WHEREAS, Kate Ruchlis and Israel Berkenfeld, owners, filed, November 22, 1927; withdrawn June 12, 1928; reopened July 27, 1928, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station; premises 897-901 Bedford avenue, northeast corner of Willoughby avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, October 16, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Bedford avenue is in a business district and Spencer street and Skillman street are in an unrestricted district; and

WHEREAS, the decision of the superintendent of buildings, rendered November 10, 1927 (re App. No. 20819-27), reads:

"Proposition contrary to the zone resolution, Art. II, Sec. 4 a 46.

"The installation of a gasoline service station in a business district;"

and

WHEREAS, it is proposed to erect an office, 18 ft. by 20 ft., bury twelve 550-gallon tanks and erect eight pumps for the purpose of conducting a gasoline station within a business district; and

WHEREAS, the applicant filed in support of his application 82 per cent of consents by affected property owners and the board deemed that denial of the variation would constitute a hardship under section 21 of the building zone resolution.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that there shall be erected at the southerly and easterly building lines a 10-ft.-high brick wall, finished with light-colored face brick, with architectural terra cotta or natural stone trim; that there shall be erected a 12-inch-high concrete curbing at northerly and westerly lines with two openings on Bedford avenue and two on Willoughby avenue, each opening to be not more than 10 ft. wide; that all gasoline pumps

shall be located 10 ft. back from the building line; that there shall be no signs or advertising displayed other than those on the illuminated gasoline pumps on the premises; that no portable gasoline tanks shall be operated or maintained on the premises; that there shall be no business of any nature or description conducted on these premises other than the selling and maintenance of gasoline and oil for automobiles; that all permits required shall be obtained within six months and all work involved thereby completed within one year from the date of this action.

520-26-BZ.

APPLICANT—Jacob Lubroth, for Charles Fineman, owner.

SUBJECT—Application for reopening—extension of time—application (re decision of superintendent of buildings) under sections 7g of the building zone resolution, to permit in a business district the erection and maintenance of a gasoline selling station.

PREMISES AFFECTED—Northeast corner Vineland avenue and Journeay avenue, Borough of Richmond.

APPEARANCES—

For Applicant: Louis Kaplan.

For Opposition: None.

ACTION OF BOARD—Application reopened and extension of time granted for six months to obtain permits and nine months to complete work, from date of this action.

Deputy Chief Martin..... 4

Negative 0

Absent: Chairman Walsh..... 1

THE RESOLUTION—

(520-26-BZ)

WHEREAS, Jacob Lubroth, for Charles Fineman, owner, filed, June 7, 1926, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station; premises northeast corner of Vineland avenue and Journeay avenue, Borough of Richmond; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, October 4, 1927, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Journeay avenue, Vineland avenue and Huguenot avenue are in business districts; and

WHEREAS, the decision of the superintendent of buildings, rendered April 30, 1926 (N. B. 557-26), reads:

"Contrary to Zoning Resolution. Gasoline Station in Business Zone;"

and

WHEREAS, it is proposed to erect an all metal office, bury two 550-gallon tanks and erect three pumps on a triangular lot 187.47 ft. by 177.61 ft. by 60.03 ft., for the purpose of conducting a gasoline service station within a business district; and

WHEREAS, this application when originally considered by this board was referred to the board of estimate and apportionment, which honorable board recommended consideration by the board of standards and appeals in this specific instance; and

WHEREAS, the applicant, subject to the principle under the requirements of section 7, subdivision g, has filed 85 per cent consents of property owners in the area deemed affected by this board; and

WHEREAS, this application was granted by the board at its meeting, October 4, 1927, on certain conditions, and applicant requested a modification of the time limit imposed.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district

MINUTES

regulations of the building zone resolution, and that the application be and it hereby is *granted* for a gasoline service station on the triangular plot formed by the intersection of Journeay avenue and Vineland avenue, 187.47 ft. on Vineland avenue, 177.61 ft. on Journeay avenue and 60.03 ft. on the base to zero apex, *on condition* that not more than one structure for accommodation, shelter and service use of these premises shall be erected on this plot, said structure not exceeding an area of 20 ft. square and one story in height, the exterior to be finished with light-face glazed brick or light-glazed architectural terra cotta; that there shall be no signs erected or displayed on this structure other than on the frieze; that there shall be no advertising signs erected or maintained on these premises other than on the illuminated lamps of the gasoline pumps; that there shall be no portable gasoline tanks operated on or from these premises, and that all permits required shall be obtained within six months and any work involved thereby shall be completed within one year from October 16, 1928.

THE RESOLUTION—

(488-28-S)

WHEREAS, James Kearney, for Rutley's, Inc., filed, May 26, 1928, a petition for a variation from the requirements of the labor law, as cited in a decision of the health commissioner, affecting premises 1440 Broadway, Borough of Manhattan; and

missioner, affecting premises 1440 Broadway, Borough of Manhattan; and

WHEREAS, the decision of the health commissioner, dated March 13, 1928, reads:

"Mr. Rutley's, Inc.

"Sir:

"At a meeting of the Board of Health of the Department of Health of The City of New York, held March 13, 1928, your application for a Sanitary Certificate for a cellar bakery at 1440 Broadway in the Borough of Manhattan was denied.

"By order of the Board of Health.";

and

WHEREAS, the building is fireproof, twenty-five stories in height, 203 ft. 10 in. by 197 ft. 6 in. in area; OCCUPIED: cellar, bakery; 1st story, stores; 2nd to 8th stories, inclusive, lofts; offices above 8th story; there being located in the cellar a bakery used in connection with the conduct of a restaurant in the first story and mezzanine, bakery being ventilated by mechanical ventilation; and

WHEREAS, appellant contends that there is a permit to conduct a kitchen and restaurant issued by the health department October 6, 1925; that in conjunction with this restaurant its cakes, etc., are sold over the counter and request is made to grant permission to conduct the sale of these cakes, etc., amounting to from ten to twelve pounds of cakes per day.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted, to permit the sale of ten pounds of cakes, baked on the premises, on condition that they be sold to the patrons of the restaurant only, and that the requirements of the labor law be complied with in all other respects.

THE RESOLUTION—

(380-28-S)

WHEREAS, John Ph. Voelker, for Kingan Provision Co., owner, filed, April 21, 1928, a petition for a variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises 700-728 Brook avenue, Borough of The Bronx; and

WHEREAS, the decision of the superintendent of buildings, rendered April 10, 1928, reads:

"1. Proposed omission of stair enclosure in 2nd story contrary to Sec. 270, par 3 of Labor Law.";

and

WHEREAS, the building is fireproof, two stories in height, 171 ft. by 50 ft. 3½ in. and 32 ft. 8½ in. in area, irregular; OCCUPIED: cellar, storage and machinery, 4 persons; 1st story, storage and sales, 11 persons; 2nd story, packing and office, 8 persons; smoke houses on north end of building from cellar to roof; means of EGRESS consist of an interior stairway, extending from the cellar to the roof, enclosed in fireproof partitions with fireproof doors at the openings at the center of the building, and interior stairway at the north end of the building extending from the first

MINUTES

story to the second story, enclosed in fireproof partitions on the first story and unenclosed above; and

WHEREAS, appellant proposes to omit an 8-inch hollow tile and plaster partitions at the northerly stairs from the second story to roof, and contends that as the stairs go directly from the second story to the street and are enclosed on the first story, and if the building be equipped with an additional fireproof stairway that the means of egress are adequate.

Resolved, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is *granted on condition* that the building be not increased in height or area and that the requirements of the labor law be complied with in all other respects.

636-28-S.

PETITIONER—Albert G. Berger, for Harley Realty Corp., owner.

SUBJECT—Variation of the labor law as cited in decision of the superintendent of buildings.

PREMISES AFFECTED—342-346 Seventh avenue and 201-203 West 29th street, northwest corner, Manhattan.

APPEARANCES—

For Petitioner: Wm. J. Minogue.

ACTION OF BOARD—Petition granted on condition.

Negative	0
Absent: Chairman Walsh.....	1

THE RESOLUTION—

(636-28-S)

WHEREAS, Albert G. Berger, for Harley Realty Corp., owner, filed, July 26, 1928, a petition for a variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises 342-346 Seventh avenue and 201-203 West 29th street, northwest corner, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered July 21, 1928 (N. B. 395-28), reads:

"4. All windows should be fireproof windows as per Sec. 264-7 L.L. and Rule 503 Industrial Code."; and

WHEREAS, the building is fireproof, four stories (54 ft. 2 in.) in height, 58 ft. 9 in. by 64 ft. in area; OCCUPIED: 1st story, stores; upper stories, tenant factories, 30 persons per story; EQUIPPED with a sprinkler system; EXITS: an interior fireproof stairway, extending from the first story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, there are openings on the first, mezzanine, second and third stories in the West 29th street and in the Seventh avenue street walls of the building glazed with plate glass set in metal frames; the maximum area of the glass on the first story being 12 ft. by 9 ft. 3 in.; on the second and third stories being 9 ft. 5 in. by 7 ft.; and

WHEREAS, petitioner contends that a strict compliance with the labor law as to the area of the glass would destroy the intended use of the three stories in question.

Resolved, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is *granted on condition* that the windows in question above the first story shall be not more than 4 ft. 8 in. wide by 7 ft. high, equipped with approved metal frames, glazed with one-quarter-inch polished plate glass, and that the requirements of the labor law be complied with in all other respects.

637-28-S.

PETITIONER—Albert G. Berger, for 259-261 West 30th Street, Inc., owner.

SUBJECT—Variation of the labor law as cited in decision of the superintendent of buildings.

PREMISES AFFECTED—259-261 West 30th street, Manhattan.

APPEARANCES—

For Petitioner: Wm. J. Minogue.

ACTION OF BOARD—Petition granted on condition.
THE VOTE—

Absent: Chairman Walsh.....	1

THE RESOLUTION—

(637-28-S)

WHEREAS, Albert G. Berger, for 259-261 West 30th street, owner, filed, July 26, 1928, a petition for a variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises 259-261 West 30th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered July 23, 1928 (N. B. App. No. 231-28), reads:

"11. Windows on first, second and third floors should comply with section 264 of labor law and rule 503 of Industrial Code."; and

WHEREAS, the building is fireproof, seventeen stories in height, 50 ft. by 165 ft. 1 in. in area; OCCUPIED: 1st story, stores; upper stories, offices, showrooms and tenant factories, 110 persons per story; EQUIPPED with a sprinkler system; EXITS: two interior fireproof stairways, extending from the first story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, there are openings on the first, second and third stories in the street walls of the building, glazed with plate glass, set in metal frames; the maximum area of the glass on the first story being 6 ft. 6 in. by 9 ft. 7 in.; on the mezzanine story being 10 ft. 8 in. by 5 ft. 7 in., and on the second and third stories being 9 ft. 6 in. by 7 ft.; and

WHEREAS, petitioner contends that a strict compliance with the labor law as to the area of the glass would destroy the intended use of the three stories in question.

Resolved, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is *granted on condition* that the windows in question above the first story be not more than 4 ft. 8 in. wide and be equipped with approved metal frames and sash, glazed with one-quarter-inch plate glass, and that the requirements of the labor law be complied with in all other respects.

512-28-S.

PETITIONER—Samuel Rosenblum, for Imperial Metal Mfg. Corp., owner.

SUBJECT—Variation of the labor law as cited in order of the fire commissioner.

PREMISES AFFECTED—3801-3809 Queens boulevard, Long Island City, Borough of Queens.

APPEARANCES—

For Petitioner: Samuel Rosenblum.

ACTION OF BOARD—Petition granted on condition.
THE VOTE—

THE RESOLUTION—

(512-28-S)

WHEREAS, Samuel Rosenblum, for Imperial Metal Manufacturing Corp., owner, filed, June 5, 1928, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises

MINUTES

3801-3809 Queens boulevard, Long Island City, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated March 8, 1928 (Order No. 33727-LD), reads:

"1. Provide an additional means of exit remote from present exit, as per Section 270 of the Labor Law.

"2. Extend stairway enclosure 3' above the roof, as per Section 270 of the Labor Law.";

and

WHEREAS, the building is fireproof, one story and mezzanine in height, 100 ft. by 200 ft. in area; OCCUPIED for the manufacture of metal bottle caps on the first story, 75 persons; office on the mezzanine floor, 4 persons; the means of EGRESS consisting of an interior stairway, extending from the mezzanine story to the street, enclosed in 4-inch terra cotta partitions with fireproof self-closing doors to the openings; premises being equipped with automatic sprinkler system and standpipe system; and

WHEREAS, petitioner contends that the mezzanine floor is used for office purposes only; that the building was erected and plans approved by the superintendent of buildings, Plan No. 20511, approved December 17, 1926, and that the building was completed in 1927, and that the exits were accepted by the bureau of buildings under this approved plan; that the building is protected by an automatic sprinkler.

Resolved, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition, as to Items 1 and 2 of Order No. 33727-LD, be and it hereby is *granted*, only so far as it affects the mezzanine floor, *on condition* that the mezzanine floor shall be used for offices by the company occupying the entire premises and so long as the building be not increased in height or area and that the requirements of the labor law be complied with in all other respects, and so long as present conditions remain substantially unchanged.

545-28-S.

PETITIONER—Croker Natl. Fire Prev. Eng. Co., for T. Douglas Robinson, trustee, owner.

SUBJECT—Variation of the labor law as cited in order of the fire commissioner.

PREMISES AFFECTED—647 Broadway, Manhattan.

APPEARANCES—

For Petitioner: Herman E. Horwood.

ACTION OF BOARD—Petition granted on condition.

THE VOTE—

Affirmative: Acting Chairman Connell, Commissioners Holland and Guilfoyle and Deputy Chief Martin..... 4

Negative 0

Absent: Chairman Walsh..... 1

THE RESOLUTION—

(545-28-S)

WHEREAS, Croker National Fire Prevention Engineering Co., for T. Douglas Robinson, trustee, filed, June 19, 1928, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 647 Broadway, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated January 26, 1928, reads:

"2. Extend the interior stairway at the north side of building to the roof, as per Section 271 of the Labor Law.";

and

WHEREAS, the building is non-fireproof, five stories (66 ft. 4 in.) in height, 25 ft. 6½ in. by 75 ft. in area at first story and 25 ft. 6½ in. by 68 ft. in area above; OCCUPIED: 1st story, stores; 2nd story, manufacture of hats, 3 persons; 3rd story, manufacture of hats, 3 persons; 4th and 5th stories, vacant at present; EQUIPPED with a fire alarm signal system; EXITS: an interior wooden stairway, extending

from the first story to roof (with iron ladder leading to scuttle in roof), enclosed on the first and second stories with wood lath and plaster partitions, on the third and fourth stories with wood partitions, and open on the fifth story, with wood doors at openings; a fire escape on the front of the building, having fireproof openings along the course thereof, extending from the top story to the second story balcony, with EGRESS from the termination of the fire escape by means of a counterbalanced stairway to street; ROOFS of adjoining buildings: to south, same level; to north, 20 ft. higher; and

WHEREAS, petitioner contends that the fire escape on the front of the building is connected on the fourth story by means of a party balcony to the fire escape on the building to the south, and proposes to enclose the hallway in the top story so that the existing iron ladder to the roof will be within the stair enclosure.

Resolved, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is *granted on condition* that the interior stairwell be extended to the roof, enclosing a double-rung iron ladder to scuttle in the roof; that the occupancy be limited to the capacity of the interior stairways, and that the requirements of the labor law be complied with in all other respects.

403-28-S.

PETITIONER—Shampan & Shampan, for Realty Construction Corp., owner.

SUBJECT—Variation of the labor law as cited in decision of the superintendent of buildings.

PREMISES AFFECTED—253-255 West 27th street, Manhattan.

APPEARANCES—

For Petitioner: Frederick J. Taulhaber.

ACTION OF BOARD—Petition granted on condition.

THE VOTE—

Affirmative: Acting Chairman Connell, Commissioners Holland and Guilfoyle and Deputy Chief Martin..... 4

Negative 0

Absent: Chairman Walsh..... 1

THE RESOLUTION—

(403-28-S)

WHEREAS, Shampan & Shampan, for Realty Construction Corp., filed, April 30, 1928, a variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises 253-255 West 27th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered April 16, 1928, reads:

"8. In a factory building windows with glass area exceeding 720 sq. inches are unlawful. Sec. 264-7 Labor Law.";

and

WHEREAS, the building is fireproof, fifteen stories in height, 49 ft. 9 in. by 98 ft. 9 in. in area at first story and 49 ft. 9 in. by 88 ft. 9 in. in area above; OCCUPIED: 1st story, stores; upper stories, tenant factories, 70 persons per story; EQUIPPED with a sprinkler system; EXITS: two interior fireproof stairways, extending from the first story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, there are openings on the first, second and third stories in the street walls of the building, glazed with one-quarter-inch thick plate glass, set in metal frames: the maximum area of the glass on the first story being 8 ft. 6½ in. by 7 ft.; on the second and third stories being 9 ft. by 7 ft.; and

WHEREAS, petitioner contends that a strict compliance with the labor law as to the area of the glass would destroy the intended use of the three lower stories.

Resolved, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor

MINUTES

law, and that the petition be and it hereby is *granted on condition* that all windows in question above the first story shall be not more than 4 ft. 6 in. wide, with the exception of one window on each side of the building on these two street fronts, which shall be not more than 6 ft. wide; that all windows in question shall be equipped with approved metal frames and sash, glazed with one-quarter-inch plate glass, and that the requirements of the labor law be complied with in all other respects.

525-28-S.

PETITIONER—John J. Gilmartin, for G. O. F. Realty Co., owner.

SUBJECT—Variation of the labor law as cited in orders of the fire commissioner.

PREMISES AFFECTED—20-26 West 36th street, Manhattan.

APPEARANCES—

For Petitioner: John J. Gilmartin.

ACTION OF BOARD—Petition granted on condition.
THE VOTE—

Affirmative: Acting Chairman Connell, Commissioners Holland and Guilfoyle and Deputy Chief Martin..... 4

Negative 0

Absent: Chairman Walsh..... 1

THE RESOLUTION—

(525-28-S)

WHEREAS, John J. Gilmartin, for G. O. F. Realty Co., owner, filed, June 8, 1928, a petition for a variation from the requirements of the labor law, as cited in orders of the fire commissioner, affecting premises 20-26 West 36th street, Borough of Manhattan; and

WHEREAS, the orders of the fire commissioner, dated May 28, 1928 (Order Nos. 31882-LD, 37924-LD, 37925-LD, 37926-LD, 37927-LD, 37928-LD, 37933-LD, 37934-LD and 37936-LD), read:

"1. Arrange bars on windows rear of building so as to be readily movable or removable from both sides in such a manner as to afford the free and unobstructed use of such windows for purposes of egress, as per Section 272 of the Labor Law."

and

WHEREAS, the building is fireproof, twelve stories in height, 65 ft. by 90 ft. in area; OCCUPIED: 1st story, store; upper stories, manufacture of furs, hats and jewelry, 50 persons on each story; EQUIPPED with a sprinkler system and a fire alarm signal system; EXITS: an interior fireproof stairway, extending from the first story

to roof, enclosed in fireproof partitions with fireproof doors at openings; an exterior iron stairway on rear of the building, having fireproof openings along the course thereof, extending from the second story to top story, gooseneck ladder to roof, and EGRESS from the termination of the stairway by means of fireproof passageway leading to the street; ROOFS of adjoining buildings: 75 ft. lower at east; same height at west; and

WHEREAS, the petitioner claims that there is one window on each of the second to the twelfth stories, inclusive, opening onto the rear exterior iron stairway, which are affected by the fire department order; that the frame of the stairway extends straight down in line of the windows which precludes the use of them as exits; that the exit door leading to the exterior iron stairway is only 2 ft. from the barred windows on each story; furthermore, the petitioner contends that the exits are adequate.

Resolved, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is *granted on condition* that there be provided on each floor a doorway leading to fire escape equipped with metal-clad door, and that the requirements of the labor law shall be complied with in all other respects.

APPEARANCES—

For Petitioner: R. C. Daly.

ACTION OF BOARD—Petition placed on reserve calendar and referred to fire department for inspection and report.

511-28-SA.

PETITIONER—Detroit Lubricator Company, owner.

SUBJECT—Genuine Detroit, Type "S," Anti-Syphon Valve, approval of.

APPEARANCES—

For Petitioner: A. A. Putt.

ACTION OF BOARD—Petition placed on reserve calendar, pending amendment of fuel oil rules.

Adjourned, 4.45 p. m.

WILLIAM J. O'GORMAN, *Secretary*.

RULES

COMMUNITY LAUNDRIES IN BUSINESS DISTRICTS

*Amended Resolution Adopted by the Board of Appeals,
March 16, 1920, Under Cal. No. 549-17-BZ*

WHEREAS, the board of appeals, at its regular meeting, December 16, 1919, unanimously rescinded an opinion incidentally expressed and incorporated in a resolution adopted by the board on May 28, 1917, in acting on Cal. No. 549-17-BZ. This opinion was that a laundry is not a prohibited use in a business district under the building zone resolution. The board unanimously rescinded this expression of opinion, inasmuch as a laundry is a factory within the meaning of the labor law and must be so construed under the building zone resolution in the absence of any definition therein to the contrary.

Resolved, that this shall not be construed to include within the prohibited uses specified under Section 4 of the building zone resolution a community or neighborhood laundry located in the basement or ground floor of a building within a business district and containing not more than eight (8) rotary washing machines with inside cylinders not more than 30 in. in diameter by 30 in. in length over all nor more than two 20 in. extractors, the 20 in. measurement being the diameter of the inside basket, which machines and extractors shall be operated solely by electric power and do not require the installation of steam boiler or plant

FORMS FOR NOTICES TO PROPERTY OWNERS

If applicants, under the building zone resolution, desire copies of Form 7NO, for notices to property owners, such forms are not to be supplied by this office.

The applicant is entitled only to one copy of Form 7NO, properly filled out.

If he desires additional copies for his own convenience, in notifying property owners, he can obtain such copies from The O'Connell Press, 176 Park Row, Manhattan, at three cents each, postage to be added if the forms are to be supplied by mail.

PUBLIC HEARING

PROPOSED AMENDMENTS TO FUEL OIL RULES

[217-21-SR]

NOTICE IS HEREBY GIVEN that a public hearing will be held by the board of standards and appeals on Friday, October 26, 1928, at 2 p. m., Room 1013, Municipal Building, on proposed amendments to Fuel Oil Rules.

Matter in *italics* is new. Matter in brackets [] to be omitted.

Rule 1. Definition.

For the purpose of these rules the following terms shall be interpreted in accordance with these definitions.

DISCHARGE LINE shall be the line between the discharge outlet of the pump and the burner oil inlet connection.

FIRM FOUNDATION: A firm foundation is one which will carry the maximum load to which it will be subjected without exceeding the safe bearing capacity of the soil.

FIRE RETARDING MATERIALS:

(a) One-half ($\frac{1}{2}$) inch plaster boards or asbestos board, or three-eighths ($\frac{3}{8}$) inch gypsum wall boards weighing not less than 16 pounds per square yard with pointed joints covered with No. 26 U. S. gauge sheet metal with one (1) inch lapped seams nailed to the wood beams when spaced not more than sixteen (16) inches on centers, or nailed to furring strips when the floor beams are spaced more than sixteen (16) inches on centers, or

(b) Two thicknesses of one-quarter ($\frac{1}{4}$) inch asbestos boards laid with tight staggered joints and nailed to the beams, when spaced not more than sixteen (16) inches on centers, or nailed to furring strips when the floor beams are more than sixteen (16) inches on centers, or

(c) Metal lath weighing not less than three pounds per square yard, attached to furring strips and plastered with Portland cement mortar at least three-quarters ($\frac{3}{4}$) inch thick.

FILL LINE is the line between the fill box and the fill pipe connection in the storage tank.

FUEL OIL, any liquid mixture, substance or compound, derived from petroleum, which does not emit an inflammable vapor below a temperature of 125°F. when tested in a Tagliabue open cup tester (Chapter X Article I Code of Ordinance).

GAUGING DEVICE: A means by which the level of the oil in a storage tank may be indicated.

HEATERS: A device for heating fuel oil for the purpose of decreasing the viscosity.

OIL BURNER: A device designed for the purpose of burning fuel oil.

OVERFLOW PIPE: A pipe which conveys by gravity the oil from the maximum level of an auxiliary tank to the storage tank or from the pump to the storage tank.

RELIEF VALVE: A valve held shut by a spring or other means to automatically relieve pressure in excess of its setting.

REMOTE CONTROL: A hand, electric or mechanically operated device to the oil supply shut off.

RETURN LINE: A line for the purpose of conveying by-passed oil to a storage tank.

SWING JOINT: A connection made in a pipe line by means of a combination of fittings so that the tank can settle naturally without breaking the line or impairing the efficiency of the connection.

SUPPLY LINE: That portion of the line between the storage tank and the oil pump inlet connection. Where a pump is not used it shall be that portion of the line between Storage Tank and the burner oil inlet connection.

SCAVENGING LINE: A line installed to permit the removal of water or foreign matter from a storage tank.

SHUT-OFF VALVE: A device that can be actuated to prevent the flow of liquid in a line of pipe.

[The term "fuel oil" under these rules shall include any liquid or mobile mixture, substance or compound derived

from or including petroleum, which does not emit an inflammable vapor below a temperature of one hundred and thirty-five (135) degrees Fahrenheit, when tested in a Tagliabue or Pensky-Martens closed cup tester; and such oil shall be classified as either Grade A Fuel Oil or Grade B Fuel Oil.

(a) Grade A Fuel Oil Shall Include:

All oil used for fuel purposes under these rules which shall show a flashpoint of not less than one hundred and fifty (150) degrees Fahrenheit when tested in a Tagliabue or Pensky-Martens closed cup tester.

(b) Grade B Fuel Oil Shall Include:

All oil used for fuel purposes under these rules which shall show a flash point of not less than one hundred and thirty-five (135) degrees Fahrenheit when tested in a Tagliabue or Pensky-Martens closed cup tester.]

OILS NOT PERMITTED:

Oils derived from or including petroleum that have a flashpoint below a temperature of 125 degrees Fahrenheit, when tested in a Tagliabue or Pensky-Martens closed cup tester, shall not be used as a fuel to produce heat or light.

[(d) Where the Use of Grade B Fuel Oil Is Permitted.]

FUEL OIL:

[Grade B] Fuel Oil, within the meaning of these rules, having a flashpoint between 125 degrees and 150 degrees may be used for domestic heating in buildings occupied by not more than two (2) families and in tenement houses and commercial plants. If used in tenement houses or commercial plants, a certificate of fitness for the operator of the plant will be required as per Rule 15.

[(e) Where Grade A oil is used in place of Grade B oil in domestic installations it may be used under the requirements for Grade B installations.]

DEVICES:

[(f)] No person, firm, company or corporation shall within the limits of the City of New York use any device or apparatus for burning fuel oil within the meaning of these rules unless such device or apparatus shall have been approved by the Board of Standards and Appeals.

Rule 2. Manner of Storage for Fuel Oil.

Fuel oil, to be used for heating and power purposes, shall be at all times stored in metal tanks with all openings or connections through the tops of the tanks *except as otherwise provided in these rules.*

Rule 3. General Location of Tanks for Fuel Oil.

(a) In all buildings fuel oil storage tanks shall be buried below the floor of the lowest story or, if in the judgment of the Superintendent of Buildings the burial of tanks is not practicable by reason of soil, foundation or structural conditions, the tanks may be placed in the lowest story, subject to the requirements hereinafter set forth.

(b) Along the line of subways no tank shall be placed within twenty (20) feet of any wall separating a building from the subway and, if practical, tanks shall be placed in a lower position than the roadbed of the subway.

Rule 4. Location, Protection and Capacity of Tanks for the Storage of Fuel Oil.

[Subdivision A. Grade A Fuel Oil.]

Section 1. Inside of Buildings Above Ground.

(a) **OVER 275 GALLONS CAPACITY.** Where tank cannot be buried as required in subdivision c of this rule,

PUBLIC HEARING

storage tanks exceeding 275 gallons capacity, or any part of such tanks, when located above the floor level of the lowest story of any building shall each be placed in an enclosure of inside dimensions of 6 inches greater on all sides than the outside dimensions of the tank. The walls of the enclosure shall be constructed of concrete not less than 6 inches in thickness or 8 inches in thickness of brick masonry. The walls shall be carried up to a height not less than 12 inches above the top of the tank and the space between the tank and the walls and top of the enclosure shall be filled with sand or well tamped earth. Enclosure shall not be constructed until after tank inspection is made.

[(a) Where tanks cannot be buried and are located in the lowest story of any building, they shall be placed in an enclosure, the walls, floor and roof of which shall be constructed of reinforced concrete not less than eight (8) inches in thickness, or of twelve (12) inches of masonry and of dimensions six (6) inches greater on all sides than the outside dimensions of the tank.

(b) The walls of the enclosure shall be carried up to a height not less than one (1) foot above the tank and roofed over with reinforced concrete or similar fireproof construction capable of sustaining a load of three hundred (300) pounds per square foot.

(c) The roof of every enclosure shall contain a manhole with fireproof cover properly weighted, but not fastened, placed immediately above the manhole in the top of the tank.

(d) A space of at least two (2) feet shall be maintained between the top of the roof of the enclosure and the ceiling immediately above.

(e) The space between the tank and the walls and roof of the enclosure shall be completely filled with dry upland sand or earth well tamped.]

(b) Not more than one tank shall be placed in an enclosure.

(c) In non-fireproof or frame buildings the total storage capacity of tanks shall not exceed five thousand (5,000) gallons, except as stated in subdivision "d."

(d) In any building, if tanks properly enclosed or covered as above required are located in a fireproof or detached room which is cut off from the rest of the building vertically and horizontally in an approved manner and if such room is ventilated to the outside air, the total storage capacity shall not exceed fifty thousand (50,000) gallons, with an individual tank capacity of not exceeding twenty thousand (20,000) gallons.

(e) 275 GALLONS CAPACITY AND LESS. Storage tanks of 275 gallons capacity and less may be installed in the lowest story so that the bottom of tank shall not be more than 2 feet above the burner oil inlet connection. The tank shall be set on and firmly anchored to a concrete or rock base which base shall be equivalent in weight to at least 15 cubic feet of concrete. Not more than one tank shall be permitted for any one building.

(f) OVER 275 GALLONS CAPACITY. Storage tanks exceeding 275 gallons capacity shall be buried below the level of the lowest floor and below the level of the burner oil inlet connection except where the burial of tanks below the level of the burner oil inlet connection is impractical:

(a) by reason of rock or water conditions.

(b) where the bottom of the tank will be below the level of the foundation footing and where the angle of repose cannot be maintained as certified by the Superintendent of Buildings.

Under conditions (a) and (b) a syphon breaking device provided for in these rules shall be used and the tank shall be placed at the lowest practical level. The top of the tank shall be protected by not less than 12 inches of sand or dry earth or 4 inches of concrete. Tanks shall be placed on firm soil and surrounded with soft earth or sand.

[Section 2. Inside Buildings Below Ground.

(a) When a tank is buried beneath a building its

capacity may be increased one hundred (100) per cent above that allowed for an inside tank as established in connection with buildings of such construction as specified in Rule 4, Subdivision A, Section 1 (g) and (h).

(b) Tanks shall be buried underground below the level of any piping to which they may be connected, with the tops of the tanks not less than two (2) feet below the surface of the ground; or, in lieu of the two (2) foot cover of earth, tanks may be buried under twelve (12) inches of earth, covered by at least six (6) inches of sary to prevent floating, tanks shall be securely anchored. horizontal outline of tanks in all directions. Where neces-

(c) Tanks shall be set on concrete or metal cradles which shall be placed on firm soil and surrounded with soft earth or sand. Tanks shall be completely encased with six (6) inches of concrete when buried in soil the nature of which would make additional protection necessary.]

Section [3] 2. Outside of Buildings Above Ground.

(a) Where vertical tanks of one hundred and fifty thousand (150,000) gallons capacity or less are located outside of buildings and placed above ground, the tanks shall be not less than one and one-fourth (1¼) tank diameters, and in no case less than ten (10) feet, from the line of adjoining property, or the nearest building or adjacent tank.

(b) Where horizontal tanks are located outside of buildings and placed above ground, the tanks shall be not less than one and one-quarter (1¼) tank diameters measured from the end of the tanks and not less than two (2) tank diameters measured from the side of the concrete which shall extend at least one foot beyond the tanks, and in no case less than ten (10) feet from the line cent tank.

(c) Where existing outside above ground storage tanks have been placed closer together than one and one-quarter (1¼) tank diameters, a fire wall shall be built to a height of at least two (2) feet above the height of the highest tank completely separating the tanks for their full diameters or lengths.

(d) Tanks placed above ground shall be set on firm foundations and, if elevated, their supports shall be constructed of fireproof materials. All tanks shall be electrically grounded.

Section [4] 3. Outside of Buildings Below Ground.

(a) Tanks buried outside of buildings below ground shall have the top of the tanks not less than 2 feet below the surface of the ground and below the level of the burner oil inlet connection to which the tanks may be connected, except where the burial of tanks below the level of the burner oil inlet connection to which the tank may be connected is impractical:

(a) by reason of rock or water condition.

(b) where the bottom of the tank will be below the level of the foundation footing and where the angle of repose cannot be maintained as certified by the Superintendent of Buildings.

Under conditions (a) and (b) a syphon breaking device provided for in these rules shall be used.

[(a) Tanks shall be buried underground below the level of any piping to which they may be connected, with the tops of the tanks not less than two (2) feet below the surface of the ground; or, in lieu of the two (2) foot cover of earth, tanks may be buried under twelve (12) inches of earth, well tamped, covered by at least six (6) inches of concrete, which shall extend at least one foot beyond the horizontal outline of tanks in all directions. Where necessary to prevent floating, tanks shall be securely anchored.

(b) Tanks shall be set on concrete or metal cradles which shall be placed on firm soil and surrounded with of adjoining property, or the nearest building or adja-

PUBLIC HEARING

soft earth or sand well tamped. Tanks shall be completely encased with six (6) inches of concrete when buried in soil the nature of which would make additional protection necessary.

Subdivision B. Grade B Fuel Oil.

Section 1. Location.

(a) Storage tanks shall preferably be buried either outside of a building or below the lowest floor level. When not buried and located inside of a building they shall be placed on the lowest floor level and shall be enclosed in four inches of terra cotta or eight inches of approved masonry, and the aggregate capacity of such storage tanks shall not exceed 275 gallons.

(b) Tanks, when buried, shall be placed with top of tanks not less than 2 feet below the surface of the ground and below the level of any piping to which the tanks may be connected, except that, in lieu of the 2-foot earth cover, tanks may be buried under 12 inches of earth and a cover of reinforced concrete at least 6 inches in thickness extending at least one foot beyond the horizontal outline of tank in all directions; concrete slab to be set on a firm soil foundation.

(c) Tanks shall be set on firm soil and surrounded with soft earth or sand and shall be completely encased with (6) inches of concrete, where soil conditions require.

(d) Where in the opinion of the Fire Commissioner extreme difference of grade or soil conditions would work a hardship an anti-syphon valve or other mechanical device to prevent syphoning approved by the U. S. Bureau of Standards, Fire Underwriters Laboratories or other laboratory recognized by the Board of Standards and Appeals, may be used.]

Section 4. Capacity.

The total storage capacity of fuel oil with flashpoint between 125 degrees and 150 degrees F. shall not exceed 1,100 gallons.

Rule 5. [Enclosure and Protection of Tanks for the Storage of Grade A Fuel Oil.]

[Section 1.] Embankments and Dikes.

(a) Above ground storage tanks shall be protected by an embankment or a dike. Such protection shall have a capacity of not less than one and one-half ($1\frac{1}{2}$) times the capacity of the tank so surrounded, and shall be at least four (4) feet high, but in no case higher than one-fourth ($\frac{1}{4}$) the height of the tank when the height of the tank exceeds sixteen (16) feet. Embankments or dikes shall be made of earth-work with clay core; of masonry or of impervious reinforced concrete. Earth-work embankments shall be firmly and compactly built of good earth from which stones, vegetable matter, etc., have been removed, and shall have a flat section at top of not less than three (3) feet and a slope of at least one and one-half ($1\frac{1}{2}$) to one (1) on both sides. Concrete or masonry dikes shall be so designed as to safely carry the entire volume of the oil in the tank so surrounded.

(b) Embankments or dikes shall be continuous and unpierced. Piping shall be carried either over or under embankments or dikes in such a manner as not to interfere with the efficiency of the enclosure.

Rule 5A. Fire Extinguishing Equipment.

(a) Every tank with a capacity of over five thousand (5,000) gallons inside of buildings and ten thousand two hundred (10,200) gallons outside of buildings shall be equipped with a system of steam pipes, blanketing gas or other approved system for use in case of fire, so arranged and installed as to adequately protect the buildings or surrounding property.

(b) When steam is used, the steam supply pipe shall not be less than one-half ($\frac{1}{2}$) inch in size. The boilers

shall be conveniently located, and the steam to the extinguisher lines shall be controlled by easily accessible valves.

(c) Near each boiler of fuel oil burning unit there shall be kept ready for use two portable fire extinguishers of not less than 1 quart capacity or other equivalent fire extinguishers for extinguishing oil fires.

Rule 6. Material and Construction of Tanks for the Storage of Fuel Oil.

Section 1. Cylindrical Tanks (except vertical tanks located outside of Buildings above Ground).

(a) All tanks for the storage of fuel oil shall be built of steel plates made by the Open Hearth Process and known to the trade as "Tank Steel." Such plates shall be free from physical imperfections, such as laminations, cracks, etc. All steel must be new, in good condition and free from rust. The thickness of steel required and the size and spacing of rivets shall be as stated in the table given below.

(b) All tanks must be welded, riveted and caulked, or riveted and welded. Flanges or other pipe connections may be welded. All caulking shall be done with round nose tools and without injury to the plates.

(c) Thickness of cylindrical tanks.

Tanks 36 in. in diameter and less— $\frac{1}{4}$ in. shell, $\frac{1}{4}$ in. heads.

Tanks 37 to 72 in. in diameter— $\frac{1}{4}$ in. shell, $\frac{5}{16}$ in. heads.

Tanks 73 to 120 in. in diameter— $\frac{5}{16}$ in. shell, $\frac{3}{8}$ in. heads.

Tanks over 120 inches in diameter to be of $\frac{3}{8}$ in. steel and to be stiffened by angle rings or equivalent members so as to retain their cylindrical form.

(d) All cylindrical tanks shall preferably be built with dished heads. Should flat heads be used, they must be braced in the same manner as described for the bracing of flat sides of rectangular tanks.

(e) Diameter and Spacing of Rivets.

Riveting in single lap seams shall not exceed a pitch as follows:

In shell $\frac{1}{4}$ in. thick, $\frac{5}{8}$ in. diameter rivets $2\frac{1}{4}$ in. pitch.

In shell $\frac{5}{16}$ in. thick, $\frac{5}{8}$ in. diameter rivets $2\frac{3}{8}$ in. pitch.

In shell $\frac{3}{8}$ in. thick, $\frac{3}{4}$ in. diameter rivets $2\frac{1}{2}$ in. pitch.

Section 2. Rectangular Tanks.

(a) All rectangular tanks shall be built of steel plates of the quality required for cylindrical tanks, and of a thickness of not less than $\frac{5}{16}$ of an inch.

(b) Corners may be made up by bending the plates or by the use of angles.

(c) Rivets in seams shall be $\frac{5}{8}$ of an inch in diameter and spaced not more than $2\frac{1}{4}$ inches center to center.

(d) All flat surfaces of rectangular tanks are to be braced. Bracing shall be done either by using structural members, which will act as girders and which will safely carry the load with a factor of safety of five (5), or by using bars from side to side, end to end and top to bottom of the tank, as the case may be.

(e) When structural members are used, such as angles, channels or beams, etc., the distance from center to center of the rivet lines on these members must not be in excess of twenty-four inches, and the rivet spacing must be such that it will develop the full strength of the member. In no case shall the rivets be in excess of six (6) inches center to center on these members.

(f) When structural reinforcing members are tied together with braces, in order to reduce the effective length, the braces shall not be stressed higher than nine thousand (9,000) pounds per square inch taken on the minimum net section.

(g) If structural members are omitted and the sides

PUBLIC HEARING

of the tank are braced by means of rods or bars, these members should not be spaced farther apart than twenty-four (24) inches center to center in all directions. The unit stress permitted in these members shall not be in excess of nine thousand (9,000) pounds per square inch on the minimum net section.

(h) The fastening between these members and the sides of the tank must in all cases be such that it will develop the full net sections of the bars so that the bar will break before the connection will let go.

Section 3. Vertical Storage Tanks Over 1,000 Gallons Capacity Located Outside of Building Above Ground.

(a) Vertical tanks located outside of buildings above ground shall be built of steel plates of the quality required for cylindrical tanks.

(b) The minimum thickness of shell or bottom plates shall be $\frac{1}{4}$ inch and the minimum thickness of roof plates $\frac{1}{8}$ inch.

The thickness of shell plates shall be figured in accordance with the following formula:

$$t \text{ equals } \frac{P \times r \times F}{T \times E}$$

P equals head pressure at bottom of ring under consideration.

r equals radius of shell in inches.

F equals factor of safety (taken as 5).

T equals tensile strength of plate in pounds per square inch (55,000 pounds per square inch).

E equals efficiency of vertical joint in ring under consideration (calculations to be based on formulas as given in Bulletin No. 14 of the New York State Industrial Commission).

(c) Roof plates shall have single riveted water tight seams and the roof shall be built to shed water. Bottom plates shall have single lap riveted seams. Shell plate seams shall be designed, with proper efficiency to meet requirements of above formula for shell plates.

(d) In all cases, steel tanks for the storage of fuel oil must be built metal to metal. No filler of any kind will be permitted.

(e) Tanks for storage of grade B oil shall be constructed in accordance with the requirements of this rule, except that tanks of a capacity of over 60 gallons and not more than 550 gallons may be constructed of steel not less than $\frac{3}{16}$ inches in thickness.

(f) Auxiliary supply tanks of 60 gallons or less capacity may be constructed of brass, copper, steel or wrought iron of not less than No. 14 U. S. Gauge.

Section 4. Welding.

(a) Where welding is to be used for a part or for the entire tank, the tank shall be fabricated as required under Rule 6, Section 1.

(b) All welded seams of plates shall be lapped or butted.

When the joint is a lapped joint, the sheet shall be lapped not less than two inches and welded both inside and outside. The plates shall be pulled up tight, metal to metal, before welding and kept tight together during welding. Both inside and outside welds shall be of full 45 degree fillet.

Where a butt joint is used, it shall be of the 90 deg. double V type welded both inside and outside and reinforced to a total thickness of at least one and one-half times the plate thickness.

(c) All heads shall be flanged, the straight part of the flange being not less than as follows:

For $\frac{3}{16}$ inch heads, $1\frac{1}{4}$ inch flange.

For $\frac{1}{4}$ inch heads, 2 inch flange.

For $\frac{5}{16}$ inch heads, 2 inch flange.

For $\frac{3}{8}$ inch heads, $2\frac{1}{4}$ inch flange.

For heads over 120 inches diameter the flange shall be increased in length by one-half inch for each increase in diameter of 2 feet.

Where heads are set into the shell, they shall be a driving fit and the shell shall fit the head closely all around. If of over 1,100 gallon capacity they shall be welded inside and outside with full fillet welds. If of 1,100 gallon capacity or less and not over 48 inches in diameter, welding on the outside only will be sufficient.

Where the heads are butt welded to the shell, the head welds for tanks of 1,100 gallon capacity or less and not over 48 inches in diameter, shall be of the 90 deg. single V type welded entirely through and reinforced not more than one-quarter of the shell thickness. For tanks of over 1,100 gallon capacity the head welds shall be of the 90 deg. double V type welded inside and out and reinforced to a total thickness of not less than one and one-half times the shell thickness.

(d) Where tanks are made up of two or more rings the welded longitudinal joints of adjacent sections shall break joints. At no point of a butt girth joint shall the sheet on one side be offset with the sheet on the other side in excess of one-half of the thickness of the plate. All butt girth joints shall be welded inside and out and reinforced to at least one and one-half times the plate thickness, except that for tanks of 1,100 gallon capacity or less and not over 48 inches diameter, they may be of the same construction as the head seams.

(e) Where braces are welded to the plates the welding shall be done in such a manner as to develop the full net sections of the braces; in other words, the brace will break before the connection will let go.

Braces made in more than one piece shall not be joined together by any method of welding.

Section 5. Rust Proofing.

All tanks shall be thoroughly coated on the outside with tar, asphaltum or other suitable rust resisting material. Where soil contains corrosive substances, special protection may be required. Tanks shall not be coated until after the necessary tests have been made.

Section 6. Venting of Tanks.

All tanks shall be vented. (See Rule 8, Section 6, for installation of vent pipes.)

Section 7. Manhole Covers.

Manhole covers shall be of cast iron, cast steel or of the same material as used in the construction of the tanks. On tanks placed inside buildings, the manhole shall be bolted or otherwise secured to the tank and made gas tight. All tanks over 1,100 gallons capacity shall be provided with a manhole of at least 11 in. by 16 in.

Rule 7. Tests of Tanks for the Storage of Fuel Oil.

Tanks and piping to burner shall be tested hydrostatically at a pressure, except as otherwise stated, of not less than 10 pounds per square inch. Those parts subjected to a pressure exceeding 10 pounds per square inch shall be tested at a pressure of not less than $1\frac{1}{2}$ times the maximum pressure to which it is subjected. The hydrostatic pressure on a tank shall be determined by measuring in feet the height from the lowest point in the tank to the highest oil reservoir from which the tank may be filled. This distance divided by 2.3 will give the equivalent pressure in pounds per square inch at the bottom of the tank. When there is danger of freezing, tanks and piping may be tested with oil provided the installation is complete and the pressure applied at the burner end of the supply line. There shall be no fire or flame in the room or rooms in which the test is being conducted. All tests shall be conducted in the presence of a representative of the Fire Commissioner and shall be continued for thirty minutes.

The contractor shall furnish all the necessary equipment for conducting the tests.

PUBLIC HEARING

[Section 1. Inside of Buildings Above or Below Ground or Outside of Buildings Below Ground.]

(a) All tanks located inside of buildings, either on or below the lowest floor level, and outside buried tanks, shall withstand after being set in place, a hydrostatic or air test for at least thirty (30) minutes and shall show no leaks.

(b) The hydrostatic pressure on a tank shall be determined by measuring in feet the height from the lowest point in the tank to the highest oil reservoir from which the tank may be filled. This distance divided by 2.3 will give the equivalent pressure in pounds per square inch at the bottom of the tank. The hydrostatic test pressure shall be not less than thirty (30) pounds per square inch for welded tanks, nor less than twenty-five (25) pounds per square inch for riveted tanks.

(c) Tanks when subjected to an air pressure test shall be equipped with a safety relief valve set at not more than 32 lbs. per sq. in., and the air compressor device employed in the air testing of the tank shall be of low pressure type, equipped with an automatic pressure regulator set at not less than 35 lbs.

Section 2. Horizontal Tanks Outside of Building, Above Ground.

Horizontal tanks outside of buildings and above ground shall stand, without leaking, a hydrostatic or air test of twenty-five (25) pounds per square inch for at least thirty (30) minutes and shall show no leaks.

Section 3. Vertical Tanks Outside of Buildings Above Ground.

Vertical tanks designed for outside above ground storage, having a cover of lighter material than that of the sides of the tank, shall withstand without leaking a head of water equal to that of the depth of the tank.

Section 4. Test for Tanks. How Conducted.

(a) Tests shall be conducted in the presence of a representative of the Fire Commissioner. The contractor shall furnish all the equipment necessary for conducting the tests. Access to the inside and outside of tanks shall be maintained until the necessary tests are completed.

(b) Welded tanks shall, while under the hydrostatic or air test as hereinbefore specified, be subjected to a thorough hammer or impact test. The test shall consist of striking the sheet on both sides of the welded seam a sharp, vibratory blow with a 2 to 6 lb. hammer, the blows to be struck 2 to 3 inches apart and within 2 or 3 inches of, and on each side of, the seam, the blows to be as rapid as a man can conveniently strike a sharp, swinging blow, and as hard as can be struck without indenting or distorting the metal of the sheet.]

Rule 8. Piping for Fuel Oil.

Section 1. Installation of Piping.

(a) Piping shall be run in a substantial and workmanlike manner and provision made for expansion, contraction and settlement. Exposed piping shall be protected against mechanical injury and shall be securely supported with rigid metal fasteners or hangers. Where the top of the tank is below the level of the burner oil inlet connection, the supply line from the tank shall be run above the level of the bottom of the tank so as to prevent syphoning. Cross connections permitting gravity flow from one tank to another are prohibited. All pipes connected to tank except measuring well or gauge pipe shall be provided with double swing joints at tank. All threaded joints shall be made tight with litharge or glycerine or equivalent suitable pipe compound.

[(a) Piping shall be run as directly as practicable without sags, and, except as provided in Rule 11A, e, shall be laid so that where practicable pipes shall pitch toward the

supply tank without traps; provision shall be made for expansion, contraction, jarring and vibration.

(b) Cross connections permitting gravity flow from one tank to another shall be prohibited.

(c) Pipes conveying oil, if laid inside of a building, shall be either buried or exposed to view. Where piping is exposed, it shall be easily accessible for inspection at all times and protected against injury. Exposed piping shall be hung or supported on fireproof materials to prevent falling in case of fire.

(d) Pipes laid below ground or subject to corrosion shall be protected.]

Section 2. Type and Material.

(a) All piping shall be of standard full weight brass, copper, wrought iron or steel for working pressures less than one hundred (100) pounds; for working pressures in excess of one hundred (100) pounds, extra heavy seamless drawn tubing and drop forged fittings shall be used. No pipe less than one-half ($\frac{1}{2}$) inch inside diameter shall be permitted; except that for Grade B oil $\frac{1}{4}$ -inch diameter pipes may be used.

(b) All connections shall be tight and shall have well-fitted joints.

(c) Tubing and couplings, where used in connection with mechanical burners, shall be capable of withstanding a pressure equal to the piping to which it is connected and shall be constructed of fire resisting materials. No soldered connection shall be used. The length of tubing shall not exceed that required for direct connections to coupling.

Section 3. Tests for Piping. [Grade A.]

Piping for systems with working pressures under one hundred (100) pounds, after installation, shall be tested and proven tight at a hydrostatic pressure of not less than one hundred and fifty (150) pounds per square inch; where working pressure exceeds one hundred (100) pounds, piping shall be tested and proven tight at a hydrostatic pressure of not less than one and one-half ($1\frac{1}{2}$) times the maximum working pressure. The maximum working pressure shall be noted on the plans. Tests shall continue for thirty (30) minutes.

[Section 3a. Tests for Piping. Grade B.]

All piping after installation shall be tested and proven tight at a hydrostatic pressure of one hundred (100) pounds per square inch.]

Section 3a. Overflow Pipes from Burners and Auxiliary Tanks.

Overflow pipes, when required, shall be not less than one size larger than supply pipe.

Section 4. Relief Valves.

[(a) All piping or heaters which can be separated from the source of supply and in which a dangerous pressure can be generated either by the action of the pump or by steam, shall be protected by an automatic pressure relief valve. Such automatic pressure relief valve shall discharge into the storage tank, or into the suction line provided there are no shut off valves in the suction line between the pressure relief valve discharge connection and the storage tank. No valves shall be installed in the safety valve lines. Automatic pressure relief valves shall be not less than $\frac{1}{2}$ in. by $\frac{1}{2}$ in., of the spring type with working parts of non-corrosive construction and shall be set to discharge at not more than fifty (50) per cent above the maximum working pressure.

(b) An automatic by-pass valve of size equivalent to that of the discharge line shall be installed between each pump and the first discharge shut-off valve. The automatic by-pass valve shall discharge into the suction line near the pump, or into the storage tank as described in the preceding paragraph. The automatic by-pass valve shall be constructed as described in the preceding paragraph with

PUBLIC HEARING

the exception that the setting mechanism shall be so designed as to prevent the complete closing of the valve.]

(a) *Where a shut-off valve is installed in the discharge line from an oil pump a relief valve shall be installed in the discharge line between the pump and the first shut-off valve. The relief line shall be returned to storage tank or to supply line near pump. There shall be no shut-off valves in the relief line.*

(b) *All heaters shall be provided with a relief valve to prevent excessive oil pressure.*

(c) *Relief valves shall be set to discharge at not more than 1½ times the maximum working pressure of the system.*

Syphon Breaking Devices—Syphon breaking devices, where permitted, shall be constructed in such a manner that the admission of air at any point in the supply line will break the syphon. Where installed, such a device shall not be accepted until it has been effectively demonstrated in the presence of a representative of the Bureau of Fire Prevention.

Section 5. Fill Pipes.

(a) *Each tank shall be provided with a separate fill pipe which shall be carried below the discharge line in the tank or otherwise trapped to prevent escape of oil vapor. The fill pipe shall be made up with screwed or flanged fittings securely held in place and shall be oil tight. Each fill pipe shall be provided with a receiver terminal or fill box or casing provided with means for locking and located as remote as practicable from any building opening or subway grating. Where the fill box terminal is below the level of the top of the tanks, the fill pipe shall terminate at the top of the tank; a check valve and a gate valve shall be installed in the fill box terminal (at the tank).*

[(a) Each fuel oil tank shall be provided with a separate fill pipe. Fill pipes when installed near any building opening shall be as remote therefrom as practicable so as to prevent liability of flow of oil or vapor through building opening.

(b) *The receiver terminal of each fill pipe shall be located in a tight metal box or casing provided with means for locking. The delivery terminal shall be connected through the top of the tank.*

(c) *The fill pipe shall be provided with a trap or seal or carried within four (4) inches of the lowest point in the tank.*

(d) *The fill pipe shall be made up with screwed or flanged fittings and shall be oil tight and securely held in place.]*

Section 6. Vent Pipes.

(a) *An open, galvanized or painted iron vent pipe without trap and draining to the tank shall be provided for each tank. The lower end of the vent pipe shall not extend through the top of the tank more than one inch.*

(b) *Where a battery of tanks designed to hold the same class of liquids is installed, vent pipes may be run into a main header. Connections to the header shall not be less than one foot above the level of the top of the highest reservoir from which the tanks may be filled. The main vent pipe from the header shall be screened. The main vent pipe and header shall be of an area equal to the aggregate area of vent pipes connected thereto.*

(c) *Vent openings in tanks shall be screened by 40 mesh non-corrodible wire screen, and shall be of sufficient area to adequately vent the tank during the filling operation. Vents shall be not less than two (2) inches in diameter for tanks over 1,100 gallons capacity, and in no case less than one and one-quarter (1¼) inches in diameter.*

(d) *Vent pipes shall be provided with weather proof hoods and terminate outside the building above the street surface, not less than six (6) feet nor more than twelve (12) feet above the fill pipe. Such vent outlet shall not be located within three (3) feet in any direc-*

tion of a window or other opening, or an exterior stairway, or fire escape, nor shall vent pipes be placed in elevator or dumb-waiter shafts, or in an enclosed court.

(e) *If compelled, because of structural conditions, to carry the vent outlet higher than twelve (12) feet above the fill box, and if the fill lines are connected to tank trucks by tight connections and filled by pressure, a one (1) inch line shall be connected to tank and shall parallel the fill line and terminate in the fill box with unthreaded end. A check valve shall be installed in the line so as to permit excess oil in the tank to flow to the fill box and shall be so set as to prevent the passage of vapor to the street.*

Section 7. Return [Pipes] Line from Burners.

Return lines from burners, where [necessary shall be not less than the diameter of the supply line to the burner. Return lines shall be run as direct as possible, and shall be connected into the suction line near the pump or into the storage tank.] used, shall not be smaller in diameter than the discharge outlet from the pump. They shall be connected into the supply line near the pump or into the storage tank without shut-off valve in the return line. No oil shall be returned to the storage tank at a temperature higher than one hundred and forty (140) degrees Fahrenheit.

Section 8. Heating Coils in Tanks.

All heating to reduce viscosity of Grade A fuel oils in storage tanks in any building shall be only by means of hot water coils thermostatically controlled and the oil shall not be heated above one hundred and forty (140) degrees Fahrenheit.

Rule 9. Valves and Control of Flow for Fuel Oil.

[Subdivision A. Grade A Fuel Oil.

(a) *Control valves at the burners shall be of a substantial type, provided with a stuffing box of liberal size containing a removable cupped gland designed to compress the packing against the valve stem and so arranged as to facilitate removal. Valves shall be designed to close against the supply and to prevent withdrawal of the stems by continued operation of the hand-wheel. The use of packing which may be affected by oil or heat is prohibited.*

(b) *A shut-off valve shall be provided in discharge and suction lines near each pump; in discharge line from each tank as near the tank as practicable, and in branch lines near each burner.*

Subdivision B. Grade B Fuel Oil.

(a) *Readily accessible valves shall be provided near each burner and in the discharge line from each storage tank.*

(b) *A remote control for shutting off the supply of oil to the burners shall be provided.*

(c) *An automatic by-pass valve of a size equivalent to that of the discharge line shall be installed between each pump and the first discharge shut-off valve. The automatic by-pass valve shall discharge into the suction line near the pump or into the storage tank. The automatic by-pass valve shall be constructed of non-corrosive materials and so designed as to prevent the complete closing of the valve.]*

(a) *In all installations a shut-off valve shall be provided at or on each burner. Where the top of the storage tank is located above the oil inlet connection to the burner a shut-off valve shall be provided in the supply line inside the building as near the tank as practicable.*

(b) *In systems where either steam or air is used for atomizing the oil, the oil and atomizing supply shall be interlocked so that in case of interruption of the atomizing supply, the oil will immediately be cut off.*

Automatic by-pass valves shall be set at not more than fifty (50) per cent above the maximum working pressure

PUBLIC HEARING

This rule shall not apply to burners and pumps approved as a unit when provided with a pressure relief device.

Rule 10. Oil Level Indicating Device for [Grade A] Fuel Oil.

[A test well or gauging device shall be installed and so designed as to prevent the escape of oil or vapor within the building at any time. The top of the well when located outside of a building shall be sealed and kept locked when not in use.]

(a) Oil level indicating devices shall be constructed of substantial materials so designed that there can be no leakage of fuel oil or vapor. Test wells shall not be permitted in tanks located inside the building. Test wells when located outside the building shall be capped oil tight and kept closed when not in use.

Rule 11. Pumps for Fuel Oil.

[Subdivision A. Grade A Fuel Oil.]

(a) Pumps shall be of a recognized standard mechanical construction approved by the Board of Standards and Appeals.

(b) Pumps shall be installed in duplicate where fire protection equipment is dependent on the use of fuel oil for heating or steam.

(c) Pumps located in the same room where burners are installed shall be provided with a remote control.

(d) Pumps used in connection with outside above ground storage tanks shall be located outside embankment walls, and at such a point that they will be accessible at all times, even if the oil in the tank or reservoir should be on fire.

(e) Pumps may be located below the top of the oil storage tank or tanks where heavy oil is used having a gravity of not more than eighteen (18) degrees Baume and where the top of the tank or tanks is not more than ten (10) feet above the pump or pumps, except as otherwise stated in these rules.

[Subdivision B. Grade B Fuel Oil.]

[(a)] (f) Oil pumps used for supplying oil to the burners shall be rigidly fastened in place and secure against leaks.

(g) Where a pump is part of a burner unit and is used for atomizing purposes, an additional approved pump may be used without the disconnection of the unit.

[(b)] Pumps shall be of approved design as described in Rule 11A (a).]

Rule 12. Burners for Fuel Oil.

The burner mechanism shall be of a recognized type approved by the Board of Standards and Appeals. In domestic installations the burner shall be equipped with an overflow attachment or an automatic control to prevent flooding.

Where an approved burner unit includes a pump as part of the unit, said pump or burner may be disconnected and used in conjunction with any other approved burner or pump.

A remote control shall be provided whereby the flow of oil to the burner can be stopped and such control shall be located either inside or outside the entrance to the room in which the burner is located and as close to such entrance as practicable.

Installations in which burners are located on different floors of a building and are supplied with oil from the same source, a remote control shall be provided on each floor on which burners are located. This remote control to be such that its operation will stop the flow of oil to all burners on that particular floor, and such control shall be located either inside or outside an accessible entrance to the floor or room containing the burners as close to the entrance as practicable.

The damper shall be so constructed that it cannot completely cut off the passage of the flue gases at any time.

Adequate ventilation at least equivalent to area of the smoke pipe at the point where it enters the flue shall be provided in all rooms in which burners are installed.

Rule 13. General Devices for [Grade A] Fuel Oil.

(a) Devices which are subject to breakage and escape of oil shall be prohibited.

(b) Thermometers with large clear reading scales, placed in thermometer wells with screwed top connections, shall be installed at convenient and prominent positions in the oil supply pipe lines between the service tank and the pumps, and also between the pumps and the burner, to indicate the temperature of the oil.

Rule 14. Instruction Cards.

Cards giving complete instructions for the care and operation of the fuel oil system shall be permanently fixed near the apparatus and maintained in readable condition.

Rule 15. Operation of Plant Other Than Domestic Installation Using [Grade A] Fuel Oil.

No fuel oil burning plant, other than domestic installations, shall be operated unless in charge of a person holding a certificate of fitness as issued by the fire department. A certificate of fitness will be required for each person who is directly in charge of the operation of the plant at any and all times.

[This certificate of fitness will be required for all Grade A installations, and Grade B installations in dwellings for more than two families and in commercial plants. This requirement as to Grade A installations shall not apply to dwellings of less than three families equipped with Grade B installations using Grade A oil.]

Rule 16. Installation.

No fuel oil installation shall be operated or oil placed in the system until after a permit has been issued by the Fire Commissioner. Plans for each fuel oil installation shall be submitted to the Fire Commissioner for approval, together with a Certificate of the Superintendent of Buildings indicating that the proposed construction of the enclosure and the location of the tanks is in accordance with the requirements of the Building Code and these Rules.

Rule 17. Auxiliary Tanks for [Grade B] Fuel Oil.

(a) Auxiliary supply tanks may be of the gravity type if suitable automatic safeguards to prevent abnormal discharge of oil at the burner are provided. The total capacity of such tank or tanks in any building shall not exceed 60 gallons.

(b) Auxiliary supply tanks, or storage tanks, shall not be located within ten (10) feet of any fire or flame, and where practicable shall be placed at an interior angle of the cellar, formed by the walls of the building.

(c) Auxiliary supply tanks shall be substantially and rigidly supported on metal frames or cradles and secured by 2x1/4-inch straps riveted or bolted to frame and securely fastened to wall of building by rigid metal braces.

(d) Where only an auxiliary tank as prescribed in these rules is used it shall in addition to complying with the requirements for auxiliary tanks comply with all requirements for the protection of a storage tank other than the enclosure.

Rule 18. Pilot Light.

Automatic systems unless electrically ignited shall be so designed that the flame cannot be extinguished by operation of the automatic control valve and a pilot light of adequate intensity shall be provided in each combustion chamber, so arranged as not to be easily extinguished.

PUBLIC HEARING

Rule 19. Furnaces and Ranges.

(a) Stoves, ranges, hot air furnaces or other devices, originally designed for use of fuel other than oil, shall not be used in connection with oil burners unless spaces in which vapors might collect are adequately vented, and if used shall be of such construction as to withstand the maximum temperature which the oil burning device to be installed may generate.

(b) No damper for closing of more than eighty (80) per cent of the effective area of the flue shall be permitted in a smoke pipe or flue.

Rule 20. Fire Protection [for Grade A and B oil in Domestic Installations] in dwellings, [occupied by not more than two families and in] old [law tenements occupied by three or more families in] and new law tenements, [and in] commercial and industrial plants.

(a) No combustible material shall be stored within ten (10) feet of a furnace door.

(b) In dwellings occupied *exclusively* by not more than two (2) families, any woodwork, wooden lath and plaster partition, or other combustible material within four (4) feet of the sides or back, or eight (8) feet from the front of the furnace or boiler shall be covered with approved fire retarding material and the ceiling, except it be of fireproof construction, and within two (2) feet of the top of the furnace or boiler, shall be protected with approved fire retarding material extending four (4) feet beyond the sides and back and eight (8) feet from the front of the furnace or boiler, except that when the top of furnace or boiler is within six (6) inches of a combustible ceiling the ceiling shall be protected with two layers of approved fire retarding material with one inch air space between layers, and any combustible ceiling, partition or other combustible material within nine (9) inches of any smoke pipe shall be covered with approved fire retarding material extending at least one (1) foot beyond each side of the smoke pipe. [In old law tenement houses occupied by three or more families the heating apparatus and oil burning device shall be located in an enclosure the partitions of which shall be constructed of fireproof material not less than four (4) inches in thickness with openings therein protected with self-closing fireproof doors and the ceiling of the enclosure, if not of fireproof construction, shall be protected with approved fire retarding material; said enclosure shall be ventilated to the outer air; all vertical openings leading to cellar shall be protected with fireproof material not less than four (4) inches in thickness with all openings therein protected with self-closing fireproof doors.]

(c) In old and new law tenement houses, [or in] commercial and industrial plants [the room or rooms in which the heating apparatus and oil burning device is installed shall be cut off from the rest of the building by fireproof partitions, ceilings and floors constructed of not less than eight (8) inches for brick, not less than six (6) inches for stone or cinder concrete, or hollow blocks of terra cotta, concrete or gypsum, and not less than four (4) inches for stone or cinder concrete if properly reinforced with steel, and such rooms shall have entrance from the street, court or yard only, and shall be ventilated to the outer air.] of non-fireproof construction the heating apparatus and oil burning device shall be located in an enclosure, the partitions of which shall be constructed of fireproof material not less than four (4) inches in thickness with any opening therein protected with self-closing fireproof door the sill of which shall be not less than twelve (12) inches above boiler room floor level; and the ceiling of the enclosure if not of fireproof construction shall be protected with approved fire retarding material, except that when the top of the furnace or boiler is within twelve (12) inches of a combustible ceiling,

the ceiling shall be protected with two (2) layers of approved fire retarding material with one (1) inch air space between layers, any vertical openings extending in the boiler room proper to be protected with self-closing fireproof doors and four (4) inch partition of approved fireproof material, said enclosure shall be ventilated to the outer air. Any smoke pipe within eighteen (18) inches of a combustible ceiling, partition, or other combustible material, the ceiling, partition, or other combustible material, shall be protected with approved fire retarding material extending at least one (1) foot beyond each side of the smoke pipe. All vertical openings in old law tenement houses shall be protected in cellar with fireproof material not less than four (4) inches in thickness with openings therein protected with self-closing fireproof doors.

(d) In new law tenement houses, commercial and industrial plants of fireproof construction the heating apparatus and oil burning device shall be located in an enclosure constructed of fireproof material not less than four (4) inches in thickness with any opening therein protected with self-closing fireproof door, said enclosure shall be ventilated to the outer air.

(e) Furnished room houses, boarding houses and non-housekeeping apartments, dormitories and day nurseries and similar occupancies with not more than ten (10) sleeping rooms, also convents, rectories, monasteries and churches, the fire protection shall be the same as that required for dwellings occupied *exclusively* by not more than two families.

(f) Dwellings occupied by not more than two (2) families and stores the occupancy of which is considered hazardous and requires a permit from the fire department, except stores for which a permit is required for the use and operation of soda water fountains, furnished room and boarding houses, non-housekeeping apartments, dormitories, day and night nurseries, with more than ten (10) sleeping rooms and similar occupancies, the fire protection shall be the same as that required for old law tenement houses.

[Approved fire retarding material shall be any material complying with the rules of the Board of Standards and Appeals for fire retarding of garages.]

(g) Near the furnace, and so located as to be convenient for use in emergency, there shall be provided a hand fire extinguisher of an approved type suitable for use on oil fires.

Rule 21. Systems Prohibited [Where Grade B Fuel Oil Is Used.]

The use of auxiliary tanks between pump and burner unit of the pressure type are prohibited. Systems, fed by gravity between the storage tank and the pump, or force systems, are prohibited. Pressure in storage tanks for the purpose of discharging oil are prohibited.

Rule 22. Use of [Grade A or Grade B] Fuel Oil.

(a) These Rules shall not apply to gas companies storing or using fuel oil in the manufacture of illuminating gas for public use.

(b) The use of oil stoves, oil heaters or oil lamps commonly used for household purposes which employ a wick to absorb such oil in its combustion shall not be prohibited; or shall the use of such oil be prohibited when used in a plumber's torch or similar apparatus.

(c) Modification: When for any reason it may be impracticable to comply strictly with the foregoing rules the fire commissioner shall have power to modify their provisions so that the spirit and substance thereof shall be complied with. Such modification shall be endorsed upon the permit over the signature of the fire commissioner.

WILLIAM E. WALSH, Chairman.

WILLIAM I. O'GORMAN, Secretary.

WARNING

Notice is hereby given to all petitioners, appellants and applicants, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

First. That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

Second. That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises, under the date of the hearing.

Third. That no plea of ignorance of the date of the hearing can be entertained in view of this publication and of the posting of the calendars on the bulletin board in the

offices of the board and of the further publication of the calendars in the daily press.

Fourth. That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

Fifth. That the business of the board is to dispose of all cases promptly, for the reason that the pendency of an appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of the appellant or petitioner to file necessary data, or by any other method of delay.

Sixth. That no appeal, application or petition will be accepted for filing unless, at the time of filing, all papers, plans and data required by law are supplied, as specified on the blank appeal, application or petition forms.

WILLIAM E. WALSH, Chairman

HENRY L. CONNELL

JAMES P. HOLLAND

JOHN GUILFOYLE

CHIEF JOHN KENLON

WILLIAM J. O'GORMAN, Secretary

EDWARD V. BARTON, Chief Clerk

OFFICE—Municipal Building, Rooms 1001 to 1015.

TELEPHONE—WORTH 0184.

OFFICE HOURS—9 a. m. to 5 p. m. Saturdays 9 a. m. to 12 noon.

All communications should be addressed to the chairman of the board.

CONTENTS

This issue of the Bulletin contains, in the order given—

Docket.

Call of Clerk's Calendar.

The Trial Calendar.

Notices in Building Zone Cases.

Minutes of Special Meeting, October 19, 1928, 2 p. m.

Minutes of Regular Meeting, October 23, 1928, 10 a. m.

Minutes of Regular Meeting, October 23, 1928, 2 p. m.

Notice of Public Hearing on Amendments to Fuel Oil Rules.

Progress Report.

Correction.

PUBLIC HEARINGS

Tuesdays, at 10 a. m. and 2 p. m.
Special meetings as published in this Bulletin.
Call of Clerk's Calendar, Tuesdays, at 2 p. m.
All hearings are held in Room 1013, Municipal Building, Manhattan.

HOURS FOR CONSULTATION

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

CALL OF CLERK'S CALENDAR

The Clerk's Calendar consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, October 30, 1928, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Wednesday, November 7, 1928, at 2 o'clock.

The Clerk's Calendar is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

NOTICE TO APPELLANTS AND PETITIONERS

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and disposition of same expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

504-28-A.

APPELLANT—Croker Natl. Fire Prev. Eng. Co., for John Farina, Inc., owner.

SUBJECT—Appeal from decision of the superintendent of buildings.

PREMISES AFFECTED—425-447 Coney Island avenue, Brooklyn.

APPEARANCES—

For Appellant: Herman E. Horwood.

ACTION OF BOARD—Appeal denied.

THE VOTE TO GRANT—

Affirmative	0
Negative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon	5
Absent	0

THE RESOLUTION—

(504-28-A)

WHEREAS, Croker National Fire Prevention Engineering Co., for John Farina, Inc., owner, filed, June 2, 1928, an appeal from a decision of the superintendent of buildings, affecting premises 425-447 Coney Island avenue, Borough of Brooklyn; and

WHEREAS, the decision of the superintendent of buildings, rendered May 15, 1928, reads:

"As area of garage exceeds 10,000 sq. ft. a 4" stand-pipe system in compliance with Article 28, Section 581 (c) of Code is required.";

and

WHEREAS, the building is non-fireproof, one story in height, 200 ft. by 101 ft. 2¼ in., about 18,600 sq. ft. in area; OCCUPIED as a garage, 2 persons; and

WHEREAS, the appellant claims the building is divided by a fire wall; that each subdivided floor area is less than 10,000 sq. ft.; that all openings in the dividing wall are equipped with self-closing fireproof doors; furthermore, that the building is provided with ten skylights in the roof, sand pails and fire extinguishers are distributed throughout, also two city fire hydrants are directly in front of the premises.

Resolved, that the decision of the superintendent of buildings be and it hereby is *affirmed*, and that the appeal be and it hereby is *denied*.

417-28-A.

APPELLANT—Buchman & Kahn, for Courtlef Realty Corp., owner.

SUBJECT—Appeal from decision of the superintendent of buildings.

PREMISES AFFECTED—263-281 Seventh avenue, 165-173 West 25th street, and 158-162 West 26th street, Manhattan.

APPEARANCES—

For Appellant: John M. Montfort.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle....	4
Negative	0
Absent: Chief Kenlon.....	1

THE RESOLUTION—

(417-28-A)

WHEREAS, Buchman & Kahn, for Courtlef Realty Corp., owner, filed, May 2, 1928, an appeal from a decision of the superintendent of buildings, affecting premises 263-281 Seventh avenue, 165-173 West 25th street and 158-162 West 26th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered April 4, 1928 (N. B. 540-1927), reads:

"20. Omission of elevator partition is unlawful. Sec. 373, subdivision 13.";

and

WHEREAS, the building is fireproof, twenty-six stories and pent house in height, 197 ft. 6 in. by 111 ft. 4 in. in area; OCCUPIED: 1st story, stores; upper stories, offices, show-rooms and 25 per cent manufacturing, 280 persons on each story; and

WHEREAS, appellant proposes to eliminate the partitions between elevators No. 10 and 11 (as shown upon filed plans) on all floors, thus placing three elevators in one shaft; and

WHEREAS, appellant requests the acceptance of the proposed conditions, contending that if required to place Elevator No. 10 in a separate shaft, great hardship would result should this elevator become disabled while carrying passengers.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and that the appeal be and it hereby is *granted*, only so far as it affects one shaftway, the south-easterly shaft, *on condition* that not more than three cars shall be installed in this shaft and that the remaining four shafts shall be restricted to not more than two cars each, and that the elevator equipment shall be installed in accordance with the rules in all other respects.

520-28-A.

APPELLANT—Edward P. Doyle, for Kelvinator Sales Corp., owner.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—3201 Queens boulevard, northeast corner of 32nd place, Long Island City, Borough of Queens.

APPEARANCES—

For Appellant: Edward P. Doyle.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon	5
Negative	0
Absent	0

MINUTES

THE RESOLUTION—

(520-28-A)

WHEREAS, Edward P. Doyle, for Kelvinator Sales Corp., owner, filed, June 6, 1928, an appeal from an order of the fire commissioner, affecting premises 3201 Queens boulevard, northeast corner of 32nd place, Long Island City, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated May 8, 1928 (Order No. 16967-LC), reads:

"4. Permanently brick up the opening on 2nd story, in division wall, separating this building from the adjoining building (4331 32nd Ave.)

OR

"Install a standpipe, four inches in diameter, tested to withstand a pressure of 300 lbs. per square inch. Plan and Specifications to be filed with the approval by the Fire Department before work is commenced."

and

WHEREAS, the building is non-fireproof, one and two stories in height, 200 ft. by 100 ft. (about 20,000 sq. ft. in area at first story) and 200 ft. by 25 ft. and 100 ft., irregular (about 6,800 sq. ft. in area at second story); OCCUPIED: cellar, boiler room; 1st story, machine shop, 30 persons; 2nd story, office and laboratory, 45 persons; and

WHEREAS, the appellant claims that the building is divided by a party wall extending 3 ft. above the roof; that there is only one opening, 3 ft. by 7 ft. in the party wall at second story for the accommodation of the office force; furthermore, the appellant contends that sufficient appliances have been installed, also that there is a fire alarm box and sufficient fire hydrants in the immediate vicinity.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and that the appeal be and it hereby is *granted on condition* that the stair hall openings on the second story shall be equipped with self-closing fireproof doors; that the building shall be not increased in height, area or dimension, and so long as conditions as to occupancy and use remain substantially unchanged.

505-28-A.

APPELLANT—Croker Natl. Fire Prev. Eng. Co., for Childs Co., owner.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—206-208 West 43rd street, Manhattan.

APPEARANCES—

For Appellant: Herman E. Horwood.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon 5

Negative 0

Absent 0

THE RESOLUTION—

(505-28-A)

WHEREAS, Croker National Fire Prevention Engineering Co., for Childs Co., owner, filed, June 2, 1928, an appeal from an order of the fire commissioner, affecting premises 206-208 West 43rd street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated May 10, 1928 (Order No. 36996-F), reads:

"1. Provide a tank on roof of at least 3,500 gallons capacity for the standpipe system, said tank to be so elevated that the bottom will be not less than 20 feet above the roof level. Sec. 20, Ch. 12, Code of Ordinances."

and

WHEREAS, the building is fireproof, eleven stories in height, 30 ft. by 100 ft. 5 in. in area; OCCUPIED as a hotel, about 100 persons throughout; and

WHEREAS, the appellant claims that the building has been used in the same manner since the date of its erection in 1901; that it is equipped with a standpipe system and an interior fire alarm system and a 2½-gallon fire extinguisher is provided on each story; that the standpipe system is fed from a 1,500-gallon roof tank, the bottom of which is 6 ft. above the top story outlet; that a similar order (No. 65593-F) was rescinded by the fire department April 16, 1920, on condition that the present tank be kept full at all times, which condition has been observed; furthermore, the appellant contends that the present system complies with the requirements of section 44 of the standpipe rules of 1923.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and that the appeal be and it hereby is *granted*, only so far as it affects the requirements as to the tank, *on condition* that the existing standpipe system shall comply and be maintained in accordance with the rules for existing standpipe systems in all other respects; that the building shall be not increased in height or area, and so long as conditions as to occupancy remains unchanged.

458-28-A.

APPELLANT—Lazar & Fonyo, lessees.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—64 West 48th street (14th floor), Manhattan.

APPEARANCES—

For Appellant: Robert S. Tipping.

For Administration: Inspector Meyer of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle.... 4

Negative 0

Absent: Chief Kenlon..... 1

THE RESOLUTION—

(458-28-A)

WHEREAS, Lazar & Fonyo, lessees, filed, May 18, 1928, an appeal from an order of the fire commissioner, affecting premises 64 West 48th street (fourteenth floor), Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated May 12, 1928 (Order No. 43115-LC), reads:

"1. Have each operator of a torch or other similar device or apparatus for heating, melting or welding, apply for and secure a Certificate of Fitness. Examinations every day from 9 A.M. to 3 P.M., Room 1100, Municipal Bldg. Each applicant must file two unmounted photographs at least 2 x 3 inches."

and

WHEREAS, the building is fireproof, sixteen stories in height, 84 ft. by 100 ft. in area at first story and 84 ft. by 90 ft. in area above; OCCUPIED: 1st story, stores; upper stories, offices and tenant factories, 40 persons per story; appellant occupies part of the fourteenth story as a manufacturing jeweler; and

WHEREAS, appellant contends that there are two cylinders, each containing 220 ft. of oxygen, stored in the premises; that the persons operating the individual torches do not operate the oxygen regulator; that the large torch for melting platinum, at the tank side, is operated by a member of the firm who has a certificate of fitness; and

WHEREAS, the operation of the equipment noted in the order of the fire commissioner requires the use of oxygen and illuminating gas; and

WHEREAS, the appellant contends that there is a certificate of occupancy for 25 per cent manufacturing use in the premises in force.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and that the appeal be and it hereby is *granted*, so far as it affects the fourteenth story, *on condition* that the operation of the oxygen cylinders and the large

MINUTES

torch shall be under the supervision of a certified operator and that this work shall be limited to that of the jewelry trade.

415-28-A.

APPELLANT—Samuel Rosenblum, for Sol. A. Cohen, owner.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—102-110 Attorney street, Manhattan.

APPEARANCES—

For Appellant: Samuel Rosenblum.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle.... 4

Negative 0

Absent: Chief Kenlon..... 1

THE RESOLUTION—

(415-28-A)

WHEREAS, Samuel Rosenblum, for Sol. A. Cohen, owner, filed, May 1, 1928, an appeal from an order of the fire commissioner, affecting premises 102-110 Attorney street and 181 Rivington street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated January 31, 1928 (Order No. 32112-F), reads:

"1. Replace the missing shutters with proper iron shutters at all openings in the exterior wall above 1st story which are distant in a direct line less than 30' from any opening in any other building and not in the same plane with said openings and which are not more than 50' above a neighboring roof at east side of building, or other approved protection, as per Sec. 375, Art. 18, Ch. 5, of the Code of Ordinances."

and

WHEREAS, the building is non-fireproof, six stories in height, 100 ft. by 50 ft. in area; OCCUPIED: 1st story, stores; 2nd story, prayer room and partly vacant; 3rd story, manufacture of coats and partly vacant, 16 persons; 4th story, vacant at present; 5th story, manufacture of coats and partly vacant, 15 persons; 6th story, manufacture of vests, 35 persons; and

WHEREAS, there are windows in the court walls of the building within 30 ft. of openings in an abutting four-story tenement to the east and three windows on each story above the first story in the easterly gable wall within 25 ft. of openings in a neighboring five-story tenement to the east; and

WHEREAS, appellant contends that the windows in the court form an exposure only to two small toilet windows in the adjoining premises; that the other windows are some distance away over open spaces and that there is no hazardous occupancy in the adjoining buildings.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and that the appeal be and it hereby is *granted*, only so far as it affects windows not on the course of stair halls, public corridors, elevator shafts, fire escapes or passageways, so long as conditions as to occupancy and use remain substantially unchanged.

476-28-A.

APPELLANT—Croker Natl. Fire Prev. Eng. Co. for Columbia Realty Co., owner.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—235-245 Sixth avenue and 109 West 15th street, Manhattan.

APPEARANCES—

For Appellant: Herman E. Horwood.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle.... 4

Negative 0

Absent: Chief Kenlon..... 1

THE RESOLUTION—

(476-28-A)

WHEREAS, Croker National Fire Prevention Engineering Co., for Columbia Realty Co., owner, filed, May 22, 1928, an appeal from an order of the fire commissioner, affecting premises 235-245 Sixth avenue and 109 West 15th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated January 12, 1928 (Order No. 31297-F), reads:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure. Each outlet to be provided with sufficient feet of 2½ inch standard hose attached thereto."

and

WHEREAS, the building is non-fireproof, four stories (60 ft.) in height, irregular in area, having a frontage of 103 ft. 3 in. on Sixth avenue and 25 ft. on West 15th street; the basement story being divided into two sections: respectively, 9,500 and 1,940 sq. ft. in area; the first story being divided into two sections: respectively, 9,200 and 2,000 sq. ft. in area; the upper stories being open lofts; the area of each being approximately 10,800 sq. ft.; OCCUPIED: basement, storage of clothing and barber shop; 1st story, stores; 2nd story, vacant at present; 3rd story, upholstery, 15 persons; 4th story, vacant at present; and

WHEREAS, appellant contends that the premises are equipped throughout with a thermostatic fire alarm system; that the basement, excepting the northerly section, is protected with a dry sprinkler system and contends, further, that the building is low in height and has a frontage on two streets; and

WHEREAS, the building opens to two street fronts and each floor is in open loft and single tenancy.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and that the appeal be and it hereby is *granted on condition* that the premises shall be equipped with thermostatic fire alarm with central office connection; that the building shall be not increased in height or area, and so long as conditions as to occupancy and use remain substantially unchanged.

436-28-A.

APPELLANT—Maxwell Schantz, for Metropolitan-Columbia Mfg. Co., Inc., owner.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—714-722 Metropolitan avenue, Brooklyn.

APPEARANCES—

For Appellant: Maxwell Schantz.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle.... 4

Negative 0

Absent: Chief Kenlon..... 1

THE RESOLUTION—

(436-28-A)

WHEREAS, Maxwell Schantz, for Metropolitan-Columbia Manufacturing Co., Inc., owner, filed, May 9, 1928, an appeal from an order of the fire commissioner, affecting premises 714-722 Metropolitan avenue, Borough of Brooklyn; and

MINUTES

WHEREAS, the order of the fire commissioner, dated April 23, 1927 (Order No. 9873-LC), reads:

"12. Install standpipe 4" in diameter, tested to withstand a pressure of 300 lbs. square inch, extending from cellar to roof, with necessary check valves and 2½" regulation Fire Department outlets. Plans and specifications in duplicate must be filed with and approved by this Department before the above work may be commenced."

and

WHEREAS, the premises consist of three attached frame and brick buildings, two and three stories (38 ft.) in height, 124 ft. 8 in. by 96 ft., about 11,800 sq. ft. in area at first story, 10,800 sq. ft. in area at second story and 6,500 sq. ft. in area at third story; OCCUPIED: 1st story, manufacture of lighting fixtures, 25 persons; 2nd story, one living apartment and manufacture of lighting fixtures, 40 persons; 3rd story, one living apartment and stock rooms; and

WHEREAS, the appellant claims that the buildings are equipped with a wet sprinkler system, connected to city main, and an interior fire alarm system; that fifty water pails are distributed throughout; that each story is divided into three floor areas; the largest single floor area is 5,764 sq. ft. and connected by fireproof self-closing doors; that the exits are adequate; furthermore, the appellant contends that the occupancy is not hazardous and the order is an unnecessary expense to the owner; and

WHEREAS, the premises are equipped with a wet sprinkler system with street connection to the city main.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and that the appeal be and it hereby is *granted on condition* that all horizontal door openings shall be equipped with approved fire doors; that the building shall be not increased in height or area, and so long as conditions as to occupancy and use remain substantially unchanged.

489-28-A.

APPELLANT—Samuel Rosenblum, for Local Milk Products, Inc., lessee.

SUBJECT—Appeal from orders of the fire commissioner.

PREMISES AFFECTED—614-616 West 49th street, Manhattan.

APPEARANCES—

For Appellant: Samuel Rosenblum.

For Administration: Inspector Meyer of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle.... 4

Negative 0

Absent: Chief Kenlon..... 1

THE RESOLUTION—

(489-28-A)

WHEREAS, Samuel Rosenblum, for Local Milk Products, Inc., filed, May 28, 1928, an appeal from orders of the fire commissioner, affecting premises 614-616 West 49th street and 615 West 48th street, Borough of Manhattan; and

WHEREAS, the orders of the fire commissioner, dated March 3, 1928, and April 17, 1928, are as follows:

"Order No. 41649-LC:

"You are hereby notified that an inspection of premises 614-16 West 49th Street, Manhattan, used as a storage garage, shows that the following must be done before permit requested by you can be issued:

"1. No occupancy permitted between garage and dwelling (office).";

and

"Order No. 42547-LC:

"You are hereby notified that your Fire Department permit No. 180518 dated to expire Feb. 14, 1929, is revoked.

"REASON: You have failed to comply with Order No. 41649-LC now pending against these premises.";

and

WHEREAS, the building, facing on two street fronts, is non-fireproof, two stories in height on West 48th street and three stories in height on West 49th street, having a frontage of 50 ft. 4 in. on West 49th street, 41 ft. 8 in. on West 48th street and a depth of 200 ft. 10 in.; OCCUPIED: 1st story, garage and milk storage, 6 persons; 2nd story, office and milk storage, 5 persons; 3rd story (48th street front), dwelling for one family; (rear), storage; and

WHEREAS, appellant contends that the garage is separated from the rest of the building by fire-retarding walls and floors; that the apartment has a direct entrance to the street and is otherwise adequately provided with exits; that the dwelling is occupied by the caretaker of the premises and that there is a permit heretofore issued for the premises.

Resolved, that the orders of the fire commissioner be and they hereby are *modified*, and that the appeal be and it hereby is *granted on condition* that the dwelling occupancy shall be restricted to the use of a regularly employed member of the organization working on the premises; that the building shall be not increased in height, area or dimension in any respect, and so long as the occupancy and use remain in single tenancy and operation.

APPELLANT—John J. Gilmartin, for Piankay Realities Inc., owner.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—218 East 28th street, Manhattan.

APPEARANCES—

For Appellant: John J. Gilmartin.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle.... 4

Negative 0

Absent: Chief Kenlon..... 1

THE RESOLUTION—

(483-28-A)

WHEREAS, John J. Gilmartin, for Piankay Realities, Inc., owner, filed, May 24, 1928, an appeal from an order of the fire commissioner, affecting premises 218 East 28th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated March 27, 1928 (Order No. 17852-F), reads:

"1. Provide iron shutters at all openings in the exterior wall above 1st story which are distant in a direct line less than 30' from any opening in any other building and not in the same plane with said openings and which are not more than 50' above a neighboring roof at east, west, south sides of the building, or other approved protection, as per Sec. 375, Article 18, Chapter 5 of the Code of Ordinances.";

and

WHEREAS, the building is non-fireproof, six stories in height, 44 ft. by 98 ft. 9 in. in area; OCCUPIED: 1st story, storage of furniture, 5 persons; upper stories, manufacture of furniture, 10 persons per story; and

WHEREAS, there are thirteen windows in the easterly wall of the building within 30 ft. of openings in or within 12 ft. of the roof of an adjoining public school; six windows in the south wall on each story above the first story within 15 ft. of a neighboring six-story tenement to the south or within 16 ft. of openings in or within 50 ft. of the roof of a neighboring two-story church to the south; three windows in the westerly wall on each story above the first story within 30 ft. of openings in neighboring buildings and two windows on the fourth, fifth and sixth stories within

MINUTES

50 ft. of the roof of an adjoining three-story tenement to the west; and

WHEREAS, appellant contends that the building is sprinklered throughout and that the system is so arranged that there is a head directly in front of most of the windows affected by the order.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and that the appeal be and it hereby is *granted*, only so far as it affects all of the exposed openings other than those in the easterly gable wall and openings not on the course of the stair halls or shaftways, *on condition* that the building shall be equipped with an approved wet sprinkler system; that the building shall be not increased in height or area, so long as conditions as to occupancy and use remain substantially unchanged.

THE RESOLUTION—

(177-28-BZ)

WHEREAS, Henry J. Nurick, for Nathan Adelman, owner, filed, February 29, 1928, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station; premises 224 Humboldt street, southeast corner of Scholes street, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, October 23, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Scholes street and Humboldt street are both in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered November 21, 1927, reads:

"Proposition contrary to the Zone Resolution, Art. 2, Section 4a, 46.

"The installation of a gasoline service station in a business district.";

and

WHEREAS, the premises consist of a plot of ground having a frontage of 30 ft. on Humboldt street and 25 ft. on Scholes street, upon which it is proposed to erect a small one-story office and to install the necessary tanks and pumps for a gasoline service station; and

WHEREAS, the board deemed that applicant did not substantiate his basis of appeal brought under section 21 of the building zone resolution.

Resolved, that the decision of the superintendent of buildings be and it hereby is *affirmed*, and the application be and it hereby is *denied*.

292-28-BZ.

APPLICANT—Morris M. Polansky, for Abraham Scher, owner.

SUBJECT—Application (re decision of the superintendent of buildings) under section 21 of the building zone resolution, to permit in a residence district the erection and maintenance of a building to be used as a store on the first story and as dwellings above.

THE RESOLUTION—

(292-28-BZ)

WHEREAS, Morris H. Polansky, for Abraham Scher, owner, filed, April 2, 1928, an application, under the building zone resolution, to permit in a residence district the erection and maintenance of a building to be used as a store on the first story and as dwellings above; premises 4430 Seton avenue, east side, 275.07 ft. north of Nereid avenue, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, October 23, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Seton avenue is in a residence district, and Mundy's lane is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered March 6, 1928 (re N. B. 276-1928), reads:

"1. Proposed business building in a residence district is contrary to the Building Zone Resolution.";

and

WHEREAS, the proposed building is to be of frame construction, two stories in height, with a frontage of 24 ft. and a depth of 67 ft.; to be occupied as store and dwellings; and

WHEREAS, it is proposed to erect a two-story building, with business use at the frontage on the first story, with dwelling occupancy throughout above; and

WHEREAS, there is a preponderance of support filed with the board in the form of consents of all property owners on the same side of Seton avenue, the board deems that a denial of this application would constitute a hardship under section 21 of the building zone resolution.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted*, only as far as it affects the first story, street level of the premises, *on condition* that the building shall be erected not less than two stories in height above grade; that the business use and occupancy shall be restricted to one room at the front of the building for retail merchandise use, the entire remainder of the premises being restricted to conforming dwelling use; that there shall be no advertising signs exposed or displayed, other than the fixed lettering on the plate glass show window of the store front; that all permits required shall be obtained within six months and all work involved thereby completed within one year from the date of this action.

THE RESOLUTION—

(407-28-BZ)

WHEREAS, William F. Doyle, for Here Holding Corp., owner, filed, April 30, 1928, an application, under the building zone resolution, to permit the extension, from a business district into a residence district, of a proposed business building (stores); premises west side of Morrison avenue, 100 ft. south of Westchester avenue, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, October 23, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Soundview avenue is in a business district; Westchester avenue is in a business district; Morrison avenue, south of a point 100 ft. south of Soundview avenue, is in a residence district, and Stratford avenue, south of a point 100 ft. south of Westchester avenue, is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered April 26, 1928 (re N. B. 913-1928), reads:

"1. Erection of business building partly in business district and partly in a residence district is contrary to provisions of Building Zone Resolution."

and

WHEREAS, the proposed building is to be of non-fireproof construction, one story and cellar in height, with a frontage of 100 ft. and a depth of 100 ft. and a distance of 87 ft. across the rear; to be occupied as stores; and

WHEREAS, the entire frontage of this property is in the business use area, within the business use influence of Soundview avenue, the rear of premises lying in the residence use area; and

WHEREAS, the board is empowered, under section 7, subdivision c, to grant a variation of the building zone resolution, and under these circumstances the board deems that applicant is entitled to relief under section 21 of the building zone resolution.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the use and operation of these premises shall be restricted to that of retail mercantile use and conduct; that the southerly gable walls shall be unpierced throughout their entire height and length; that there shall be no roof signs erected or maintained on the premises; that all permits required shall be obtained within six months and all work involved thereby completed within one year from the date of this action.

WHEREAS, William F. Doyle, for Nathan Levy, owner, filed, April 12, 1928, an application, under the building zone resolution, to permit the extension, from a business district into a residence district, of an existing business building; premises 771-773 East Tremont avenue, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, October 23, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that East Tremont avenue is in a business district; Mapes avenue is in a business district; Prospect avenue, north of a point 100 ft. north of East Tremont avenue, is in a residence district, and East 178th street, west of a point 100 ft. west of Mapes avenue, is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered April 9, 1928 (re Alt. App. 177-1928), reads:

"1. Proposed extension of business building into residence district is contrary to provisions of Building Zone Resolution."

and

WHEREAS, the existing building is non-fireproof, one story and basement in height, having a frontage of 50 ft. and a depth of 100 ft.; it is proposed to remove the rear wall of the existing building and to extend the basement and first story for a distance of 50 ft. to the rear; a triangular-shaped portion (the northwesterly half) of the proposed addition extends into the residence district, the remainder of the structure being in the business district; proposes to use the entire building as a department store; and

WHEREAS, it is proposed to extend an existing business building for a distance of 50 ft. to the rear, a triangular-shaped portion of said extension running into the residence use district due to the topographical lines of street fronts; and

WHEREAS, the board is empowered, under the provisions of section 7, subdivision c, to grant a variation under these circumstances; and

WHEREAS, the board deems that it would be a hardship under section 21 to deny the application.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the use and occupancy of the premises shall be restricted to that of retail mercantile business; that the building within the residence use area shall not exceed in height a one-story structure above grade; that the gable walls within the residence use area shall be unpierced throughout their entire height and length; that the building shall be constructed strictly in accordance with the requirements of the building code in all respects; that all permits required shall be obtained within nine months and all work involved thereby completed within one year from the date of this action.

THE RESOLUTION—

(309-28-BZ)

WHEREAS, William F. Doyle, for B. M. Maltz and Sons, Inc., owner, filed, April 4, 1928, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station; premises 2323-2331 Flatbush avenue and 2370-2384 Utica avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, October 23, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Flatbush avenue and Utica avenue are in a business district, and Avenue S is in a residence district; and

WHEREAS, the decision of the fire commissioner, rendered March 29, 1928, reads:

"1. A gasoline service station at the above location being in a business district may not be permitted. Appeal may be taken to the Board of Standards and Appeals. Sec. 4-6, Building Zone Resolution."

and

WHEREAS, it is proposed to erect a cement block office, 20 ft. by 20 ft., bury four 550-gallon tanks and erect four pumps for the purpose of conducting a gasoline service station within a business district; and

WHEREAS, there has been filed by the applicant a preponderance of consents of all affected property owners on both street fronts and of the adjoining owners in the same triangular block, the board deemed that denial of the variation would constitute a hardship under section 21 of the building zone resolution.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that there shall be erected on the building line on both street fronts a concrete curbing not less than 12 in. in height and a triangular concrete platform not less than 10 ft. in depth and 12 in. in height from the intersection of Utica avenue with Flatbush avenue; that the proposed one-story building shall be finished on the exterior with white enameled brick with dark enameled brick trim; that the roof shall be of hip type finished with variegated slate or Spanish tile; that there shall be not more than two vehicular openings in the concrete curbing on either street front; that the use, operation and sales of these premises shall be restricted exclusively within the property lines; that there shall be no crankcase service, grease racks or pits installed on the premises; that any signs or advertising display shall be restricted to that on the illuminated lamps of the gasoline pumps; that all permits required shall be obtained within six months and any work involved completed within one year from the date of this action.

THE RESOLUTION—

(156-28-BZ)

WHEREAS, William F. Doyle, for Hugh Clark, owner, filed, February 23, 1928, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station and also a garage for the storage of more than five motor vehicles; premises 287-289 Prospect avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, July 17, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Prospect avenue is in a business district and Sixth avenue is in a business district; and

WHEREAS, the decision of the fire commissioner, rendered February 11, 1928 (re Plan No. 321-1928), reads:

"1. A garage for more than five cars and a gasoline service station may not be permitted in a business district. Appeal may be taken to the Board of Standards and Appeals. Sec. 4, Building Zone Resolution."

and

WHEREAS, the decision of the superintendent of buildings, rendered October 18, 1928, in acting on Application No. 15722-28, reads:

"1. Garage for more than 5 motor vehicles contrary to Art. II, Sec. 4 (a 15) of zone resolution above. Application is therefore denied."

and

WHEREAS, the proposed building is to be of fireproof construction, two stories in height, with a frontage of 75 ft. and a depth of 196 ft. 7 in.; to be occupied as a gasoline service station and a garage for the storage of more than five motor vehicles; and

WHEREAS, the applicant established his basis of appeal under section 7e of the building zone resolution and the board deemed that denial of the variation would constitute unnecessary hardship within the meaning of section 21 of the resolution; and

WHEREAS, this application was granted by the board at its meeting, July 17, 1928, on the basis of a decision of the fire commissioner, and applicant requested a reopening of the case and the inclusion of the decision of the superintendent of buildings.

Resolved, that the board of standards and appeals does hereby reaffirm its action of July 17, 1928, and make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the building shall be erected fireproof throughout and shall not exceed two stories

MINUTES

in height above grade; that the building shall not be erected within 5 ft. of the westerly property line; that both gable walls shall be unpierced throughout their entire height and length; that the front elevation shall be finished with face brick and architectural terra cotta or stone trimmings; that any gasoline storage equipment installed shall be located at the extreme easterly end of the premises at the front of the building; that there shall be no open gasoline service station installed on these premises; that the walls shall be carried, at the building line, from the street grade to the roof; that all necessary permits shall be obtained within nine months and the work completed within one year from the date of this action.

1234-27-BZ.

APPLICANT—Alonzo E. De Baun, owner.

SUBJECT—Application for reopening—extension of time—application (re decision of the fire commissioner) under sections 7c and 21 of the building zone resolution, to permit partly in a business district and partly in a residence district the erection and maintenance of an automobile showroom and service station in connection therewith.

PREMISES AFFECTED—South side of Hillside avenue, 120 feet west of 146th street (Colonial avenue), Jamaica, Borough of Queens.

APPEARANCES—

For Applicant: William F. Doyle.

For Opposition: None.

ACTION OF BOARD—Application reopened and time extended to procure permits.

THE VOTE TO REOPEN AND EXTEND TIME—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and

Chief Kenlon 5

THE RESOLUTION—

(1234-27-BZ)

WHEREAS, Alonzo E. DeBaun, owner, filed, November 22, 1927, an application, under the building zone resolution, to permit, partly in a business district and partly in a residence district, the erection and maintenance of an automobile showroom and service station in connection therewith; premises south side of Hillside avenue, 120 ft. west of 146th street (Colonial avenue), Jamaica, Borough of Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, April 24, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Hillside avenue is in a business district; 144th street is in a business district; 146th street, south of a point 100 ft. south of Hillside avenue, is in a residence district, and 88th avenue, from a point 100 ft. east of 144th street to a point 100 ft. east of 146th street, is in a residence district; and

WHEREAS, the decision of the fire commissioner, rendered March 8, 1927 (re Plan No. 1828-1926), reads:

"1. Automobile showroom and service station in connection therewith not permitted in a business district extending into a residence district. * * *";

and

WHEREAS, the proposed building is to be of non-fireproof construction, one story in height, with a frontage of 122.54 ft. and a depth of 163.24 ft., irregular; to be occupied as a showroom and service station; an irregular shaped portion along the rear of the proposed building is in the residence district, 32 ft. by approximately 120 ft., 3,800 sq. ft. in area, and the remainder, approximately 19,500 sq. ft. of the building is in the business district; proposes to use that portion of the building facing on Hillside avenue as automobile showrooms and as a driveway leading to the service station at the rear; and

WHEREAS, the entire premises is in single ownership, the rear portion of which extends into the residence use area; and

WHEREAS, this application was granted by the board at its meeting, April 24, 1928, on certain conditions, and applicant requested an extension of time.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted, only as far as it affects the first story, street grade level of the entire plot, on condition that any structure erected in excess of one story shall be restricted to conforming uses, and on condition that no part or portion of these premises shall be used, maintained or operated for automobiles in live storage, use or operation, and that any industrial work, use or operation on any automobiles on these premises shall be restricted to that of manual operation; that no machinery, open furnace, flame or torch shall be permitted in the use and operation of any business conducted on the premises; that there shall be no roof signs erected or maintained; that the rear and gable walls within the business use area of the premises shall be unpierced throughout their entire height and length; that any permits required shall be obtained within three months and all work involved completed within six months from the date of this action—October 23, 1928.

Adjourned 12.45 p. m.

THE RESOLUTION—

(469-28-A)

WHEREAS, Croker National Fire Prevention Engineering Co., for Bleeker & Wooster Corp., owner, filed, May 21, 1928, an appeal from an order of the fire commissioner, affecting premises 124 Bleeker street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated December 7, 1927 (Order No. 29464-F), reads:

"1. Provide a tank on roof of at least 3,500 gallons capacity for the standpipe system, said tank to be so elevated that the bottom will be not less than 20 feet above the roof level, Section 20, Chapter 12, Code of Ordinances."

and

WHEREAS, the building is fireproof, eight stories (99 ft.) in height, 25 ft. by 100 ft. (2,500 sq. ft.) in area; OCCUPIED: 1st story, stores, 5 persons; 2nd story, manufacture of shoes, 12 persons; 3rd story, manufacture of hats, 4 persons; 4th story, manufacture of clothing, 3 persons; 5th story, manufacture of electric irons, 4 persons; 6th and 7th stories, manufacture of clothing, 4 persons each story; 8th story, manufacture of hats, 7 persons; and

WHEREAS, the appellant claims the building was erected in 1900, equipped with a dry standpipe system with riser in stair hall, 2½-inch hose outlet on each story and siamese

connections on Wooster street front; the cellar is protected with perforated pipes with siamese connections on Wooster street front; that the building is provided with a labor law fire escape on Wooster street front, and also equipped with an interior fire alarm system; furthermore, the appellant contends that the exits and fire protective appliances are adequate.

Resolved, that the order of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted on condition that a tank be installed not less than 10 ft. above the grade of the roof; the capacity of the tank to be not less than 2,000 gallons; the system in all other respects to be completely in accordance with the rules for existing standpipe equipment, and on further condition that the building be not increased in height or area and that the occupancy and use remain substantially unchanged.

290-28-A.

APPELLANT—Joseph J. Furman, for Penn Arcade Realty Corp., lessee.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—146-150 West 34th street and 141-153 West 33rd street, Manhattan.

APPEARANCES—

For Appellant: Herman E. Horwood.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon

Negative 5
Absent 0

THE RESOLUTION—

(290-28-A)

WHEREAS, Joseph J. Furman, for Penn Arcade Realty Corp., lessee, filed, March 31, 1928, an appeal from an order of the fire commissioner, affecting premises 146-150 West 34th street and 141-153 West 33rd street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated January 25, 1928, reads:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure. Each outlet to be provided with sufficient feet of 2½ inch standard hose attached thereto."

and

WHEREAS, the building is non-fireproof, four stories (44 ft.) in height, having a frontage of 60 ft. on West 34th street, 125 ft. on West 33rd street and a depth of 200 ft.; a total area of approximately 19,000 sq. ft. on the first story and approximately 10,000 sq. ft. above the first story; OCCUPIED: 1st story, stores; 2nd story, restaurant, stores and offices, 90 persons; 3rd story, offices, showrooms and tenant factories (embroideries), 100 persons; 4th story, offices, showrooms and tenant factories (embroideries), 100 persons; and

WHEREAS, appellant contends that the building is low in height, faces on two street fronts and is adequately provided with exits and proposes to install an interior fire alarm signal system; to maintain a fire drill and to provide portable fire extinguishers, fire pails, etc., throughout the building; and

WHEREAS, because the layout of the first story from street to street exceeds an area of 10,000 sq. ft., and of the occupancy of the entire plot on first story, the requirements as to standpipe equipment for area and occupancy applies in this case.

MINUTES

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the building shall not be increased in height or area and that the premises shall be equipped throughout with such auxiliary fire fighting equipment as shall be directed by the fire department, so long as conditions as to occupancy and use remain unchanged.

437-28-A.

APPELLANT—Joseph C. Schaeffler, for Borden's Farm Products Co., Inc., owner.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—615-627 West 49th street and 624-628 West 50th street, Manhattan.

APPEARANCES—

For Appellant: None.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon 5

Negative 0

THE RESOLUTION—

(437-28-A)

WHEREAS, Joseph C. Schaeffler, for Borden's Farm Products Co., Inc., owner, filed, May 10, 1928, an appeal from an order of the fire commissioner, affecting premises 615-627 West 49th street and 624-628 West 50th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated October 20, 1927 (Order No. 27617-F), reads:

"Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure.";

and

WHEREAS, the building is fireproof, one, two and three stories (43 ft.) in height, 55 ft. 8 in. frontage on Twelfth avenue, 300 ft. frontage on West 50th street, extending 200 ft. 10 in. through the block with a frontage of 150 ft. on West 49th street, about 35,000 sq. ft. in area at first story, 25,000 sq. ft. in area at second story and 7,800 sq. ft. in area at third story; OCCUPIED: cellar, boiler room; 1st story, wagon storage, 50 persons; 2nd story, office and stable, 105 persons; 3rd story, storage of baled hay and oats; and

WHEREAS, the appellant claims that a four-inch horizontal wet line has been constructed along the ceiling of first story, fed from two street mains, with eleven 1½-inch hose outlets covering the first story floor area; there are also nine ¾-inch hose outlets on second story; that an approved automatic sprinkler system has been installed on the third story; that the fire hazard in stable on second story has been reduced to a minimum by using peat moss for bedding; furthermore, the appellant contends that the present fire extinguishing systems provide a more certain protection than a vertical standpipe system; and

WHEREAS, the premises opens on three street fronts and has auxiliary sub-standard fire extinguishing equipment.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the building be not increased in height or area; that the third story used as storage occupancy shall be equipped with a sprinkler system and that the existing standpipe service shall be maintained, and so long as conditions as to occupancy and use remain unchanged in single tenancy and operation.

552-28-A.

APPELLANT—Croker Natl. Fire Prev. Eng. Co., for Goodwin & Goodwin, lessees.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—880-890 Columbus avenue, Manhattan.

APPEARANCES—

For Appellant: Herman E. Horwood.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon 5

Negative 0

Absent 0

THE RESOLUTION—

(552-28-A)

WHEREAS, Croker National Fire Prevention Engineering Co., for Goodwin & Goodwin, Inc., lessee, filed, June 21, 1928, an appeal from an order of the fire commissioner, affecting premises 880-890 Columbus avenue, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated December 27, 1927, reads:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure. Each outlet to be provided with sufficient feet of 2½ inch standard hose attached thereto.";

and

WHEREAS, the building is non-fireproof, three stories and basement (40 ft. 6 in. above grade) in height, 151 ft. 10 in. by 109 ft., irregular, in area; separated into two sections by a brick wall which is unpierced on the basement and first stories and having two openings on the second story with a fireproof door on one side of the openings therein; the area of the basement story, south of the fire wall being 4,900 sq. ft.; north of the fire wall being 11,800 sq. ft.; the respective areas of the first and second stories, south of the fire wall, being 3,800 sq. ft.; north of the fire wall, being 8,900 sq. ft.; the third story being 1,400 sq. ft.; OCCUPIED: basement, storage and bowling alley, 5 persons; 1st story, stores, 30 persons; 2nd story, offices, furniture showroom, sign painter and manufacture of artificial flowers, 19 persons; 3rd story, photo studio, 2 persons; and

WHEREAS, appellant proposes to provide, at the openings (on the second story) in the fire wall an automatic self-closing sliding door at one side of opening in addition to the existing fire door, contending that this will constitute two separate buildings under the standpipe rules; contends, further, that the only excess area exists in the basement which has an area of 11,800 sq. ft.; that the boiler room is outside the structure and that the building is amply provided with exits; and

WHEREAS, the premises is subdivided longitudinally by a wall of approved masonry, no single area of which exceeds 10,000 sq. ft., other than the basement story.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that all horizontal openings be equipped with approved fireproof doors, so long as conditions as to occupancy and use remain unchanged and the building be not increased in height or area.

BUILDING ZONE CASES.

45-28-BZ.

APPLICANT—John J. Dunnigan, for Marles Realty Corp., owner.

MINUTES

SUBJECT—Application (re decision of the superintendent of buildings) under section 21 of the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

Absent	0

THE RESOLUTION—

(29-28-BZ)

WHEREAS, Philip Sinnott, for Isidor Dunitz, owner, filed, January 13, 1928, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station; premises 1952-1956 Eastern Parkway Extension, east side, 5 ft. 1½ in. north of Truxton street, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, October 23, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Eastern Parkway Extension, Truxton street and Fulton street are all in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered November 17, 1927 (re App. No. 21328), reads:

"Proposition contrary to the zone resolution, Art. II, Sec. 4 a, 46.

"The installation of a gasoline service station in a business district.";

and

WHEREAS, the premises consist of a plot of ground having a frontage of 49 ft. 3 in. on Eastern Parkway Extension, 39 ft. on Truxton street and a distance of 33 ft. 2½ in. across the easterly rear, upon which it is proposed to erect a small one-story office and to install the necessary tanks and pumps for a gasoline service station; and

WHEREAS, the board deemed that applicant was not entitled to the relief requested on the ground of practical difficulty and unnecessary hardship within the meaning of section 21 of the building zone resolution.

Resolved, that the decision of the superintendent of buildings be and it hereby is affirmed, and that the application be and it hereby is denied.

540-27-BZ.

APPLICANT—F. Matthew Buermann, substituted for Henry J. Nurick, for Abraham Goldinger, owner.

SUBJECT—Application (re decision of the superintendent of buildings) under sections 7(g) and 21 of the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station (previously denied).

PREMISES AFFECTED—725-727 Bedford avenue, Brooklyn.

APPEARANCES—

For Applicant: F. Matthew Buermann.

THE RESOLUTION—

(540-27-BZ)

WHEREAS, F. Matthew Buermann, substituted for Henry J. Nurick, for Abraham Goldinger, owner, filed, May 16, 1927, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station; premises 725-727 Bedford avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, October 23, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Bedford avenue is in a business district, and Flushing avenue and Spencer street are in an unrestricted district; and

WHEREAS, the decision of the superintendent of buildings, rendered May 5, 1927 (re App. No. 7762-27), reads:

"Proposed gasoline station to be located in a business use district is contrary to Art. II, 84 (a) of the Zone Resolution.";

and

WHEREAS, it is proposed to erect an office, bury storage tanks and erect pumps on the premises for the purpose of conducting a gasoline service station within a business district; and

WHEREAS, the applicant has filed 77 per cent of consents of affected property owners and is precluded from obtaining over 80 per cent because of the refusal of owners of similar competitive property within the affected area to give consent, and the board deems that it would, under the circumstances, be an unnecessary hardship within the meaning of section 21 of the building zone resolution to deny the application.

Resolved, that the board of standards and appeals does

MINUTES

hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that there shall be erected on the southerly and easterly property line a wall of approved masonry finished on the interior or exposed side with light-colored face brick, laid out in panel design with rails and styles of dark colored enameled brick, said wall to be coped with architectural terra cotta, natural stone or vitrified Spanish tile in shingle design; that there shall be erected on the building line concrete coping not less than 12 in. above grade, except for driveways; that the structure proposed for the shelter of the patrons and use and service of the premises shall not exceed in height one story above grade, shall be approximately 15 ft. by 20 ft., and shall be finished on the exterior with light colored enamel face brick with dark brick trimming, roofed with vitrified shingle or Spanish tile; that there shall be not more than one driveway, not exceeding a width of 10 ft., on the Flushing avenue frontage and not more than two driveways on the Bedford avenue frontage; that there shall be no crankcase service and no grease pits or racks; that the operation and conduct of this service station shall be restricted within the property lines; that all necessary permits shall be obtained within six months and the work involved completed within one year from the date of this action.

240-28-BZ.

APPLICANT—McCooey & Conroy, for Geraldine Norton, owner.

SUBJECT—Application (re decision of the superintendent of buildings) under sections 7a and 21 of the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station.

THE RESOLUTION—

(240-28-BZ)

WHEREAS, McCooey & Conroy, for Geraldine Norton, owner, filed, March 20, 1928, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station; premises 3502 Far Rockaway boulevard, 301 Beach 35th street and 3501 Amstel boulevard, Edgemere, Borough of Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, October 23, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Far Rockaway boulevard, north side, is in a business district; Far Rockaway boulevard, south side, is in an unrestricted district; Amstel boulevard is in a business district, and Beach 35th street, north of Amstel boulevard, is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered March 13, 1928 (re N. B. 1714-28), reads:

"Contrary to the Zone Law. Gasoline service station not permitted in a business district."

and

WHEREAS, the premises consist of a plot of ground having a frontage of 115.32 ft. on Amstel boulevard, 32.62 ft. on Beach 35th street and 128.96 ft. on Far Rockaway boulevard, upon which it is proposed to erect a one-story office, 20 ft. by 17 ft. 6 in. in area, and to install the necessary tanks and pumps for a gasoline service station; and

WHEREAS, the applicant filed substantial consents of property owners immediately affected in support of his application and the board deemed that denial of the application would be an unnecessary hardship within the meaning of section 21 of the building zone resolution.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that there shall be built along the westerly property line a wall of approved masonry, finished on the inside or exposed surface with white enamel brick, trimmed with dark-colored enamel brick laid out in panel design, coped with architectural terra cotta or natural stone coping; that there shall be erected along the building line on the three street fronts a concrete curbing, not less than 12 in. in height, with not more than two driveways from Amstel boulevard and Far Rockaway boulevard; that the building proposed for the shelter and use of the patrons and operators shall not exceed in height one story above grade and shall be of octagonal or rectangular plan, finished on the exterior with white enamel face brick, with dark colored enamel brick trimming, roofed with Spanish tile, all substantially in accordance with the design presented on this appeal; that any advertising display on the premises shall be restricted to a panel frieze on the front of the building and along the wall at the westerly property line and to the glass globes of the gasoline pumps; that the operation and service of these pumps shall be restricted to and conducted wholly within the property line; that there shall be no crankcase or grease service racks or pits established or maintained on the premises; that all necessary permits shall be obtained within six months and the work involved completed within one year from the date of this action.

452-24-BZ.

APPLICANT—Thomas J. McGlone, for B. Salazzo, owner.
